TIER III REVIEW **FYE 6/30/10**

EXECUTIVE SUMMARY

Key Financial Data

Overall Financial Condition	Critical
General Fund Cash and Investments	$15,064
Unrestricted GF Fund Balance	($14,621,546)
General Fund Quick Ratio	0.3:1
Total Government LT Debt / Net Assets	0.5:1

Background

A Tier III Review was completed following a Tier II recommendation in addition to other concerns noted from review of the City's 2010 audit report:

- Reporting an unrestricted general fund deficit of $14.6 million,
- Reporting interfund payables of $18 million for negative equity in pooled cash,
- Reporting a net pension obligation of $8.9 million,
- Court ordered judgment levy of 8.3 million was entered subsequent to year end,
- Not filing its Single Audit report with the Department of Treasury on a timely basis, and
- Not complying with a Water Fund bond covenant.

The City submitted a deficit elimination plan to the Department of Treasury in May 2011 which is presently under review. The proposed plan includes issuance of $20 million in Fiscal Stabilization Bonds in order to

eliminate the General Fund deficit in FYE 2013.

Background (continued)

In January 2011, the Flint Journal reported that the City Council approved a resolution to request the State Administrative Board approve issuance of $20 million of Fiscal Stabilization Bonds. The Department of Treasury approved issuance of $8 million in bonds in March 2011 and agreed to reconsider an additional $12 million in 2013.

In July 2011, the Flint Journal reported that the federal government suspended the City's two energy grants as a result of an investigation into its stimulus-funded energy grant programs dating back to April 2009. The Mayor cited possible problems with compliance and allowable costs as the reason for the federal government's action.

The City's 2010 Single Audit has not been filed with the Department of Treasury. The City's 2009 Single Audit was qualified by Plante Moran due to non-compliance with the suspension and disbarment compliance provisions applicable to its CDBG. Management responded by indicating that it had implemented corrective actions to eliminate this deficiency.

Operating Results

The City's General Fund has incurred cumulative operating deficits of $21 million since 2007 which has resulted in its unrestricted fund balance decreasing from a surplus of $6.4 million at FYE 2007 to a deficit of $14.6 million at FYE 2010. The losses have been reduced by the City's decision in 2009 to begin transferring $3 million of equity from its Water and Sewer funds each year. The primary reason for the decrease in fund balance is attribuatable to the loss of revenues due to the economy and City officials inability to adjust its cost structure appropriately.

The City's website reports preliminary results for its 2011 fiscal year end. The preliminary results indicate the City's General Fund will report an operating surplus of $4 million which does not appear to include $1.4 million of transfers to other funds, as proposed in its DEP and which was a part of the approval to issue Fiscal Stabiliazation Bonds. The operating surplus includes $8 million of revenue related to the Fiscal Stabilization Bonds and $3 million of transfers from the Water and Sewer funds.

The City's website reports that a $49.9 million budget was approved for the General Fund for fiscal year 2012. Budgeted revenues include $3 million in transfers from the Water and Sewer funds. Expenditures were budgeted to decrease approximately $9 million from FYE 2011. The decrease in expenditures appears to be primaily related to cuts in public safety costs, specifically the police department. Police department expenditures are budgeted to be $15.1 million in FYE 2012 which is 50% of the cost incurred in FYE 2008. Total police department expenditures were $31.5 million in FYE 2008 and $24.7 million in FYE 2010.

In 2009, the City appears to have made the decision to make annual transfers totaling $3 million from its Water and Sewer funds to assist the General Fund, and has facrtored continuing transfers from these fund into its Gneral Fund's DEP. The Water Fund had an unrestricted deficit of $5.8 million and the Sewer Fund had unrestricted Net Assets of $9.3 million at FYE 2010.

The City's sewer fund has incurred a significant decrease in net assets since 2006. The fund has incurred a cumlative net decrease in net assets of $47.9 million over this period ($28.6 million net of depreciation). The decrease in net assets includes $4 million transferred to the General Fund and a net amount of $13 million charged for the settlement of a sewer back claim with residents.

Serious Deficiencies Noted in Audit Report

- Material year end adjustments to the OPEB liability and to transfer delinquent water and sewer receivables to the tax rolls, and

- Non-compliance with the suspension and disbarment provisions of the CDBG.

Other Significant Issues

- Federal investigation and suspension energies grants.

- City has not filed its Single Audit report with the Department of Treasury.

- The City failed to comply with a water bond covenant which requires water rates to equal at least

125% of the principal and interest on the bonds, plus any other legal requirements.

- Moody's rated a 2010 revenue bond issue by Hurley Medical Facility Ba1.

Conclusion

The City's overall financial condition is very good. The primary issue identified as part of this review are the deficiencies noted in the City's Single Audit and its controls over federal grant programs.

The City's controls over administration of its federal grant programs deteriorated in FYE 2010 as compared to 2009. Plante Moran qualified its opinion on the 2010 Single Audit due to the City's non-compliance with OMB Circular A-133 and cited a total of 15 significant and material deficiencies in its internal control over grant programs.

Based on the number and seriousness of the deficiencies noted by its CPA firm, it appears as though the City has little, if any, procedures and controls in place to properly administer and comply with the requirements of OMB Circular A-133.

Recommendations

- Insist that the City file its FYE 2010 Single Audit with the department of treasury,

- Consider requiring the City to provide a detailed corrective action plan that requires installation of procedures insuring compliance with OMB Circular A-133.

- Consider performing an Internal Control Review of the City's procedures over federal award programs.

Flint, Michigan 48502

Jacqueline Poplar, President
Flint City Council
1101 South Saginaw Street
Flint, Michigan 48502

The purpose of this letter is to notify you that the Department of Treasury will commence a preliminary review of the financial condition of the City of Flint pursuant to Public Act 4 of 2011, the Local Government and School District Fiscal Accountability Act.[1] The Department intends to commence the preliminary review on Monday August 29, 2011.

Section 12(1) of the Act authorizes this Department to commence a preliminary review if one, or more, of the enumerated conditions occur. To date, the conditions contained in subdivisions (j), (m), (o) and (r) have occurred within the City. [2]

---

[1] Section 12(2) of the Act provides as follows:

> If the state financial authority [State Treasurer] determines that a preliminary review is appropriate under this section, before commencing the preliminary review the state financial authority shall give the local government specific written notification of the review. The preliminary review shall be completed within 30 days following its commencement. Elected and appointed officials of a local government shall promptly and fully provide the assistance and information requested by the state financial authority for that local government in conducting the preliminary review.

[2] Subdivision (j) provides that "[t]he local government has violated a requirement of sections 17 to 20 of the uniform budgeting and accounting act, 1968 PA 2, MCL 141.437 to 141.440." Subdivision (m) provides that "[a] local government is in breach of its obligations under a deficit elimination plan or an agreement entered into pursuant to a deficit elimination plan." Subdivision (o) provides that "[a] municipal government has ended a fiscal year in a deficit condition as defined in section 21 of the Glenn Steil state revenue sharing act of 1971, 1971 PA 140, MCL 141.921, or has failed to comply with the requirements of that section for filing or instituting a financial plan to correct the deficit condition." Subdivision (r) provides that a preliminary review may be commenced due to "[t]he existence of other facts or circumstances that in the state treasurer's sole discretion for a municipal government are indicative of municipal financial stress, or, that in the superintendent of public instruction's sole discretion for a school district are indicative of school district financial stress."

In respect to subdivision (r), I note the confluence of several interrelated factors. Notably, City officials were authorized to issue $8.0 million in fiscal stabilization bonds in February. At that time, City officials indicated that the foregoing amount would be sufficient to keep the City in a positive cash position for approximately 24 months. However, a recently prepared cash flow analysis indicates the City may have insufficient cash to pay current obligations in a much shorter period.

Additionally, several steps City officials committed to take to reduce the City's financial stress and to address recurring structural operating deficits, such as securing labor concessions, have not been implemented. Accordingly, you are receiving this notice of our planned preliminary review.

I trust that this information will be of assistance. If I may be of further assistance, let me know.

Sincerely,

Andy Dillon
State Treasurer

Flint Water/KWA Decision Points and Timeline

In November 2012, all major stakeholders (city officials, EM Kurtz, county officials, DWSD, DEQ & Treasury) met to discuss a regional effort to build a new water pipeline from Lake Huron to Genesee County.

Flint and Genesee Co. had been getting water from DWSD under a 30-year contract that, at that time had expired.

Genesee Co. was planning to build a new pipeline from Lake Huron (Karegnondi Water Authority, KWA) and eventually provide service to the City of Lapeer, Lapeer County, and Sanilac County.

County officials believed that continuing to buy water from DWSD would cost the region more than $2.1 billion over the next 25 years but that building a pipeline and developing the KWA would reduce regional cost by approximately $200 million over that time.

Genesee County officials said it was cheaper to build their own system than to continue to pay more each year to the DWSD and the proposal was about delivering the best quality water to residents in the least expensive way.

EM Ed Kurtz had been exploring options for water since his appointment in August 2012 (to replace Mike Brown).

Mayor Walling and City Council were fully supportive of the move to KWA, though under the emergency manager Act, the State Treasurer had to approve deals >$50,000.

Prior to the meeting, Treasury suggested a high-level response to media inquiries about the meeting:

Treasury officials will be meeting with Genesee County and Detroit officials tomorrow to get the details of the proposed pipeline plan. Until the ultimate costs

are known and the various studies have been conducted, the benefits to the citizens of Flint and Genesee County cannot be determined.

In December of 2012, then State Treasurer Andy Dillon requested an independent review of the KWA proposal. Consulting engineers Tucker, Young, Jackson, and Tull, Inc. conducted a review that supported the County and City preference to join KWA (I'M AWAITING A COPY OF THIS REPORT TO ENSURE ACCURACY ON THIS POINT).

In March of 2013, the City was pushing for a decision, given the need to hit tight construction season timelines/deadlines.

In late March, Kurtz submitted a resolution to join KWA to the State Treasurer. It was received on March 29, 2013. The Treasurer and DEQ staff thoroughly reviewed the resolution (Under PA 436, the Treasurer must approve contracts >$50K that were not competitively bid).

DWSD was allowed an opportunity to make a "last, best offer" to keep Flint with the DWSD.

On April 11, 2013, the Treasurer sent his approval to Flint (attached). The effective date for the approval was April 16, 2013 as a condition of the approval was Mr. Kurtz's consideration of the final DWSD offer.

On April 16, 2013, Flint EM Kurtz sent a letter to the State Treasurer, indicating that the DWSD last best offer was not sufficient (attached).

Following Mr. Kurtz announcement of the City's decision to join KWA, Treasury worked from the following talking points.

- This is a decision made by the City of Flint and its elected leaders and is a local decision that affects the local water supply.
- Flint EM Ed Kurtz kept the city's elected officials involved throughout the decision-making process and all agree this is best for the citizens and businesses in Flint.
- The change is expected to save Flint ~$100m over the next 25 years, and possibly as much as $300m.
- The Departments of Treasury and Environmental Quality have approved the financial and environmental soundness of KWA's plan.
- Flint accounts for only 2% of DWSD's capacity.

City of Flint, Michigan

BUDGET

for Fiscal Year 2012-2013

Michael K. Brown, Emergency Manager

City of Flint
FY13 Budget

It is well known that the City of Flint is confronted with a financial emergency. It has been in state receivership since November 2011. The City is projected to have more than an $18 million deficit by June 30, 2012. Cash flow is extremely narrow, and any major unexpected expense or revenue loss at this time could be catastrophic.

The Emergency Manager is committed to seeing Flint not only return to financial solvency, but become the thriving municipality it once was, attracting residents, businesses, and visitors.

The challenge is great – financial insolvency; a population base reduced by 50%; declining property values; high numbers of vacant houses and persons in poverty, crumbling infrastructure, and high crime.

The first step to recovery is to stabilize the City's finances, in order to provide basic services to our citizens. With a focus on a next year's budget that is realistically balanced on attainable revenue estimates, and with assistance from the state to address the accumulated deficits from past years, our journey into the future can begin.

It will not be easy. The current level of expenses for city services significantly exceeds the current amount of revenues which will be received, and choices for new revenues are limited. Consequently, while efforts continue to identify new sources of revenue, current services and workforce will be reduced significantly. Where new sources of revenue are found and implemented, it will mean increased costs to taxpayers. There is no other choice – expenses must be reduced, revenues must be increased, or a combination of both must occur.

This budget is based on conservative assumptions regarding revenues and expenses. If there is uncertainty about a revenue stream, it is not included. When projecting expense items over which the City has little direct control, they have been projected on the high side. The result can be characterized as a "worst case" budget. However, since the budget is a flexible plan, new developments –such as additional revenue sources – can be added if and when they become available.

.

THE FY13 BUDGET

The FY13 Budget for the City of Flint totals $195 million for all funds, including $58 million for the General Fund plus Special Revenue Funds, Capital Improvement and Enterprise Funds. It provides for a workforce of 539 employees. The amount of funds available, and the size of the workforce afforded by those revenues, are significantly less than in the current and prior years.

As this budget process began, there was a projected gap of some $25 million between the amount of funds projected to be received and the cost of continuing all services and positions in the same manner as currently done. This gap has been closed by a mixture of revenue increases and expenditure decreases.

REVENUES

City services are funded by a mix of property taxes, income taxes, state and federal shared revenues, and fees, charges, and assessments. The current property tax rate for city services is 15.5 mills, or $15.50 for each $1,000 of taxable value. Residents and businesses also pay a 1% income tax, while non-residents pay one-half that amount, the limit set by state law.

The revenue stream supporting city services in this budget is different from the current year's in some significant ways:

- With property values continuing to decrease, property tax revenues are decreased by more than 20%. These revenues are decreased even further as the 3 mill levy for waste collection is eliminated in favor of a new waste collection fee designed to cover the entire cost of that service.

- State shared revenue remains at the reduced level legislated by the state beginning in FY12.

- Revenues from some major grant sources – the SAFER grant for firefighters and the MOTT grant for community policing – are not included, as there is no certainty those funds will be received.

- Revenues from a new city-wide special assessment will reduce the cost burden on the City's General Fund while providing funding for the operation, maintenance, and improvement of the City's street lighting system.

- Additionally, it is necessary to increase water and sewer rates significantly in order to have sufficient funds to operate the system. A system capable of serving more than 200,000 users is now utilized by less than half that number. The systems are old, in need of repair, and costly to maintain. Costs from the primary supply source - the Detroit Water System – have also increased significantly over the past several years. While there have been significant increases in rates over the past few years, they have not been sufficient to cover the operating costs of the systems. While there are currently significant and positive efforts being made to make the systems more efficient and cost effective, they will not affect the cost of operating the systems this year.

The impact of these changes in the revenue stream will vary on taxpayers, businesses and residents. Compared to the current year, many taxpayers will see an increase in their total payments for city services, with the amount varying to the extent that their property values have reduced.

However, when compared to total payments for city services made in 2005 – before the precipitous drop in property values began - many taxpayers will still be paying less. It appears that owners of property with a taxable value of more than $53,450 in 2005 will still pay less for city services in FY13 than they paid in FY2005. Property owners with a taxable value of less than $53,450 in 2005, however, will pay more for city services in FY13 than they paid even in FY2005.

Unfortunately, with the tools at hand for raising revenues at this time, it is not possible to spread the impact differently. Alternatives such as raising the property tax millage or the income tax rate require voter approval and, in the case of the income tax, state legislative approval as well. However, these alternatives are being evaluated for future use.

EXPENSES

The revenues collected pursuant to this budget will be used to provide a very basic level of services in the areas traditionally provided by the City. Police and fire protection and other public safety services, water and sewer service, trash collection, street maintenance and lighting, parks maintenance, building inspection, code compliance, demolition and other community development activities, will all be continued, although in different ways and at reduced levels. Citizens can expect that response times for certain services or requests for information will be slowed.

The City's workforce will be reduced by more than 20% and, unfortunately, layoffs will occur. The extent of these reductions has been lessened significantly with concessions obtained from employee bargaining units.

Reductions equivalent to 20% of the wage base have been negotiated with three of the six city bargaining units (IAFF, FPOA Sgts, and FPOA Command), and a final vote on similar concessions with AFSCME 1799 is pending. Concession discussions with AFSCME 1600 and FPOA Patrol continue, but no agreements have been achieved. This budget assumes implementation of similar concessions across all bargaining units and exempt employees.

Similarly, reductions in the cost of retiree health care are also anticipated. The cost for the City's 1,500 retirees is projected at nearly $25 million for FY13, an amount which severely constrains the ability of the City to provide services to its residents. The City has determined that there are alternative means by which health care can be provided to retirees but at a significantly reduced cost. The City intends to implement the less costly alternative and has incorporated more than $4 million in anticipated cost reductions savings into this budget. Without such cost reductions, the City's workforce will be reduced even further.

Within the context of these revenue constraints and overall expense reductions, a very basic level of services will be provided to the residents and businesses in Flint in 2013:

PUBLIC SAFETY

Police – With the continued loss of tax and grant revenue, the Police Department will be minimally staffed at a level of 108 sworn officers and 21 non-sworn personnel. This represents the current level of staffing less 19 officers funded by grants which have expired. Requests for continuation funding are in process but have not been approved at this time.

Given the financial condition of the City, funding at this level represents a significant commitment to pubic safety, but it is recognized that more must be done. In the ensuing year, the department will be transitioning to 12 hour shifts. This transition will reduce overtime expenses

and should increase the number of officers on patrol at any one time. The efforts of the FPD will continue to be assisted with continuing support from the Michigan State Police, and contracted services from Hurley Hospital and Kettering University. Aggressive efforts will be made to seek the renewal of grants and to seek additional permanent funding for this essential service.

911 - 911 Dispatch will continue at current staffing, while efforts continue to consolidate City and County dispatch operations. Communications with and between officers will be enhanced with the projected move to the 800 MHz system on July 1, 2012.

Fire - With the expiration of the federal SAFER grant, funding for 39 firefighters would be lost, potentially reducing total staffing in the Fire Department to 54. However, with the reductions in costs attributable to union concessions, and an assessment of the impact this would have on the ability of the City to provide virtually any level of fire response, staffing in this budget is at 62.

Given the staffing constraints, three of the current five stations will remain open pending the decision on the SAFER grant. In addition, with Genesee County now providing paramedic response, the City's paramedic personnel will be assigned to suppression.

The City is aggressively pursuing renewal of the SAFER grant and, should it be received, the number of stations in operation could be increased.

Court - As required by law, the City will continue to financially support the operation of the 68th District Court. Recognizing the financial circumstances of the City, along with the court's decreased caseload and offsetting revenues, court funding is reduced in this budget.

Lock-up – The City has been aggressively working to receive funding from the State of Michigan for re-opening the City Lock-up. At this time an operational plan is being developed as a condition for receiving consideration for funding. There are no City funds allocated in this budget for operation of the Lock-Up.

INFRASTRUCTURE

Water and Sewer - The expenses of the Water and Sewer system can be viewed in three categories – operations and maintenance, capital improvements, and purchase of water. Operational costs, in terms of personnel, have been reduced to the minimum necessary to operate the collection and distribution systems, but ongoing increases in compensation-related costs, such as pension and healthcare, make significant dollar reductions difficult.

Ongoing capital expenses are a necessity, as significant repair and replacement activities such as replacing broken water meters and keeping pump stations operational and in regulatory compliance, are necessary on an ongoing basis. Improvements are also necessary to improve the efficiency of operations, such as implementing remote monitoring of pump stations.

Finally, the purchase of water at ever-increasing rates is a significant cost of the operations, and while efforts to contain these costs are ongoing, they will not likely affect the cost of operations in FY13.

The costs of operations for water and sewer are projected at $85 million, with projected revenues at current rates totaling approximately $65 million. Recent rate increases do not generate sufficient revenues to cover the total costs of operations. Thus, in order to keep the systems financially solvent and provide funds for operation and maintenance, the overall rates for water and sewer will be increased in total by an average of 25%. Sewer rates are projected to increase by 45% while water rates are projected to increase by 12.5%. Even with this increase, it is not possible to set aside funds for pre-funding retiree health care, so formal balance sheets will still show deficits.

Waste Collection – The City has historically provided weekly trash pick-up for all residents, with the costs presumably paid from a special 3 mill property tax levy. However, the amount collected from the levy has reduced as property values have fallen, and costs of collection – personnel costs being a significant portion - have increased. As a result, the City's General Fund has subsidized the difference, by as much as $1.5 million in the past year.

Consequently, the 3 mill levy for waste collection will be discontinued, and a collection fee on residential properties will be implemented. It is anticipated that in the first year (starting July 1, 2012) the waste collection process will continue on a weekly pick-up schedule and will include composting. Fall leaf pick up will be restored. In the second year, it is expected that the waste collection service will be expanded to include recycling, and by that time a thorough evaluation of the means by which the service is carried out will be completed.

The fee for this service will be added to the property tax bill for owners of residential property, and is currently projected to be $143 in FY13, based on the projected cost of the service as reflected in the budget and the number of property owners billed. The amount will be adjusted on an annual basis to assure that it is reflecting the cost of the service.

Streets and Transportation – Funding for streets and transportation activities – with the notable exception of street lighting – is provided primarily from the state collected gas and weight tax allocated by formula to the City. That amount has been decreasing over the past years, making the ability to maintain local and major streets, sidewalks, and traffic control mechanisms very difficult. As with sewer and water, the City's road system is built to accommodate more than 200,000, and the City's population is now 102,000. This population drop has also contributed to the City's reduced level of gas and weight tax. As a result, the City's road system is currently rated a "3" on a scale of 1-10, demonstrating the effect of the lack of maintenance. The road maintenance activities for FY13 are focused primarily on preventive maintenance rather than targeted resurfacing, and will be chosen on the basis of most critical need and best return on investment.

Financing of infrastructure in the FY13 budget and beyond will be aided by use of a special assessment for street lighting, which is currently a general fund cost of nearly $3 million. The implementation of a city-wide special assessment district will provide for the operational costs of the current system and will enable upgrades and improvements to street lighting throughout the City. The assessment will be added to the property tax bill for all property owners, and is currently projected to be less than $100 per property in FY13. The amount to be assessed will be adjusted annually to reflect the projected cost for the operational, maintenance and improvement costs, and the number of property owners.

Parks - Maintenance of the City's 64 parks and its many trees in the rights of way will be funded primarily from the .5 mill special parks millage. Maintenance of the City-owned recreation/ community centers are also supported by the General Fund. Maintenance of parks, including play equipment, rights of way, and trees is minimal, and consists primarily of mowing, paying utilities, and responding to emergencies. There has not been any significant investment or maintenance of play structures in the parks for several years. Unfortunately, this level of investment will at best continue with the funds provided in this budget. Efforts will continue, as they have this year with golf courses, to find alternative ways to sustain the City's recreational assets. Continuing efforts will also be made to engage volunteers, neighborhood groups, and others to support specific parks and recreation centers.

Development - Building Inspection and Code Compliance activities will continue to the extent funds are available. Grant funds are budgeted at a reduced level to continue demolition activities and building inspection and code compliance fees are being reviewed again to see if the level and type of fees and fines are sufficient to cover costs and encourage voluntary compliance. In FY13, demolition activities will be done primarily by contractors in order that full cost recovery can be obtained from grant funds.

Planning and zoning activities will continue to the extent funds are available. Grant funds are budgeted to continue the upgrade to the City's master plan.

Community and Economic Development – Minimal ongoing financial support of economic development, in the form of CDBG funds, is also continued. Administration of the City's CDBG and NSP programs will continue, although grant funds are reduced. Evaluation of the administrative structure has resulted in reduced costs to the General Fund.

FINANCE AND ADMINISTRATION

All organizations have internal functions which support the delivery of services to the organization's constituency. In the City of Flint, these functions include assessing, accounting and budgeting, human resources, purchasing, information technology, risk management, fleet, facilities, treasury, and tax collections. Some of these functions are scalable to the size of the organization (such as human resources and risk management); others are not (such as tax billing and assessing). Regardless, with a decreasing base of business, and a corresponding reduction in workforce delivering services externally, there is compelling pressure to reevaluate processes and workforce numbers involved in all of these processes.

Changes are reflected in the size of the workforce appropriate to the current financial situation. It is also necessary to change internal processes to reflect an organization closer in size to 500 employees rather than 1,500. Changes beginning or planned include:

- Streamlined purchasing processes, including use of procurement cards for smaller purchases
- Simplification of processes for approving purchases
- Use of electronic means for processing payables and purchase orders
- Elimination of staffed stock rooms

- Changes in pension system administration and performance
- More reliance on Third Party Administration for workers' compensation related activities
- Elimination of manned security cameras where appropriate
- Evaluation of costs associated with custodial services
- More reliance on computer access for customer inquiries
- Consolidation of customer service functions
- More investment in technology to enhance productivity
- Commitment to funding necessary capital improvements which provide the workforce with proper equipment and facilities
- Implementation of a performance measurement system
- Commitment to rebuilding financial reserves by annual appropriation to a Budget Stabilization Fund

PUBLIC IMPROVEMENT FUND

The City Charter requires setting aside the proceeds of a 2.5 mill levy for the purposes of capital improvements and debt service. For the foreseeable future, these funds will be dedicated solely to current and anticipated debt service. A significant increase is expected as the City recognizes the need to increase its share of debt service for the downtown parking ramp debt, for making its required debt service of the initial Fiscal Stabilization Bonds, and for incurring future debt associated with additional bonding to alleviate the accumulated General Fund deficit. For FY13, it is projected that approximately $1 million will be available for the new debt service associated with additional Fiscal Stabilization bonds; in FY14 the amount available for debt service is projected to grow to approximately $1.5 million as current debt service for equipment ends.

GOVERNANCE AND OVERSIGHT

Core offices associated with governance and oversight traditionally include Council, Mayor, Administrator, City Attorney, City Clerk, Ombudsman, and Civil Service. Under receivership, there is also an Emergency Manager.

Several changes resulting in cost reductions were implemented by the Emergency Manager. These include: a reduction in salaries for the Council and Mayor, elimination of funding for the Ombudsman and Civil Service Commission, and the appointment of personnel to assist, either paid only on an hourly basis without fringe benefits, or loaned from another source. These cost reductions are continued in the FY13 budget.
Additionally, the costs of issuing business permits through the City Clerk's Office indicate that the costs of administration appear to significantly exceed the revenues collected. It will be necessary in the future to either reduce costs or increase permit fees to offset this imbalance.

CONCLUSION

The financial decisions made in this budget are significant but unavoidable. The budget reflects difficult decisions on the part of administrators and employees made to enable the City to provide services in FY13 at the levels its resources allow. The service levels will be low and not at a level anyone finds acceptable over the long term.

These decisions, however, provide the basis for going forward in a positive way. The budget is realistically balanced, with full expectation that when June 30, 2013 arrives, the City will not have once again spent more than it has taken in. It will have also put into place the financing to address the accumulated deficits of the past. Significant progress is being made to achieve financial solvency.

While there will certainly be financial challenges, decisions made in this process will assist in going forward. The decisions regarding employee compensation not only helped to address the short term financial challenge, but will assist in controlling expenses in the future, as the growth in future unfunded liabilities is slowed.

If the City government of Flint is to be a positive force in making Flint a safe and attractive place for residents, businesses, and visitors, it must have its own house in order. It cannot teeter on the edge of financial insolvency and hope to lead the way.

BUILDING THE FUTURE

The focus of the 2013 budget process remains on the future of Flint. While this budget includes sharp reductions in both revenues and expenses, WE SEE HOPE FOR THE FUTURE.

These hopes are based on some very tangible and promising factors:

- Expense reductions are designed to live with current realistic revenue projections;
- New revenue options for fiscal year 2014 and beyond will include actual fees for services, special assessment districts and other revenue options;
- Partnership with the State Police and other law enforcement agencies will be expanded to create a safer environment for our citizens;
- Additional resources will be secured to house individuals who are continually abusing our residents in the neighborhoods; the City Lock-up will open and remain open;
- New public and private partnerships will be developed to provide waste collection services, senior citizen services, youth employment and training programs;
- Internal City operations will be improved in regard to finance and accounting, more efficient operation of licensing and permitting, and expanded training for our employees, including supervisory training;
- The City's information and technology capability will be improved, enhancing the capacity throughout the City, from paying bills on time to public safety issues faced by our police and fire operations.

As the City moves beyond the 2013 budget year, and the management of our affairs improves, citizens will see better response times from police, removal of individuals who are harming our children and seniors from our neighborhoods, improved code enforcement at homes owned by absentee landlords and expanded opportunities for our young people.

Staffing in the FY13 Budget

As of April, 2012, the City of Flint has 686 permanent full-time employees. In this budget, that number will be 539, a reduction of 147 employees. Reductions are virtually in every area of city service. The distribution of positions for FY13 will be as follows:

Governance (including the offices of Mayor, Council, Clerk, Emergency Manager, City Attorney, and Human Relations Commission) – Permanent full-time staffing will be 18, a reduction of 3 from the current 21.

Public Safety (including District Court, Police, Fire, and 911) – Permanent full-time staffing will be 245, a reduction of 55 from the current 300. The reductions are exclusively related to the loss of grant funding for police officers and fire fighters.

Infrastructure (including Water and Sewer operations, Waste Collection, Street Maintenance and Engineering, Parks, Development, DCED, Facilities, and Fleet) – Permanent full-time staffing will be 222, a reduction of 54 from the current 275.

Finance and Administration (including Finance, Treasury, Purchasing, Assessing, Information Services, Human Resources, and Risk Management) – Permanent full-time staffing will be 54, a reduction of 36 from the current 90.

ESTIMATED IMPACT OF FINANCING CHANGES

The FY13 Budget contains changes in the financing of city services.

The overall property tax levy for city services is reduced by 3 mills as the levy for trash pick up is removed. However, there is a new fee implemented for trash pick-up which will reflect the actual cost of the service.

There is also a special assessment district covering the entire city which will assess the costs of maintaining and improving street lighting throughout the City

Additionally, water and sewer rates are increased in order that the systems remain financially solvent.

In the upcoming tax year, most property owners will pay more in total for property taxes, street lighting, trash pick-up and water and sewer charges than they paid in 2011.

However, property owners whose property had a taxable value of more than $53,450 in 2005 will pay less in the upcoming year than they paid in 2005.

Property owners whose property had a taxable value of less than $53,450 in 2005 will pay more in the upcoming year than they paid in 2005

TAX LEVIES, FEES AND CHARGES ON TAX BILL: JULY 2012 - JUNE 2013

Water OPEB Liability	$ (12,092,943)	$ (15,592,943)	$ (19,342,943)
	$ (44,118,659)	$ (47,823,825)	$ (39,481,583)

* *Fiscal Stabilization Bonds Issued in 2011 in the amount of $8 million*
Request has been made as part of the FY11 Deficit Elimination Plan to borrow an additional $9 million in 2012
City also anticipates a final borrowing of up to $10 million in FY13 to address the final portion of the deficit
Assuming the FY13 budget is implemented as planned, the deficit should be eliminated
The Public Improvement Fund is being reserved for debt service for the 3 borrowings, but additional sources of funds - primarily the General Fund - will also be used.

Subject: Flint & DWSD

Amy - another issue I spoke to Mr. Dillon about was the DWSD relationship with Flint & KWA. He was going to think about talking to the Flint EM for us. This is a blog posted today on the subject and the Flint Journal article is hyperlinked.

"The Flint Journal is reporting (here) that Michael Brown, the City of Flint's Emergency Manager, is considering the sale of Flint's water and sewer system. Shaky finances and the need to raise cash are part of the reason Brown is considering "all options."

The sale of Flint's water and sewer system would complicate plans by the Karegnondi Water Authority, which has urged Flint to break ties with the Detroit Water and Sewerage Department. KWA officials recently have been lobbying Flint's Emergency Manager to join the new authority.
No word about who might be interested in buying Flint's water and sewer system or who will foot the bill for the $61.5 million worth of upgrades to Flint's water treatment plant that will be required, according to Rowe Engineering (here and here); KWA would only be furnishing Flint with raw water, not the finished water currently supplied by DWSD."

The full Flint Journal article is found at :
http://www.mlive.com/news/flint/index.ssf/2012/01/water.html .

I would ask Mr. Dillon to arrange a meeting with Mr. Michael Brown and me & DWSD Director Sue Brown. I would be glad to discuss this item with him. Jim

RE: **COMMITMENT TO PURCHASE RAW WATER FROM THE KAREGNONDI WATER AUTHORITY**

This letter serves as a commitment from the City of Flint to purchase 20 MGD of **raw water** from the Karegnondi Water Authority based on the following agreements and understandings contained within this letter.

- ✓ It is understood that the Genesee County Drain Commission will purchase and reserve an additional 5 MGD from the KWA above its needed capacity volume and will make that available to Flint at a later date.

- ✓ It is understood that Flint will be exempt from any payment involved in the final "go/nogo" engineering study that will be performed to determine final costs and details of the Karegnondi project.

- ✓ It is agreed that the City of Flint will have 60 days to review the final engineering report prior to signing the actual KWA master contract.

- ✓ It is understood that the KWA master contract will be amended such that there is no "one-time lump sum payment".

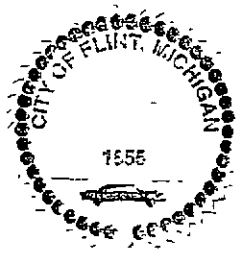
- ✓ It is agreed that the City of Flint will begin monthly payments to the KWA in accordance with the purchase of 20 MGD of raw water from the KWA Authority within 30 days of signing the KWA master contract.

- ✓ It is understood that that the Genesee County Drain Commission will assist the City of Flint with any licensed individuals or technical expertise needed by Flint to complete upgrades to Flints Water Treatment Plant or the operational management and Maintenance of the plant for a length of time to be determined by the City of Flint administration.

- ✓ It is understood that the City of Flint will receive at its treatment plant, "raw water" from KWA **within a 24 month to 36 month timeframe** beginning with the signing of the KWA master contract.

- ✓ * It is understood that all verbal and written agreements by the City of Flint are subject to approval from the State of Michigan prior to becoming factual.

*** Due to the fact that the city of Flint is in State Receivership under Public Act 4, final approval to enter into a contract of more than $50K must be authorized by the State Treasurer.**



CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
MICHAEL K. BROWN

Presentation to State Treasurer
by Michael K. Brown, Emergency Manager
and the Flint Team
February 13, 2012

City Hall
1101 S Saginaw Street - Flint, Michigan 48502
810-766-7346 FAX: 810-766-7218 www.cityofflint.com

Presentation to Treasurer Dillon

Monday, February 13, 2012

Path to Recovery for Flint has begun

I. 45 day plan submitted to Treasurer on January 15, 2012

II. Deficit Elimination Plan being drafted for February 27, 2012

III. Necessary Support from State:

- Fiscal Stabilization Bonds ($13 to $15M range) We are seeking assistance and approval to borrow money.
- 1 year funding for City Lock-up (range $1M depending on who operates the facility.) We need multi-year commitment here but on a declining basis over three years. We are very concerned about liability exposure. If privatization helps with this concern, then it makes sense especially if it is less expensive to operate.
- Labor Counsel support ($200K)
- Support for Organizational Analysis by functional area (utilize state pool of vendors and resources) $TBD (See handout)
- State Police and financial support for hiring FPD officers. There are two parts to this ask. First, we welcome continued assistance of State Police. Second, the Chief estimates need for

50 additional Flint police officers. He believes we can positively impact the crime rate with additional State Police support and the 50 additional officers. ($Estimate for FPD is $4M)

- EVIP implementation support in following areas:

  1. Kerognondi Water Pipeline: We are seeking support through the DWRF with 50% principal forgiveness for this project. In addition, if EVIP dollars are available, we will pursue these grant resources to assist this multi-county and city authority.

  2. Consolidation of 67th and 68th district court (Chief Judge Yuille is taking the lead on this project.) We are unsure of the cost but we are hopeful that state support would be available to assist in the implementation process.

  3. Merger of Genesee County 911 w Flint 911 (includes 800MHZ transition) The cost estimate is in the range of $2M for the 800MHZ issue alone. This is a critical part of the overall Criminal Justice Plan as the present communication technology used by FPD goes silent on Jan. 1, 2013.

  4. Cooperative agreement with County Road Commission on fleet management and facility sharing. These discussions are underway with the Director of the Road Commission. The cost estimate for just the study is in the range of $60K.

  5. Cooperative agreements on various opportunities with Genesee County are in early discussion stage. An example is with County Treasurer on tax collection, investments, assessing and information technology.

Another example is in the Criminal Justice area, where discussions have taken place to add county prosecutors.

6. Cooperative agreement with County Metropolitan planning commission on Master Plan development, as well as general support for planning and zoning functions.

7. Cooperative agreement with Genesee County Land Bank on blight elimination, tax reverted properties and marketing of vacant housing. We have been cooperating on weed abatement for three years due to the high volume of houses and properties owned by the Genesee County Land Bank.

8. Public private partnership with Swedish Bio-Gas, Flint Twp., Genesee County Drain Commissioner and Mott Foundation to shut-down incinerator, manage Waste Water Treatment Plant, develop composting and recycling of waste. This is a project the State of Michigan invested in back in 2009. There is opportunity to expand this public-private partnership.

9. Consolidation and merger of Genesee County and City of Flint Park sites. There are also discussions with the private sector on park maintenance.

10. Cooperative Agreement with County, Genesee Intermediate School District, Genesee Regional Chamber of Commerce and other municipalities in forming purchasing collaborative.

IV. Implementation of 15 strategies to achieve financial stabilization (See Attached)

V. Continue Community Outreach and Involvement Strategy

- Monthly meetings with City Council
- Monthly meetings with 5 member Advisory Committee
- Reconvene 5 citizen advisory groups for June update of plan:

1. Legacy committee
2. Community and Economic Development Committee
3. Public Safety Committee
4. Finance Committee
5. Infrastructure Committee

VI. Criminal Justice Policy Council: Development and Implementation of plan to improve cooperation among courts, prosecutor, sheriff, state and federal law enforcement agencies, Flint and county police agencies and appropriate support agencies such as: probation, alternatives to incarceration and citizen groups.

VII. Infrastructure and Development plan

Water, sewer, roads and bridges, Fleet, Sanitation, Parks, and other related buildings and properties owned and operated by the city.

Please see attachments that provide further detail on our strategies to implement the necessary changes, restructuring and creation of public private partnerships to help us achieve our goals.

We are also in discussions with the Charles Stewart Mott Foundation regarding funding for:

1. Community Policing ($1.3M) We have submitted a revised version of this grant to support our Criminal Justice Policy Council in cooperation with Genesee County criminal justice partners.
2. Master Plan ($500K this is match for $1.5M HUD Sustainability grant)
3. $250K for shutting down incinerator at Sewage Treatment Plant. This is coupled with a DOE grant for $800K that we have been able to renegotiate with the federal government. This grant was pulled away from the Walling administration due to management and other issues.
4. Genesee Towers $3M for acquisition and demolition as part of a downtown redevelopment project involving the MSU College of Human Medicine expansion in the City of Flint.
5. Organizational Analysis support in the range of $1M for a number of projects within city departments.
6. Support for selected team positions to accomplish the task at hand. This request is in the range of $500K to $750K over the next two years.

Please note that our request to the State of Michigan is urgent. We are putting together a comprehensive strategy to address the pressing budget issues. However, there are significant immediate challenges in the areas of Finance, Public Safety and Infrastructure that must be tackled immediately.

PRELIMINARY DRAFT - FLINT DEFICIT ELIMINATION ACTION PLAN

2/13/2012

THE CHALLENGE:

Eliminate actual and projected deficits incurred by the City of Flint and adopt a spending plan for FY13 and beyond which is based on credible revenue estimates and expenditure projections, while positioning the City to be a sustainable and financially viable community in the future

THE DEFICITS:

The current and projected deficits total $22 million as of June 30, 2011, with nearly an additional $20 million anticipated to be added by June 30, 2012:

	FY 11 Actual	FY12 Projected	Cumulative
General Fund:	$ 8,863,133	$ 3.557,692	$ 12,420,825
Water Fund	$ 12,443,265	$ 4,265,539	$ 16,708,803
Sewer Fund	$ 423,349	$ 11,761,622	$ 12,184,967
Garage	$ 364,112	(prior year resolved)	
	$22,093,859	$ 19,584,853	$ 41,639,955

HOWEVER, the deficits in the Water and Sewer Funds are due primarily to the inclusion of OPEB liabilities, which began to be reflected in the financial statements for these enterprise funds beginning in 2008. If the deficit projections are revised to exclude OPEB liabilities, the deficits to be addressed are significantly less:

	FY 11 & FY12	FY 08 – FY12
General Fund:	$ 12,420,825	$ 12,420,825
Water Fund	$ 9,759,762	$ 1,115,861
Sewer Fund	$ 1,901,683	$ -0- (positive $9.9 mil)
	$ 24,082,270	$ 13,536,686
		28,103,269

It is not possible, given the City's precarious financial position, to begin to fully fund the City's OPEB liabilities. It is the City's intent to address the projected $13.5 million deficit, and to also reduce OPEB liabilities by changing current labor contracts.

PRELIMINARY DRAFT - FLINT DEFICIT ELIMINATION ACTION PLAN

2/13/2012

THE REVENUES:

Preliminary projections for Fiscal Year 13 (July 1, 2012 – June 30,2103) show $XXX in funds available for city services, based on current tax rates, fees and charges:

	Revenues		
	FY 11 actual	FY 12 Proj.	FY13 Proj.
Operating Funds			
General Fund			
Neighborhood Police			
Parks			
Waste Collection			
Major Streets			
Local Streets			
Building Inspection			
Sewer			
Water			
Public Improvement			

PRELIMINARY DRAFT - FLINT DEFICIT ELIMINATION ACTION PLAN
2/13/2012

PLAN OBJECTIVES

1. Address the FY11 and FY12 deficits by issuing additional Financial Stabilization Bonds, payable from dedicated millage funds and increases in water and sewer rates
2. Reduce the projected FY12 deficit as possible and prepare for achieving higher revenues and lower cost bases in development of the FY13 budget
3. Implement the FY13 budget based on credible revenue and expense projections, including debt service for FSB funds, and addressing most critical public safety and infrastructure needs.
4. Take steps as necessary to assure that the changes made during the tenure of the Emergency Manager continue into the future

PLAN STRATEGIES

1. Implement new labor contracts which reduce short and long term compensation costs, including health and pension, and which give more employer flexibility in managing operations
2. Transfer administration of the Flint Employees Retirement System to the Municipal Employees Retirement System, and modify retiree health care in order to reduce annual costs and future OPEB liability
3. Restructure Trash Pick-up Service to keep costs within the 3 mill levy or implement alternatives which do not rely on any millage support
4. Restructure Water Supply delivery system to reduce costs, including concentrated effort to reduce water leakage, and implementing additional fees as necessary to keep system solvent, including deficit bond repayment
5. Reduce costs of operating the Sewer System to stay within current revenues, while making critical capital improvements and repaying deficit bonds
6. Reduce costs of operating the Park System to stay within current revenues generated by the parks millage
7. Implement new fee schedules, in particular where increased revenues can be used for code compliance and blight enforcement
8. Invest in necessary improvements to the City's public safety, utility, road, and technology infrastructure
9. Restructure the City organization to reduce costs and increase efficiency
10. Analyze potential City/County collaborations and consolidations, as well as public/private partnerships
11. Utilize and manage grants to the fullest extent possible
12. Inventory City assets and dispose of those identified as surplus.
13. Identify other sources of increased revenues, including increased property tax millages and increased income tax limits. Establish Budget Stabilization Fund
14. Support economic development and community development activities which improve Flint's ability to attract and retain residents, businesses, and visitors
15. Identify and advocate for City Charter revisions that will modernize city operations and clarify governance roles. Implement necessary agreements with state to assure continued operations of the City after the exit of the Emergency Manager.

OBJECTIVE AND STRATEGIES DETAILS

1. Issuance of additional Financial Stabilization Bonds: Request will be made to the State of Michigan for approval to issue Financial Stabilization Bonds to address the documented FY11 deficit and the projected FY12 deficit. It is not otherwise possible, given the financial constraints of the City, to alleviate these deficits. With less than six months remaining in the fiscal year, it is not possible to significantly further reduce the projected FY12 deficit. It is possible, when constructing the FY13 budget, to begin to prepare for repayment of all Financial Stabilization Bonds. This approach allows for full energies to be spent on developing a sustainable Flint City organization for the future.
2. Reduce the projected FY12 deficit as possible: Since the appointment of the Emergency Manager, steps have been taken to reduce current expenses and improve efficiencies. These steps, including personnel cost reductions of more than $600,000, were detailed in the January 15, 2012 plan submitted to the State Treasurer. A revised method of prescription drug administration for retirees is also being implemented on March 1, 2012, which is anticipated to reduce costs by more than $1 million annually. A detailed review of the FY12 budget is in the process of completion, and decisions will be made as to any additional cost cutting actions at that time.
3. Preparing the FY13 budget: Work is underway to achieve higher revenues and lower cost bases for preparation of the FY13 budget. This budget will be the spending plan which begins to put the City of Flint onto firm financial footing and to provide the most basic of city services to its residents. Providing a basic level of public safety remains the top priority in preparation of this budget.
4. Foster sustainable organizational changes, including changes to the City Charter: It is critical to identify and advocate for City Charter and ordinance revisions that will modernize city operations and clarify governance roles so that the City can continue in a financial and sustainable manner after the exit of the Emergency Manager. Building an advocacy base of support will be necessary. Consideration should also be given to maintaining the state's involvement through a consent agreement for some period of time after the Emergency Manager's tenure.

PREPARATION OF FY 13 BUDGET

Preparing the spending plan for FY13 will be the primary vehicle for establishing the City's financial viability for the future. In preparation of the upcoming budget, the following approach for forecasting revenue and expenses will be undertaken:

1. Revenue projections will be reviewed and vetted by departments, finance staff, and administration prior to incorporation into the budget. Past history of unrealistic projections is recognized as a problem not to be repeated. Particular attention will be paid to net property tax and income tax projections, as well to grant revenues and interfund transfers.
2 Expense projections will be reviewed and vetted in a similar manner, with specific attention to expenditure items not subject to the control of departments.

Again, past history of unrealistic projections for utilities, fuel, and personnel are problems not to be repeated. A strict personnel control count will be in place as well as controls on the hiring of temporary and contract employees.

3. Critical capital needs will be addressed, with appropriate cost impacts included in the budget. Debt service will likewise be included to assure that the City's debt obligations are met.
4. The potential of issuing Fiscal Stabilization Bonds will be fully examined, including identification of the amount needed and the dedicated source of repayment, and amount of debt service to be included.

what will be the source of repayment?

The plan strategies identified earlier will be incorporated into the process of developing the FY13 budget, and the entire organization will be reviewed to determine what services, within its financial constraints, will be provided and at what level:

Labor contracts (Strategy #1) - New labor contracts are being developed for all unions along with new personnel policies for exempt employees. The goals are to reduce short and long term compensation costs, including health and pension, and to give the City more flexibility in managing operations. It is anticipated that these revisions will put health and retirement benefits into compliance with state laws, and, for new employees, may substitute a health retirement savings account for employer provided retiree health care. For active employees, consideration is being given to implementing the hard cap provision with respect to employer provided health care.

potential savings from Health care changes? Deadline for ability 8/421

Retirement administration (Strategy #2) - Discussions are underway with MERS with respect to their assumption of FERS. Initial review of the system indicates that the City's administrative costs are high, and that investment performance is low. MERS would be a credible alternative. In addition, the extent possible, health care for retirees will be modified to reduce city costs while continuing to provide adequate coverage.

Plan B

Trash pick-up (Strategy #3) – Waste collection is carried out by City employees for all residents, and is based on funding provided by a statutorily allowed 3 mill property tax levy. However, the cost of collection is more than $4 million annually, compared to the $3 million generated from the millage. Either the cost of the collection will be reduced to the amount of funds provided by the millage, or other alternatives will be implemented. Possibilities include privatization, franchising, or licensing waste haulers within the City.

just with recycling of yard waste

Restructure Water Supply delivery system (Strategy #4) - Action will be taken to assure that the system is returned to a financially stable position. Consideration is being given to utilizing the Flint River and Flint's water treatment plant as a short term alternative to water purchase from Detroit. Preliminary indications are that this alternative may cost significantly less than the net $11 million spent annually by the City on water purchase. If so, this would allow for funds to upgrade the plant, provide funds to enable a concentrated effort on reducing water leakage, and make debt service payments on the Financial Stabilization Bonds. An annual review and adjustment of fees would also be made to assure the system is financially solid; however, the relatively high rates currently paid by users are a complicating factor.

NEGOTIATIONS w/ DSWA

Eliminate Sewer System deficit (Strategy #5) – Costs of operating the Sewer System will be reduced and fees increased in order to return the system to a financially stable

position, while critical capital improvements will also be made to assure that the system remains serviceable.

Limiting the City's cost of operating the Park system (Strategy #6) – The .5 mill property tax levy for park operations has regularly been supplemented by a General Fund appropriation. The supplemental appropriation will be eliminated and costs reduced accordingly. Actions taken to implement this are anticipated to include turning operation of Senior Centers to a subcontractor; turning management of the City golf courses over to a subcontractor; and utilizing subcontractors to mow most if not all of the City's parks.

Review of fees and charges for City services (Strategy #7) – All fees and charges for City services will be reviewed and appropriate changes implemented no later than July 1. Past history shows than implementation of approved fees has been inconsistent and untimely, and revenue estimates have been unrealistic. Consequently, there will be specific attention paid to avoiding this in the future. Within the context of setting fees and charges, particular attention will be paid to establishing fees and fee levels which will enable the enforcement of building codes and blight prevention codes.

Invest in necessary improvements to the City's public safety, utility, technology, and road infrastructure (Strategy #8) – Major investments in the City's infrastructure are necessary if the City is to be sustainable and efficient in the future. These improvements include improvements to the Water Treatment Plant ($30 million); improvements to the Sewer system ($14 million); conversion of the 911 backbone to an 800MHz system ($2.5 million); and an upgrade to the City's Information technology infrastructure ($1 million). Implementation will require incorporation of future debt service into the City's financial plans and dedication of personnel to accomplish them.

Restructure the City organization to reduce costs and increase efficiency (Strategy #9) - Several cost saving strategies have already been implemented, including the elimination of the Civil Service Commission and the Ombudsman Office. For operational purposes, the City is being reorganized into 3 major divisions: Public Safety, Infrastructure, and Finance/Administration. Within this context, further organizational changes are being evaluated, including consolidation of Human Resources and Risk Management; Treasury and Income Tax; and Human Relations and Mayor's Office. Operations within the Finance Department will be restructured as necessary to address internal control issues identified in the recent audit.

Evaluate City services and delivery systems within the context of collaboration and consolidation (Strategy #10) – The location of City offices in such close proximity to County offices begs for a thorough evaluation of collaboration and consolidations. Areas which have been broached in recent times include consolidation of 911 services; collaboration in water delivery and provision of paramedic services; consolidation treasury and collection functions; information technology; purchasing; building inspection and code compliance; and fleet management. Regular meetings have been established with County Commissioners, the Emergency Manager, and others to explore these potentials. The potential of EVIP funding and the interest of the Mott Foundation may make it possible to fully explore these potentials in a short period of time.

PRELIMINARY DRAFT - FLINT DEFICIT ELIMINATION ACTION PLAN

2/13/2012

Utilize and manage grants to the fullest extent possible (Strategy #11) – Grant administration has been an ongoing area of concern. New leadership has been designated and new processes for monitoring are being implemented to assure that grants are appropriately managed and that the City is actually receiving the funds to which it is entitled. Beyond current grant administration, however, there is a need for a resource dedicated solely to searching out and applying for potential grants to assist the City in its recovery and in establishing its path to continued sustainability.

GRANT MATCH?

NO DEFICIT ELIMINATION GRANTS!

Inventory City assets and dispose of those identified as surplus (Strategy #12) - Little direct attention has been paid to disposing or repurposing surplus assets owned by the City. Continuing to maintain them for no purpose takes City resources and forestalls the use of their value for other purposes. Dedicated attention to disposing of such assets, such as the Genesee Towers property, and the apparently oversized fleet, will provide a revenue source for other critical capital projects.

ONE-TIME REVENUE,

WHO IS THE MARKET

Identify sources for increased revenue streams (Strategy #13) – It is clear that the City's revenue stream, composed primarily of property tax, income tax, and state shared revenues, will not be sufficient – at least for the foreseeable future - to enable the City to provide the level of services desperately needed to once again become a sustainable community. An evaluation of unlevered taxing authority will be undertaken to determine if millage rates can be increased to offset falling assessments. Consideration will be given to whether or not to seek legislative approval to increase the local income tax rate, and discussions will continue with the state to determine in what areas the state can provide programmatic and financial assistance.

← WHAT IS THE LEVEL OF SUSTAINABLE

Support economic development and community development activities which improve Flint's ability to attract and retain residents, businesses, and visitors (Strategy #14) – It is not likely that the City will have much in the way of funds to support these types of efforts. It does not mean that, however, that City officials cannot devote some of their time towards these efforts, and that the City cannot work to foster others to continue this essential effort. This is also an area where state assistance can be extremely valuable.

COMM. DEV. POSSIBLE

IMPLEMENTING THE PLAN

Each of the objectives and strategies identified above will help define the spending plan for FY13. As the process of developing the FY13 budget progresses, the financial and programmatic implications of potential decisions will become clearer. This section will track those implications and their feasibility as to incorporation into the budget.

1 Issue Fiscal Stabilization Bonds:
2. Reduce FY12 deficit
3. Establish base revenue and expense projections for FY13
4. Define basic and affordable level of public safety
5. Identify potential Charter and ordinance revisions
6 Implement new labor contracts
7. Transfer administration of FERS to MERS
8. Restructure trash pick-up
9. Restructure water supply delivery system
10. Reduce costs of operating the sewer system
11. Reduce costs of operating the park system
12. Implement new/increased fee schedules
13. Implement new/increased fees to support code compliance and blight enforcement
14. Invest in infrastructure improvements
15. Restructure the city organization
16. Establish new City/County partnerships
17. Establish new public/private partnerships
18. Utilize and manage more grants
19. Inventory city assets and dispose of surplus
20. Assess potential of new or increased sources of revenue for city services
21. Establish Budget Stabilization Fund
22. Support economic development activities
23. Support community development activities

HOW YOUR WATER RATE COULD CHANGE

Here are the percentage changes in water rates released Thursday by the Detroit Water and Sewerage Department. The figures are preliminary and still must be approved by the Detroit Board of Water Commissioners before taking effect July 1. The Detroit figure is the change in the retail rate. Suburban figures represent the change in the wholesale rate that a community pays Detroit. Suburban customers also pay additional charges levied by their communities to fund the local water system.

COMMUNITY	Proposed water rate percentage change
Detroit	10.3%
Average suburban wholesale rate	7.9
Allen Park	8.5
Ash Township	8.5
Auburn Hills	8.3
Belleville	7.2
Berlin Twp.	8.5
Brownstown Twp.	8.0
Canton	8.3
Center Line	7.4
Chesterfield Twp.	9.0
Clinton Twp.	9.2
Commerce Twp.	3.8
Dearborn	8.6

Harrison Township Supervisor Kenneth Verkest contemplated a proposed 13% water rate increase for his Macomb County community from the Detroit Water and Sewerage Department on Thursday.

"Thirteen percent seems kind of heavy," he said.

Harrison Township, like dozens of other metro Detroit communities, is reviewing the rates the department proposed for the 2012-13 fiscal year that begins in July. The department hosted a meeting Thursday to discuss the changes.

Suburban wholesale rates would average a 7.9% hike and Detroit retail rates would increase by 10.3%. The Board of Water Commissioners is expected to decide on the rates in March.

Within the averages is wide variation, with rate hike recommendations at 28.9% in Grosse Pointe Shores and 28.4% in Van Buren Township to rate decreases of 12.7% in Hazel Park and 24.2% in Plymouth Township.

Plymouth Township Supervisor Richard Reaume noted that the change followed a massive 40% increase last year. In addition to negotiating with the department on system improvements, credit should go to residents, he said.

"Residents took heed that they should use water in off-peak hours," Reaume said.

Because of the change, the township might be able to pass on a double-digit water rate decrease to its customers, he said.

That potential decrease highlights the way in which the water rates translate into customer bills. Although Detroit sets rates for communities based on their projected usage and investment costs, the individual communities set the final total. Officials said that, in general, Detroit Water and Sewerage rates represent about half the actual bill a residential customer receives, with individual communities adding fees.

The overall increase in water rates is caused by factors such as increased operating costs and a lower volume of water sales.

Sewer rates also are increasing for most areas, although two areas would see modest decreases. The system as a whole would see an overall 8.5% increase, while City of Detroit retail customers should see a 9.9% hike and suburban wholesale customer rates are expected to increase overall by 6.7%.

State Rep. Kurt Heise, R-Plymouth Township, said Detroit's system was built decades ago for a population and an industrial base that no longer exist.

"It could have been worse, but it's going to be unacceptably high for many customers in the region," Heise said. "More needs to be done to control costs to create greater efficiencies, to reduce legacy costs and possibly sell off the system."

Heise introduced a bill last year that would abolish the Board of Water Commissioners and have the system run by a regional authority. That bill remains in committee.

Bart Foster, who works as a consultant to the department, said that suburban communities currently help shape the way rates are determined.

"The folks in this room ... not only get it," Foster said of the people at Thursday's meeting, "they were involved in developing the philosophy."

John or Matt,
Just double-checking to see if you got this earlier note reprinted below. Do you foresee a concern about the LAFD etc. for Flint that would require extra early attention? Let me know if you have any questions, but please respond to me or Sonya if you can. If there might be a problem, perhaps it could be discussed at a future MFA/DEQ joint meeting?
Thanks, David

Subject: City of Flint Part I application for DWRF loan#7310-01: 4Q FY2012

Hi John;

Just a heads-up that another financially-strapped community, the city of Flint, is coming in with an application for a DWRF loan and "principal forgiveness" in the 4th quarter of 2012. Although my project schedule (see attached copy) with Flint does not require a Part I submittal until May 24, 2012, Wendy warned me that the city could need extra time to get LAFD approval and that they will need to be fully aware of the need for early submittal of a "long form" LAFD application as well as a budget "deficit reduction plan." As you probably know, the governor appointed Michael K. Brown as the emergency financial manager for the city of Flint, and he is acting as the authorized representative for the DWRF loan project as well. Perhaps you know who the city's bond attorney is and can alert him/her of the early deadlines for LAFD. What would you recommend we tell the city as far as anticipated deadlines for the "long form" and deficit reduction plans? I'll be happy to pass the word on for you once I know your expectations. We are trying really hard to get Flint to jump through all the right hoops and get this project off the ground with a big chunk of "forgiveness" as a bonus.

Thanks!
Note: the attached DWRF schedule is an unsigned draft copy, but Mr. Brown and DEQ have signed it and the dates have not changed.

Local Government Meeting Agenda, Tuesday March 13th

Allen Park

On Tuesday, March 13th, City Council voted to have the City Attorney, Finance Director and Administrator create a letter requesting that the Michigan Department of Treasury send in a preliminary review team. Approval could be made at the next meeting on March 20th.

City of Benton Harbor

Meeting scheduled for March 29st – Andy attending; preparation; other staff?

Benton Harbor Area Schools

City of Dearborn Heights

City of Detroit – Update - Brom

Detroit Public Schools

East Detroit Schools

Ecorse

Flint

TRO – Mike Brown off duty. Hearing this week.
Labor issues being worked – Meet and Confer sessions for 5 of 7 contracts ongoing.
Karegnondi Water Authority – Request for Flint participation in Engineering study paused.
Revised DEP due April 6, along with FY12-13 budget.
New Public Safety Administrator due around April 1.

Highland Park City

Substantial Accounts Payable situation
Long term Strategy-Roger
Police alternatives – Discussion with Col. Etue
Staff support

Highland Park Schools

Hamtramck

Fiscal analysis arrangement
Revenue Sharing Advance and TAN; agreement on spending reductions
The proposed March 13, 2012 Hamtramck city council agenda has the following under "New Business":

7. RESOLUTION TO SUBMIT A REQUEST FOR STATE OF MICHIGAN FINANCIAL REVIEW FOR HAMTRAMCK. Placed on the agenda by Councilmember Zwolak.

Inkster
Emergency Loan Board meeting scheduled for the week of March 19th
Call ahead to other board members-Andy

Muskegon Heights Public Schools

City of Pontiac
Judgment levy impact on fiscal condition
Note from Lou on Pontiac Schools
Feedback on Public Safety employees

Pontiac School District
Tom Saxton recommended to MDE to approve the DEP and begin PA 4 review immediately
Note from Lou

City of River Rouge

Wayne County
DEP submitted; T.A.N. needed - Suzanne
Ability to delay tax auctions to preserve property values?

One Page Reports
Pontiac- tweak to include Judgment Levy in 2011
Add projection about when each local unit could or is expected to break even

Please email me back with any updates or changes and I can send out a final draft ahead of tomorrow's meeting.

Local Government Meeting Agenda, Tuesday March 27th

Allen Park
City council voted March 20th to request a preliminary review under PA 4. Allen Park is also asking voters to approve a Headlee override in May. This review request should not be considered timely until after the May election.

City of Benton Harbor
Meeting scheduled for March 29st – Andy attending

Benton Harbor Area Schools

City of Dearborn Heights

City of Detroit – Update – Brom and Andy

Detroit Public Schools

East Detroit Schools

Ecorse

The City of Ecorse experienced three events in 2011 that resulted in a surplus in the general fund of $1,049,706:

Issuance of Judgment levy	$9,315,146
Receipt of Emergency Loan	$2,000,000
Charge off of an Interfund Payable	$5,364,984
Total	$16,680,130

The judgment levy is for two more years. It was issued to pay other local units for property tax collections Ecorse "borrowed" rather than distribute to the other units. Joyce anticipates a balanced budget even after these one-time receipts expire.

Flint

Status of appeal on Aquilina's order? Court of Appeals required plaintiff response by 9:30 this morning. Seems to signal early consideration by COA.

Mayor and City Council in charge. Possible effects on:

- Karegnondi Water Authority – Still on hold.
- Revised DEP due April 6, along with FY12-13 budget.
- New Public Safety Administrator due around April 1

Highland Park City

Long term Strategy-Roger

Police alternatives – Discussion with Wayne County Sheriff (for Hamtramck also)

Highland Park Schools

Hamtramck

Potential for partnership with Highland Park for Wayne County sheriffs

City council meeting last week: RESOLUTION TO PLACE A PUBLIC SAFETY MILLAGE ON THE AUGUST 2012 PRIMARY and RESOLUTION TO SUBMIT A REQUEST FOR STATE OF MICHIGAN FINANCIAL REVIEW FOR HAMTRAMCK. The first item failed because there was no second for the motion and the other was voted down.

Inkster

Emergency loan. Ed and I met last week with Skuldreyer who expressed concern with the compliance with the Consent Decree. Ed and I will be in Inkster on Thursday to meet with key officials to try to assess and improve circumstances as needed.

Muskegon Heights Public Schools

City of Pontiac

Judgment levy impact on fiscal condition. Lou Schimmel believes he needed this year's levy to keep from adding to the deficit. Will have enough spending cuts in place to avoid a levy next year.

Pontiac School District

Partnership with Waterford schools? Lou contacted Waterford Schools last week advising that we thought it was a good thing to do. Today, Lou was under the impression that Waterford had not done anything with the information and would call to encourage them.

City of River Rouge

Wayne County

Revenue Sharing advance

Delinquent tax revenue?

Last week, the approvals were made on a conditional DEP and for the TAN. An escrow account is part of the deal, as planned. The audit came in as scheduled, showing the County's GF deficit increasing by $53 million, as compared to their $20 million forecast.

Subject: News story regarding Flint water deal

Hi Terry:

I hope this correspondence finds you well. I just wanted to send you a note, on behalf of Mike, to let you know that today's newspaper headline is a little misleading. We have not "inked" THE water deal (Keregnondi). Of course, this will not and can not be done without the State's approval.

Today's article is about a longstanding agreement with the county to provide back-up water services in case of an emergency for present day use, not any future use. This agreement had been in place, but never executed. Now that Mike has signed off on it, the city will generate revenue from the agreement.
http://www.freep.com/article/20120328/NEWS06/120328011/Genesee-County-Flint-River-water

On another note, tomorrow is my last day with the City of Flint. I am returning to television. It has been a pleasure working with you and I hope our paths cross again in the future.

Now that I will soon be a working member of the media again, I would like for you to add my e-mail address to your media distribution list [redacted]. My cell number is (810)[redacted]

To: Saxton, Thomas (Treasury)
Subject: FW: Local Government agenda & Updates

Tom,

Did you plan on having me join the local gov't meeting tomorrow?

I did talk with Brom this morning and I have Andrea looking at how to reconcile the City of Detroit reports from Rick Drumb and E&Y. I am not sure we can actually reconcile them, but we will try. If we cannot, did you want me to work with Rick to figure it out?

I also gave Brom an update on Pontiac schools. I spoke with Paul Bryant and he is working with MDE this morning to get the April and May state aid payments released. The District did submit another draw for the TAN which I left with Beth. Perhaps we can spend a few minutes today reviewing the draw and latest update from the District. Also, I have a call Thursday with the Key Bank, the purchaser of the TAN to discuss the issues. My guess is Key Bank will not provide credit in the future and it will be difficult for the District to secure another TAN.

Andrea and I have a good first draft of projected cash flows for Benton Harbor Schools through August 2013, I am pretty stacked up today, but should be able to have it ready for review sometime tomorrow.

Thank you
John

Subject: Local Government agenda for Wednesday- Please review
Importance: High

Please review these items below and advise of any changes ASAP:

Allen Park
City council did not approve the Emergency Loan Application last week and city administrator resigned effective May 31st
Preliminary review tentatively scheduled to begin on May 29

City is required to submit an updated DEP that does not include revenues from the millage, which failed earlier this month

City of Benton Harbor
Charter Amendment plan
Legislator contact- Fred
Millage Issue, Financial Crisis
EM Transition

Benton Harbor Area Schools
Met with the Superintendent and Plante Moran on May 17th to review cash flow and outstanding district liabilities
Updated cash flows to be sent June 1
Indicated the request to borrow 70% of their state school aid is not acceptable
Assessing long- term restructuring of the District's state aid note

City of Dearborn Heights
Deficit elimination plan approved. The plan is a combination of a successful Headlee override and 10% salary reductions.

City of Detroit
Has submitted a new application for borrowing (a continuation of the previous borrowing). Staff is working with the City to obtain all the necessary documents.
Delay in appointing certain positions
Financing issues

Detroit Public Schools
PA-72 concerns, possible removal of academic appointees
District has completed the refinancing of the 2005B bonds
Detroit has indicated a possible need for a proposed cash flow borrowing in August/September
They have been advised of our concerns and that it needs to be documented
School Board status

East Detroit Schools
Continue to monitor cash flow, should be okay through the end of school year

Ecorse
Long term transition plan

Flint
The City is projecting an $18M accumulated deficit for the fiscal year ending June 30, 2012 and has submitted a deficit elimination plan. The City plans to issue $19M in fiscal stabilization bonds over a two year period ($9M in 2012 and $10M in 2013). The city is reducing its workforce by 21% (147 employees) and is projecting a $4M savings from changing health care benefits. The City bluntly states that it cannot eliminate its deficit in the water/sewer fund, i.e. it

cannot raise its rates high enough. The water and sewer funds are not making their OPEB payments, which results in an increasing deficit. But for the water/sewer fund deficit, the DEP is reasonable.
Privatization and Consolidation efforts
EM succession issue
Universal Retirement Healthcare product

Highland Park City
Tony Saunders is working under state contract with the Mayor and city staff on several projects: moving water system to DWSD, negotiating collective bargaining agreements, balancing the GF budget and reducing health care expenses.

Highland Park Schools
Developing financial plan and related documents to implement charter district
Scheduling weekly conference calls
Cash appears to be good through July/August

Hamtramck
Pierce Monroe study completed. City projected to have $2.5-$3.0 million deficit by year-end.
City Council expected to request PA 4 review this week.

Harper Woods
City council at their May 7, 2012 meeting approved moving forward with a Special Assessment District for police and fire operations.

Inkster
Stout, Risius & Ross presented operational evaluation report to city council on May 9, 2012.
City Council approved exploring consolidation of police force with Wayne County, Garden City or others at the May 11, 2012 meeting.

City of Muskegon Heights
City manager recently contacted and their financial condition is stable.

Muskegon Heights Public Schools
Developing financial plan and related documents to implement charter district
Scheduling weekly conference calls
State Aid Advance of $193,000 was made on May 8th
Cash flow remains a challenge

City of Pontiac

Pontiac School District
Labor contract negotiations
MDE withheld April and May state aid payments due to insufficient reporting related to the DEP
Preliminary Review began on May 7th and is due June 5th

City of River Rouge

Royal Oak Township

Board appointed former Supervisor Jerry Sadler, as interim Supervisor on May 7, and he will serve until November election. Per the Treasurer and Clerk, township finances are adequate with the extra voted millage approved in November 2011.

Wayne County

The County has submitted its commission approved DEP. It is under review by staff- it is likely the plan will need to be revised by the County. So far the County has complied with all of the Department's requirements for additional reporting. The monthly financial report shows that of the 17 funds with deficits, only 9 have met the projections. The general fund had a projected deficit on March 31, 2012 of $70.8M, but the actual was $80.5M. The health fund projected a deficit of $0.1M but actual is $5.2M. The general fund cash position appears to be getting worse. The deficit elimination plan includes $58M in grant administration fees. Staff is reviewing financial information for unauthorized borrowing or other significant items in the audit. Staff is also preparing SOW for financial review of County records.

City Of Flint Water History Facts

Current Treatment Plant was put into service in 1954.

Current 72" main pipeline was completed in 1970.

Flint signed a 30 year contract with Detroit Water and Sewer Department in the mid 1960's.

The contract with DWSD has expired and we are currently operating on a yearly extension.

In 2006 Flint completed a $48,000,000 upgrade of the existing Water Plant (required by the MDEQ & for backup only).

Flint's Water & Sewer System is approximately a $300,000,000 Enterprise.

Flint's Water & Sewer System is designed to deliver water to over 200,000 people with over 1,500 miles of infrastructure.

Flint's most recent census count shows a population of approximately 102,000 in 2010.

Flint's census population in 2000 was approximately 124,000.

The water system had over 45,000 customers in June of 1999.

The water system had just over 36,000 customers by June 2011

The "Fixed Costs" that must be covered to maintain the system and deliver quality water have increased over time.

CITY OF FLINT
WATER NON-PAYMENT TURN-OFF POLICY

1. Water services to any customer may be shut off if the account is not paid until after 30 days after the due date. (City ordinance 46-52 (h))

2. Non-payment turn-offs are done only Monday through Thursday. The Customer Service Center does not schedule non-payment turn-offs on Fridays, Saturdays, Sundays, or most recognized holidays.

3. Illegal usage, broken payment arrangements and NSF (non-sufficient funds) turn-offs are done at any time without additional notice.

4. Turn-off notices are mailed to delinquent customers fifteen (15) days before actual turn-off.

5. The water customer is responsible for maintenance of all plumbing in the premises including connection to City water mains or sewer lines.

6. If a customer disputes a water bill and is unable to resolve the issue with Customer Service personnel, the customer may request an administrative review. Further information on any water account may be obtained by calling (810) 766-7015 or visiting the Customer Service Center at 1st Floor, City Hall, 1101 S. Saginaw St.

Preliminary Options for Future City of Flint Water Sources

Consider a New Negotiated Contract with Detroit Water and Sewer Department

PROS	CONS
No upfront capital costs	Lack of control over new / fixed changes
Possibility to negotiate a lower rate	Past practices
Ability to "Blend" water sources to further control costs	

Consider a Contract with the Karegnondi Water Authority

PROS	CONS
Voting member of KWA board	Capital cost (debt service)
Ability to "Blend" water sources to further control costs	Uncertainty of final costs
Raw water is an asset for attracting new buisnesses	

Blended Use of the Flint River

PROS	CONS
Helps control cost of water	

*** CURRENTLY NO DECISIONS HAVE BEEN MADE REGARDING THE FUTURE WATER SOURCE

Improvements for City of Flint Water System

Reduce Leakage

- **Finalize a Preventative Maintenance Plan**
  - (Planning started in January 2012, requires funding, … part of Operational Costs)
  - Will help identify repair area's

- **Reduce water theft**

- **Replace water meters**
  - We currently have an eighteen month plan to replace all meters with more efficient *"Smart Meters"*

- **Encourage routine household checks**
  - "Faulty" toilets are a significant reason for household water loss. and unexpected larger bills.

Other Leakage concerns

- ✓ Transmission Loss
- ✓ Fire Hydrants
- ✓ Incorrect water bills
- ✓ Non-Payment

Michael K. Brown
Emergency Manager

Howard D. Croft
Director

June 26, 2012

Sue F. McCormick
Director DWSD
735 Randolph St.
Detroit, MI 48226

Dear Ms. McCormick,

In cooperation with the Michigan Department of Environmental Quality (MDEQ) and city engineers, the City of Flint has undertaken a review of the regulatory requirements necessary to supply water to our residential and commercial customers. As part of our evaluation it was determined that the Flint Water Treatment Plant is capable of successfully "blending" or "co-mingling" water sources while continuing to provide quality drinking water to citizens.

The Flint Water Treatment Plant would require approximately $1.3 million dollars in increased expenses in order to blend as much as one third (1/3) of treated river water with two thirds (2/3) of treated DWSD water. Using the 2013 DWSD rates this would result in savings of between two and three million dollars annually based on current usage data. The MDEQ has provided Flint with written documentation supporting our blending of water sources and the potential benefit.

Given this information we respectfully request written permission from DWSD to proceed with blending treated Flint River Water with treated DWSD water.

It should be understood that our goal is to deliver both high quality and economically viable water to our customers. This goal has led us to fully consider all available options including purchasing water from the Karegnondi Water Authority and use of the Flint River. We believe that in order for an option with DWSD to be successful it is essential that along with the proposed authorization to blend water that there is a guaranteed containment of the new "fixed costs" that exist in the current fee structure. The new DWSD fixed charge of $707,000 each month regardless of amount of water used is five times the original $143,000 each month instituted only two years ago. This has resulted in the cost of water from DWSD dropping in recent years as the overall fee has increased annually by millions although our usage has continued to decline. The continuation of this trend would render our request and goals invalid.

With the current Emergency Manager condition in Flint we believe that limiting an agreement to only three years is appropriate. This time frame would also serve as an evaluation period prior to any proposed long term agreement being considered.
We appreciate your consideration and look forward to working together.

Sincerely,

Michael K. Brown
Emergency Financial Manager Flint, Mi.

June 26, 2012

Roger Fraser
Deputy State Treasurer
Lansing, MI 48226

Dear Mr. Fraser,

For the last six months the City of Flint has aggressively pursued a more economically viable way to provide quality drinking water to its customers, one of which is Genesee County. In recent years our 40 year contract to purchase treated drinking water from the Detroit Water and Sewer Department (DWSD) has expired but Flint continues to purchase water from DWSD without a signed contract or agreement.

There are several water source options currently available to Flint, each with pro's and con's which we have carefully worked to evaluate. The Flint River, the Karegnondi Water Authority (KWA) and DWSD are all options which have been given significant consideration. We have solicited information and advice from the Department of Environmental Quality (MDEQ), Oakland County officials, DWSD officials, the Genesee County Drain Commissioner, and engineering firms to assist in making this significant decision.

Briefly;

The Flint River – Using the river would require costly upgrades to our water plant (up to $60 million dollars) and would only be able to provide water to the City of Flint.

The KWA – A regional project which stands to bring raw water into the area for potential industrial growth and is expected to significantly reduce water bills but requires a yet to be determined 20 year bond commitment.

The DWSD – Negotiating a new agreement here would not require an investment but recent pricing trends, growing infrastructure problems, and cost restructuring by DWSD have all but assured this to be the most costly option.

The MDEQ has supported means such as blending water sources which offers the ability to have a measure of control over water (commodity) costs regardless of which primary source is used, but still leaves rising infrastructure costs as a concern. Given the steps we have taken, we believe that submitting a non-committal "capacity amount" to KWA in order to determine the actual construction costs of this project is the logical next step. The capacity amount is the maximum amount of water Flint anticipates using over the next 30 years and would be used to calculate Flint's percentage of construction cost.

We have included in this submission drafts of letters written to both DWSD, and KWA in which we have detailed our requests and intentions of each entity, to help further our evaluation. We would also like for the treasury to review each document and support our decision to pursue final construction costs pertaining to purchasing water from the KWA.

It should also be noted that the City of Flint is actively looking at various City/County partnerships which could have a positive impact on both the efficiency and the cost of providing quality drinking water to citizens. The discussions being held are designed to aid in the overall scope of water delivery, maintenance, infrastructure, and service throughout the County and could potentially help the current economic condition.

We appreciate your tie and attention,

Sincerely,

Michael K. Brown
Emergency Financial Manager Flint, Mi.

FLINT WATER SUPPLY FUTURE

1. Based on all our analysis, KWA presents the best opportunity for Flint for the following reasons:
    a. Because approximately 40% of Michigan's population is served by the Detroit Water and Sewer District (DWSD) system, it is in Flint's, as well as the State's, best interest for a second pipeline to be built.
    b. It is the least expensive of the alternatives and provides for relatively fixed rates for water to the Flint citizens for the next 25 years. In the first year of operations (Fiscal Year 16), the City should be able to deliver water for about the same costs as today with annual increases of less than 3%.
    c. Flint can use the Flint River for its backup and that cost is factored into the above projections.
    d. It eliminates the need to update the dams at a substantial savings to the city. A Riverfront Restoration Plan exists which deals with the elimination/replacement of the dams.
2. Use of the Flint River while feasible is risky and very expensive
    a. Significant upgrades would need to be made to the dams to insure adequate water levels during both high and low water events
    b. The cost of treating river water is more expensive than treating lake water
    c. In a study of the Flint River in 2011 it was estimated that the up front cost of Flint using the river would be $61.5 million.
3. If Flint does not participate with Karegnondi Water Authority (KWA) it will be a hostage of Detroit or the Flint River for the next 40 years.
4. The estimated cost of continuing to use DWSD water would be $19 million more than KWA over the next eight years conservatively. It is our belief that based on everything we read and hear about Detroit the rates will increase substantially more than our forecast.

5. Concerns
    a. KWA would consist of five Incorporating Board Members
        i. Genesee County
        ii. City of Flint
        iii. City of Lapeer
        iv. Lapeer County
        v. Sanilac County

    b. Only two, possibly three, municipalities would sign capacity agreements to buy water, though all would have a vote.
    c. In addition an additional ten board members will be appointed on the basis of water purchased.
    d. It is concerning that members not purchasing water could make decisions affecting those that are paying the costs.

e. In any event, Flint would be a minority voting member, with Genesee County having a majority. (The Five member incorporating board can override the decisions of the total board on some matters such as incurring debt and selling the system).
f. In the event of cost overruns after contracts are signed, the Board could vote to incur additional debt even if Flint was opposed.
g. Flint would have the option to opt out if the bids exceed the projected costs ($355,000/unit per year).
h. Based on cost estimates by KWA Flint would have to pay a one time fee of $581,400 upon signing a capacity contract and then $48,450 per month until the bonds have been sold. (Estimated to be 3 years) A total of $2.3 million will be recovered in the first year of operations under KWA.
i. At the end of the contract (40 years) KWA owns the system and has no obligation to deliver water to Flint.
j. If construction costs exceeded projections by 15% and if constructions was to be delayed by one year and the city was obligated to make its first year debt service before KWA begins operations, the city's up front costs would exceed $10 million. Given the City's precarious financial position it would be necessary to find a source of capital for this until operating savings covers it.

6. Funding sources for:
    a. $2.3 million got up front operating costs.
    b. $7,100,000 for upgrades to the water treatment plant.
    c. $8.2 million additional up front cost if there are significant cost overruns and a one year delay in water supply delivery from KWA. (This would require an additional source of capital.)

7. Next steps
    a. Finalizing a contract with KWA
    b. Continue to explore options for the operation of the Flint Water System
        i. $25,000,000 in bond debt and high legacy costs limit options

FLINT WATER SYSTEM OPTIONS

DWSD OPTION: Continue to purchase water from DWSD. Some blending with River Water.

Potential Positives:

- Purchases from DWSD are the cheapest option at the onset.
- In the event that the City experiences unexpected growth, DWSD could provide more water above current projections. The maximum MGD DWSD can provide needs to be determined.
- If the City buys water from DWSD, could the City use KWA as a backup?
- A plan to address water loss within the system needs to be developed.
- Requires no bonding by the City.
- Use of the 72" Line will lower water rates.
- No duplication of service lines.
- Flint could try to negotiate better terms with DWSD.

Potential Negatives:

- DWSD is the most expensive option by 2042.
- Not a member of the Board of Directors.
- It is unclear what the current rate Flint is paying to DWSD for water? It is also unclear how many MGD is Flint currently purchasing?
- Flint needs to determine the amount of water that the system is currently losing (estimated at 25%). How losses impact current or future purchases from DWSD needs to be determined.
    - *Flint may have begun a water meter replacement program to begin to identify some of these losses.*
- A projected cost and funding for system repairs to reduce water loss needs to be prepared.
- Overall expenditures required to cover the outlined options are going to require water rates to rise almost annually. An analysis of what rates might look like and what the capacity of the public to pay these rates might be should be performed.
- The December 21st letter from DWSD to Flint outlines some different options for Flint than what was presented by TYJT. What are the potential impacts?

KWA OPTION: Purchase Lake Huron water through the KWA Authority.

Potential Positives:

- Lower costs than DWSD in 2042.
- Excellent water quality. Requires less treatment.
- Has a management position in the authority.
- Bonding can be done through the County.
- In the event that the City experiences unexpected growth, KWA could provide more water above current projections. The maximum MGD KWA can provide needs to be determined.
- Could the City partner with KWA to increase the size of their water plant and purchase 100% of water from them and mothball the Water Plant?
- If the City buys water from KWA, could the City use DWSD as a backup?
    - *TYJT states that the MDEQ will require Flint to have a redundant water supply.*
- Could KWA purchase or lease Flint's water plant for redundancy?
- Flint could try to negotiate better terms with KWA.
- Allows cooperation with other communities via KWA.

Potential Negatives:

- Most expensive option at the onset.
- Need to determine who maintains the supply line into Flint.
- Requires 2 bond issues.
- Flint needs to determine the amount of water that the system is currently losing (estimated at 25%). How losses impact current or future purchases from KWA needs to be determined.
    - *Flint may have begun a water meter replacement program to begin to identify some of these losses.*
- A projected cost and funding for system repairs to reduce water loss needs to be prepared.
- Overall expenditures required to cover the outlined options are going to require water rates to rise almost annually. An analysis of what rates might look like and what the capacity of the public to pay these rates might be should be performed.

FLINT WATER PLANT OPTION: Utilize Water Plant for 100% of needs.

Potential Positives:

- Cheapest option in 2042.
- Water source is the river; not required to purchase water.
- Could use KWA or DWSD as back-up.
- What is the budget surplus of the City's Water Fund? Are any funds available for additional repairs, staffing, capital improvements, etc.?
- What is the current maximum production capability of the Flint Water Plant?

Potential Negatives:

- River water requires more treatment.
- Is the City's current repair/maintenance budget for the water system sufficient?
- How old is the Flint Water Plant? What is its projected lifespan?
- What is the current annual cost to run the plant?
- How large is the current staff at the Water Plant? What staffing level would be required to run the plant at full capacity?
- Does the Water Plant have the capacity to provide more MGD if Flint experiences growth?
- Given the current financial situation, does the City have the ability to sell $85.5-million bonds necessary to make the improvements being proposed for the Water Plant?
- If decline continues in Flint, there could be operational and financial impacts. What this would do to water purchases and debt payments should be determined.
- Is there sufficient river water available over the next 30-years to supply Flint's needs?
- Limited ability to sell water to others. Surrounded by KWA and DWSD.
- Hard to compete against KWA's new infrastructure.
- How will OPEB liability be addressed?

UPDATE TO TREASURY REGARDING THE CITY OF FLINT EVALUATION OF WATER SERVICE DELIVERY

1. It is the goal of the City of Flint to assure the delivery of water to its residents and businesses at the lowest cost possible over the long term. City officials have expended considerable amounts of time over the past many months evaluating three primary options: water service delivery by KWA, continued water service delivery by DWSD, and sole reliance on the Flint River. At this time we continue to consider the KWA and DWSD options, but do not believe that sole reliance on the Flint River would be in the best interests of the City.
2. We have previously provided Treasury with an analysis of the KWA and DWDS options. At this time, depending on the final outcome of negotiations regarding future costs, either option could be the best for the City.
3. Treasury engaged the services of Tucker, Young Jackson, Tull, Inc. (TYJT) of Detroit to review the assumptions underlying the KWA option. Their assessment was recently presented to City officials and raised several questions as to the credibility of the KWA option. City officials shared the TYJT assessment with Rowe Engineering and the Genesee County Water and Waste Services and requested their response to the TYJT analysis.
4. Rowe Engineering met with City Officials to review their response to the TYJT assessment and provided the attached report. In our judgment, Rowe adequately addressed the significant concerns raised by TYJT, including those related to pump station costs, land acquisition costs, legal, engineering and contingency estimates, and bonding costs. Consequently, it is our belief that the KWA proposal as outlined in October, 2012, is credible, and should continue to be used in evaluating the City's options.
5. Further, our review of the proposal from DWSD (December 21, 2012) raises questions which must be addressed. For example, the DWSD proposal indicates that the cost reductions would be phased in over five years. Further, no actual projected dollar amounts for the first year or subsequent years were included in the proposal. The City has asked DWSD, based on a projected water usage, to supply the City with projected dollar and unit costs over the next five years. The Detroit proposal also does not address projected future rate increases. (See attached Proposal and Rate information)
6. Based on the Proposal from Detroit along with projected rates for FY13 provided November 9, 2012 by DWSD, The City has developed a cost analysis of the following options:
    a. Detroit Proposal 1 with a 6.8% annual rate of increase
    b. Detroit Proposal 1 with a 4.4% annual rate of increase
    c. KWA based on the Rowe study

    It is important to note that a review of the City's records reflects a 10.5% average increase over the past 10 years. For the entire history of our contract with DWSD the average annual increase has been 6.7%. Note that the TYJT's analysis was based on the 2004 through 2014 years which showed a -7.4% rate increase in the first year (2004), while ignoring the 2003 year which showed a 38.1% rate

increase. The time period of 2002 through 2012 was used to calculate Genesee County' rate. (See attached Rate Analysis)

The City's projections for the above referenced options over the 30 year life is as follows: (See attached Cost Analysis)

a. Detroit Proposal 1 with a 6.8% annual rate of increase—$890,513,917
b. Detroit Proposal 1 with a 4.4% annual rate of increase—$705,602,181
c. KWA based on the Rowe study--$649,241,254

7. One of the options provided by TYJT on page 9 of their slides projects a rate of $11.11/MCF. If DWSD can provide that rate along with a guarantee of future rates not to exceed their projection of 4.4% over the life of the contract, the City would sign a contract with Detroit. It is the City's belief that the WSW would also sign a contract.
8. If the City of Flint signs a contract with Detroit the following provisions should also be agreed upon:
    a. The City would have a seat on the Technical Advisory Board
    b The City would have a seat on the DWSD board
    c. That the City could opt out if the conditions as Proposed by DWSD are not agreed to
9. All things being equal the City believes the following are also important:
    a. The availability of raw water to the City and County for economic development in heavy/light industry, food processing and agriculture
    b. The possibility of creating a Mid-Michigan Regional Water/Sewer Authority
10. For the sake of regional integrity, it would also be a step backwards for the City of Flint and Genesee County to be on different water supply systems. It is in the City's best interest to be able to pursue shared services with nearby municipalities and counties
11. The City would also reiterate the critical nature of long term costs. The City is not well served with decisions that work for the short term but not the long.

REVENUES

City services are funded by a mix of property taxes, income taxes, state and federal shared revenues, and fees, charges, and assessments. The current property tax rate for city services is 15.5 mills, or $15.50 for each $1,000 of taxable value. Residents and businesses also pay a 1% income tax, while non-residents pay one-half that amount, the limit set by state law.

The revenue stream supporting city services in this budget is different from the current year's in some significant ways:

- With property values continuing to decrease, property tax revenues are decreased by more than 20%. These revenues are decreased even further as the 3 mill levy for waste collection is eliminated in favor of a new waste collection fee designed to cover the entire cost of that service.

- State shared revenue remains at the reduced level legislated by the state beginning in FY12.

- Revenues from some major grant sources – the SAFER grant for firefighters and the MOTT grant for community policing – are not included, as there is no certainty those funds will be received.

- Revenues from a new city-wide special assessment will reduce the cost burden on the City's General Fund while providing funding for the operation, maintenance, and improvement of the City's street lighting system.

- Additionally, it is necessary to increase water and sewer rates significantly in order to have sufficient funds to operate the system. A system capable of serving more than 200,000 users is now utilized by less than half that number. The systems are old, in need of repair, and costly to maintain. Costs from the primary supply source - the Detroit Water System – have also increased significantly over the past several years. While there have been significant increases in rates over the past few years, they have not been sufficient to cover the operating costs of the systems. While there are currently significant and positive efforts being made to make the systems more efficient and cost effective, they will not affect the cost of operating the systems this year.

The impact of these changes in the revenue stream will vary on taxpayers, businesses and residents. Compared to the current year, many taxpayers will see an increase in their total payments for city services, with the amount varying to the extent that their property values have reduced.

However, when compared to total payments for city services made in 2005 – before the precipitous drop in property values began - many taxpayers will still be paying less. It appears that owners of property with a taxable value of more than $53,450 in 2005 will still pay less for city services in FY13 than they paid in FY2005. Property owners with a taxable value of less than $53,450 in 2005, however, will pay more for city services in FY13 than they paid even in FY2005.

Unfortunately, with the tools at hand for raising revenues at this time, it is not possible to spread the impact differently. Alternatives such as raising the property tax millage or the income tax rate require voter approval and, in the case of the income tax, state legislative approval as well. However, these alternatives are being evaluated for future use.

EXPENSES

The revenues collected pursuant to this budget will be used to provide a very basic level of services in the areas traditionally provided by the City. Police and fire protection and other public safety services, water and sewer service, trash collection, street maintenance and lighting, parks maintenance, building inspection, code compliance, demolition and other community development activities, will all be continued, although in different ways and at reduced levels. Citizens can expect that response times for certain services or requests for information will be slowed.

The City's workforce will be reduced by more than 20% and, unfortunately, layoffs will occur. The extent of these reductions has been lessened significantly with concessions obtained from employee bargaining units.

Reductions equivalent to 20% of the wage base have been negotiated with three of the six city bargaining units (IAFF, FPOA Sgts, and FPOA Command), and a final vote on similar concessions with AFSCME 1799 is pending. Concession discussions with AFSCME 1600 and FPOA Patrol continue, but no agreements have been achieved. This budget assumes implementation of similar concessions across all bargaining units and exempt employees.

Similarly, reductions in the cost of retiree health care are also anticipated. The cost for the City's 1,500 retirees is projected at nearly $25 million for FY13, an amount which severely constrains the ability of the City to provide services to its residents. The City has determined that there are alternative means by which health care can be provided to retirees but at a significantly reduced cost. The City intends to implement the less costly alternative and has incorporated more than $4 million in anticipated cost reductions savings into this budget. Without such cost reductions, the City's workforce will be reduced even further.

Within the context of these revenue constraints and overall expense reductions, a very basic level of services will be provided to the residents and businesses in Flint in 2013:

PUBLIC SAFETY

Police – With the continued loss of tax and grant revenue, the Police Department will be minimally staffed at a level of 108 sworn officers and 21 non-sworn personnel. This represents the current level of staffing less 19 officers funded by grants which have expired. Requests for continuation funding are in process but have not been approved at this time.

Given the financial condition of the City, funding at this level represents a significant commitment to pubic safety, but it is recognized that more must be done. In the ensuing year, the department will be transitioning to 12 hour shifts. This transition will reduce overtime expenses

and should increase the number of officers on patrol at any one time. The efforts of the FPD will continue to be assisted with continuing support from the Michigan State Police, and contracted services from Hurley Hospital and Kettering University. Aggressive efforts will be made to seek the renewal of grants and to seek additional permanent funding for this essential service.

911 - 911 Dispatch will continue at current staffing, while efforts continue to consolidate City and County dispatch operations. Communications with and between officers will be enhanced with the projected move to the 800 MHz system on July 1, 2012.

Fire - With the expiration of the federal SAFER grant, funding for 39 firefighters would be lost, potentially reducing total staffing in the Fire Department to 54. However, with the reductions in costs attributable to union concessions, and an assessment of the impact this would have on the ability of the City to provide virtually any level of fire response, staffing in this budget is at 62.

Given the staffing constraints, three of the current five stations will remain open pending the decision on the SAFER grant. In addition, with Genesee County now providing paramedic response, the City's paramedic personnel will be assigned to suppression.

The City is aggressively pursuing renewal of the SAFER grant and, should it be received, the number of stations in operation could be increased.

Court - As required by law, the City will continue to financially support the operation of the 68th District Court. Recognizing the financial circumstances of the City, along with the court's decreased caseload and offsetting revenues, court funding is reduced in this budget.

Lock-up – The City has been aggressively working to receive funding from the State of Michigan for re-opening the City Lock-up. At this time an operational plan is being developed as a condition for receiving consideration for funding. There are no City funds allocated in this budget for operation of the Lock-Up.

INFRASTRUCTURE

Water and Sewer - The expenses of the Water and Sewer system can be viewed in three categories – operations and maintenance, capital improvements, and purchase of water. Operational costs, in terms of personnel, have been reduced to the minimum necessary to operate the collection and distribution systems, but ongoing increases in compensation-related costs, such as pension and healthcare, make significant dollar reductions difficult.

Ongoing capital expenses are a necessity, as significant repair and replacement activities such as replacing broken water meters and keeping pump stations operational and in regulatory compliance, are necessary on an ongoing basis. Improvements are also necessary to improve the efficiency of operations, such as implementing remote monitoring of pump stations.

Finally, the purchase of water at ever-increasing rates is a significant cost of the operations, and while efforts to contain these costs are ongoing, they will not likely affect the cost of operations in FY13.

The costs of operations for water and sewer are projected at $85 million, with projected revenues at current rates totaling approximately $65 million. Recent rate increases do not generate sufficient revenues to cover the total costs of operations. Thus, in order to keep the systems financially solvent and provide funds for operation and maintenance, the overall rates for water and sewer will be increased in total by an average of 25%. Sewer rates are projected to increase by 45% while water rates are projected to increase by 12.5%. Even with this increase, it is not possible to set aside funds for pre-funding retiree health care, so formal balance sheets will still show deficits.

Waste Collection – The City has historically provided weekly trash pick-up for all residents, with the costs presumably paid from a special 3 mill property tax levy. However, the amount collected from the levy has reduced as property values have fallen, and costs of collection – personnel costs being a significant portion - have increased. As a result, the City's General Fund has subsidized the difference, by as much as $1.5 million in the past year.

Consequently, the 3 mill levy for waste collection will be discontinued, and a collection fee on residential properties will be implemented. It is anticipated that in the first year (starting July 1, 2012) the waste collection process will continue on a weekly pick-up schedule and will include composting. Fall leaf pick up will be restored. In the second year, it is expected that the waste collection service will be expanded to include recycling, and by that time a thorough evaluation of the means by which the service is carried out will be completed.

The fee for this service will be added to the property tax bill for owners of residential property, and is currently projected to be $143 in FY13, based on the projected cost of the service as reflected in the budget and the number of property owners billed. The amount will be adjusted on an annual basis to assure that it is reflecting the cost of the service.

Streets and Transportation – Funding for streets and transportation activities – with the notable exception of street lighting – is provided primarily from the state collected gas and weight tax allocated by formula to the City. That amount has been decreasing over the past years, making the ability to maintain local and major streets, sidewalks, and traffic control mechanisms very difficult. As with sewer and water, the City's road system is built to accommodate more than 200,000, and the City's population is now 102,000. This population drop has also contributed to the City's reduced level of gas and weight tax. As a result, the City's road system is currently rated a "3" on a scale of 1-10, demonstrating the effect of the lack of maintenance. The road maintenance activities for FY13 are focused primarily on preventive maintenance rather than targeted resurfacing, and will be chosen on the basis of most critical need and best return on investment.

Financing of infrastructure in the FY13 budget and beyond will be aided by use of a special assessment for street lighting, which is currently a general fund cost of nearly $3 million. The implementation of a city-wide special assessment district will provide for the operational costs of the current system and will enable upgrades and improvements to street lighting throughout the City. The assessment will be added to the property tax bill for all property owners, and is currently projected to be less than $100 per property in FY13. The amount to be assessed will be adjusted annually to reflect the projected cost for the operational, maintenance and improvement costs, and the number of property owners.

Parks - Maintenance of the City's 64 parks and its many trees in the rights of way will be funded primarily from the .5 mill special parks millage. Maintenance of the City-owned recreation/ community centers are also supported by the General Fund. Maintenance of parks, including play equipment, rights of way, and trees is minimal, and consists primarily of mowing, paying utilities, and responding to emergencies. There has not been any significant investment or maintenance of play structures in the parks for several years. Unfortunately, this level of investment will at best continue with the funds provided in this budget. Efforts will continue, as they have this year with golf courses, to find alternative ways to sustain the City's recreational assets. Continuing efforts will also be made to engage volunteers, neighborhood groups, and others to support specific parks and recreation centers.

Development - Building Inspection and Code Compliance activities will continue to the extent funds are available. Grant funds are budgeted at a reduced level to continue demolition activities and building inspection and code compliance fees are being reviewed again to see if the level and type of fees and fines are sufficient to cover costs and encourage voluntary compliance. In FY13, demolition activities will be done primarily by contractors in order that full cost recovery can be obtained from grant funds.

Planning and zoning activities will continue to the extent funds are available. Grant funds are budgeted to continue the upgrade to the City's master plan.

Community and Economic Development – Minimal ongoing financial support of economic development, in the form of CDBG funds, is also continued. Administration of the City's CDBG and NSP programs will continue, although grant funds are reduced. Evaluation of the administrative structure has resulted in reduced costs to the General Fund.

FINANCE AND ADMINISTRATION

All organizations have internal functions which support the delivery of services to the organization's constituency. In the City of Flint, these functions include assessing, accounting and budgeting, human resources, purchasing, information technology, risk management, fleet, facilities, treasury, and tax collections. Some of these functions are scalable to the size of the organization (such as human resources and risk management); others are not (such as tax billing and assessing). Regardless, with a decreasing base of business, and a corresponding reduction in workforce delivering services externally, there is compelling pressure to reevaluate processes and workforce numbers involved in all of these processes.

Changes are reflected in the size of the workforce appropriate to the current financial situation. It is also necessary to change internal processes to reflect an organization closer in size to 500 employees rather than 1,500. Changes beginning or planned include:

- Streamlined purchasing processes, including use of procurement cards for smaller purchases
- Simplification of processes for approving purchases
- Use of electronic means for processing payables and purchase orders
- Elimination of staffed stock rooms

- Changes in pension system administration and performance
- More reliance on Third Party Administration for workers' compensation related activities
- Elimination of manned security cameras where appropriate
- Evaluation of costs associated with custodial services
- More reliance on computer access for customer inquiries
- Consolidation of customer service functions
- More investment in technology to enhance productivity
- Commitment to funding necessary capital improvements which provide the workforce with proper equipment and facilities
- Implementation of a performance measurement system
- Commitment to rebuilding financial reserves by annual appropriation to a Budget Stabilization Fund

PUBLIC IMPROVEMENT FUND

The City Charter requires setting aside the proceeds of a 2.5 mill levy for the purposes of capital improvements and debt service. For the foreseeable future, these funds will be dedicated solely to current and anticipated debt service. A significant increase is expected as the City recognizes the need to increase its share of debt service for the downtown parking ramp debt, for making its required debt service of the initial Fiscal Stabilization Bonds, and for incurring future debt associated with additional bonding to alleviate the accumulated General Fund deficit. For FY13, it is projected that approximately $1 million will be available for the new debt service associated with additional Fiscal Stabilization bonds; in FY14 the amount available for debt service is projected to grow to approximately $1.5 million as current debt service for equipment ends.

GOVERNANCE AND OVERSIGHT

Core offices associated with governance and oversight traditionally include Council, Mayor, Administrator, City Attorney, City Clerk, Ombudsman, and Civil Service. Under receivership, there is also an Emergency Manager.

Several changes resulting in cost reductions were implemented by the Emergency Manager. These include: a reduction in salaries for the Council and Mayor, elimination of funding for the Ombudsman and Civil Service Commission, and the appointment of personnel to assist, either paid only on an hourly basis without fringe benefits, or loaned from another source. These cost reductions are continued in the FY13 budget.
Additionally, the costs of issuing business permits through the City Clerk's Office indicate that the costs of administration appear to significantly exceed the revenues collected. It will be necessary in the future to either reduce costs or increase permit fees to offset this imbalance.

CONCLUSION

The financial decisions made in this budget are significant but unavoidable. The budget reflects difficult decisions on the part of administrators and employees made to enable the City to provide services in FY13 at the levels its resources allow. The service levels will be low and not at a level anyone finds acceptable over the long term.

These decisions, however, provide the basis for going forward in a positive way. The budget is realistically balanced, with full expectation that when June 30, 2013 arrives, the City will not have once again spent more than it has taken in. It will have also put into place the financing to address the accumulated deficits of the past. Significant progress is being made to achieve financial solvency.

While there will certainly be financial challenges, decisions made in this process will assist in going forward. The decisions regarding employee compensation not only helped to address the short term financial challenge, but will assist in controlling expenses in the future, as the growth in future unfunded liabilities is slowed.

If the City government of Flint is to be a positive force in making Flint a safe and attractive place for residents, businesses, and visitors, it must have its own house in order. It cannot teeter on the edge of financial insolvency and hope to lead the way.

BUILDING THE FUTURE

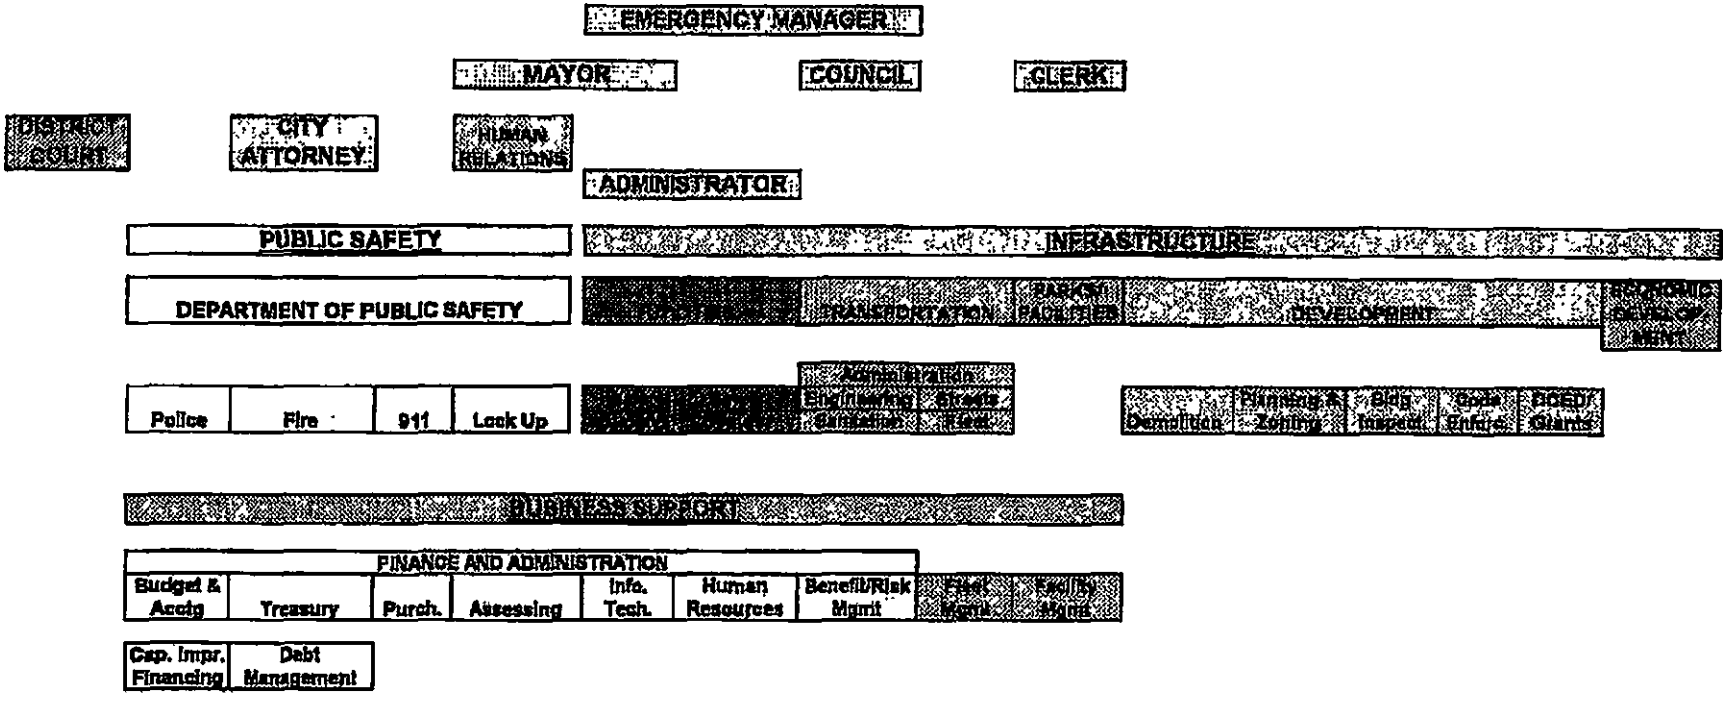
The focus of the 2013 budget process remains on the future of Flint. While this budget includes sharp reductions in both revenues and expenses, WE SEE HOPE FOR THE FUTURE.

These hopes are based on some very tangible and promising factors:

- Expense reductions are designed to live with current realistic revenue projections;
- New revenue options for fiscal year 2014 and beyond will include actual fees for services, special assessment districts and other revenue options;
- Partnership with the State Police and other law enforcement agencies will be expanded to create a safer environment for our citizens;
- Additional resources will be secured to house individuals who are continually abusing our residents in the neighborhoods; the City Lock-up will open and remain open;
- New public and private partnerships will be developed to provide waste collection services, senior citizen services, youth employment and training programs;
- Internal City operations will be improved in regard to finance and accounting, more efficient operation of licensing and permitting, and expanded training for our employees, including supervisory training;
- The City's information and technology capability will be improved, enhancing the capacity throughout the City, from paying bills on time to public safety issues faced by our police and fire operations.

As the City moves beyond the 2013 budget year, and the management of our affairs improves, citizens will see better response times from police, removal of individuals who are harming our children and seniors from our neighborhoods, improved code enforcement at homes owned by absentee landlords and expanded opportunities for our young people.

CITY OF FLINT - ORGANIZATIONAL CHART



Cost Calculation Methodology per Unit for KWA Debt Service - ALL PAYMENTS ARE ESTIMATED

		years 2017 through 2038		years 2039 through approx. 2041		year 2042 and later
Payment on 2013 Intake Bonds		2,528,000		0		0
Payment on 2014 A KWA Bonds		15,165,200		15,168,788		15,165,250
Payment on 2014 B KWA Bonds		5,210,000		7,229,450		7,234,575
Total Payments		20,375,200		22,398,238		22,399,825
Genesee County Share	42	70.00%		70.00%		70.00%
City of Flint Share	18	30.00%		30.00%		30.00%
Total Units	60					
County Share of KWA Bonds	70.00%	14,262,640	70.00%	15,678,766	70.00%	15,679,878
Less Credit for 30% of Intake Bonds Debt Service		-758,400		-733,980 [1]		0
County Adjusted Share of KWA Bonds	66.28%	13,504,240	66.72%	14,944,786	70.00%	15,679,878
Units of Capacity		42		42		42
KWA Cost per Unit		321,530		355,828		373,330
Flint Share of KWA Bonds	30.00%	6,112,560	30.00%	6,719,471	30.00%	6,719,948
Plus 30% Share of Intake Bonds Debt Service		758,400		733,980 *		0
Flint Adjusted Share of KWA Bonds [2]	33.72%	6,870,960	33.28%	7,453,451	30.00%	6,719,948
Units of Capacity		18		18		18
KWA Cost per Unit		381,720		414,081		373,330

[1] Equal to 1/37th of 30% of first 3 year's and 1 month debt service on Genesee water intake bonds multiplied times 12 months ($7,543,648 x 30% / 37 = $61,165 per month x 12 months) until # of months is reached from intake bonds Oct 1, 2013 issuance to date KWA begins supplying raw water.
[2] The total of Flint's payments for intake bonds will be $18,955,726.17 which is 30% of the intake bond's debt service

Formulas for the above calculations follow

Years 2017-38 - A Year is defined as payments due May and November of each calendar year
Intake Bonds Credit Calculation. (30% of Intake Bonds Debt Service)
County Cost per Unit Calculation: ((70% of KWA Debt Service minus Intake Bonds Credit) divided by 42 units)
City Cost per Unit Calculation: ((30% of KWA Debt Service plus Intake Bonds Credit) divided by 18 units)

Years 2039 through Approximately 2041 - A Year is defined as payments due May and November of each calendar year
Intake Bonds Credit Calculation. (See note 1 above)
County Cost per Unit Calculation: ((70% of KWA Debt Service minus $61,165/month Intake Bonds Credit) divided by 42 units)
City Cost per Unit Calculation: ((30% of KWA Debt Service plus $61,165/month Intake Bonds Credit) divided by 18 units)
Intake Bonds credit will be $61,165 per month or $733,980 per year until Flint's total debt service obligation of $18,955,726.17 has been satisfied.

Years 2042 and beyond - A Year is defined as payments due May and November of each calendar year
If the City's obligation on the Intake Bonds is not entirely satisfied, continue as above Otherwise:
County Cost per Unit Calculation: (70% of KWA Debt Service divided by 42 units)
City Cost per Unit Calculation: (30% of KWA Debt Service divided by 18 units)

The above methodology depicts recovery of Flint's 30% of debt service on the 2013 water intake bonds from January 1, 2039 through the number of months Genesee County made intake bond payments on Flint's behalf before KWA becoming operational. Initially, Genesee County will pay 100% of the intake bonds debt service. At the time KWA becomes operational, the City of Flint will begin paying 30% of the intake bonds debt service and continue making payments after the intake bonds have been repaid for the number of months from October 1, 2013 when the intake bonds were issued until the KWA system becomes operational. The above calculations are for illustration only. Actual payments will be determined after the KWA bonds have been issued and when the project becomes operational with regard to Flint's contributions for the Intake Bonds which begin in 2039 and will continue until the obligation is satisfied.

Contractual payments from Genesee County and the City of Flint will be due to KWA in 12 monthly installments beginning on the November 1 prior to the following calendar year's bond payments, and continuing through October 1 such that each year's annual KWA bond payment obligation (due May 1 and November 1) is on hand at least one month prior to KWA's bond payment dates.

DEFICIT REPORTING FORM

Last Updated May 1, 2014

Unit No. 25-2-040
Name City of Flint
Fiscal Yr. 06/30/2014

Approvals	Reviewer	Manager
Initials	JPS	
Date	1/26/2015	1-29-15

Sue F. McCormick & DWSD Board
Director DWSD
735 Randolph Street
Detroit, MI 48226

Dear DWSD Board:

During the past nine months we have had several discussions with DWSD representatives regarding future water rates and other options including permission for Flint to blend treated water from DWSD. Flint currently has received written documentation from the state regulatory agency DEQ supporting the ability for Flint to safely blend treated water from Detroit.

In an effort to move forward we must have a written response from the DWSD Board that clearly states the following:

Will DWSD allow Flint to blend treated water from Detroit?

What are the rates given an estimated usage by Flint and Genesee County of:

- 23 MGD Average Daily Usage
- 40 MGD Maximum Day Usage

We are requesting this information be delivered to Flint no later than **October 1, 2012** so that we may evaluate all of our options and begin moving forward.

Sincerely,

Edward J. Kurtz
Emergency Financial Manager

Subject: Genesee Water Project - City of Flint

Follow Up Flag: Follow up
Flag Status: Flagged

Rick Hammel just called to find out if Flint will participate in this project. I think we owe it to the proponents to give them an answer. Concern I had/have was based on what the engineering firm Tucker Young told me, i.e., that all the costs were not put into the analysis that supported the project. I think we should ask Tucker Young to help us review the rationale and get one of our CPAs to crunch some numbers. I saw we recently hired TY and suspect they will do some preliminary analysis pro bono.

Dennis, I understand Dept of AG may support this project so we may consider having them at the table as we work through this.

Lake Huron Water Supply Study

Karegnondi Water Authority

- City of Flint
- Genesee County

Appendix 20
October 2012 Preliminary Engineering Report Update
Final Report

October 4, 2012

DRAFT

42

ROWE PROFESSIONAL SERVICES COMPANY
540 S. Saginaw Street Suite 200 P.O. Box 3748 Flint, MI 48502

20.1 Introduction

The September 2009 Preliminary Engineering Report – Lake Huron Water Supply (2009 Study) compared alternatives for a new regional water supply. Since the 2009 Study, Genesee County and the City of Flint have continued planning and confirmed the capacities to be provided for each. This memorandum updates the capital costs for the proposed new water supply based on the confirmed capacities.

20.2 KWA Water Supply

Ongoing planning has resulted in modifications to the preliminary design developed in the 2009 Study. This cost update is based on the modified preliminary design. For this update, the KWA water supply is assumed to include the following primary components:

- Water Supply Intake
- Lake Huron Pumping Station (LHPS)
- Transmission Mains (Segment 1, Segment 2, and Flint Segment)
- Intermediate Pumping Station (IPS)

It is assumed that the new KWA supply will deliver raw water to a new WTP constructed and operated by Genesee County in western Lapeer County and to the City of Flint's existing WTP. Construction of the new GCDC-WWS WTP and needed upgrades to the Flint WTP will be the responsibility of each agency and these costs are not included in KWA costs.

20.3 Economics

Costs are based on the following criteria:

- Assume construction occurs in 2013 through 2015
- Assume construction is financed by 25 year bonds at a rate of 5%
- Assume engineering, legal, administration, and contingencies are 25% of construction cost
- Adjust construction costs to the current Engineering News-Record Construction Cost Index (ENR CCI) which in August 2012 had a value of 9351

Costs for pump stations and the intake have been updated based on the current design concepts. New material costs for pipe have been obtained from pipe suppliers. Pipe sizes and lengths are revised from the 2009 Study based on providing service only to GCDC-WWS and the City of Flint.

20.4 Capacities

This update is based on providing the following Maximum Day Demands:

GCDC-WWS:	42 mgd
City of Flint:	18 mgd
Total:	60 mgd

Maximum day demands include WTP process water.

20.5 Design Criteria

Based on current market conditions, it is assumed that ductile iron pipe will be used for pipe sizes smaller than 48" diameter and that pipe having a diameter of 48" or more is steel pipe. Pipe is designed assuming a Hazen Williams coefficient of 120 and a maximum operating pressure of 200 psi.

20.6 Reliability

It is assumed that the KWA will provide only the primary raw water supply to each agency's WTP. GCDC-WWS and the City of Flint will each be responsible for their backup water supply for reliability.

20.7 Water Supply Details

Following is a summary of the primary components of the planned KWA water supply. Revised construction costs are based on the following assumptions regarding the planned water supply.

- *78" diameter intake pipeline, extending about one mile into Lake Huron* – Two timber crib intakes are provided each having a capacity of 60 mgd and located in 25 deep water. The intake pipeline has provisions for extension and designed for a capacity of 85 mgd. Both intakes are provided with chemical feed provisions to control zebra mussels.
- *Lake Huron Pump Station (LHPS)* – Four 14,000 gpm vertical turbine pumps with constant speed motors are planned. Pumps will draw from one of two clear wells, each provided with separate screens. No backup power is planned for the pumps; a redundant power supply from the utility is planned to maintain lights and controls in the event of loss of the primary power supply.
- *Transmission Main Segment 1* – 121,000 lf 60' pipeline will convey water from the LHPS to the Intermediate Pumping Station (IPS) reservoir, located midway between Lake Huron and a new water treatment plant (WTP).
- *Intermediate Pumping Station (IPS)* – The IPS is assumed to provide four 14,000 gpm constant speed horizontal split case pumps to pump water from the IPS reservoir to the GCDC-WWS WTP. The IPS reservoir is planned to be an open top, 5 million gallon ground storage tank. The reservoir will allow for balancing of variations in the pumping rates between the two pump stations. No backup power is planned for pumping. A generator is planned to provide lights and maintain controls in the event of loss of power from the utility company.
- *Transmission Main Segment 2* – The IPS will pump water to the GCDC-WWS WTP through 148,000 lf of 60" pipeline.
- *Transmission Main Flint Segment* – 96,000 Lf of 36" transmission main will be provided to convey water past the GCDC-WWS WTP to the City of Flint's existing WTP.

20.8 Project Cost

The updated project cost for the proposed water supply is $272,000,000. Figure 1 provides a summary of the costs. Annual principal and interest payments for the project are estimated to be $19,300,000 for a total of $483,000,000 over the life of the 25 year bond period. The annual unit cost is estimated to be $322,000 per each 1 mgd of total capacity.

Figure 1 - KWA Water Supply Project Cost

	Unit Cost	Quantity	Total
Intake			
Timber Crib	$1,050,000 Each	2 Each	$2,100,000
Intake Pipe - Marine Construction	$2,120 / LF	5,655 LF	$11,988,600
Intake Pipe - Tunnelled	$2,200 / LF	1,235 LF	$2,717,000
Shorewell	$3,500,000 Each	1 Each	$3,500,000
Zebra Mussel Control	$75 / LF	10,800 LF	$810,000
Site Work		1 LS	$961,250
Intake Subtotal			$22,076,850
Pumping Stations			
Structure	$3,338,300 / Each	2 Each	$6,676,600
Pumps & Equipment	$1,716,840 / Each	2 Each	$3,433,680
Piping & Valves	$1,812,220 / Each	2 Each	$3,624,440
Electrical	$4,387,480 / Each	2 Each	$8,774,960
5 MG Reservoir	$1,606,400 / Each	1 Each	$1,606,400
Reservoir Sitework / Appurtenances	$502,000 / Each	1 Each	$502,000
Pumping Station - Subtotal			$24,618,080

Project Summary

ROWE
10/5/2012

AGENDA

October 15, 2012

I. The City has made substantial progress – see attached file

II. Law suits and Labor charges
   a. Outsourcing
   b. Water
   c. Retiree Health care
   d. Surviving spouse health care

III. Continuing decline in revenue (four year projection)

IV. On-going Concerns
   a. $16.7 million General Fund deficit – remains unaddressed
   b. OPEB unfunded liability reduced to $350 million
   c. Pension under-funding of $450 million

V. Surprises
   a. HUD paybacks, CDBG
   b. County charge back

VI. Assistance Needed from State
   a. Continued funding for the City lock-up
   b. Statutory authority to raise City income tax

VI. Plans for outcome of November election

MAJOR PRIORITIES OF THE CITY OF FLINT

1. Implement Waste Collection Contract **November 1**

Received three responses to the RFP and currently negotiating with two of the three. Expect to have a contract signed by November 1 for implementation to begin January 1, 2013

2. Implement Demolition Plan/Contracts **October 15**

Bids were received on October 10. Between The City and the Land Bank we plan to demolish 600 to 700 properties by February 10, 2013. Plan to sign contracts the week of October 15th. The City is concerned about meeting the HUD deadline.

3. Start New Construction at Smith Village **October 1**

Negotiated a final settlement with the second developer and have received the deeds for Phase I. A new (3rd) developer has been contracted and construction on Phase II has begun. Phase I which consisted of 29 homes has many code violations that prevent occupancy. A detailed list of each property's violation has been compiled and developer three is in the process of correcting these problems. There are 10 purchase agreements and the City hopes to have the buyers' in their homes by the end of the year. Had a very good meeting with HUD on October 11, and they are in agreement with the City's direction. The plan is to have 39 homes completed by February 12, 2013. Expect that within two weeks to take this off the priority list.

4. Budget Review and Amendment **October 1**

Completed a first quarter review of the FY13 budget to actual and did not need to make a budget adjustment. The areas of concern are softer than expected income tax revenue and overtime in the fire department. (See attached Financial Progress Report)

5. Chevy in the Hole **January 1, 2013**

For the past several years, the City has been dumping its compost at a site known as "Chevy in the Hole". It is a contaminated former GM location which has now been cited by the EPA and the DEQ. We must now submit plans to deal with the water run off and implement corrective action. There is a plan for the 130 acre site and funds available from GM for the process.

6. Contract/Commit All HUD Funds **October 15**
(DCED, NSP2 and 3 focus)

The CDBG area within the City can best be described as struggling. Under previous administrations many of the HUD funds have been spent on ineligible expenses and the City entered into an agreement with HUD to pay back slightly more than one million dollars.

7. 800 MHZ/911 Merger **November 1**

All police and fire mobile and portable radios have been purchased, received and templating is being finalized. The Flint 911 Center will transition to 800 MHz operation with consolettes before December 31. The microwave point to point installation will be

completed in 2013. The currently available towers failed structural testing. A new tower needs to be purchased and installed. This is delayed due to funding, NEPA studies and FAA approvals.

The potential for 911 reconsolidation is being studied by the Training and Advisory Team from MSU College of Criminal Justice, paid through a Mott Foundation grant. This study is expected to be complete by the end of 2013.

8. Open Lockup **October 1**
The lockup was opened on October 1 with management by the Genesee County Sheriff and appears to be operating smoothly. (Note: Occupancy rates are lower than anticipated)

9. Complete FERS to MERS/ Retiree Healthcare Changes **October 1**
The FERS to MERS transfer has been mostly completed. The last check from the City was October 1 and the first check from MERS will be on October 18. There is still an outstanding lawsuit challenging this transition.

Retiree Healthcare changes have been implemented. There is also an outstanding lawsuit challenging this as well.

10. SBI Decision **September 15**
Swedish Biogas International was turned down by the Mott Foundation for financing to expand their operations. The City has a contract with SBI to treat waste and convert it into gas. However, as the price of gas fell dramatically and the level of sludge was less than anticipated the SBI operation has not been profitable. SBI has sought additional financing to expand their operations and thereby to allow the City to eliminate the need to incinerate sludge. Right now the relationship between the City and SBI is untenable.

11. Weekly Press Briefings **September 12 and each Wednesday after**
Briefings began as planned and are ongoing.

12. Decision on Water/KWA **November 1**
This is the number one priority for the City. The City has entered into a series of Friday afternoon meetings with the Drain Commissioner on this issue. The first decision is whether or not the City will become a partner in Karagnondi Water Authority (KWA) for the delivery of raw water. If so, will the City also partner with the County on the construction of a water treatment plant in the eastern section of the County or use its existing plant to treat water? Also, as part of that decision, what will happen to the Flint water treatment plant, etc? The City is still waiting for a final answer from the Detroit Water and Sewerage Department on the issue of blending water with Flint River water.

13. Senior Center Plan **November 1**
The City has not done a very good job of operating the Senior Centers. To that end, the City has put out an RFP seeking independent operators of the Centers.

OTHER ISSUES

1. Street Light Assessment District (*Completed*)
2. Indigent fund for water (no action)
3. EVIP Dashboard, Citizens guide, Projected 2014 budget due Oct 1 (*Completed*)
4. Labor Contract implementation (complete but with many grievances and an unfair labor practice charge pending)
5. Boards and Commissions (Mayor)
6. MSU Med School (Genesee County Chamber of Commerce)
7. Quarterly Report to Treasury (*Completed*)
8. Next step on Genesee Towers (Demolition)
9. Impound Lot Evaluation (*Completed*)
10. Criminal Justice Policy Council Meeting (complete and ongoing)
11. Neighborhood Projects with Metro (Contract in Law Office)
12. Neighborhood Safety/Blight Elimination Officers (no action)
13. Golf Courses (under contract with independent operators, plan to extend contracts for five years)

The City of Flint in Receivership: A Progress Report, October, 2012

For the second time, the City of Flint is in receivership due to its financial condition and is being managed under the direction of a state appointed manager. Pursuant to PA4, Mr. Michael K. Brown was appointed in December, 2011 as the Emergency Manager. When PA 4 was suspended in August, 2012 as a referendum on the question of the continuation of PA was certified, Mr. Edward Kurtz was appointed as the Emergency Financial Manager pursuant to PA72.

In spite of the controversy surrounding the use of PA4 and the subsequent reversion to PA72, significant progress has been made in addressing the City's financial situation. Cash flow is currently stable, although marginal, and city operations are operating at the end of the first quarter of FY13, consistent with the adopted budget, which was constructed and balanced on the basis of realistic revenue and expense projections. However, the projected accumulated General Fund deficit of $16.7 million as of June 30, 2012 has yet to be addressed.

The necessary steps taken to reduce the City's deficit spending and to implement a balanced FY13 budget have included organizational changes and more than $42 million in combined revenue increases and expenditure decreases. City taxpayers are paying more, the workforce has been reduced by 20%, compensation for the remaining employees has been reduced by the equivalent of 20% of wages, and health care and retirement benefits have been restructured for both active employees and retirees. Of particular note is that the City's OPEB liability – one of the highest in the state – has been reduced by more than 50%. Health care costs for employees and retirees are now below the caps set by state law.

Public safety has consistently been of paramount concern to Mr. Brown and Mr. Kurtz. In spite of these changes, it has been possible to retain the FY12 level of police and fire staffing, to re-open the city lock-up and to make progress towards improving the capabilities of the 911 Dispatch Center.

The changes now in place have not been without controversy. Lawsuits are pending with respect to changes in retiree health benefits, the restructuring of the pension system, and the imposition of increases in water and sewer rates. Unfavorable rulings on some or all of these lawsuits (total exposure of some $30 million) will create a financial crisis which will be difficult, if not impossible, to resolve and still continue to provide even the most basic of city services.

Even without the prospect of unfavorable decisions with respect to lawsuits, the financial challenges will continue. Property values –and thus property tax revenues- are projected to continue to decline, with a 15% reduction currently forecast for FY14. However, the steps taken to date provide a firm base from which to address these future challenges and enable the City government to become a positive force in restoring the community of Flint.

Overview: The City of Flint in Receivership: A Progress Report

The City of Flint has been in a precarious financial situation for many years. In 2002, the City was in receivership, and was managed for several years under a state appointed Emergency Financial Manager. Finances were stabilized briefly by 2004, but declined again as population continued to decrease; as an increasing number of residents saw incomes drop below the poverty level; as employment reduced significantly due to General Motors workforce reductions; as property values (and thus tax revenues) declined significantly; as the State reduced revenue sharing; and as the effects of the Great Recession hit Flint.

These realities significantly impacted city revenues while the costs of city operations (employment related costs in particular) continued to increase. In spite of significant cost reductions, including staffing reductions, the City's financial situation declined to a point where in 2011 the City was again placed into receivership and a state appointed Emergency Manager was assigned to manage the City.

At the time that an Emergency Manager was appointed, the City's accumulated general fund deficit was $8.8 million. The accumulated deficit from the prior year (June 30, 2010), was $14.6 million, and was reduced to $8.8 million by June 30, 2011 only because of the borrowing of $8 million in Fiscal Stabilization Bonds.

Upon taking managerial control of the City in December 2011, the EM quickly discovered that the Council approved FY12 budget was faced with significant problems, due to inaccuracies in projecting both revenues and expenses. As a result, it was determined that the City would likely have an accumulated deficit of $18.2 million as of 6/30/12.

With the FY12 half complete at the time the Emergency Manager was appointed, it was clear that significant long term solutions to the City's financial condition could not be achieved in the remainder of that fiscal year. Addressing any significant reductions in January, 2012, would have required unthinkable reductions in the level of public safety and other essential city services, and would have been done in an atmosphere of crisis. As a result, it was determined to contain spending as much as possible for the balance of FY12, while building a credible spending plan for FY13 and laying the necessary groundwork for substantially reducing the City's cost base for FY13 and beyond.

At this time, the FY12 fiscal year has ended and the city is in the process of closing its books. Preliminary statements show that the accumulated deficit of $8.8 million as of June 30, 2011 will be increased as a result of expenses in FY12 exceeding revenues, but short of the $18.2 million projected earlier in the year. The preliminary accumulated deficit as of June 30, 2012 is projected to be $16.7 million.

Addressing the City's financially distressed situation required that the FY13 spending plan be balanced with realistic revenue projections and realistic calculations of expenses.

As the process of developing the FY13 spending plan began, the preliminary estimate of the gap between revenues from current sources and the cost of existing positions and services was projected to be more than $25 million. Plans were developed to bring spending into line with revenues, while at the same time continuing to provide the current (but inadequate) level of public safety resources, and containing the FY12 deficit as much as possible; as a result, it was necessary to develop both significant revenue increases and expenditure reductions. This included the imposition of increased and new fees, elimination of positions, imposition of wage and benefit reductions, and restructuring of active and retiree health care insurance. These steps were necessary to keep the City of Flint from becoming financially insolvent and unable to provide even the most basic of city services.

The necessary steps taken to reduce the City's deficit spending since December, 2011 and to implement a balanced budget for FY13 include a total of more than $42 million in combined revenue increases and cost reductions. They include:

Expenditure reductions of $22.75 million:

- $650,000 annual savings from the elimination of administrative positions (implemented in December, 2011)
- $8.6 million in annual savings from negotiated and implemented employee concessions (Implemented in June, 2012 following negotiations)
- $10.0 million in annual savings from the elimination of 115 positions (20% of the workforce, implemented in the FY13 budget)
- $3.5 million in annual savings from changes in the structure of retiree health care (implemented beginning in August, 2013)

Revenue Increases of $19.35 million:

- $15 million from imposition of increased fees for water and sewer
- $1.5 million from imposition of increased fees for garbage collection in lieu of a 3 mill property tax levy
- $2.85 million from imposition of a city-wide street light assessment

Other changes include a reshaping of the City's organizational structure, a transfer of the City's retirement system to the Municipal Employees Retirement System, and a decision that new employees will not be offered employer paid retiree health insurance. The organizational changes will enable more efficient administration of city functions and the transfer of the retirement system will result in administrative cost reductions, increased investment income, and improved service to retirees.

The FY13 budget is balanced on realistic revenue and income expenses, but does not address the elimination of the accumulated deficit, now totaling $16.7 million. Any significant reduction in anticipated revenues or the occurrence of unplanned expenses will create a crisis, as the city has no reserves. For example, being required to restore the previous structure of health care for retirees will result in an unplanned increase in health insurance costs of $3.5 million, and would require immediate staffing reductions. Likewise, a rollback of the increased fees for water and sewer would necessitate an approximate 20% decrease in the expenses of the water and sewer system or an unplanned appropriation of $15 million from the City's General Fund.

Either of these occurrences would be devastating and would no doubt significantly impair the ability of the City to provide the most basic of City services, public safety in particular. With public safety costs consuming 70% of the City's $60 million General Fund Budget, it would be virtually impossible to eliminate $3.5 million or $15 million in expenditures without reductions in police and fire. The 115 positions eliminated in the FY13 budget came from virtually every department of city services except police and fire, so further reductions in those areas would no doubt require the virtual elimination in services such as code compliance, blight inspection, and parks. It is questionable whether the City government, in these situations, could continue to operate.

While these changes have made substantial and significant progress in restoring the City of Flint's financial solvency, the struggle is not over. Continuing declines in property values are forecast for the next several years, with a 15% decrease currently projected for the next budget year. While other revenue sources may remain stable, assuming the economy remains stable; the City will be faced with cost increases exceeding available revenues. Regressing from current steps taken to contain and reduce costs will only worsen an already challenging situation. And while the City government itself continues to face it's most pressing and immediate financial challenges, it is less able to take any substantive role in returning the community of Flint to a healthy condition.

EM/EFM Achievements to restore financial solvency to the City of Flint

December, 2011 - October, 2012

Achievements	Status	Achievement	Challenges
FY 11 audit completed	Complete	Completed by statutory deadline	Progress of addressing auditors recommendations will be reviewed as part of FY12 audit; staffing reductions have hindered progress.
FY11 Deficit Elimination Plan developed and approved	Complete	Approved by state	No state authorization for borrowing, although contained in the approved DEP. The accumulated deficit cannot be addressed without additional borrowing
FY12 budget managed to initial expectations	Complete	FY12 deficit is projected to be $16.7 million, which is $1.5 million less than the initially projected $18.2 million	Final results not yet available; audit completion scheduled for early December. Potential of significant adjustments exists, but not likely. The General fund has significant negative cash, reflecting the accumulated deficit condition of the City.
Employee compensation costs reduced	Labor contract changes implemented	Employee compensation costs reduced by an equivalent of 20% of wages	While some cost reductions were negotiated, others were imposed under authority of PA4. Some of the changes may become subject to legal challenge. Numerous grievances have been filed with respect to the changes made.
Employee and retiree health care costs reduced	Restructured health care plans for employees and retirees implemented	Average health insurance contract cost to City reduced 24.5%, from $12,202 to $9,218; cost is less than state cap	While some cost reductions were negotiated, others were imposed under authority of PA4. Some of the changes are currently the subject of lawsuits. There may additional legal challenges depending on the voter decision on PA4.
OPEB liability reduced	Restructured benefit structure implemented and new OPEB valuation completed	City's OPEB liability reduced by nearly 60%, from $885m to $350 million. ARC reduced from $63.6 million to $24.4 million.	While many of the employee healthcare changes were negotiated, others, including changes in retiree health care were imposed under authority of PA4. Retiree health care changes are currently the subject of lawsuits. There may be additional legal challenges depending on the voter decision on PA4.

Flint Employees Retirement System transferred to Municipal Employees Retirement System	The majority of assets of FERS have been transferred to MERS, and MERS will make its first payment to Flint retirees on October 18.	The transfer is projected to significantly reduce administrative costs, improve investment return, and improve service to Flint retirees	While the FERS Board officially authorized the transfer, some members had been replaced by the EM under his authority granted by PA4. The transfer of the system is currently in litigation.
FY13 budget developed and implemented	FY13 began July 1, 2012. First quarter complete with most indicators in line with expectations.	FY13 budget balanced at $192 million, utilizing a mixture of revenue increases ($19.4 million) and expenditure reductions ($22.8 million) while maintaining current level of police and fire staffing. Total workforce reduced by 115 FTE;s, or 20%	$12.1 million in cost reductions associated with employee concessions and retiree health care are incorporated in to the budget. So too is $15 million in water and sewer rate increases, $2.85 million in a new street lighting assessment fee, and $5 million in a new waste collection fee. All are or may be subject to legal challenge, with potential results devastating to the City's budget. There are current legal challenges pending with regards to retiree healthcare changes ($3.5 million) and the water and sewer rate increases ($15 million).
Cash flow stabilized	Cash flow monitored monthly, and is stable	Cash flow stabilized with addition of new non-property tax based revenue sources	Successful legal challenges to revenue and expense changes will negatively affect cash flow, which while currently stable, is minimal. The city has no reserves and the General Fund cash position is negative.
Water and sewer finances stabilized	New rates and staffing levels implemented. Evaluation of alternative means of purchasing water underway	Water/sewer rates and expenditure reductions result in balanced financial operations.	Successful legal challenges to the increase in rates could take away $15 million in revenues, and would destroy the financial solvency of the system.
Waste collection finances stabilized	New rates implemented. Decision to be made before end of October on potential use of outside vendor	Insufficient property tax millage replaced with fee reflecting actual costs. Service expanded to provide recycling and composting	Successful legal challenge to the new fee could result in a $5 million revenue loss to the City, and would eliminate the ability of the City to provide this service.

Scope of Ineligible grant expenses assessed and addressed	City has negotiated the potential repayment of more than $2 million in ineligible grant expenditures	The FY12 financial statements include the City's General Fund obligation for repayments, currently projected at $1 million; the remainder is being repaid by returning unspent grant funds	Findings of any additional ineligible grant expenses requiring a General Fund appropriation will negatively affect the City, since there are no funds budgeted for such event and no reserves. Given the current history of unanticipated findings, it would not be a total surprise to receive additional notices.
Police and fire staffing levels stabilized	Continuation of FY12 staffing levels contained in FY13 Amended Budget. A request for voter approval of a 6 mill property tax increase dedicated to police and fire is on the November ballot.	FY13 budget, with addition of SAFER grant and COPS funding, provides for continuation of current staffing. Changes in work schedules to 12 hour shifts increases response time. Commitment of additional MSP resources also assists.	Successful legal challenges affecting the revenues of the City will affect the ability of the City to maintain the current level of staffing. Lack of voter approval of the 6 mill increase will mean reductions in staffing, beginning in January, 2013. With further property value declines expected in future years (15% in FY14, 10% in FY15, 7% in FY16), the ability of the City to even maintain the most basis of city services is in question.
City Lock-up re-opened	City Lock-up opened first of October	Re-opening of lock-up provides FDP officers with space to house arrestees.	Re-opening of the lock-up was made possible only by the financial assistance from the state. It will not be possible for the City to operate the lock-up with its own resources for many years.
Genesee Towers Sold	Complete	Although sold for $1, with a pledge of committing $775,000 in grant funds towards demolition, the City received commitment that the structure would be demolished at an estimated cost of $4 million.	Part of the consideration in selling the property was for its potential future use in promoting economic development, and in having the building demolished in the near future. The success of this is subject to many factors outside of the direct control of the City, and progress could be slower than anticipated

City of Flint Police and Fire Budget 2012 – 2017
Securing Stable Funding

What is the City's objective?
We want to reduce crime in the Flint community. To accomplish this, the city must stabilize and then strengthen its police and fire staffing levels. We want more police officers on the street and we want to maintain our fire department staffing.

How are you going to improve police and fire protection?
To improve police and fire protection for the citizens of Flint, it is necessary to obtain additional funding. There are two potential sources of funding available: a property tax and an income tax. The two taxes jointly implemented would create a stable revenue stream that would sustain the current staffing levels and leave room for expansion. An ordinance which commits 55.5 percent of all future General Fund revenues to support police and fire budgets would be adopted.

On November 6 voters will be asked to approve a 6 mill property tax increase, with the new funds guaranteed for the exclusive use for public safety. In January 2013 the state legislature will be asked to approve legislation giving Flint voters the right to vote on increasing the local income tax. The tax would increase from its current 1 percent for residents and 0.5 percent for non-residents to 1.5 percent for residents and .75 percent for non-residents.

What will a 6 mill property tax increase cost the average homeowner?
The average taxable value of a residential property in Flint is currently $13,131. Therefore, a 6 mil increase would cost the average taxpayer approximately $79. To determine specific costs for your property, check your Notice of Assessment, Taxable Valuation and Property Classification document received from the City. For each $1,000 of taxable value multiply by $6; that will be the cost for your property.

What happens financially if we work with current funds only?
To maintain a balanced budget the current staffing for police and fire would fall up to 30 percent from its current combined level of 233 to 166 by 2017. This is unacceptable.

What has the City done so far to improve police and fire protection?
Over the past several months the City has implemented several items in the Public Safety Plan. For example, police officers' redesigned schedules have increased the number of officers on patrol throughout the day. As a result, 911 response times have decreased. In cooperation with the Michigan State Police there are more road patrols in the City and we now have doubled the number of detectives assigned to investigations. The City's lock-up facility is scheduled to reopen at the end of September. The 911 technology is being upgraded along with the police and fire communications system which will now be compatible with all other Genesee County public safety agencies.

Finance Department Analysis

Staffing for Flint Police and Fire Departments currently totals 233. This number is significantly reduced from past years and is clearly inadequate for a city with Flint's challenges. Even maintaining current staffing, let alone increasing staffing to acceptable levels, is costly. Over the next five years, current revenues supporting police and fire budgets are projected to decrease, while the cost of maintaining current staffing, in spite of actions taken to contain them, is projected to increase.

What will it cost us just to continue the current level of staffing and services?

Even with the cost containment measures recently enacted, the costs of maintaining the current staffing levels will continue to increase.

	Budget FY 13 (in millions)	*Projected* FY14 (in millions)	*Projected* FY15 (in millions)	*Projected* FY16 (in millions)	*Projected* FY17 (in millions)
Current General Fund Police (94 sworn, 21 civilian)	$ 21.03	$ 21.66	$ 22.31	$ 23.42	$ 24.59
Current General Fund Fire (47 sworn, 7 civilian)	10.92	11.24	11.58	12.16	12.77
Current Special Police Millage (14 sworn)	1.54	1.59	1.64	1.72	1.81
Current Staffing - SAFER Grant (39 sworn)	3.45	3.55	3.66	3.84	4.04
Current Staffing - Mott Grant (11 sworn)	1.10	1.13	1.17	1.23	1.29
Current Staffing - COPS Grant (6 sworn included in GF)					
TOTAL POLICE AND FIRE STAFFING OF 233 (140 POLICE;93FIRE;SWORN AND CIVILIAN)	**$ 38.04**	**$ 39.18**	**$ 40.35**	**$ 42.37**	**$ 44.49**

What revenues will we have to just continue the current level of staffing and services?

The budgets for police and fire currently consume 55.5% of the City's General Fund. In addition, the budgets for police have been supplemented with the proceeds of a voter approved 2 mill property tax levy and various grants, including a grant from the Mott Foundation. The budget for fire has been supplemented with the federal SAFER grant for the past several years. With property values continuing to decline, other General fund revenue sources remaining stagnant, and grants projected to decline if not disappear, revenues projected to be available to support police and fire budgets will be significantly inadequate to maintain current staffing.

		Budget FY 13 (in millions)	*Projected* FY14 (in millions)	*Projected* FY15 (in millions)	*Projected* FY16 (in millions)	*Projected* FY17 (in millions)
Revenue Projected		$ 36.92	$ 37.34	$ 35.63	$ 35.51	$ 35.46
Expense Projected		38.04	39.18	40.35	42.37	44.49
Difference between Costs and Revenues		$ (1.12)	$ (1.83)	$ (4.72)	$ (6.86)	$ (9.03)
	Current					
Staffing Impact	233	222	203	193	183	166
Change from current		(11)	(30)	(40)	(50)	(67)

A continuation of the status quo in terms of current millages and revenue sources is projected to result in the need to reduce staffing for police and fire by nearly 30% or some 67 positions over the next 4 years.

What financing alternatives do we have?

In order to avoid continuing pressure to reduce the staffing for police and fire, it will be necessary to find other sources of revenue. With funding for public safety (police, fire, 911, and the courts) now absorbing nearly 70% of the City's General Fund, it is not possible to find sufficient additional funds within the General Fund.

The primary additional sources of revenue are additional property tax millages and additional income tax levies. Both can and should be supplemented with a continuing effort to solicit and obtain grants from federal, state, and local sources, but grants should not be seen as a long term funding solution.

Here are preliminary projections on the financial and staffing level impacts of 1) increasing the income tax; 2) increasing the property tax, and 3) doing both. All alternatives assume some continuation of grant funding. In addtion, proceeds from the alternative revenue sources are used in a manner that stabilizes staffing over the next 5 years.

Increase the Income Tax beginning in 2014 from the current 1% resident / .5% non-resident to 1.5% resident / .75% non-resident. This will need action by the state legislature as well as voter approval.

		Budget FY 13 (in millions)	*Projected* FY14 (in millions)	*Projected* FY15 (in millions)	*Projected* FY16 (in millions)	*Projected* FY17 (in millions)
Revenue Projected		$ 38.02	$ 41.55	$ 39.76	$ 38.56	$ 38.56
Expense Projected		38.04	39.18	40.35	42.37	44.49
Difference between Costs and Revenues		$ (0.02)	$ 2.37	$ (0.60)	$ (3.81)	$ (5.92)
	Current					
Staffing Impact	233	233	233	233	233	208
Change from current		0	0	0	0	(25)

Increase the Property Tax by 6 mills in December 2012. This will require voter approval in the November, 2012 election, and is on the ballot.

		Budget FY 13 (in millions)	*Projected* FY14 (in millions)	*Projected* FY15 (in millions)	*Projected* FY16 (in millions)	*Projected* FY17 (in millions)
Revenue Projected		$ 43.40	$ 42.02	$ 39.75	$ 38.25	$ 38.20
Expense Projected		38.04	39.18	40.35	42.37	44.49
Difference between Costs and Revenues		$ 5.36	$ 2.84	$ (0.60)	$ (4.12)	$ (6.29)
	Current					
Staffing Impact	233	243	243	218	218	218
Change from current		10	10	(15)	(15)	(15)

Increase the Property Tax in 2012 and the Income Tax in 2013. This will require the approvals noted above.

		Budget FY 13 (in millions)	*Projected* FY14 (In millions)	*Projected* FY15 (in millions)	*Projected* FY16 (in millions)	*Projected* FY17 (in millions)
Revenue Projected		$ 43.40	$ 46.13	$ 43.88	$ 42.39	$ 42.28
Expense Projected		38.04	39.18	40.35	42.37	44.49
Difference between Costs and Revenues		$ 5.36	$ 6.95	$ 3.52	$ 0.02	$ (2.21)
	Current					
Staffing Impact	**233**	**243**	**260**	**260**	**260**	**260**
Change from current		**10**	**27**	**27**	**27**	**27**

It is clear that neither the new property tax levy nor the income tax increase alone will provide the resources necessary to sustain current staffing for the next 5 years. However, both individually, along with continued efforts to obtain grant funding, will provide needed resources, which if deployed appropriately, can maintain (and possibly increase) staffing for the next few years.

Together, however, these additional revenue sources can enable not only a continuation of current staffing, but an increase as well. And, should the economy improve more quickly than anticipated, and efforts at cost containment continue, staffing increases can become sustainable.

Follow Up Flag: Follow up
Flag Status: Completed

The article is correct, we will be meeting with both proponents and opponents of the potential pipeline project. There isn't much to say at this point, Treasury does not have an opinion yet, as we will be getting the full briefing tomorrow.

Here is what we know:
-A group is proposing a water pipeline from Lake Huron to the Flint Metro area, which would eliminate the need to purchase water from Detroit Water and Sewer Department (DWSD).

-The design and cost estimates have yet to be completed.

-The City of Flint has contributed about $25-30k towards the costs of the studies.

-DWSD is opposed to the plan for the obvious reason that they would lose customers. DWSD officials have pointed out that a study was done in the 90's that concluded that a project of this nature would not be cost effective.

-This would allow Flint to control their own water costs and quality and provide opportunities for industrial growth.

Since Treasury officials have not been briefed on all the information yet, I would keep the statement from the Governor rather high-level, something like:

Treasury officials will be meeting with Genesee County and Detroit officials tomorrow to get the details of the proposed pipeline plan. Until the ultimate costs are known and the various studies have been conducted, the benefits to the citizens of Flint and Genesee County cannot be determined.

Feel free to call me if you have any questions.

Flint water treatment plant *Ryan Garza | MLive com file photo*

GENESEE COUNTY, MI -- In a meeting of all the major stakeholders, the city of Flint is expected to make its case to the state Thursday that joining a regional effort to build **a new pipeline from Lake Huron** is the best option for Flint's future water.

The meeting is expected to include representatives from Flint emergency financial manager Ed Kurtz's administration as well as the Genesee County Drain Commissioner's Office, Detroit Water and Sewerage Department and thr Michigan Treasury department, Flint officials said this week.

"The state is looking to bring all the parties to one place to look at the numbers," said Howard Croft, Flint's director of infrastructure. "All the pros and cons and all the people involved will be in the room."

Flint and Genesee County have been getting water from Detroit under a 30-year contract that is now expired, and are looking to break away because of continuing price increases.

Officials with the Flint emergency manager's office have been exploring several options for water

since the city was taken over by the state in December. The options included treated Flint River water as well as blending Detroit water with Flint River water.

Now, Flint authorities say joining with Genesee County officials on **building a new pipeline from Lake Huron** is the best bet in order to stabilize Flint water rates over the long term.

The pipeline would service a wider region that could also include Lapeer, Sanilac County and Lapeer County, called the Karegnondi Water Authority.

"We're comfortable with the work we've done. We believe the numbers bear out," Croft said. "This is taking it to the next level, taking it to the state and saying these are our options."

Kurtz said that, under the emergency financial manager law, the state treasurer has to sign off on any deal more than $50,000 -- which certainly applies to the pipeline project that's expected to cost the three-county region up to $300 million.

The Genesee County Board of Commissioners **took steps last week to borrow** up to $35 million to cover the initial construction costs for the pipeline.

Genesee County Drain Commissioner Jeff Wright said he was asked to attend the meeting Thursday in Lansing. He said his office will be glad to be there to answer any questions about the KWA proposal.

County officials claim that continuing to buy water from the city of Detroit will cost the region $2.1 billion during the next 25 years. By building a pipeline, that cost would no more than $1.9 billion over the same period.

"It's cheaper to build our own system than to continue to pay more and more to the city of Detroit," Wright said. "This is about the least expensive way for our people to get the best quality water."

Croft said the Flint River isn't the best option for Flint's primary source because of concerns about capacity during drought conditions and questions about what the city and county would rely on as their state-required backup source, which is currently the river.

If the city were to make the Flint River its primary source, major upgrades would have to be made to the dams and other infrastructure, Croft said.

Blending river water with Detroit water would still leave Flint vulnerable to future rate increases from Detroit, he said.

Going with the KWA pipeline, on the other hand, would mean a fixed water cost, Croft said.

"A lot of things are conditional (with blending)," Croft said. "That's not a good scenario for us. We're looking for a long-term solution not a short-term one."

Still, no decisions have been finalized, he said.

"The state has to support any decision of this magnitude," he said. "This is about us making the best-informed decision we can make

RE: Cost Comparison, KWA v DWSD

Mr. Kurtz:

The City of Flint is considering whether joining the Karegnondi Water Authority (KWA) is a better alternative for the residents and businesses of Flint than continuing to purchase water from the Detroit Water and Sewer District (DWSD).

An important part of this consideration is the relative cost of the alternatives. We have compared the current projected costs of continuing to purchase water from DWSD to the projected costs of purchasing water from KWA.

The projected costs of purchasing water from DWSD come from our current and past experience, as well as statements from DWSD about their future costs. The costs of purchasing water from KWA are based on the KWA Lake Huron Water Supply Study, as updated by its October 2012 Preliminary Engineering Report Update, Appendix 20, dated October 4, 2012.

Based on the current contract with DWSD, the FY13 cost of purchasing water for the City of Flint only (excluding the sale of water to Genesee County) is budgeted at $14.4 million. Past experience indicates that it is reasonable to assume a 10% increase annually in the capacity charge from DWSD and a 5% increase in the commodity cost. It is also reasonable to assume a 5% increase in operational costs for the Flint Water Treatment Plant. Consequently, it appears that the costs for continuing to purchase water from DWSD will increase to $22.7 million by FY20.

Conversely, joining KWA and participating in the construction of infrastructure to receive water will require an up-front cost to the City of $2.3 million, to be paid over the first three years of joining. This would be paid by the City during the construction period while the City continues to purchase its water from DWSD. However, once the construction is complete and water delivery commences, the City's capacity charge will be fixed, based on the debt service necessary to finance construction. Operational costs for KWA water delivery and the Flint WTP are projected to increase by 5% annually.

Based on the assumptions in this comparison, the annual projected cost of purchasing water for the City of Flint is 15% or $2.6 million LESS using the KWA option in the first year of operation, increasing to 27% or $6.1 million LESS in the fifth year of operation. The only caveat is that in order to achieve this, the City will need to upfront KWA $3.25 million over 3 years prior to KWA beginning water delivery.

Concerns have been raised about the potential of cost overruns and delays in construction. These are reasonable concerns. An additional analysis, assuming a 15% cost overrun, and a one-year delay in construction, indicates that the gain to be achieved from participating in KWA is lessened (from $2.6 million in the first year to $2.3 million) and the City's upfront contribution is increased to $10.4 million if the City is required to make its first year's debt service payment before operations begin. The City's gain from participating in KWA is delayed, but once operations begin, the City's annual costs are less than continuing with DWSD, becoming net positive in FY20. However, given the City's precarious financial position, it is likely that the City would need to find some source of capital if such an up-front payment were necessary.

Finally, we have also analyzed what constraints DWSD would need to impose on its contract with the City of Flint in order to be a positive financial option. It would appear that if the capacity costs to Flint were to be fixed at the FY13 level and if annual operating cost increases were capped at 2.25%, then the cost to the City of Flint could be less than KWA.

Attached are the three projections summarized above. First is the "Original Projection" utilizing the KWA Study. Second is the "Worse Case Projection" with cost increases and construction delays. Third is the reduced DWSD costs associated with fixed capacity costs and capped increases in operational costs.

Please contact me if you have any questions.

$272M investment system
7.1M upgrade Flint Plant

- Delivering raw water to Flint plant & new plant by G.C.

FINAL 10/31/2012

ORIGINAL PROJECTION
SUMMARY COMPARISON: KWA V DWSD

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ -	$ -	$ -	$ -	$ -
KWA Entry Fee $2,325,600	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
KWA Debt Service	$ -	$ -	$ -	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
FWTP Debt Service	$ -	$ -	$ -	$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
KWA operations	$ -	$ -	$ -	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
FWTP operations w KWA	$ -	$ -	$ -	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 15,576,658	$ 15,936,535	$ 16,946,934	$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,660	$ 21,219,438	$ 22,671,186

6.5%

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 2,562,568	$ 3,342,591	$ 4,190,974	$ 5,114,072	$ 6,118,851
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ 236,968	$ 3,579,559	$ 7,770,533	$ 12,884,605	$ 19,003,456

(1) This projection assumes that KWA begins delivery of water to Flint starting in July, 2016. Any interest on the bonds will be capitalized until that period. The City will be obligated to begin paying its $2,325,600 entry fee in FY13 - 2 payments of $581,400 in FY13, 1 payment in FY14 and 1 payment in FY15.

(2) The cost of the KWA option is projected to be $2,562,568 or 15% LESS than DWSD in the first year of operation (Year 4). This gain offsets the upfront costs of $2,325,600 by $236,968.

(3) The cost of the KWA option is projected to be $6.1 million or 27% LESS than DWSD in the 5th year of operation (Year 8)

(4) The cumulative savings by the 8th year from the beginning of the project are projected to be $19 million.

Detail of Original Cost Projections FINAL 10/31/2012

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,680	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
Escalator	1.10	1.10	1.10	1.10	1.10	1.10	1.10	
Commodity Cost (2)	$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
Flint WTP Operating Cost (3)	$ 2,725,538	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,909	$ 3,478,554	$ 3,652,482	$ 3,835,106
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	$ 14,413,859	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,436	$ 22,671,185

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total. Flint's cost is 52% or $4.4 million total.

(2) Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7.3 million, based on $12.46/unit ($12.46x1600unitsx365).

(3) Per FY13 Budget, annual cost of WTP is $4.1 million. Genesee County pays $1,386,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400		$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)				$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155	$ 6,593,155
Escalator				1.00	1.00	1.00	1.00	
Fixed Flint WTP Construction Cost (3)				$ 572,781	$ 572,781	$ 572,781	$ 572,781	$ 572,781
Escalator				1.00	1.00	1.00	1.00	
Flint WTP Operating Cost (4)	$ 5,911,538	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE			$ 14,888,149	$ 15,274,260	$ 15,679,676	$ 16,105,363	$ 16,552,334

(1) The City will, upon joining, be required to pay an initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,400 annually. Since it is projected that fee will be assessed for 3 years, the City's upfront cost is projected at $2,325,600.

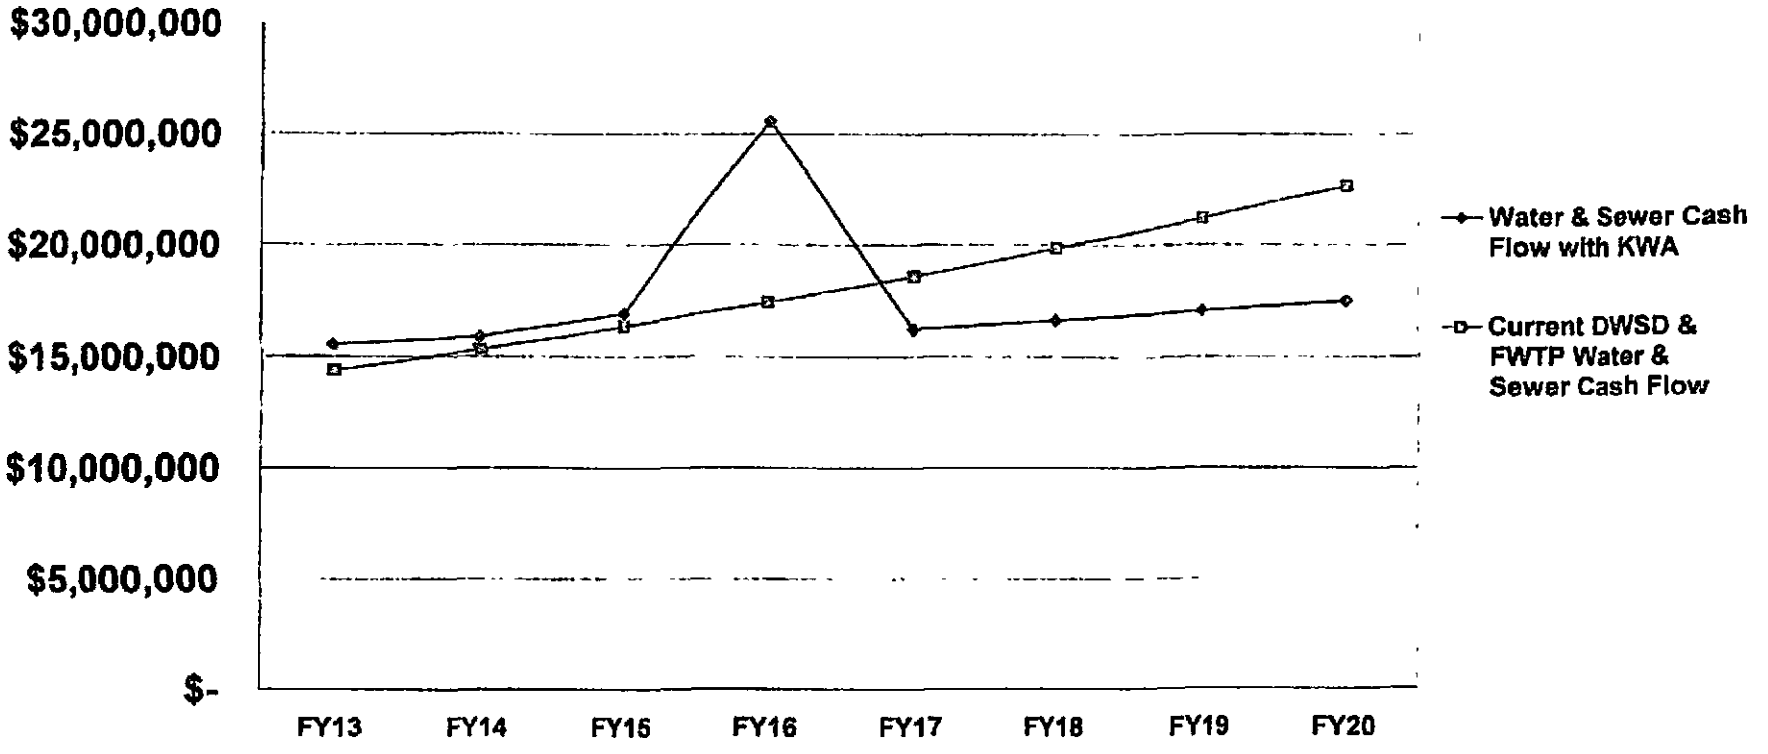
(2) Per KWA proposal, project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years; 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,588 plus $13,621,078 for 3 years = $313,284,782)

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15 (total principal = $8.165 million)

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost. 100%

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD.

Worst Case Scenario - Summary Comparison KWA vs DWSD (15% Cost Overrun; One year delay in Water Supply delivery)



FINAL 10/31/2012

WORSE CASE PROJECTION
SUMMARY COMPARISON: KWA V DWSD
(15% Cost Overrun; One year delay in Water Supply delivery)

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,385,534	$ 17,450,717	$ -	$ -	$ -	$ -

FWTP operations w KWA	$ -	$ -	$ -	$ -	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 15,576,658	$ 15,936,535	$ 16,966,934	$ 25,691,544	$ 16,349,150	$ 16,754,566	$ 17,180,253	$ 17,627,225

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,658	$ 15,355,135	$ 16,385,534	$ 17,450,717	$ 18,616,861	$ 19,870,660	$ 21,219,435	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual KWA - DWSD	$ (1,162,800)	$ (581,400)	$ (581,400)	$ (8,240,826)	$ 2,267,700	$ 3,116,094	$ 4,039,182	$ 5,043,960
Cumulative	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (10,566,426)	$ (8,298,726)	$ (5,182,642)	$ (1,143,460)	$ 3,900,500

"Worse Case" scenario differs from Original in these respects:

(1)	Delivery of water to Flint from KWA is delayed by one year and construction costs are 15% above the original projection. Consequently, the City is required to begin paying for debt service one year before KWA begins delivery of water. This is in addition to its obligation to pay its initial entry fee of $581,400 plus $581,400 annually for the first 5 years.
(2)	Once KWA begins delivering water in year 5, the annual operating costs are less than DWSD by 12%. Considering $10.6 million in upfront costs in the first 4 years prior to KWA operation, the cumulative cost of KWA exceeds the cost of DWSD until year 8.
(3)	Cumulative savings by Year 8 are projected to be $3.9 million, compared to $19 million in the original projection.

Detail of Worse Case Cost Projections — FINAL — 10/31/2013

Worse Case Scenario

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)	$ 4,411,880	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
Escalator	1.10	1.10	1.10	1.10	1.10	1.10	1.10	
Commodity Cost (2)	$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
Flint WTP Operating Cost (3)	$ 2,725,538	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,908	$ 3,478,554	$ 3,652,482	$ 3,835,106
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	$ 14,413,958	$ 15,355,135	$ 16,365,534	$ 17,450,717	$ 18,616,851	$ 19,870,650	$ 21,219,436	$ 22,671,185

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8 5 million total. Flint's cost is 52% or $4.4 million total.

(2) Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7.3 million, based on $12.46/unit ($12.46x1600unitsx365).

(3) Per FY13 Budget, annual cost of WTP is $4.1 million Genesee County pays $1,355,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

	FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)	$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)				$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128

Flint WTP Operating Cost (4)	$ 5,911,538	$ 6,207,115	$ 6,517,471	$ 6,843,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)	$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL	KWA NOT AVAILABLE				$ 16,349,150	$ 16,754,566	$ 17,180,253	$ 17,627,226

(1) The City will, upon joining, be required to pay a, initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,000, for a total of $2,325,600..

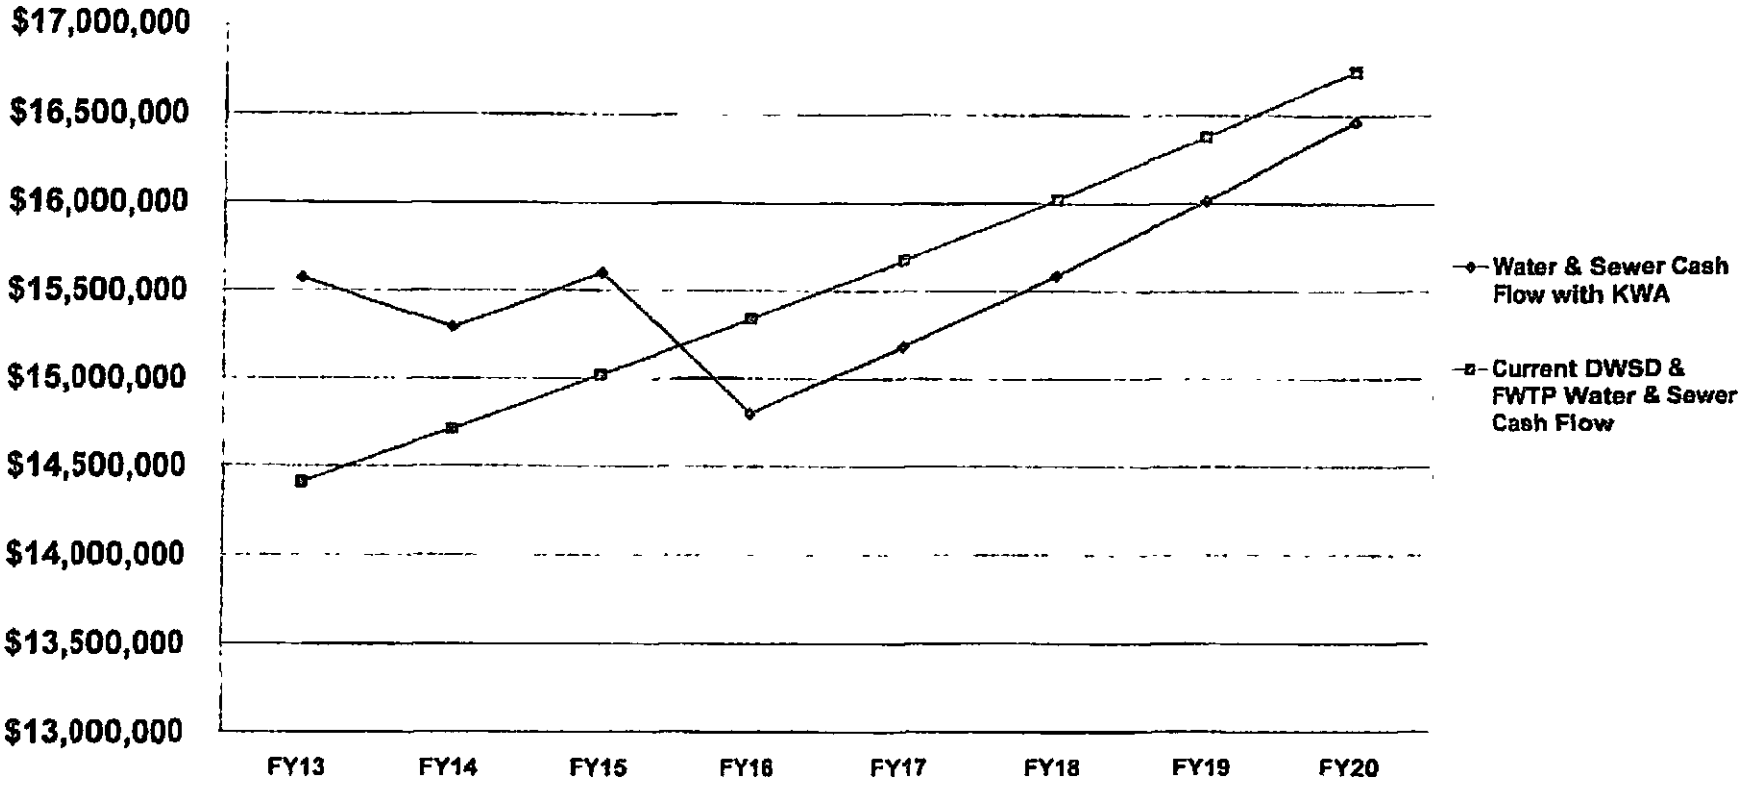
(2) Per KWA proposal, original project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 60mgd, of which 18MGD is for Flint Debt service is based on 5% interest rate @ 25 years, 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,566 plus $13,621,078 for 3 years = $313,284,782). The costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17.

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15 (total principal = $8.165 million). Again, costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17. Debt service is now on $9.4 million.

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1 6 million for electricity and chemicals & 2 FTE's are added. 100% City cost

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD

ALTERNATE PROJECTION - SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED (Fixed Costs held constant; Commodity Costs Increased by 2.25% Annually)



FINAL 10/31/2012

ALTERNATE PROJECTION
SUMMARY COMPARISON: KWA V DWSD WITH DWSD COSTS REDUCED
(FIXED COSTS HELD CONSTANT; COMMODITY COSTS INCREASED BY 2.25% ANNUALLY)

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ 15,345,778	$ 15,678,562	$ 16,023,172	$16,380,091	$ 16,749,823

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 457,629	$ 404,302	$ 343,496	$ 274,728	$ 197,489
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (1,867,971)	$ (1,463,669)	$ (1,120,173)	$ (845,445)	$ (647,956)

(1) This projection assumes that DWSD fixed costs remain at 2013 levels and that operating costs increase by 2.25% annually

(2) KWA costs are as in the Original Projection.

(3) In this comparison, KWA costs are still less once operations begin (by 2.9%), and cumulative gain does not occur until after year 8. Over time, DWDS costs could be less with these limitations on cost increases.

Flint Transmission System

Summary of Construction Cost

[1]Facilities	Base Cost	Contingency	Subtotal	GC, Insurance, Bonds, Mob/Demob., Allowances	Escalation	Cost
South Transmission Main	$ 180,552,670	$ 18,055,267	$ 198,607,937	$ 36,446,873	$ 28,206,577	$ 263,261,387
North Transmission Main	$ 152,354,260	$ 15,235,428	$ 167,589,708	$ 32,284,868	$ 23,984,949	$ 223,859,525
Grand Blanc Pumping Station	$ 29,171,593	$ 2,917,159	$ 32,088,752	$ 8,738,638	$ 4,899,287	$ 45,726,677
[2][3] Total Cost	$ 362,078,543	$ 36,207,854	$ 398,286,397	$ 77,470,379	$ 57,090,813	$ 532,847,589

[1] The Transmission Main and Grand Blanc Pumping Station shall be constructed under 3 separate construction contracts as follows:

1. Construction Contract No. 1 shall include the construction of the Transmission Main from the connection to the NOTS in Orion Township to the Oakland/Genesee County line (approximately 121,100 lft). The total Contract 1 construction cost is estimated to be $ 263,261,387.

2. Construction Contract No. 2A shall include the construction of the Transmission Main from the Oakland/Genesee County line to the connection to the DWSD system near the Potter Road/Baxter Road intersection in Davison Township (approx. 120,500 lft). The total Contract 2 construction cost is estimated to be $ 223,859,525.

3 Construction Contract No. 2B shall include the construction of the Grand Blanc Pumping Station. The total Contract 3 construction cost is estimated to be $ 45,726,677.

[2] Construction duration of the project is appoximately 3 years. An escalation @ 6% per year is added to cover second and thrid year of construction.

[3] CM fee is not included in this cost estimate.

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 14,713,859	$ 15,024,358	$ 15,345,778	$ 15,678,562	$ 16,023,172	$16,380,091	$16,749,823

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual Cost: DWSD - KWA	$ (1,162,800)	$ (581,400)	$ (581,400)	$ 457,628	$ 404,302	$ 343,498	$ 274,728	$ 197,489
Cumulative Gain with KWA	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (1,867,971)	$ (1,463,669)	$ (1,120,173)	$ (845,445)	$ (647,956)

(1) This projection assumes that DWSD fixed costs remain at 2013 levels and that operating costs increase by 2.25% annually

(2) KWA costs are as in the Original Projection.

(3) In this comparison, KWA costs are still less once operations begin (by 2.9%), and cumulative gain does not occur until after year 8. Over time, DWDS costs could be less with these limitations on cost increases.

Detail of Worse Case Cost Projections — FINAL — 10/31/2012

Worse Case Scenario

Cost Comparisons: Water Supply to City of Flint from DWSD and proposed KWA project

Cost of water to City of Flint (excluding Genesee) using continued service from DWSD

		FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
Fixed Cost (1)		$ 4,411,880	$ 4,852,848	$ 5,338,133	$ 5,871,946	$ 6,459,141	$ 7,105,055	$ 7,815,560	$ 8,597,116
	Escalator	1.10	1.10	1.10	1.10	1.10	1.10	1.10	
Commodity Cost (2)		$ 7,276,640	$ 7,640,472	$ 8,022,496	$ 8,423,620	$ 8,844,801	$ 9,287,041	$ 9,751,394	$ 10,238,963
	Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
Flint WTP Operating Cost (3)		$ 2,725,538	$ 2,861,815	$ 3,004,906	$ 3,155,151	$ 3,312,908	$ 3,478,554	$ 3,652,482	$ 3,835,106
	Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL		$ 14,413,858	$ 15,355,135	$ 16,365,534	$ 17,460,717	$ 18,616,851	$ 19,870,650	$ 21,219,435	$ 22,671,185

(1) Per FY13 Budget and DWSD Contract, fixed charge from DWSD for FY13 is $707,000 per month or $8.5 million total. Flint's cost is 52% or $4.4 million total.

(2) Per FY13 Budget and DWSD Contract, and based on 12 million gallons per day (mgd), cost is $7.3 million, based on $12.46/unit ($12.46x1600units x365)

(3) Per FY13 Budget, annual cost of WTP is $4.1 million. Genesee County pays $1,388,000 for emergency back up service.

Cost of water to City of Flint using proposed KWA project for water supply to Flint WTP

		FY13	FY14	FY15	FY16	FY17	FY18	FY19	FY20
KWA Entry Costs (1)		$ 1,162,800	$ 581,400	$ 581,400	$ -	$ -	$ -	$ -	$ -
Fixed KWA Construction Cost (2)					$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128	$ 7,582,128
	Escalator						1.00	1.00	
Fixed Flint WTP Construction Cost (3)					$ 658,698	$ 658,698	$ 658,698	$ 658,698	$ 658,698
	Escalator								
Flint WTP Operating Cost (4)		$ 5,811,538	$ 6,207,115	$ 6,617,471	$ 6,643,344	$ 7,185,511	$ 7,544,787	$ 7,922,026	$ 8,318,128
	Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
KWA Commodity Charge (5)		$ 759,200	$ 797,160	$ 837,018	$ 878,869	$ 922,812	$ 968,953	$ 1,017,401	$ 1,068,271
	Escalator	1.05	1.05	1.05	1.05	1.05	1.05	1.05	
TOTAL		KWA NOT AVAILABLE				$ 16,349,150	$ 16,754,566	$ 17,160,253	$ 17,627,225

(1) The City will, upon joining, be required to pay a, initial fee of $32,300 per MGD plus the same amount for each year until bonding for the project is obtained. At 18MGD, the City's cost is $581,000, for a total of $2,325,600..

(2) Per KWA proposal, original project cost is $272 million. City's fixed cost would be 30% of debt service, based on capacity design of 90mgd, of which 18MGD is for Flint. Debt service is based on 5% interest rate @ 25 years; 5% added to principal for capitalized interest for FY13, FY14, and FY15. ($272,421,588 plus $13,621,078 for 3 years = $313,284,782). The costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17.

(3) Per KWA proposal, the cost of upgrading the Flint is $7.1 million. City's fixed cost would be100% of debt service based on 5% interest rate @ 25 years), with 5% added to cover capitalized interest for FY13, FY14, and FY15. (total principal = $8.165 million) Again, costs here are increased by 15%; debt service starts in FY16 but water is not available until FY17. Debt service is now on $9.4 million.

(4) Per FY13 Budget annual cost of WTP is $4,111,538. $1.6 million for electricity and chemicals & 2 FTE's are added. 100% City cost.

(5) Per KWA proposal, initial commodity charge would be based on $1.30/unit or 7,500 gallons. Charge is based on 12MGD

FINAL 10/31/2012

WORSE CASE PROJECTION
SUMMARY COMPARISON: KWA V DWSD
(15% Cost Overrun; One year delay in Water Supply delivery)

Water and Sewer Cash Flow with KWA

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20

FWTP operations w KWA	$ -	$ -	$ -	$ -	$ 7,185,811	$ 7,544,787	$ 7,922,026	$ 8,318,128
Total Costs	$ 15,576,658	$ 15,936,535	$ 16,946,934	$ 25,691,544	$ 16,349,150	$ 16,754,566	$ 17,180,253	$ 17,627,225

Water and Sewer Cash Flow with DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Current DWSD & FWTP Costs	$ 14,413,858	$ 15,355,135	$ 16,366,534	$ 17,450,717	$ 18,616,851	$ 19,870,660	$ 21,219,436	$ 22,671,185

Cash Flow Difference: KWA and DWSD

	Year 1 FY13	Year 2 FY14	Year 3 FY15	Year 4 FY16	Year 5 FY17	Year 6 FY18	Year 7 FY19	Year 8 FY20
Annual KWA - DWSD	$ (1,162,800)	$ (581,400)	$ (581,400)	$ (8,240,828)	$ 2,267,700	$ 3,116,094	$ 4,039,182	$ 5,043,960
Cumulative	$ (1,162,800)	$ (1,744,200)	$ (2,325,600)	$ (10,566,428)	$ (8,298,728)	$ (5,182,642)	$ (1,143,460)	$ 3,900,500

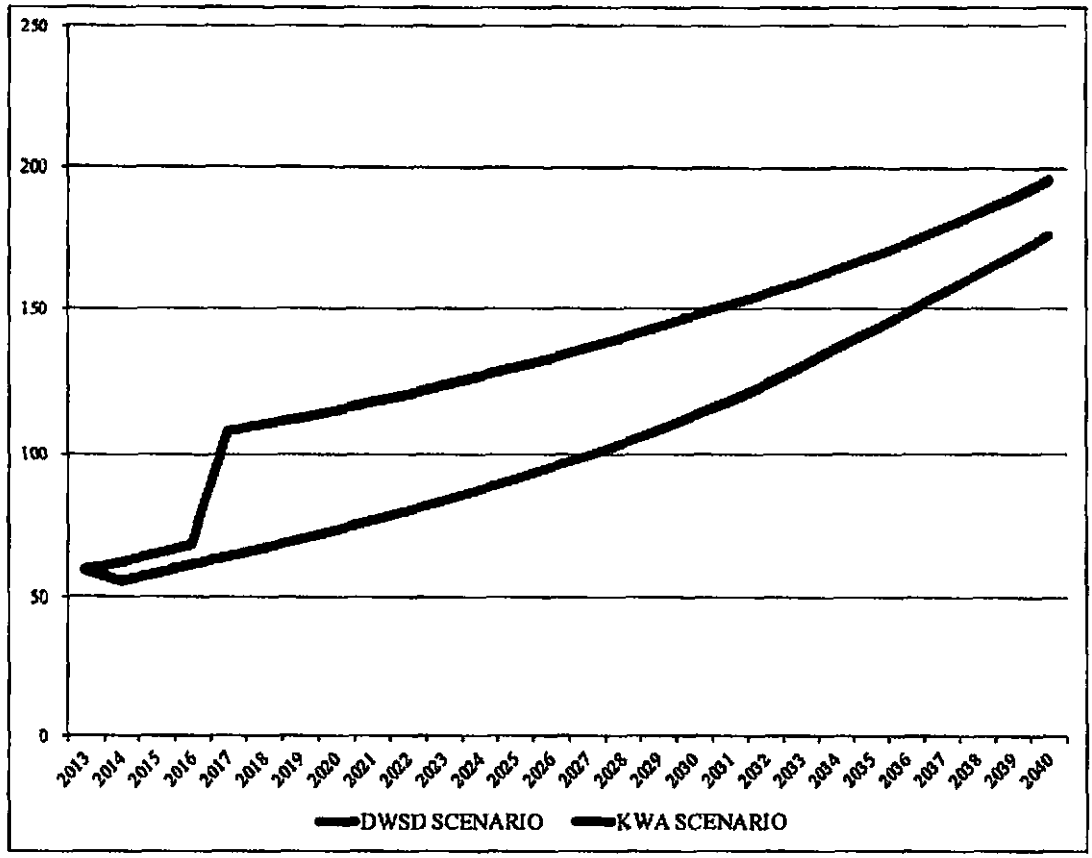
"Worse Case" scenario differs from Original in these respects:

(1) Delivery of water to Flint from KWA is delayed by one year and construction costs are 15% above the original projection. Consequently, the City is required to begin paying for debt service one year before KWA begins delivery of water. This is in addition to its obligation to pay its initial entry fee of $581,400 plus $581,400 annually for the first 3 years

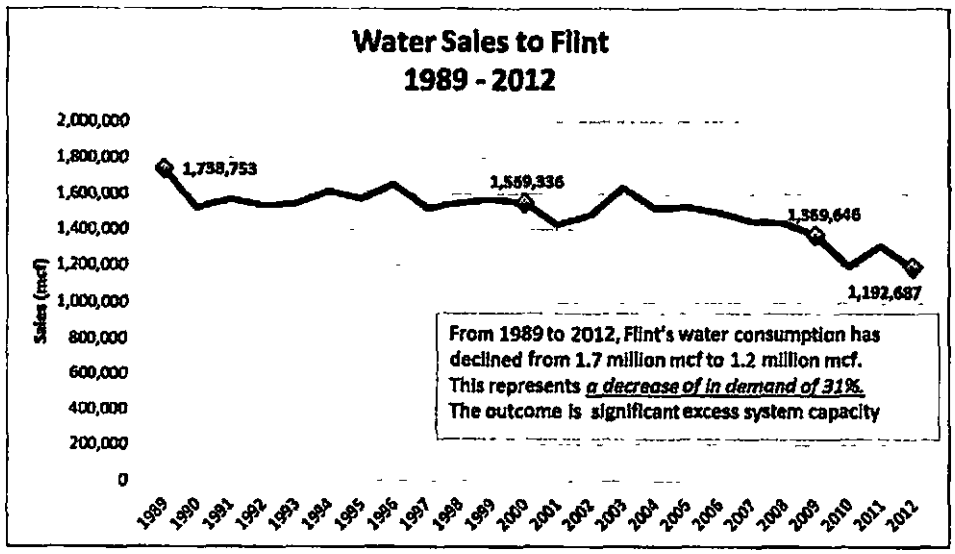
(2) Once KWA begins delivering water in year 6, the annual operating costs are less than DWSD by 12%. Considering $10.8 million in upfront costs in the first 4 years prior to KWA operation, the cumulative cost of KWA exceeds the cost of DWSD until year 8

(3) Cumulative savings by Year 8 are projected to be $3.9 million, compared to $19 million in the original projection.

SUMMARY OF TOTAL PROJECTED WATER COSTS TO FLINT/GCDC - SCENARIO COMPARISON *($ millions)*



Attachment 3



Indefinite-scope, Indefinite-delivery Contract Number 00383
2012 Professional General Architectural/Engineering Services

CITY OF FLINT WATER SUPPLY ASSESSMENT
SAMPLE PROJECT PLAN

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint. The work would be completed as an authorized task under the reference contract, Contract No. 00383. This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

- Using DWSD's new model contract that provides reduction in cost for communities with their own storage,
- Moving the location of supply from Potter and Baxter to the Imlay Pumping Station to reduce fees associated with elevation and distance from DWSD's water plants,
- Providing finished (potable) non-pumped water from the Lake Huron Water Treatment Plant, and
- Providing raw (not treated) non-pumped water from the Lake Huron Water Treatment Plant.

This phase of the work would include the collection and review of the following documents:

- The Lake Huron Water Supply Karegnondi Water Authority Preliminary Engineering Report, dated September 2009 and the 2012 update by Rowe Engineering;
- The Analysis of the Flint River as a Permanent Water Supply for the City of Flint Report, dated July 2011;
- Proposed or draft contract agreements that would be used between the KWA and the City of Flint;
- DWSD's contract rates based on the new model contracts;
- Information related to other DWSD proposals for service to Flint; and
- Other letters, minutes, etc. from all parties that provide information that could be used in the evaluation.

All information provided would be evaluated and subsequent meetings would be held with the DWSD, Flint and the KWA to address any data gaps or clarifications that may be required. These meetings would be coordinated with the Treasurer so that its representatives can be present at the meetings. For the purpose of this proposal, TYJT has assumed a total of two meetings for both the DWSD and KWA.

3.2. Engineering Evaluation

The City of Flint Emergency Financial Manager has indicated that he believes the determination of who supplies water to the City's system should mainly be based on the following criteria (in order of importance):

- Cost,
- System redundancy/reliability, and
- The recognized limitation of the Flint River as a source to supplying all of Flint's water needs.

In consultation with the Treasurer, these factors plus additional ones that may be identified in the evaluation process would be used.

An analysis will be performed for the options identified and a comparison will be made based on cost, reliability of supply, and any limitations that may identified by both suppliers in providing the needed service.

TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified. TYJT will then incorporate comments from the Treasury's review and submit a final document to the Department of Treasury for their use.

Furthermore, as is done as a standard of practice at TYJT for quality control and quality assurance (QA/QC), an independent review will be completed by staff or outside consultants not directly involved in the project. These reviewers will have noted experience in the field necessary to complete the QA/QC reviews. Two reviews are envisioned; one to review the evaluation process and the other to review the findings and recommendations.

4. Schedule

At the meeting between all interested parties on November 1, 2012, two dates were identified by the Treasurer. The first date identified was December 20, 2012 for the preliminary evaluation to be provided to the State. The second date was January 15, 2013 for the Treasury to make a decision on the City of Flint water supply. TYJT proposes to complete the draft report for submittal on December 20th. This will provide a two week review period by the Treasury. The final report would then be completed and submitted one week prior to the January 15th deadline. TYJT will also be available, if requested by the Treasurer, to attend a general meeting with all parties involved at the conclusion of the work.

Koryzno, Edward (Treasury)

Subject:	Briefing on Karegnondi Project/City of Flint
Location:	Treas_Confrm_StateTreasurersBrdRm
Start:	Thu 11/1/2012 10:00 AM
End:	Thu 11/1/2012 11:30 AM
Recurrence:	(none)
Meeting Status:	Accepted
Organizer:	Fraser, Roger (Treasury)
Required Attendees:	Dillon, Andy (Treasury); Stibitz, Brom (Treasury); Koryzno, Edward (Treasury); Mike Brown (mbrown@reinvestflint.org)
Optional Attendees:	Hichez, Amy (Treasury); Cousineau, Sara (Treasury); 'mmurray@cityofflint.com'; 'mking@dwsd.org'; 'Fausone, Jim'

Please note – location change AND additional attendees:

Discussion: Brief Treasury on pros and cons of Karegnondi project. There are concerns about cost and engineering constraints. Report for Flint in late 90's....suggested this project was not financially feasible.

Attendees:

State of Michigan
Andy Dillon - Treasurer
Brom Stibitz – Policy Advisor
Roger Fraser – Deputy Treasurer
Ed Koryzno – Office of Fiscal Responsibility

City of Flint – (confirmed attendance with Maxine Murray)
Mike Brown – City Administrator
Jerry Ambrose, Finance Director
Howard Croft, Director of Infrastructure & Development
Bob Emerson – CEO Lawrence Moon Funeral Home
Bob Emerson – Former State Senator
John Matonich, EDO Rowe Professional Svcs.

Genesee County – (confirmed attendance with Maxine Murray)
Jeff Wright, Genesee County Drain Commissioner
John OBrian, Chief Deputy Drain Commissioner
Dave Jansen, Assistant Director, Genesee County Drain Commission
Rick Freeman, Rowe Professional Service

Tucker, Young, Jackson & Tull – (confirmed attendance with David Guastella)
George Karmo, President
David Guastella
Awni Qaqish

Detroit – (confirmed with Marian King-Bell)
James Fauson – DWSB Chair
Sue McCormick – DWS Director
Matt Schenk – DWS COO

RECEIVED
NOV 8 2012
OFFICE OF THE STATE TREASURER

November 6, 2012

Mr Andy Dillon, Treasurer
Michigan Department of Treasury
430 W Allegan Street
Lansing, MI 48922

Dear Treasurer Dillon

First, thank you for giving us the opportunity to present our plan for the "Flint Water Supply Future" with you. We have already had initial contact with DWSD about scheduling meetings as well as what information is needed by them to make a proposal to us. Our understanding from the meeting is that DWSD needs to make a proposal to us for consideration along with the KWA proposal by the 20th of December We would then make a recommendation to you for the Governor's consideration A final recommendation will be made by the Governor's office by January 15, 2013

I assure you, that we will work diligently with DWSD to provide them with whatever they need, so they can meet that deadline. We will give serious consideration to their proposal

As I stated at the meeting, I am not an advocate for KWA but for the best cost option for the next 30 to 40 years for the people of the City of Flint. However, in our analysis of the options, KWA does several things that I think are in the best interest of our city, our region (Mid Michigan) and the State of Michigan They are

1. It provides a second source of water from Lake Huron Currently over 40% of the people of the state are served by DWSD

2. DWSD does not provide water services to the Thumb area, namely Sanilac and Lapeer Counties

3. It affords the opportunity for the region to form a water and sewer authority in the future Genesee County, the Genesee County Drain Commission, the Cities of Flint and Lapeer, Lapeer and Sanalac Counties as well as other regional municipalities could come together to form a Mid Michigan Water and Sewer Authority to the benefit of the entire region

4. It gives the City of Flint "ownership" in a water distribution system and the ability, along with its partners, to control its own water resource destiny

5. It offers additional economic development opportunities for the region by providing businesses with a source of low cost water

I think it is also important to again indicate that Genesee County intends to go ahead with the pipe line with or without Flint The County Board of Commissioners has already approved bonding for the first stage of the project

Again, let me assure you that we in the City of Flint have an open mind relative to the outcome.

Sincerely,

Edward Kurtz
Emergency Financial Manager

can they perform the work in this

Ed/Randy,

Attached is the submitted proposal from TYJT to perform the water system analysis for Flint.

I received this from Tom Falik today. I am not sure to whom this needs to be reviewed by but I have noticed that their submitted price is $45,000; their original information estimated a cost of $39,000.

Regards,

Eric Cline | Unit Operations Specialist - Office of Fiscal Responsibility

SOW Checklist for Contractor Proposal Contents and Responsiveness

This checklist is provided for your convenience to help remind Contractors of the important requirements of the SOW. The list may not be all inclusive. The Contractor is responsible to read the SOW and submit all the required responses. If Contractors have any questions concerning these requirements please contact the Buyer listed on the front page of this SOW document.

Article 1 and Attachment A:

____X_____ Responses have been provided for all items requested in Article 1, Statement of Work, as requested. Technical Proposal Requirements have been met and responses are included within the format designated by the State in Article 3.

____X_____ Price Proposal, Article 1, Section 1.061, for the proposal has been included in Contractor's proposal, according to the instructions laid out in Article 3 and using the format in Attachment A (if required in 1.061).

Article 3:

____X_____ The complete proposal was submitted to the appropriate location and on time in an electronic format.

____X_____ Responses have been provided for all items requested in Article 3 and includes signature by an individual authorized to legally bind Contractor's company.

Article 1 – Statement of Work (SOW)

Note to Contractors: Proposals must include detailed responses to all tasks as requested in Article 1. Contractors should provide thorough responses to each task, or, when appropriate, state their agreement that the Contractor will provide the requested services. Contractors are encouraged to provide detailed responses in order to allow the State to fully evaluate the Contractor's capabilities.

Throughout this SOW, language referring to Contract or Contractor(s) refers to any Contract awarded from this SOW. This SOW in itself is not to be construed as a Contract.

1.010 Project Identification

1.011 Project Request

This is an SOW for a Municipal Water Supply Assessment on behalf of the Department of Treasury and the City of Flint in Genesee County. This is a formal request to prospective Contractors to solicit bids or price quotations. Contractors must submit written proposals according to the instructions contained within this document, discussing how they will meet the specific requirements.

Any awarded Purchase Order(s) between the State and any awarded Contractor(s) is a separate document, whose terms are limited by the Contract.

1.012 Background

The Treasury Department is charged with monitoring, oversight and provision of assistance to local units of government under various statutes, including but not limited to, the Home Rule City Act (Act 279 of 1909), the Uniform Budgeting and Accounting Act (Act 2 of 1968), and the Glenn Steil State Revenue Sharing Act (Act 140 of 1971). In providing such monitoring and assistance to local units of government, the Treasury Department strives to preserve the capacity of local units to provide those services essential to the public health, safety and welfare of the citizens of this State.

The City of Flint is currently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is provided through a single 72-inch water main that terminates at a master meter. The City of Flint's water treatment plant uses the Flint River as a back-up and redundancy supply source to the DWSD supply, as required by the Michigan Department of Environmental Quality (MDEQ). The City of Flint also provides potable water to Genesee County downstream of the DWSD master meter.

The newly formed Karegnondi Water Authority (KWA) plans to construct a raw water supply system that will feed Flint's water treatment plant with water directly from Lake Huron. The Flint water treatment plant could be upgraded to accommodate and treat this new raw water source. DWSD has also proposed alternatives to the existing agreement with the City of Flint that could also be pursued.

A Contractor is needed to provide services to the Department of Treasury and the City of Flint upon request of the Treasury Department. The Department of Treasury is requesting a Contractor provide an analysis of the water supply options for the City of Flint to assist the Department of Treasury and the City of Flint in determining the best available option.

1.020 Scope of Work and Deliverables

1.021 In Scope

The Contractor must provide Water Supply Assessment as requested by the Department of Treasury. These services will include data collection and review, an engineering evaluation and the generation of recommendations.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services

1.022 Work and Deliverable

Contractor must provide Deliverables/Services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

A. **Data Collection and Review:**

1. Provide all labor, materials and equipment to fully perform the work of data collection and review for an assessment of water supply options for the City of Flint.

Bidder Response:

Our Price Proposal in Attachment A includes all labor, materials and equipment to perform the base work described in our Sample Project Plan.

2. Perform an analysis and comparison of the KWA and DWSD proposals that includes all capital, financing, operational and maintenance costs.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services.

3. Prepare and submit for Department of Treasury and City of Flint review a preliminary report on the findings by Thursday, December 20, 2012; additionally, a final inspection report of findings and recommendations must be presented no later than January 8, 2013 (also see Section 1.022.E).

Bidder Response:

Agreed; however, meeting these dates are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

B. Data collection and analysis services must include the following:

1. DWSD's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

2. DWSD's proposed water rates with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

3. Other relevant DWSD documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response:

Agreed.

4. KWA's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

5. Any engineering or environmental reports that evaluate KWA's proposal to provide municipal water to the City of Flint.

Bidder Response:

Agreed.

6. Other relevant KWA documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response:

Agreed.

C. **Engineering Evaluation:**

1. Evaluation and recommendation of a potential water supply for the City of Flint must be based upon: 1) Cost; 2) System redundancy and reliability; and 3) The capacity for the Flint River to supply all of the City of Flint's water needs.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

2. Evaluation and recommendation of a potential water supply for the City of Flint will also be based upon any additional criteria mutually agreed upon by the Department of Treasury, the City of Flint and the Contractor.

Bidder Response:

Agreed.

D. The Contractor must carry out its operations in strict accordance with local, state, federal regulations.

Bidder Response:

Agreed.

E. Provide electronic copies (in the most suitable format) of the final inspection report of findings and recommendations to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013:

Bidder Response:

Agreed.

1. Describe format of findings and recommendations. Format should also include a description of all work performed.

Bidder Response:

Our attached Sample Project Plan describes our approach for the findings and recommendations. TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified.

a) Preliminary inspection report of findings and recommendations must be presented by December 20, 2012.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

b) Final inspection report of findings and recommendations must be presented no later than January 8, 2013.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

2. Describe electronic formats available.

Bidder Response:

Document formats would include PDF's or in their initial format (Word, Excel, GIS/CAD, etc.).

F. Submit findings and recommendations to an independent Quality Control and Quality Assurance (QA/QC) review process for validation.

Bidder Response:

Agreed; the independent QA/QC approach is included in our attached Sample Project Plan.

1. Provide electronic copies (in the most suitable format) of the independent QA/QC review to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013, with the final inspection report.

Bidder Response:

Agreed; however, meeting this date are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

1.030 Roles and Responsibilities

1.031 Contractor Staff, Roles, and Responsibilities

1. Contractor must identify staff who will be involved in the project, including the name of each individual, work locations, and detailed descriptions of their roles and responsibilities.

   Note: If an overall organization chart has been developed, provide a reference to that chart as well. Note any part-time personnel.

   Bidder Response:

The staff will be comprised of our senior management: Messrs. David Guastella and Awni Qaqish. Also, we will be supported by our part-time staff member, former Finance Director of Redford. Their roles will include meeting with Flint, KWA, and DWSD; estimating capital costs of all options; estimating all operation and maintenance costs of all options, a financial analysis for funding capital; and all other issues related to the costs of service.

2. Specific work schedules for this project are Monday through Friday, 8:00 a.m. to 5:00 p.m. Eastern Time; however, possible night and weekend hours may be required.

   Bidder Response:

Agreed.

1.032 State Staff, Roles, and Responsibilities

1. Contract Compliance Inspector (CCI): The State's CCI provides oversight and monitoring of the selected Contractor's adherence to the terms and conditions of this project and the Contract.

2. Project Manager: The State's Project Manager will monitor the project activities.

1.040 Project Plan

1.041 Project Plan Management

1. The Contractor will carry out this project under the direction and control of the CCI or designee.

2. Although there will be continuous liaison with the Contractor team, the CCI or designee will meet quarterly as a minimum, or as requested by the CCI or designee, with the Contractor's Project Manager for the purpose of reviewing progress and providing necessary guidance to the Contractor in solving problems which arise.

3. Contractors must provide a sample project plan with proposal for the deliverables proposed in section 1.022. The plan must include the details noted in section 1.041.4.

   Contractor Response:

Agreed; the Sample Project Plan is attached.

4. Within five working days of Contract or purchase order award, the Contractor must submit to the CCI or designee for final approval a detailed project plan. This final project plan must be in agreement with the Contractor's proposal and accepted by the State for Contract, and must include the following:

   a. The Contractor's project organizational structure.

   b. The Contractor's staffing table with names and title of personnel assigned to the project. This must be in agreement with staffing of accepted proposal. Necessary substitutions

due to change of employment status and other unforeseen circumstances may only be made with prior approval of the State.

c. The project breakdown showing sub-projects, activities and tasks, and resources required and allocated to each (e.g., estimated levels of effort for each level of personnel for Contractor personnel, including any contractual employees, and State personnel).

1.042 Reports

1. The Contractor must submit written bi-weekly summaries of progress which outline the work accomplished during the reporting period; work to be accomplished during the subsequent reporting period; problems, real or anticipated, which should be brought to the attention of the CCI; and notification of any significant deviation from previously agreed-upon work plans.

1.050 Acceptance – Deleted – N/A

1.060 Proposal Pricing

1.061 Proposal Pricing

1. For authorized Services and Price List, see Attachment A (Price Proposal). Please complete Attachment A and submit with proposal.

2. Bidders are encouraged to offer quick payment terms (i.e. _0__% discount off invoice if paid within _____ days). This information can be noted on the Bidders price proposal (see Attachment A). This may be a factor considered in the award decision.

3. Contractor's out-of-pocket expenses are not separately reimbursable by the State or local unit of government unless, on a case-by-case basis for unusual expenses, the State has agreed in advance and in writing to reimburse Contractor for the expense at the State's current travel reimbursement rates. See www.michigan.gov/dtmb for current rates.

4. Invoicing and payment must occur per Article 2 (Compensation) of Indefinite Scope Indefinite Delivery Contract No. 263 (Discretionary Contract Number 00263) and Attachment A.

1.070 Additional Requirements – Deleted – N/A

Article 2, Terms and Conditions

The terms and conditions of Indefinite Scope Indefinite Delivery Contract No. 263 (Discretionary Contract Number 00263) and apply to this SOW and any resulting Contract or purchase order.

Article 3 – Proposal Process

3.010 Introduction

3.011 Pre Bid Meetings – Deleted – N/A

3.012 Communications – Deleted – N/A

3.013 Questions

Questions concerning the SOW are to be submitted, in writing, no later than 3:00 p.m. Eastern Time on November 16, 2012 to:

Thomas Falik
Michigan Department of Treasury
430 West Allegan
Lansing, MI 48922
Email: FalikT@michigan.gov.

All questions must be submitted in writing and sent as an attachment in Microsoft Word or Rich Text Format (RTF). Changes to the SOW and answers to questions will be prepared as an addendum and issued to Contractors. Any issued addendum officially revises and supersedes the original SOW. Any addenda will be issued approximately November 19, 2012.

3.020 Award Process

3.021 Reservations

(a) The State reserves the right to award by item, part or portion of an item, group of items or total proposal, to reject any and all proposals in whole or in part, if, the best interest of the State will be so served.

3.022 Award Decision

Award recommendation will be made to the Administrator of Office of Departmental Services. Pending award recommendation approval, a purchase order will be issued authorizing services to commence.

3.030 Proposal Details

3.031 Complete Proposal

To be considered, each Contractor must submit a COMPLETE proposal in response to this SOW, using the format specified. No other distribution of proposals is to be made by the Contractor. The proposal must state how long it remains valid. This period must be at least 15 days from the due date for responses to this SOW.

3.032 Efficient Proposal

Each proposal should be prepared simply and economically, providing a straightforward, concise description of the Contractor's ability to meet the requirements of the SOW. Emphasis should be on completeness and clarity of content in the format specified.

3.033 Proposal Format

The following information must be included in all proposals. Contractors must respond to all sections of the SOW. Proposals should be formatted to include each of the following sections, which should be clearly identified using the same format as the SOW is written in and with the appropriate headings:

Article 1 – Statement of Work – Contractor must respond to each section. **Proposal must include detailed responses to all tasks as requested in Article 1. Contractors must copy these sections, and provide Contractor's response in the area specified for "Contractor Response". This area has been designed to expand as necessary**

3.040 Submitting Bids and Proposals

3.041 Proposal Submission

Proposal is due November 21, 2012 at 3:00 p.m. Eastern Time or as soon as possible. Submit an electronic copy of your proposal via e-mail to FalikT@michigan.gov in a Microsoft Office format. If an electronic copy of the proposal is not available, it can be mailed to the following address:

Michigan Department of Treasury
Purchasing Section
Attn: Thomas Falik
430 West Allegan
Lansing, MI 48922.

CITY OF FLINT WATER SUPPLY ASSESSMENT
SAMPLE PROJECT PLAN

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint. The work would be completed as an authorized task under the reference contract, Contract No. 00383. This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task.

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

CITY OF FLINT WATER SUPPLY ASSESSMENT

DWSD Discussion/Questions for the November 19, 2012 Meeting

1. Verify that the four options presented at the November 1, 2012 meeting are still available for consideration:
    c. Supplied from Potter & Baxter using the new model contract (assume a Maximum Day Customer),
    d. Supplied from Imlay Station,
    e. Finished un-pumped supply from Lake Huron WTP, and
    f. Raw un-pumped supply from Lake Huron WTP.
2. What additional capital improvements will be required for each option?
3. Are there other options being presented that should be considered (e.g., blending)?
4. To evaluate each option over the 25 year planning period, provide:
    g. Annual water rate for Flint for 2002 through 2012, and the
    h. Projected annual rate adjustment for each option. What are the proposed measures to keep the rate adjustments down in the future?
5. Flint stated a 10% increase in the capacity charge. What number did DWSD provide Flint?
6. Flint financial comparison is based on the initial Cost of $14,413,858, which includes $2,725,538 for Flint WTP operating cost, i.e DWSD charge is $11,688,320. How good is this number?
7. KWA's initial charge to Flint is based on 12 MGD. Is DWSD charge based on 12 MGD?

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Summary of DWSD Cost Allocations to Flint Under Various Scenarios

Flint Only

	Revenue Requirement	Rates and Charges: Fixed	Rates and Charges: Commodity	Rates and Charges: Avg Unit Cost
1 **Status Quo**	11,461,700	357,271	12.46	19.91

Dave Guastella, TYJT

DATE: November 24, 2012

PURPOSE OF MEETING: Meeting with the City of Flint for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment

PREPARED BY: Dave Guastella

A meeting was held at the City of Flint Municipal Center on November 20, 2012 to discuss the water supply option being presented by the Karegnondi Water Authority (KWA) to the City of Flint. The main items discussed generally followed the attached KWA Discussion/Questions that were provided to City prior to the meeting. A summary of the key points discussed are provided below.

The questions submitted are repeated in the Discussion Items for easy reference. A summary of the action items generated from the meeting follow the Discussion Items.

DISCUSSION ITEMS

1. Question/Discussion Item: Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?

   KWA would supply up to 18 MGD. 18 MGD has been assumed as the maximum day demand and 12 MGD is assumed as the average day demand throughout the 25 year planning period.

2. Question/Discussion Item: Copy of the intake contract documents and engineer's estimate.

   The intake contract documents are approximately 90% complete and are not available for distribution. However, the updated Appendix 20, dated October 4, 2012 includes the most recent cost estimate of the intake based on the current design in process.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

3. Question/Discussion Item: Documentation of the Flint WTP improvements required and cost estimate.

   The costs are approximately $7M as presented in the September 2009 Preliminary Engineering Report. However, this estimate has been updated. Some processes have been eliminated. John O'Brien will provide the updated costs and the description of the planned improvements to the plant.

4. Question/Discussion Item: Confirm Flint's allocated percentage of the KWA capital improvements (30%?).

   Yes, the allocation is based on 18 MGD/60 MGD total capacity.

5. Question/Discussion Item: Copy of the proposed KWA operating agreement for Flint.

   John O'Brien will provide the operating agreement as well as the Capacity Contract and Articles of Incorporation.

6. Question/Discussion Item: What is the annual operating agreement adjustment projected for the 25 year planning period?

   This information is provided in Appendix 14, Table 14.2 of the September 2009 Preliminary Engineering Report. Operating cost based on Table 1. Used 12 MGD as average day demand (ADD). Assumed 5% as the annual increase in operating costs. John O'Brien indicated that these operating costs were based on Genesee County's operating costs. John O'Brien will provide the last 10 years of audited financial statements for the water fund.

   To assess operating and maintenance costs for the Flint WTP, Duffy will provide multiple years of financial statements for the water fund. Duffy did not believe they had 10 years, but they will provide what they have.

   Regarding operation and maintenance costs, Flint believes that these costs will increase by 2/3 of what they are now.

7. Question/Discussion Item: Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).

   KWA will not release the route due to concerns regarding speculation of land and easements. John O'Brien did indicate that the Lake Huron pump station would be at Fisher and M-25. The intermediate pump station site is near a location of the Lapeer/Sanilac/St. Clair border; where all three meet.

8. Question/Discussion Item: KWA's initial charge to Flint is based on a 12 MGD average day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

This was answered in Question No. 1 above.

9. Question/Discussion Item: Is there a transition plan and cost during construction of the KWA system identified?

   Flint is looking for an agreement with DWSD for back-up supply from the 72-inch main at the Genesee border.

10. Question/Discussion Item: The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?

    Flint indicated that they have adequate storage to supply the system for 6 to 7 days. Flint has 55 MG of storage and Genesee County has 65 MG for 2.5 days.

11. Question/Discussion Item: The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?

    In cases of emergency, Flint indicated that the back-up for the KWA system will be the same as it is now with DWSD; they will use the Flint River as the source water. Flint currently operates their plant four times a year.

    When questioned as to whether the WTP will be able to treat both lake water from the KWA system and river water Flint indicated that once the improvements identified in the September 2009 Preliminary Engineering Report are completed they will be able to accomplish both treatment processes. Flint will provide a schematic of the treatment trains at the WTP and a copy of the Flint transmission system.

    Genesee County indicated that additional redundancy would also be provided from the new Genesee County WTP.

    Regarding hydraulic transients; Genesee County indicated that a model analysis has not been included, but capital costs for mitigating transients have been included.

12. Question/Discussion Item: Related to the construction cost:

    a. Does it include an additional traffic lane since the construction will occupy half the right of way? *Not required, all roads are county roads; however, there are a few State road crossings.*

    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million. *Not required; all of the counties have waived any fees.*

    c. Does the cost of the steel pipe segments include corrosion protection measures such as

anode stations and related O&M? *Yes; however, the KWA has not settled on using steel pipe. PCCP pipe may be used. Steel shown in estimate because it is highest in cost and therefore the pricing is conservative.*

d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators. *Yes, Genesee County did emphasize that the SCADA system will be simple and straightforward because a lot of controls are not required.*

e. Other items discussed at the meeting included:

- The 2009 plant improvement cost is still good; however, there will be some reduction, such as a sulfuric chloride feed system that was eliminated. Plant capacity now is 36MGD, but will be 18 MGD.
- The KWA Lake Huron Pumping Station (LHPS) is now only high lift pump station.
- Genesee County will provide the distance of the intake pipe from the crib to the LHPS.
- The intake project is almost ready to bid; waiting for the COE permit.
- Genesee County is estimating the construction for the pipe lines and pump stations will begin July 2013.
- The route has been flown for survey.
- Genesee County is estimating construction will be complete and the project will be placed in service by Jan 2016.
- Genesee County to provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?

    The Flint River would serve as a back up supply.

14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

    The 40 years was stated in error. The reference was to DWSD's requirement to sign a 30 year contract.

    After 40 years Flint will own 30% of the project and can sell their share of ownership if they want. Conversely, with DWSD, they continue to pay for the capital projects but have no ownership. Flint believes they will know what they will be charged for the next 25 years versus DWSD that can't commit to a fixed escalation.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Action Items for Follow-up		
Items:	***Assigned To:***	***Date to Complete***
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12
2. KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12
3. Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12
4. Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12
5. Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12
7. Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.	John O'Brien	11/26/12

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

CITY OF FLINT WATER SUPPLY ASSESSMENT

KWA Discussion/Questions for the November 20, 2012 Meeting

1. Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?
2. Copy of the intake contract documents and engineer's estimate.
3. Documentation of the Flint WTP improvements required and cost estimate.
4. Confirm Flint's allocated percentage of the KWA capital improvements (30%?).
5. Copy of the proposed KWA operating agreement for Flint.
6. What is the annual operating agreement adjustment projected for the 25 year planning period?
7. Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).
8. KWA's initial charge to Flint is based on a 12 MGD maximum day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?
9. Is there a transition plan and cost during construction of the KWA system identified?
10. The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?
11. The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?
12. Related to the construction cost:
    a. Does it include an additional traffic lane since the construction will occupy half the right of way?
    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

c. Does the cost of the steel pipe segments include corrosion protection measures such as anode stations and related O&M?
d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference the for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?
14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

Comments: Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Subject: Flint
Attachments: Flint Rate Hist.pdf; Flint Rate Hist Imlay.pdf

Flint / Genesee (Page 1)
My original assessment was slightly off – the benefit is more gradual than I anticipated, probably because of the movement with all of the other customers in their exhibit Bs. Bottom line – average annual rate increase to Flint over the last 10 years has been 6.3% - it would be 5.5% had they contracted at 23mgd/40mgd with the second wave for FY 2010. (I left the FY 2009 figures alone to indicate the impact they got from the first wave).

Flint Only (Page 2)
Historical rates unchanged until hypothetical switch to negotiated contract for Flint only in FY 2010. The lower (relative to the combined Flint / Gen CO customer) max day results in a large decrease from the Page 1 figures, similar to what we showed last week. Bottom line – average annual rate increase to Flint over the last 10 years has been 6.3% - it would be 4.4% had they contracted at 12mgd/18mgd wit the second wave for FY 2010.

Flint rate if Imlay Station was point of connection.

CITY OF FLINT WATER SUPPLY ASSESSMENT

Action Items for Follow-up

Items:	*Assigned To:*	*Date to Complete*	*Status as of 11/29/12*
Requests Made at 11/20/12 Meeting			
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12	*Not Received* $7.1 mm
2. KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12	*Not Received*
3. Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12	Received 11/29/12
4. Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12	Received 11/26/12
5. Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12	Received 11/21/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12	Received 11/29/12
7. Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.	John O'Brien	11/26/12 12/5/12 talk to Dan. Comm Ed will send	*Not Received* engr today
Email request to D. Johnson 11/26/12			
8. Copy of the labor agreements for the Flint WTP sent Links 12/1/12	Duffy Johnson		*Not Received*
Email to E. Kurtz 11/28/12			
9. Please identify the type of bonds, KWA is anticipating on using. If they are municipal bonds, whose credit rating will be used for the KWA work?	Ed Kurtz Ed - Revenue bonds		*Not Received* TBD lab Tue
10. Please provide the most recent credit ratings for the appropriate enterprise fund applicable for the Flint work at the WTP and the KWA transmission system.	Ed Kurtz Ed will send		*Not Received*
11. If the bonds are revenue bonds, please identify the percent reserve assumed and the percent coverage anticipated.	Ed Kurtz per Ed must be negotiated	have not been set	*Not Received*
12. In the 09' KWA report 37% was assumed for engineering, contingencies, and bonding. In the 2012 update the percentage dropped to 25% for engineering and contingencies; bonding was not shown as part of the percentage. Does the 25% include bonding issuance costs? What percentage is assumed in either case for the issuance of bonds?	Ed Kurtz Per Ed he said yes 0% negotiated		*Not Received*

eng contingency 22%

313 402 0354

13. Please provide the last three years of water purchased and water billed. This will help us to determine the water loss amount. If the water loss is high, a proactive water audit program could reduce the total volume needed from the KWA. This could reduce the size of the pipeline and pumping needs.	Ed Kurtz Ed signed 12/4/17		*Not Received* — Did not receive it —

Article 1 – Statement of Work (SOW)

Note to Contractors: Proposals must include detailed responses to all tasks as requested in Article 1. Contractors should provide thorough responses to each task, or, when appropriate, state their agreement that the Contractor will provide the requested services. Contractors are encouraged to provide detailed responses in order to allow the State to fully evaluate the Contractor's capabilities.

Throughout this SOW, language referring to Contract or Contractor(s) refers to any Contract awarded from this SOW. This SOW in itself is not to be construed as a Contract.

1.010 Project Identification

1.011 Project Request

This is an SOW for a Municipal Water Supply Assessment on behalf of the Department of Treasury and the City of Flint in Genesee County. This is a formal request to prospective Contractors to solicit bids or price quotations. Contractors must submit written proposals according to the instructions contained within this document, discussing how they will meet the specific requirements.

Any awarded Purchase Order(s) between the State and any awarded Contractor(s) is a separate document, whose terms are limited by the Contract.

1.012 Background

The Treasury Department is charged with monitoring, oversight and provision of assistance to local units of government under various statutes, including but not limited to, the Home Rule City Act (Act 279 of 1909), the Uniform Budgeting and Accounting Act (Act 2 of 1968), and the Glenn Steil State Revenue Sharing Act (Act 140 of 1971). In providing such monitoring and assistance to local units of government, the Treasury Department strives to preserve the capacity of local units to provide those services essential to the public health, safety and welfare of the citizens of this State.

The City of Flint is currently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is provided through a single 72-inch water main that terminates at a master meter. The City of Flint's water treatment plant uses the Flint River as a back-up and redundancy supply source to the DWSD supply, as required by the Michigan Department of Environmental Quality (MDEQ). The City of Flint also provides potable water to Genesee County downstream of the DWSD master meter.

The newly formed Karegnondi Water Authority (KWA) plans to construct a raw water supply system that will feed Flint's water treatment plant with water directly from Lake Huron. The Flint water treatment plant could be upgraded to accommodate and treat this new raw water source. DWSD has also proposed alternatives to the existing agreement with the City of Flint that could also be pursued.

A Contractor is needed to provide services to the Department of Treasury and the City of Flint upon request of the Treasury Department. The Department of Treasury is requesting a Contractor provide an analysis of the water supply options for the City of Flint to assist the Department of Treasury and the City of Flint in determining the best available option.

1.020 Scope of Work and Deliverables

1.021 In Scope

The Contractor must provide Water Supply Assessment as requested by the Department of Treasury. These services will include data collection and review, an engineering evaluation and the generation of recommendations.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services.

1.022 Work and Deliverable

Contractor must provide Deliverables/Services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

A. **Data Collection and Review:**

1. Provide all labor, materials and equipment to fully perform the work of data collection and review for an assessment of water supply options for the City of Flint.

Bidder Response:

Our Price Proposal in Attachment A includes all labor, materials and equipment to perform the base work described in our Sample Project Plan.

2. Perform an analysis and comparison of the KWA and DWSD proposals that includes all capital, financing, operational and maintenance costs.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services.

3. Prepare and submit for Department of Treasury and City of Flint review a preliminary report on the findings by Thursday, December 20, 2012; additionally, a final inspection report of findings and recommendations must be presented no later than January 8, 2013 (also see Section 1.022.E).

Bidder Response:

Agreed; however, meeting these dates are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

B. Data collection and analysis services must include the following:

1. DWSD's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

2. DWSD's proposed water rates with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

3. Other relevant DWSD documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response:

Agreed.

4. KWA's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

5. Any engineering or environmental reports that evaluate KWA's proposal to provide municipal water to the City of Flint.

Bidder Response:

Agreed.

6. Other relevant KWA documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response.

Agreed.

C. **Engineering Evaluation**:

1. Evaluation and recommendation of a potential water supply for the City of Flint must be based upon: 1) Cost; 2) System redundancy and reliability; and 3) The capacity for the Flint River to supply all of the City of Flint's water needs.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

2. Evaluation and recommendation of a potential water supply for the City of Flint will also be based upon any additional criteria mutually agreed upon by the Department of Treasury, the City of Flint and the Contractor.

Bidder Response:

Agreed.

D. The Contractor must carry out its operations in strict accordance with local, state, federal regulations.

Bidder Response:

Agreed.

E. Provide electronic copies (in the most suitable format) of the final inspection report of findings and recommendations to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013:

Bidder Response:

Agreed.

1. Describe format of findings and recommendations. Format should also include a description of all work performed.

Bidder Response:

Our attached Sample Project Plan describes our approach for the findings and recommendations. TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified.

a) Preliminary inspection report of findings and recommendations must be presented by December 20, 2012.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

b) Final inspection report of findings and recommendations must be presented no later than January 8, 2013.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

2. Describe electronic formats available.

Bidder Response:

Document formats would include PDF's or in their initial format (Word, Excel, GIS/CAD, etc.).

F. Submit findings and recommendations to an independent Quality Control and Quality Assurance (QA/QC) review process for validation

Bidder Response:

Agreed; the independent QA/QC approach is included in our attached Sample Project Plan.

1. Provide electronic copies (in the most suitable format) of the independent QA/QC review to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013, with the final inspection report.

Bidder Response:

Agreed; however, meeting this date are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

1.030 Roles and Responsibilities

1.031 Contractor Staff, Roles, and Responsibilities

1. Contractor must identify staff who will be involved in the project, including the name of each individual, work locations, and detailed descriptions of their roles and responsibilities.

   Note: If an overall organization chart has been developed, provide a reference to that chart as well. Note any part-time personnel.

   Bidder Response:

The staff will be comprised of our senior management: Messrs. David Guastella and Awni Qaqish. Also, we will be supported by our part-time staff member, former Finance Director of Redford. Their roles will include meeting with Flint, KWA, and DWSD; estimating capital costs of all options; estimating all operation and maintenance costs of all options, a financial analysis for funding capital; and all other issues related to the costs of service.

2 Specific work schedules for this project are Monday through Friday, 8:00 a.m. to 5:00 p.m. Eastern Time; however, possible night and weekend hours may be required.

Bidder Response:

Agreed.

1.032 State Staff, Roles, and Responsibilities

1. Contract Compliance Inspector (CCI): The State's CCI provides oversight and monitoring of the selected Contractor's adherence to the terms and conditions of this project and the Contract.

2. Project Manager: The State's Project Manager will monitor the project activities.

1.040 Project Plan

1.041 Project Plan Management

1. The Contractor will carry out this project under the direction and control of the CCI or designee.

2 Although there will be continuous liaison with the Contractor team, the CCI or designee will meet quarterly as a minimum, or as requested by the CCI or designee, with the Contractor's Project Manager for the purpose of reviewing progress and providing necessary guidance to the Contractor in solving problems which arise.

3. Contractors must provide a sample project plan with proposal for the deliverables proposed in section 1.022. The plan must include the details noted in section 1.041.4.

   Contractor Response:

Agreed; the Sample Project Plan is attached.

4. Within five working days of Contract or purchase order award, the Contractor must submit to the CCI or designee for final approval a detailed project plan. This final project plan must be in agreement with the Contractor's proposal and accepted by the State for Contract, and must include the following:

   a. The Contractor's project organizational structure.

   b. The Contractor's staffing table with names and title of personnel assigned to the project. This must be in agreement with staffing of accepted proposal. Necessary substitutions

due to change of employment status and other unforeseen circumstances may only be made with prior approval of the State.

c. The project breakdown showing sub-projects, activities and tasks, and resources required and allocated to each (e.g., estimated levels of effort for each level of personnel for Contractor personnel, including any contractual employees, and State personnel).

1.042 Reports

1. The Contractor must submit written bi-weekly summaries of progress which outline the work accomplished during the reporting period; work to be accomplished during the subsequent reporting period; problems, real or anticipated, which should be brought to the attention of the CCI; and notification of any significant deviation from previously agreed-upon work plans.

1.050 Acceptance – Deleted – N/A

1.060 Proposal Pricing

1.061 Proposal Pricing

1. For authorized Services and Price List, see Attachment A (Price Proposal). Please complete Attachment A and submit with proposal.

2. Bidders are encouraged to offer quick payment terms (i.e. _0__% discount off invoice if paid within _____ days). This information can be noted on the Bidders price proposal (see Attachment A). This may be a factor considered in the award decision.

3. Contractor's out-of-pocket expenses are not separately reimbursable by the State or local unit of government unless, on a case-by-case basis for unusual expenses, the State has agreed in advance and in writing to reimburse Contractor for the expense at the State's current travel reimbursement rates. See **www.michigan.gov/dtmb** for current rates.

4. Invoicing and payment must occur per Article 2 (Compensation) of Indefinite Scope Indefinite Delivery Contract No. 263 (Discretionary Contract Number 00263) and Attachment A.

1.070 Additional Requirements – Deleted – N/A

Attachment A, Price Proposal

Bidders are encouraged to offer quick payment terms (i.e. __0__% discount off invoice if paid within _____ days). This information can be noted on the price proposal. This may be a factor considered in the award decision

Provide the price per deliverable for the proposed services in section 1.022.

CITY OF FLINT WATER SUPPLY ASSESSMENT
SAMPLE PROJECT PLAN

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint. The work would be completed as an authorized task under the reference contract, Contract No. 00383. This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task.

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

- Using DWSD's new model contract that provides reduction in cost for communities with their own storage,
- Moving the location of supply from Potter and Baxter to the Imlay Pumping Station to reduce fees associated with elevation and distance from DWSD's water plants,
- Providing finished (potable) non-pumped water from the Lake Huron Water Treatment Plant, and
- Providing raw (not treated) non-pumped water from the Lake Huron Water Treatment Plant.

This phase of the work would include the collection and review of the following documents:

- The Lake Huron Water Supply Karegnondi Water Authority Preliminary Engineering Report, dated September 2009 and the 2012 update by Rowe Engineering;
- The Analysis of the Flint River as a Permanent Water Supply for the City of Flint Report, dated July 2011;
- Proposed or draft contract agreements that would be used between the KWA and the City of Flint;
- DWSD's contract rates based on the new model contracts;
- Information related to other DWSD proposals for service to Flint; and
- Other letters, minutes, etc. from all parties that provide information that could be used in the evaluation.

All information provided would be evaluated and subsequent meetings would be held with the DWSD, Flint and the KWA to address any data gaps or clarifications that may be required. These meetings would be coordinated with the Treasurer so that its representatives can be present at the meetings. For the purpose of this proposal, TYJT has assumed a total of two meetings for both the DWSD and KWA.

3.2. Engineering Evaluation

The City of Flint Emergency Financial Manager has indicated that he believes the determination of who supplies water to the City's system should mainly be based on the following criteria (in order of importance):

- Cost,
- System redundancy/reliability, and
- The recognized limitation of the Flint River as a source to supplying all of Flint's water needs.

In consultation with the Treasurer, these factors plus additional ones that may be identified in the evaluation process would be used.

An analysis will be performed for the options identified and a comparison will be made based on cost, reliability of supply, and any limitations that may identified by both suppliers in providing the needed service.

TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified. TYJT will then incorporate comments from the Treasury's review and submit a final document to the Department of Treasury for their use.

Furthermore, as is done as a standard of practice at TYJT for quality control and quality assurance (QA/QC), an independent review will be completed by staff or outside consultants not directly involved in the project. These reviewers will have noted experience in the field necessary to complete the QA/QC reviews. Two reviews are envisioned; one to review the evaluation process and the other to review the findings and recommendations.

4. Schedule

At the meeting between all interested parties on November 1, 2012, two dates were identified by the Treasurer. The first date identified was December 20, 2012 for the preliminary evaluation to be provided to the State. The second date was January 15, 2013 for the Treasury to make a decision on the City of Flint water supply. TYJT proposes to complete the draft report for submittal on December 20th. This will provide a two week review period by the Treasury. The final report would then be completed and submitted one week prior to the January 15th deadline. TYJT will also be available, if requested by the Treasurer, to attend a general meeting with all parties involved at the conclusion of the work.

MEETING MINUTES

IN ATTENDANCE:	Ed Kurtz; Flint Emergency Financial Manager, City of Flint Dayne Walling; Mayor, City of Flint Mike Brown, City of Flint John O'Brien, Genesee County Howard Croft, City of Flint Dwayne "Duffy" Johnson, City of Flint Brent Wright, City of Flint Awni Qaqish, TYJT Dave Guastella, TYJT
DATE:	November 24, 2012
PURPOSE OF MEETING:	Meeting with the City of Flint for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment
PREPARED BY:	Dave Guastella

A meeting was held at the City of Flint Municipal Center on November 20, 2012 to discuss the water supply option being presented by the Karegnondi Water Authority (KWA) to the City of Flint. The main items discussed generally followed the attached KWA Discussion/Questions that were provided to City prior to the meeting. A summary of the key points discussed are provided below.

The questions submitted are repeated in the Discussion Items for easy reference. A summary of the action items generated from the meeting follow the Discussion Items.

DISCUSSION ITEMS

1. Question/Discussion Item: Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?

   KWA would supply up to 18 MGD. 18 MGD has been assumed as the maximum day demand and 12 MGD is assumed as the average day demand throughout the 25 year planning period.

2. Question/Discussion Item: Copy of the intake contract documents and engineer's estimate.

   The intake contract documents are approximately 90% complete and are not available for distribution. However, the updated Appendix 20, dated October 4, 2012 includes the most recent cost estimate of the intake based on the current design in process.

Comments: Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

3. Question/Discussion Item: Documentation of the Flint WTP improvements required and cost estimate.

   The costs are approximately $7M as presented in the September 2009 Preliminary Engineering Report. However, this estimate has been updated. Some processes have been eliminated. John O'Brien will provide the updated costs and the description of the planned improvements to the plant.

4. Question/Discussion Item: Confirm Flint's allocated percentage of the KWA capital improvements (30%?).

   Yes, the allocation is based on 18 MGD/60 MGD total capacity.

5. Question/Discussion Item: Copy of the proposed KWA operating agreement for Flint.

   John O'Brien will provide the operating agreement as well as the Capacity Contract and Articles of Incorporation.

6. Question/Discussion Item: What is the annual operating agreement adjustment projected for the 25 year planning period?

   This information is provided in Appendix 14, Table 14.2 of the September 2009 Preliminary Engineering Report. Operating cost based on Table 1. Used 12 MGD as average day demand (ADD). Assumed 5% as the annual increase in operating costs. John O'Brien indicated that these operating costs were based on Genesee County's operating costs. John O'Brien will provide the last 10 years of audited financial statements for the water fund.

   To assess operating and maintenance costs for the Flint WTP, Duffy will provide multiple years of financial statements for the water fund. Duffy did not believe they had 10 years, but they will provide what they have.

   Regarding operation and maintenance costs, Flint believes that these costs will increase by 2/3 of what they are now.

7. Question/Discussion Item: Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).

   KWA will not release the route due to concerns regarding speculation of land and easements. John O'Brien did indicate that the Lake Huron pump station would be at Fisher and M-25. The intermediate pump station site is near a location of the Lapeer/Sanilac/St. Clair border; where all three meet.

8. Question/Discussion Item: KWA's initial charge to Flint is based on a 12 MGD average day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

This was answered in Question No. 1 above.

9. Question/Discussion Item: Is there a transition plan and cost during construction of the KWA system identified?

   Flint is looking for an agreement with DWSD for back-up supply from the 72-inch main at the Genesee border.

10. Question/Discussion Item: The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?

    Flint indicated that they have adequate storage to supply the system for 6 to 7 days. Flint has 55 MG of storage and Genesee County has 65 MG for 2.5 days.

11. Question/Discussion Item: The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?

    In cases of emergency, Flint indicated that the back-up for the KWA system will be the same as it is now with DWSD; they will use the Flint River as the source water. Flint currently operates their plant four times a year.

    When questioned as to whether the WTP will be able to treat both lake water from the KWA system and river water Flint indicated that once the improvements identified in the September 2009 Preliminary Engineering Report are completed they will be able to accomplish both treatment processes. Flint will provide a schematic of the treatment trains at the WTP and a copy of the Flint transmission system.

    Genesee County indicated that additional redundancy would also be provided from the new Genesee County WTP.

    Regarding hydraulic transients; Genesee County indicated that a model analysis has not been included, but capital costs for mitigating transients have been included.

12. Question/Discussion Item: Related to the construction cost:

    a. Does it include an additional traffic lane since the construction will occupy half the right of way? *Not required, all roads are county roads; however, there are a few State road crossings.*

    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million. *Not required; all of the counties have waived any fees.*

    c. Does the cost of the steel pipe segments include corrosion protection measures such as

anode stations and related O&M? *Yes; however, the KWA has not settled on using steel pipe. PCCP pipe may be used. Steel shown in estimate because it is highest in cost and therefore the pricing is conservative.*

d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators. *Yes, Genesee County did emphasize that the SCADA system will be simple and straightforward because a lot of controls are not required.*

e. Other items discussed at the meeting included:

- The 2009 plant improvement cost is still good; however, there will be some reduction, such as a sulfuric chloride feed system that was eliminated. Plant capacity now is 36MGD, but will be 18 MGD.
- The KWA Lake Huron Pumping Station (LHPS) is now only high lift pump station.
- Genesee County will provide the distance of the intake pipe from the crib to the LHPS.
- The intake project is almost ready to bid; waiting for the COE permit.
- Genesee County is estimating the construction for the pipe lines and pump stations will begin July 2013.
- The route has been flown for survey.
- Genesee County is estimating construction will be complete and the project will be placed in service by Jan 2016.
- Genesee County to provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?

    The Flint River would serve as a back up supply.

14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

    The 40 years was stated in error. The reference was to DWSD's requirement to sign a 30 year contract.

    After 40 years Flint will own 30% of the project and can sell their share of ownership if they want. Conversely, with DWSD, they continue to pay for the capital projects but have no ownership. Flint believes they will know what they will be charged for the next 25 years versus DWSD that can't commit to a fixed escalation.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Action Items for Follow-up		
Items:	***Assigned To:***	***Date to Complete***
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12
2. KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12
3. Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12
4. Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12
5. Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12
7. Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.	John O'Brien	11/26/12

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

CITY OF FLINT WATER SUPPLY ASSESSMENT

KWA Discussion/Questions for the November 20, 2012 Meeting

1. Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?
2. Copy of the intake contract documents and engineer's estimate.
3. Documentation of the Flint WTP improvements required and cost estimate.
4. Confirm Flint's allocated percentage of the KWA capital improvements (30%?).
5. Copy of the proposed KWA operating agreement for Flint.
6. What is the annual operating agreement adjustment projected for the 25 year planning period?
7. Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).
8. KWA's initial charge to Flint is based on a 12 MGD maximum day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?
9. Is there a transition plan and cost during construction of the KWA system identified?
10. The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?
11. The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?
12. Related to the construction cost:
    a. Does it include an additional traffic lane since the construction will occupy half the right of way?
    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

c. Does the cost of the steel pipe segments include corrosion protection measures such as anode stations and related O&M?
d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference the for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?
14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

Anticipated Contract Start Date	11/26/2012

SOW Checklist for Contractor Proposal Contents and Responsiveness

This checklist is provided for your convenience to help remind Contractors of the important requirements of the SOW. The list may not be all inclusive. The Contractor is responsible to read the SOW and submit all the required responses. If Contractors have any questions concerning these requirements please contact the Buyer listed on the front page of this SOW document.

Article 1 and Attachment A:

____X_____ Responses have been provided for all items requested in Article 1, Statement of Work, as requested. Technical Proposal Requirements have been met and responses are included within the format designated by the State in Article 3.

____X_____ Price Proposal, Article 1, Section 1.061, for the proposal has been included in Contractor's proposal, according to the instructions laid out in Article 3 and using the format in Attachment A (if required in 1.061).

Article 3:

____X_____ The complete proposal was submitted to the appropriate location and on time in an electronic format.

____X_____ Responses have been provided for all items requested in Article 3 and includes signature by an individual authorized to legally bind Contractor's company.

Article 1 – Statement of Work (SOW)

Note to Contractors: Proposals must include detailed responses to all tasks as requested in Article 1. Contractors should provide thorough responses to each task, or, when appropriate, state their agreement that the Contractor will provide the requested services. Contractors are encouraged to provide detailed responses in order to allow the State to fully evaluate the Contractor's capabilities.

Throughout this SOW, language referring to Contract or Contractor(s) refers to any Contract awarded from this SOW. This SOW in itself is not to be construed as a Contract.

1.010 Project Identification

1.011 Project Request

This is an SOW for a Municipal Water Supply Assessment on behalf of the Department of Treasury and the City of Flint in Genesee County. This is a formal request to prospective Contractors to solicit bids or price quotations. Contractors must submit written proposals according to the instructions contained within this document, discussing how they will meet the specific requirements.

Any awarded Purchase Order(s) between the State and any awarded Contractor(s) is a separate document, whose terms are limited by the Contract.

1.012 Background

The Treasury Department is charged with monitoring, oversight and provision of assistance to local units of government under various statutes, including but not limited to, the Home Rule City Act (Act 279 of 1909), the Uniform Budgeting and Accounting Act (Act 2 of 1968), and the Glenn Steil State Revenue Sharing Act (Act 140 of 1971). In providing such monitoring and assistance to local units of government, the Treasury Department strives to preserve the capacity of local units to provide those services essential to the public health, safety and welfare of the citizens of this State.

The City of Flint is currently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is provided through a single 72-inch water main that terminates at a master meter. The City of Flint's water treatment plant uses the Flint River as a back-up and redundancy supply source to the DWSD supply, as required by the Michigan Department of Environmental Quality (MDEQ). The City of Flint also provides potable water to Genesee County downstream of the DWSD master meter.

The newly formed Karegnondi Water Authority (KWA) plans to construct a raw water supply system that will feed Flint's water treatment plant with water directly from Lake Huron. The Flint water treatment plant could be upgraded to accommodate and treat this new raw water source. DWSD has also proposed alternatives to the existing agreement with the City of Flint that could also be pursued.

A Contractor is needed to provide services to the Department of Treasury and the City of Flint upon request of the Treasury Department. The Department of Treasury is requesting a Contractor provide an analysis of the water supply options for the City of Flint to assist the Department of Treasury and the City of Flint in determining the best available option.

1.020 Scope of Work and Deliverables

1.021 In Scope

The Contractor must provide Water Supply Assessment as requested by the Department of Treasury. These services will include data collection and review, an engineering evaluation and the generation of recommendations.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services.

1.022 Work and Deliverable

Contractor must provide Deliverables/Services and staff, and otherwise do all things necessary for or incidental to the performance of work, as set forth below:

A. **Data Collection and Review:**

1. Provide all labor, materials and equipment to fully perform the work of data collection and review for an assessment of water supply options for the City of Flint.

Bidder Response:

Our Price Proposal in Attachment A includes all labor, materials and equipment to perform the base work described in our Sample Project Plan.

2. Perform an analysis and comparison of the KWA and DWSD proposals that includes all capital, financing, operational and maintenance costs.

Bidder Response:

Agreed; our attached Sample Project Plan describes our approach for these services.

3. Prepare and submit for Department of Treasury and City of Flint review a preliminary report on the findings by Thursday, December 20, 2012; additionally, a final inspection report of findings and recommendations must be presented no later than January 8, 2013 (also see Section 1.022.E).

Bidder Response:

Agreed; however, meeting these dates are predicated on receiving a notice to proceed (purchase order) the Treasury Department by November 26, 2012 by 5 p.m.

B. Data collection and analysis services must include the following:

1. DWSD's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

2. DWSD's proposed water rates with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

3. Other relevant DWSD documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response:

Agreed.

4. KWA's proposed contract with the City of Flint.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

5. Any engineering or environmental reports that evaluate KWA's proposal to provide municipal water to the City of Flint.

Bidder Response:

Agreed.

6. Other relevant KWA documents or information regarding the provision of municipal water to the City of Flint.

Bidder Response:

Agreed.

C. **Engineering Evaluation**:

1. Evaluation and recommendation of a potential water supply for the City of Flint must be based upon: 1) Cost; 2) System redundancy and reliability; and 3) The capacity for the Flint River to supply all of the City of Flint's water needs.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan.

2. Evaluation and recommendation of a potential water supply for the City of Flint will also be based upon any additional criteria mutually agreed upon by the Department of Treasury, the City of Flint and the Contractor.

Bidder Response:

Agreed.

D. The Contractor must carry out its operations in strict accordance with local, state, federal regulations.

Bidder Response:

Agreed.

E. Provide electronic copies (in the most suitable format) of the final inspection report of findings and recommendations to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013:

Bidder Response:

Agreed.

1. Describe format of findings and recommendations. Format should also include a description of all work performed.

Bidder Response:

Our attached Sample Project Plan describes our approach for the findings and recommendations. TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified.

a) Preliminary inspection report of findings and recommendations must be presented by December 20, 2012.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

b) Final inspection report of findings and recommendations must be presented no later than January 8, 2013.

Bidder Response:

Agreed; this is included in our attached Sample Project Plan and the date is predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

2. Describe electronic formats available.

Bidder Response:

Document formats would include PDF's or in their initial format (Word, Excel, GIS/CAD, etc.).

F. Submit findings and recommendations to an independent Quality Control and Quality Assurance (QA/QC) review process for validation.

Bidder Response:

This has been deleted per the Treasury's request dated 11/20/12.

1. Provide electronic copies (in the most suitable format) of the independent QA/QC review to the City of Flint and the Department of Treasury, Office of Fiscal Responsibility by January 8, 2013, with the final inspection report.

Bidder Response:

Agreed; however, meeting this date are predicated on receiving a notice to proceed from the Treasury Department by November 26, 2012.

1.030 Roles and Responsibilities

1.031 *Contractor Staff, Roles, and Responsibilities*

1. Contractor must identify staff who will be involved in the project, including the name of each individual, work locations, and detailed descriptions of their roles and responsibilities.

   Note: If an overall organization chart has been developed, provide a reference to that chart as well. Note any part-time personnel.

   Bidder Response:

The staff will be comprised of our senior management: Messrs. David Guastella and Awni Qaqish. Also, we will be supported by our part-time staff member, former Finance Director of Redford. Their roles will include meeting with Flint, KWA, and DWSD; estimating capital costs of all options; estimating all operation and maintenance costs of all options, a financial analysis for funding capital; and all other issues related to the costs of service.

2. Specific work schedules for this project are Monday through Friday, 8:00 a.m. to 5:00 p.m. Eastern Time; however, possible night and weekend hours may be required.

   Bidder Response:

Agreed.

1.032 State Staff, Roles, and Responsibilities

1. Contract Compliance Inspector (CCI): The State's CCI provides oversight and monitoring of the selected Contractor's adherence to the terms and conditions of this project and the Contract.

2. Project Manager: The State's Project Manager will monitor the project activities.

1.040 Project Plan

1.041 Project Plan Management

1. The Contractor will carry out this project under the direction and control of the CCI or designee.

2. Although there will be continuous liaison with the Contractor team, the CCI or designee will meet quarterly as a minimum, or as requested by the CCI or designee, with the Contractor's Project Manager for the purpose of reviewing progress and providing necessary guidance to the Contractor in solving problems which arise.

3. Contractors must provide a sample project plan with proposal for the deliverables proposed in section 1.022. The plan must include the details noted in section 1.041.4.

   Contractor Response:

Agreed; the Sample Project Plan is attached.

4. Within five working days of Contract or purchase order award, the Contractor must submit to the CCI or designee for final approval a detailed project plan. This final project plan must be in agreement with the Contractor's proposal and accepted by the State for Contract, and must include the following:

   a. The Contractor's project organizational structure.

   b. The Contractor's staffing table with names and title of personnel assigned to the project. This must be in agreement with staffing of accepted proposal. Necessary substitutions

due to change of employment status and other unforeseen circumstances may only be made with prior approval of the State.

c. The project breakdown showing sub-projects, activities and tasks, and resources required and allocated to each (e.g., estimated levels of effort for each level of personnel for Contractor personnel, including any contractual employees, and State personnel).

1.042 Reports

1. The Contractor must submit written bi-weekly summaries of progress which outline the work accomplished during the reporting period; work to be accomplished during the subsequent reporting period; problems, real or anticipated, which should be brought to the attention of the CCI; and notification of any significant deviation from previously agreed-upon work plans.

1.050 Acceptance – Deleted – N/A

1.060 Proposal Pricing

1.061 Proposal Pricing

1. For authorized Services and Price List, see Attachment A (Price Proposal). Please complete Attachment A and submit with proposal.

2. Bidders are encouraged to offer quick payment terms (i.e. _0__% discount off invoice if paid within _____ days). This information can be noted on the Bidders price proposal (see Attachment A). This may be a factor considered in the award decision.

3. Contractor's out-of-pocket expenses are not separately reimbursable by the State or local unit of government unless, on a case-by-case basis for unusual expenses, the State has agreed in advance and in writing to reimburse Contractor for the expense at the State's current travel reimbursement rates. See **www.michigan.gov/dtmb** for current rates.

4. Invoicing and payment must occur per Article 2 (Compensation) of Indefinite Scope Indefinite Delivery Contract No. 263 (Discretionary Contract Number 00263) and Attachment A.

1.070 Additional Requirements – Deleted – N/A

Article 2, Terms and Conditions

The terms and conditions of Indefinite Scope Indefinite Delivery Contract No. 263 (Discretionary Contract Number 00263) and apply to this SOW and any resulting Contract or purchase order.

Article 3 – Proposal Process

3.010 Introduction

3.011 Pre Bid Meetings – Deleted – N/A

3.012 Communications – Deleted – N/A

3.013 Questions
Questions concerning the SOW are to be submitted, in writing, no later than 3:00 p.m. Eastern Time on November 16, 2012 to:

Thomas Falik
Michigan Department of Treasury
430 West Allegan
Lansing, MI 48922
Email: FalikT@michigan.gov.

All questions must be submitted in writing and sent as an attachment in Microsoft Word or Rich Text Format (RTF). Changes to the SOW and answers to questions will be prepared as an addendum and issued to Contractors. Any issued addendum officially revises and supersedes the original SOW. Any addenda will be issued approximately November 19, 2012.

3.020 Award Process

3.021 Reservations
(a) The State reserves the right to award by item, part or portion of an item, group of items or total proposal, to reject any and all proposals in whole or in part, if, the best interest of the State will be so served.

3.022 Award Decision
Award recommendation will be made to the Administrator of Office of Departmental Services. Pending award recommendation approval, a purchase order will be issued authorizing services to commence.

3.030 Proposal Details

3.031 Complete Proposal
To be considered, each Contractor must submit a COMPLETE proposal in response to this SOW, using the format specified. No other distribution of proposals is to be made by the Contractor. The proposal must state how long it remains valid. This period must be at least 15 days from the due date for responses to this SOW.

3.032 Efficient Proposal
Each proposal should be prepared simply and economically, providing a straightforward, concise description of the Contractor's ability to meet the requirements of the SOW. Emphasis should be on completeness and clarity of content in the format specified.

3.033 Proposal Format

The following information must be included in all proposals. Contractors must respond to all sections of the SOW. Proposals should be formatted to include each of the following sections, which should be clearly identified using the same format as the SOW is written in and with the appropriate headings:

Article 1 – Statement of Work – Contractor must respond to each section. **Proposal must include detailed responses to all tasks as requested in Article 1. Contractors must copy these sections, and provide Contractor's response in the area specified for "Contractor Response". This area has been designed to expand as necessary**

3.040 Submitting Bids and Proposals

3.041 Proposal Submission

Proposal is due November 21, 2012 at 3:00 p.m. Eastern Time or as soon as possible. Submit an electronic copy of your proposal via e-mail to FalikT@michigan.gov in a Microsoft Office format. If an electronic copy of the proposal is not available, it can be mailed to the following address:

Michigan Department of Treasury
Purchasing Section
Attn: Thomas Falik
430 West Allegan
Lansing, MI 48922.

SIGNATURE AUTHORITY

I/We certify that the undersigned is authorized to submit bids/quotations on behalf of Tucker, Young, Jackson, Tull, Inc.(TYJT). The information provided about the attached response, pricing and sample project plan and TYJT's ability to provide the goods and/or services outlined in this SOW document is true and accurate. I/We understand that our product and/or service offerings must be in compliance with all requirements of this SOW document.

Attachment A, Price Proposal

Bidders are encouraged to offer quick payment terms (i.e. __0__% discount off invoice if paid within _____ days). This information can be noted on the price proposal. This may be a factor considered in the award decision.

Provide the price per deliverable for the proposed services in section 1.022.	
Deliverable	**Price**
A. Municipal Water Supply Assessment	
1. Data Collection and Review	$ 7,000
2. Engineering Evaluation	$ 28,800
3. Provide Results of QA/QC Review	$ 5,000
4. Provide Copies of Findings and Review Findings	$ 3,000
Grand Total	$ 43,800
B. Optional Services	
1.	$
2.	$
3.	$
4.	$
5.	$

Indefinite-scope, Indefinite-delivery Contract Number 00383
2012 Professional General Architectural/Engineering Services

CITY OF FLINT WATER SUPPLY ASSESSMENT
SAMPLE PROJECT PLAN

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint. The work would be completed as an authorized task under the reference contract, Contract No. 00383. This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task.

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

- Using DWSD's new model contract that provides reduction in cost for communities with their own storage,
- Moving the location of supply from Potter and Baxter to the Imlay Pumping Station to reduce fees associated with elevation and distance from DWSD's water plants,
- Providing finished (potable) non-pumped water from the Lake Huron Water Treatment Plant, and
- Providing raw (not treated) non-pumped water from the Lake Huron Water Treatment Plant.

This phase of the work would include the collection and review of the following documents:

- The Lake Huron Water Supply Karegnondi Water Authority Preliminary Engineering Report, dated September 2009 and the 2012 update by Rowe Engineering;
- The Analysis of the Flint River as a Permanent Water Supply for the City of Flint Report, dated July 2011;
- Proposed or draft contract agreements that would be used between the KWA and the City of Flint;
- DWSD's contract rates based on the new model contracts;
- Information related to other DWSD proposals for service to Flint; and
- Other letters, minutes, etc. from all parties that provide information that could be used in the evaluation.

All information provided would be evaluated and subsequent meetings would be held with the DWSD, Flint and the KWA to address any data gaps or clarifications that may be required. These meetings would be coordinated with the Treasurer so that its representatives can be present at the meetings. For the purpose of this proposal, TYJT has assumed a total of two meetings for both the DWSD and KWA.

3.2. Engineering Evaluation

The City of Flint Emergency Financial Manager has indicated that he believes the determination of who supplies water to the City's system should mainly be based on the following criteria (in order of importance):

- Cost,
- System redundancy/reliability, and
- The recognized limitation of the Flint River as a source to supplying all of Flint's water needs.

In consultation with the Treasurer, these factors plus additional ones that may be identified in the evaluation process would be used.

An analysis will be performed for the options identified and a comparison will be made based on cost, reliability of supply, and any limitations that may identified by both suppliers in providing the needed service.

TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified. TYJT will then incorporate comments from the Treasury's review and submit a final document to the Department of Treasury for their use.

4. Schedule

At the meeting between all interested parties on November 1, 2012, two dates were identified by the Treasurer. The first date identified was December 20, 2012 for the preliminary evaluation to be provided to the State. The second date was January 15, 2013 for the Treasury to make a decision on the City of Flint water supply. TYJT proposes to complete the draft report for submittal on December 20th. This will provide a two week review period by the Treasury. The final report would then be completed and submitted one week prior to the January 15th deadline. TYJT will also be available, if requested by the Treasurer, to attend a general meeting with all parties involved at the conclusion of the work.

Ed

Please provide an update to the requested information in the minutes. All of the information was supposed to have been provided by this past Monday.

Additionally, we also need a response to the following:

1. Please identify the type of bonds, KWA is anticipating on using. If they are municipal bonds, whose credit rating will be used for the KWA work?
2. Please provide the most recent credit ratings for the appropriate enterprise fund applicable for the Flint work at the WTP and the KWA transmission system.
3. If the bonds are revenue bonds, please identify the percent reserve assumed and the percent coverage anticipated.
4. In the 09' KWA report 37% was assumed for engineering, contingencies, and bonding. In the 2012 update the percentage dropped to 25% for engineering and contingencies; bonding was not shown as part of the percentage. Does the 25% include bonding issuance costs? What percentage is assumed in either case for the issuance of bonds?
5. Please provide the last three years of water purchased and water billed. This will help us to determine the water loss amount. If the water loss is high, a proactive water audit program could reduce the total volume needed from the KWA. This could reduce the size of the pipeline and pumping needs.

Let me know if you have any questions.

Dave

LAKE HURON WATER SUPPLY INITIATIVE
CONTRACT S-4000
WATER INTAKE SUPPLY

BID FORM

GENESEE COUNTY DRAIN COMMISSIONER'S OFFICE
DIVISION OF WATER AND WASTE SERVICES
G-4610 BEECHER ROAD
FLINT, MICHIGAN 48532-2617

DATE: _____, 20____

This Bid is submitted by _____, ("Bidder") to Genesee County, County Agency, the Genesee County Drain Commissioner's Office – Division of Water and Waste Services pursuant to Public Act 342 of the Michigan Public Acts of 1939, as amended ("GCDC-WWS").

The Bidder proposes and agrees to enter into an Agreement (including executing the Contract Documents) with GCDC-WWS in the form included in the Bidding Documents, to perform and furnish all Work as specified or indicated in the Contract Documents for the Bid price and within the times indicated in this Bid and in accordance with the other terms and conditions in the Contract Documents.

Bidder accepts all of the terms and conditions of the Invitation to Bid and Instructions to Bidders including, but not limited to, those dealing with the disposition of Bid security. This Bid shall remain subject to acceptance for ninety (90) days after the day of the Bid opening or for such longer period of time that Bidder may agree to in writing. Bidder shall sign and deliver the required number of counterparts of the Agreement with the bonds and other documents required by the Bidding Documents within twenty (20) days after the issuance date of the Notice of Award.

In submitting this Bid, Bidder represents and warrants to GCDC-WWS, as more fully set forth in the Agreement and Contract Documents, that:

1. Bidder has examined and carefully studied the Bidding Documents, the other related data identified in the Bidding Documents and the following Addenda, and receipt of all such documents is hereby acknowledged by Bidder.

Addendum No.	Addendum Date

2. Bidder has visited the Site and become familiar with and is satisfied as to the general, local and Site conditions that may affect cost, progress, performance and furnishing of the Work.

3. Bidder is familiar with and is satisfied as to all federal, state and local Laws and Regulations that may affect cost, progress and performance of the Work.

4. Bidder has carefully studied all: (A) reports of explorations and tests of subsurface conditions at or contiguous to the Site and all drawings of physical conditions in or relating to existing surface or subsurface structures at or contiguous to the Site (except Underground Facilities) which have been identified in the Supplementary Conditions as provided in Paragraph 4.02 of the General Conditions; and (B) reports and drawings of a Hazardous Environmental Conditions, if any, which have been identified in the Supplementary Conditions as provided in Paragraph 4.06 of the General Conditions.

5. Bidder has obtained and carefully studied all such additional or supplementary examinations, investigations, explorations, tests, studies and data concerning conditions (surface, subsurface and Underground Facilities) at or contiguous to the Site which may affect cost, progress or performance of the Work or which relate to any aspect of the means, methods, techniques, sequences and procedures of construction to be employed by Bidder, including applying the specific means, methods, techniques, sequences and procedures of construction expressly required by the Agreement and Contract Documents to be employed by Bidder and the safety precautions and programs incident thereto.

6. Bidder does not consider that any further examinations, investigations, explorations, tests, studies or data are necessary for the determination of this Bid for performance of the Work at the price(s), within the times and in accordance with other terms and conditions in the Agreement and Contract Documents.

7. Bidder is aware of the general nature of work to be performed by GCDC-WWS and others at the Site that relates to Work for which this Bid is submitted as indicated in the Agreement and Contract Documents.

8. Bidder has correlated the information known to Bidder, information and observations obtained from visits to the Site, reports and drawings identified in the Contract Documents and all additional examinations, investigations, explorations, tests, studies and data with the Contract Documents.

9. Bidder has given GCDC-WWS and Engineer written notice of all conflicts, errors, ambiguities or discrepancies that Bidder has discovered in the Agreement and Contract Documents, and the written resolution thereof by GCDC-WWS is acceptable to Bidder. Bidder acknowledges by submitting a Bid that if a conflict, error, ambiguity or discrepancy exists in the Bidding Documents, such conflict, error, ambiguity or discrepancy between the higher and lower price will be resolved in favor of the higher price.

10. The Agreement and Contract Documents are generally sufficient to indicate and convey understanding of all terms and conditions for performing and furnishing the Work for which the Bid is submitted.

11. Bidder further affirms this Bid is genuine and not made in the interest of or on behalf of any undisclosed individual or entity and is not submitted in conformity

with any agreement or rules of any group, association, organization, person or entity. Bidder has not directly or indirectly induced or solicited any other Bidder to submit a false or sham Bid. Bidder has not solicited or induced any individual or entity to refrain from bidding. Bidder has not sought by collusion to obtain for itself any advantage over any other Bidder or over GCDC-WWS.

1.01 Base Bid

Bidder shall complete the Work in accordance with the Contract Documents for the following price(s):

BASE BID (Bidders must provide prices for each item)

1.02 Major Suppliers

The Bidder has based the base bid on materials and products supplied by the following suppliers. Bidders must list the supplier of the following major materials or products:

78" Gate Supplier:_____
RCP Supplier: _____
PCCP Supplier: _____
Timber Supplier:_____

1.03 Alternative Bid Items

Bidders may provide bids for one or more alternatives listed below. Bidders are not required to provide bids for any of the alternatives. Where bids for alternatives are provided the information describing alternative materials, suppliers, and designs shall be provided.

The Bidder expressly agrees to the following provisions:

A. The base bid stated hereinbefore includes the furnishing and installation of materials listed on the base bid;
B. GCDC-WWS may select alternative materials as listed in the following tabulation, that the undersigned agrees to furnish and install such materials as selected and at the contract price equal to the base bid, adjusted by the difference between the sum of the installed prices for the items selected by GCDC-WWS as stated in the following tabulation;
C. The installed price stated in the following tabulation on all alternatives includes the preparation and submission to the Engineer by the Bidder of detailed Drawings showing all modifications, if any, of the Drawings necessary to accommodate the alternatives;
D. The installed cost stated in the following tabulation of alternatives includes a complete installation, including the furnishing and installation of any changes or modifications to the details presented in the drawings to accommodate the alternative material; and

E. All items offered in the following tabulation, if any, fully comply with the Specifications.

Item No. Alternative(s) offered by Bidder

13A Junction Chamber – Alternative design provided by contractor
Brief description of alternative design and construction method:

_____

_____

Lump Sum Price: $_____

16A 60" Intake Pipe, Open Cut Marine
Alternative Pipe Material Proposed:_____
Pipe Supplier: _____
Unit Price: $_____ per LF

17A 78" Intake Pipe, STA 8+50 to 19+50, Tunneling
Alternative Pipe Material Proposed:_____
Pipe Supplier: _____
Unit Price: $_____ per LF

18A 78" Intake Pipe, STA 19+50 to 22+50, Tunneling or Open Cut Marine (Contractor's Choice)

Pipe Material Proposed for tunneling installation _____

Pipe Supplier for tunneled pipe _____

Pipe Material Proposed for open cut marine installation _____

Pipe Supplier for marine pipe _____

Unit price for alternative proposed by bidder: $_____ Per LF

20A 78" Intake Pipe, STA 22+50 to POE, Open Cut Marine
Alternative Pipe Material Proposed:_____
Pipe Supplier: _____
Unit Price: $_____ per LF

The Bidder understands and agrees that the Owner may consider the Alternative Bid Items in determining the lowest responsive bidder. The decision to consider the Alternative Bid Items is the Owner's sole decision. Alternative Bid Items will be considered only when there is potential for the alternative to provide the Owner with greater or equal value than established by the Base Bid. The Owner will consider the likely impact of the time and Owner's additional costs for review of an alternative when determining whether to consider an alternative.

Bidders proposing on Alternatives are responsible to submit design details and sufficient supporting documentation to demonstrate that the proposed alternative is sound and provides the owner with equal or greater value than the "base bid items". Alternatives must meet the requirements of the plans and specifications. The documentation is not required at the time bids are submitted, but may be requested by the Owner following the bid opening if the Owner decides to consider a particular alternative. If requested, design details and supporting documentation shall be provided to the Owner within ten calendar days. Bidders shall identify the impacts of the proposed alternative(s) to any other portions of the project, including changes in schedule or cost.

The decision whether or not to accept an alternative following the owner's review and evaluation will be the sole decision of the owner. The best value to the owner and that the alternative provides an equal or better standard than established by the base bid item.

1.04 Award of the contract will be to lowest responsive, responsible bidder based on the Base Bid, any alternatives reviewed and acceptable to the Owner, and bid that is considered to be in the best interest of GCDC-WWS.

2.01 **BID CONDITIONS.** Bidder has carefully checked the Bid against the Agreement and Contract Documents before preparing the Bid and accepts the items listed in the Bid as substantially correct, both as to classification and amount and as correctly listing the complete Work to be done in accordance with the Agreement and Contract Documents.

3.02 Bidder agrees that the Work shall be Substantially Completed and finally completed and ready for final payment on or before the dates or within the number of days indicated in Section 4.02 of the Agreement.

3.03 Bidder agrees to the provisions of the Agreement as to liquidated damages (as set forth in Section 4.03 of the Agreement) in the event of failure to complete the Work within the times specified in Section 4.02 of the Agreement.

4.01 The following documents are attached to and made a part or condition of this Bid:

A. Legal status of Bidder shall be included (Attachment A). If Bidder is an entity, the authorization of appropriate officers, managers, members or partners as the case may be, authorizing the person signing the Bid to obligate the entity for a contract shall be submitted;

B. Non-collusion Affidavit of prime Bidder (Attachment B);

C. A tabulation of Subcontractors, Suppliers and other individuals and entities required to be identified in this Bid (Attachment C);

D. Required Bidder's Qualification Statement with supporting data (Attachment D; 48 hours after request to do so);

E. Bidder Certification (Attachment E);

F. Required Bid security in the form of a certified check or cashier's check or Bid bond (Attachment F);

G. Certification of Debarment (Attachment G);

H. Safety Questionnaire (Attachment H; 48 hours after request to do so);

J. Bidder shall acknowledge receipt of any Addenda by noting the Addenda on the first page of the Bid and by return of the signed affidavit enclosed with each Addenda;

K The name of Bidder and its official or registered address, telephone number, fax number and e-mail address shall be set forth on the last sheet of the Bid; and

L. All items in the Bid shall be completed as noted in writing.

5.01 The capitalized words used in this Bid, shall have the meaning indicated in the General Conditions and the Supplementary Conditions.

6.01 Communications concerning this Bid shall be addressed to the following person or such other person as who may subsequently be identified by GCDC-WWS:

Indefinite-scope, Indefinite-delivery Contract Number 00383
2012 Professional General Architectural/Engineering Services

CITY OF FLINT WATER SUPPLY ASSESSMENT

November 2012

1. Scope of Work

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer is providing a proposal to perform an analysis of the water supply options being considered by the City of Flint. The work would be completed as an authorized task under the reference contract, Contract No. 00383. This proposal provides a background of our understanding of the issues, our approach, schedule dates, and the level of effort to perform the task.

2. Background

The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint's Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining the best course going forward for the City of Flint.

3. Scope of Work

The proposed scope of work summarizes TYJT's approach to perform the analysis. The work includes data collection and review, an engineering evaluation, and recommendations. The recommendations would be provided in a report that would also include a description of all the work performed under this task.

3.1. Data Collection and Review

To perform an analysis of competing proposals it is important to provide a relative or "apples-to-apples" comparison. As example, DWSD's cost of service includes all capital, financing, and operation and maintenance costs to deliver the water to Flint's system. Therefore, it will be necessary for an assessment of KWA's proposal to also include all of these costs in the comparison.

Additionally, DWSD is proposing other alternatives to its existing agreement with Flint that will also need to be evaluated. The options currently proposed include:

- Using DWSD's new model contract that provides reduction in cost for communities with their own storage,
- Moving the location of supply from Potter and Baxter to the Imlay Pumping Station to reduce fees associated with elevation and distance from DWSD's water plants,
- Providing finished (potable) non-pumped water from the Lake Huron Water Treatment Plant, and
- Providing raw (not treated) non-pumped water from the Lake Huron Water Treatment Plant.

This phase of the work would include the collection and review of the following documents:

- The Lake Huron Water Supply Karegnondi Water Authority Preliminary Engineering Report, dated September 2009 and the 2012 update by Rowe Engineering;
- The Analysis of the Flint River as a Permanent Water Supply for the City of Flint Report, dated July 2011;
- Proposed or draft contract agreements that would be used between the KWA and the City of Flint;
- DWSD's contract rates based on the new model contracts;
- Information related to other DWSD proposals for service to Flint; and
- Other letters, minutes, etc. from all parties that provide information that could be used in the evaluation.

All information provided would be evaluated and subsequent meetings would be held with the DWSD, Flint and the KWA to address any data gaps or clarifications that may be required. These meetings would be coordinated with the Treasurer so that its representatives can be present at the meetings. For the purpose of this proposal, TYJT has assumed a total of two meetings for both the DWSD and KWA.

3.2. Engineering Evaluation

The City of Flint Emergency Financial Manager has indicated that he believes the determination of who supplies water to the City's system should mainly be based on the following criteria (in order of importance):

- Cost,
- System redundancy/reliability, and
- The recognized limitation of the Flint River as a source to supplying all of Flint's water needs.

In consultation with the Treasurer, these factors plus additional ones that may be identified in the evaluation process would be used.

An analysis will be performed for the options identified and a comparison will be made based on cost, reliability of supply, and any limitations that may identified by both suppliers in providing the needed service.

TYJT will draft a report for the Treasurer that identifies the information collected, the analysis process, our findings, and the recommendations made. Our recommendations will be based on the risks to Flint associated with the options identified. TYJT will then incorporate comments from the Treasury's review and submit a final document to the Department of Treasury for their use.

Furthermore, as is done as a standard of practice at TYJT for quality control and quality assurance (QA/QC), an independent review will be completed by staff or outside consultants not directly involved in the project. These reviewers will have noted experience in the field necessary to complete the QA/QC reviews. Two reviews are envisioned; one to review the evaluation process and the other to review the findings and recommendations.

4. Schedule

At the meeting between all interested parties on November 1, 2012, two dates were identified by the Treasurer. The first date identified was December 20, 2012 for the preliminary evaluation to be provided to the State. The second date was January 15, 2013 for the Treasury to make a decision on the City of Flint water supply. TYJT proposes to complete the draft report for submittal on December 20th. This will provide a two week review period by the Treasury. The final report would then be completed and submitted one week prior to the January 15th deadline. TYJT will also be available, if requested by the Treasurer, to attend a general meeting with all parties involved at the conclusion of the work.

5. Level of Effort and Cost

TYJT estimates the level of effort to be $39,500. The work would be billed on a time and material basis using the rates in the reference contract, Contract No. 00383.

Subject: RE: water questions

Good morning Ed,

We will review the links you provided for Action Item No. 8; however, we still do not have information from the other items. Below is a description of the outstanding items. I have also attached the action item list once again for your use.

Please respond as soon as possible as this is delaying our ability to complete our evaluation.

Thank you,

Dave

Action Item No. 1: Below is the email from Brent. We have requested a breakdown of the cost estimate and what the improvements are for; this information was not received.

Also, John O'Brien indicated that the cost has changed (reference Discussion Item No. 3 of our minutes on 11/21/12). Mr. O'Brien was to provide the updated costs and a description of the planned improvements to the plant.

The proposed back up to the KWA line is for the Flint WTP to change over from treating lake water to treating river water. A treatment train schematic would show how this is to be done and what treatment processes are required for each. Our concern is how easily this can be done and if there would be any potential water quality issues with mixing the two sources.

Action Item No. 2: I checked with Awni Qaqish and he did not receive the operating agreement from John O'Brien on November 20th. Please forward as soon as possible.

Action Item No. 7: Please let us know when we can anticipate getting this information from Genesee County.

Action Items No. 9 through 12: Please let us know when we can anticipate getting this information from you.

Subject: water questions

Attached is the response to your last set of questions. With the exception of question 7 which will be provided by the Genesee County Drain Commission, I believe we have answered all your questions. If you need more information please contact me. Ed

CITY OF FLINT WATER SUPPLY ASSESSMENT

Action Items for Follow-up			
Items:	***Assigned To:***	***Date to Complete***	***Status as of 11/29/12***
Requests Made at 11/20/12 Meeting			
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12	*Not Received*
2. KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12	*Not Received*
3. Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12	Received 11/29/12
4. Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12	Received 11/26/12
5. Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12	Received 11/21/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12	Received 11/29/12
7. Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.	John O'Brien	11/26/12	*Not Received*
Email request to D. Johnson 11/26/12			
8. Copy of the labor agreements for the Flint WTP	Duffy Johnson		*Not Received*
Email to E. Kurtz 11/28/12			
9. Please identify the type of bonds, KWA is anticipating on using. If they are municipal bonds, whose credit rating will be used for the KWA work?	Ed Kurtz		*Not Received*
10. Please provide the most recent credit ratings for the appropriate enterprise fund applicable for the Flint work at the WTP and the KWA transmission system.	Ed Kurtz		*Not Received*
11. If the bonds are revenue bonds, please identify the percent reserve assumed and the percent coverage anticipated.	Ed Kurtz		*Not Received*
12. In the 09' KWA report 37% was assumed for engineering, contingencies, and bonding. In the 2012 update the percentage dropped to 25% for engineering and contingencies; bonding was not shown as part of the percentage. Does the 25% include bonding issuance costs? What percentage is assumed in either case for the issuance of bonds?	Ed Kurtz		*Not Received*

13. Please provide the last three years of water purchased and water billed. This will help us to determine the water loss amount. If the water loss is high, a proactive water audit program could reduce the total volume needed from the KWA. This could reduce the size of the pipeline and pumping needs.	Ed Kurtz		*Not Received*

STATE OF MICHIGAN CONTRACT NO. 271N3200089

CITY OF FLINT WATER SUPPLY ASSESSMENT

At the request of the Treasurer, Tucker, Young, Jackson, Tull, Inc. (TYJT) makes the following recommendation to the Department of Treasury concerning Flint's water supply alternatives. Based on the financial analysis performed of the various options presented by DWSD to continue treated water service to Flint compared to Flint being supplied by the new KWA untreated water system, TYJT believes that several of the options presented by DWSD are lower in cost currently and over the long run than the one offered by KWA. TYJT also believes that DWSD's most recent offer (subsequent to the submittal of our report) to build a smaller parallel water main from Imlay to Flint, funded by the entire DWSD base of customers, is the best solution offering the least cost alternative and the required redundancy by MDEQ.

Furthermore, since a majority of the KWA system has not been designed and none of the system has been constructed, there is an additional risk that the cost of the KWA system may actually be higher than estimated due to potential construction delays and unforeseen conditions. This risk to Flint could be substantial since the city is responsible for 30 percent of the KWA design and construction costs while still having to purchase water from DWSD during the construction period.

Finally, there are other issues that were identified in our report that may result in risks to Flint if it were to join KWA that should be considered by the Treasury in determining how Flint's potable water should be supplied. These issues are related to redundancy and reliability, other items affecting cost, and Flint's desire to control its own destiny related to its water supply. These are described further below.

- DWSD's supply to Flint is via a 72-inch water main from Imlay City. This main also supplies Imlay City, Mayfield and the Greater Lapeer County Utilities Authority (GLCUA). The volume of water contained within the 72-inch main is approximately 30 million gallons. If Genesee and Flint move to KWA then the three remaining communities' consumption would most likely not be large enough to maintain fresh water in DWSD's pipeline (due to loss of chlorine residual). DWSD may consider shutting down the 72-inch line completely due to the water quality concerns, which would then create an additional burden for Imlay, Mayfield and GLCUA to finance treated water supplies.
- The KWA supply option is counter to the Treasury's Competitive Grant Assistance Program (Formerly EVIP Grant). This program has been put in place to allow for communities to consolidate their services and save money. Two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (GLCUA, Mayfield, Imlay City) separating from another water system is in contradiction to the program.
- There is a concern over the ability of smaller systems (KWA) over larger systems (DWSD) to pay for future unfunded mandates and regulations. Obviously, identifying regulation requirements over 30 years is hard to determine. However, it is widely accepted that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.
- Although Flint will be responsible for 30 percent of the construction cost, they will only have a minority vote on the KWA board. Furthermore, there are other communities (Lapeer County, the City of Lapeer, and Sanilac County) that sit on the board and vote. However, they are not purchasing water nor contributing to the construction costs. Their position on the KWA Board will not provide them an ability to "control their own destiny," as they have stated to the Treasury.

Project Costs - TYJT Slides 26 through 30

	KWA	TYJT

Total	$272,421,558	$357,578,260
ELAC as % of Construction	25.0%	42.9%

UPDATE TO TREASURY REGARDING THE CITY OF FLINT EVALUATION OF WATER SERVICE DELIVERY

1. It is the goal of the City of Flint to assure the delivery of water to its residents and businesses at the lowest cost possible over the long term. City officials have expended considerable amounts of time over the past many months evaluating three primary options: water service delivery by KWA, continued water service delivery by DWSD, and sole reliance on the Flint River. At this time we continue to consider the KWA and DWSD options, but do not believe that sole reliance on the Flint River would be in the best interests of the City.
2. We have previously provided Treasury with an analysis of the KWA and DWDS options. At this time, depending on the final outcome of negotiations regarding future costs, either option could be the best for the City.
3. Treasury engaged the services of Tucker, Young Jackson, Tull, Inc. (TYJT) of Detroit to review the assumptions underlying the KWA option. Their assessment was recently presented to City officials and raised several questions as to the credibility of the KWA option. City officials shared the TYJT assessment with Rowe Engineering and the Genesee County Water and Waste Services and requested their response to the TYJT analysis.
4. Rowe Engineering met with City Officials to review their response to the TYJT assessment and provided the attached report. In our judgment, Rowe adequately addressed the significant concerns raised by TYJT, including those related to pump station costs, land acquisition costs, legal, engineering and contingency estimates, and bonding costs. Consequently, it is our belief that the KWA proposal as outlined in October, 2012, is credible, and should continue to be used in evaluating the City's options.
5. Further, our review of the proposal from DWSD (December 21, 2012) raises questions which must be addressed. For example, the DWSD proposal indicates that the cost reductions would be phased in over five years. Further, no actual projected dollar amounts for the first year or subsequent years were included in the proposal. The City has asked DWSD, based on a projected water usage, to supply the City with projected dollar and unit costs over the next five years. The Detroit proposal also does not address projected future rate increases. (See attached Proposal and Rate information)
6. Based on the Proposal from Detroit along with projected rates for FY13 provided November 9, 2012 by DWSD, The City has developed a cost analysis of the following options:
    a. Detroit Proposal 1 with a 6.8% annual rate of increase
    b. Detroit Proposal 1 with a 4.4% annual rate of increase
    c. KWA based on the Rowe study

    It is important to note that a review of the City's records reflects a 10.5% average increase over the past 10 years. For the entire history of our contract with DWSD the average annual increase has been 6.7%. Note that the TYJT's analysis was based on the 2004 through 2014 years which showed a -7.4% rate increase in the first year (2004), while ignoring the 2003 year which showed a 38.1% rate

increase. The time period of 2002 through 2012 was used to calculate Genesee County' rate. (See attached Rate Analysis)

The City's projections for the above referenced options over the 30 year life is as follows: (See attached Cost Analysis)

a. Detroit Proposal 1 with a 6.8% annual rate of increase---$890,513,917
b. Detroit Proposal 1 with a 4.4% annual rate of increase---$705,602,181
c. KWA based on the Rowe study--$649,241,254 - P1

7. One of the options provided by TYJT on page 9 of their slides projects a rate of $11.11/MCF. If DWSD can provide that rate along with a guarantee of future rates not to exceed their projection of 4.4% over the life of the contract, the City would sign a contract with Detroit. It is the City's belief that the WSW would also sign a contract.
8. If the City of Flint signs a contract with Detroit the following provisions should also be agreed upon:
    a. The City would have a seat on the Technical Advisory Board
    b. The City would have a seat on the DWSD board
    c. That the City could opt out if the conditions as Proposed by DWSD are not agreed to
9. All things being equal the City believes the following are also important:
    a. The availability of raw water to the City and County for economic development in heavy/light industry, food processing and agriculture
    b. The possibility of creating a Mid-Michigan Regional Water/Sewer Authority
10. For the sake of regional integrity, it would also be a step backwards for the City of Flint and Genesee County to be on different water supply systems. It is in the City's best interest to be able to pursue shared services with nearby municipalities and counties
11. The City would also reiterate the critical nature of long term costs. The City is not well served with decisions that work for the short term but not the long.

Attachments:	TYJT Response Exhibit.pdf

Dave - please see attachment, which summarizes the information you are seeking. You should be aware of several items:

- The allocated costs of service and rates computed in the attachment follow an "all else being equal" application of the current (FY 2012-13) DWSD unit costs. This is consistent with the figures we've been discussing with Flint representatives in one on one meetings. Whenever these service requirements actually get applied in a proposed rate, the lower SYSTEM units associated with lower FLINT units (blending, max day, Genesee, etc.) will raise the unit costs for ALL customers, creating a moderate impact for ALL customers. We've acknowledged this to Flint representatives in our discussions. Frankly, with all of the other moving parts (associated with other customer contract renegotiations, changing revenue requirements from the new organization structure, etc.) - we are of the opinion that this approach is the most appropriate option.
- As such, in our discussions with Flint we've taken care to identify these figures as hypothetical results indicative of rate calculations, as opposed to firm offers.
- Scenarios 3 and 4 (average day service only) have not been part of our discussions with Flint to date.
- As Sue mentioned, our most recent discussions with Flint have introduced a potential rate "credit" for them providing their own redundancy and/or for DWSD reserving wheeling rights in the event that Flint elects to move their delivery point to Imlay. These elements are not part of the existing DWSD rate structure and are less easily quantified.
- We've not included any "rate" impact of the sale of the 72-inch main to Flint, nor have we been definitive with how that would work in our discussions with Flint. We contemplate that the transaction could be negotiated in a manner that takes the items mentioned in the prior bullet into consideration. We are scheduled to have further conversations with Flint on these concepts tomorrow.

I trust that this information is responsive to your requests. Let me know if you have any questions.

Raphael

Per our conversation please run the following two scenarios for supplying only Flint from Potter/Baxter and from Imlay. The first assumes that DWSD will provide 2/3 rds of the average and maximum day demands, while the second option assumes that the Flint WTP will supply anything above the average day demand requirements.

1. Annual Volume: 390,374 MCF (8 MGD Average Day Demand)
   Maximum Day: 12 MGD
   Peak Hour: 12 MGD
2. Annual Volume: 390,374 MCF (8 MGD Average Day Demand)
   Maximum Day: 8 MGD
   Peak Hour: 8 MGD

Let me know if you have any questions.

Raphael

Thanks for meeting with us regarding the Flint supply project we are working on for the Treasury. I have a few additional requests to help us evaluate Flint being supplied by DWSD or KWA. Please provide the following:

1. A FY 2012-13 Proposed Rate Calculation summary sheet for DWSD supplying 8 MGD using the new contract assuming that Flint would be a Maximum Day Customer of 8 MGD from their current master meter at Potter/Baxter.
2. A FY 2012-13 Proposed Rate Calculation summary sheet for DWSD supplying 8 MGD using the new contract assuming that Flint would be a Maximum Day Customer of 8 MGD from Imlay Station.
3. A FY 2012-13 Proposed Rate Calculation summary sheet for DWSD supplying 8 MGD using the new contract assuming that Flint would be a Maximum Day Customer of 8 MGD from Imlay Station with the purchase of the 72-inch main worked into the water rate (assume $4.7M for the purchase).
4. The annual water sold to YUCA, SOCWA, and Flint for the past 10 years. This information is being used to validate KWA's proposed O&M escalation. We believe that YUCA and SOCWA would be similar enough to get a unitized cost for operations and maintenance. Flint is needed in case we are unable to get the GCDC water purchase from Flint.

Please feel free to contact me any time if you have questions. We are finishing up our cost comparison next week, so the sooner we can get this information would be much appreciated.

Subject: TJY&T Presentation of KWA Analysis

TJY&T will present their preliminary findings, per the RFP, on 12/21/12. Eric is working on a "guest list and location for the meeting. I suggested the Treasurer's Board room and I am proposing the following list for your consideration:

Andy
Roger
Brom
Ed
Eric
Ed Kurtz
Jerry Ambrose
Mike Brown

Have I missed anyone?

When I spoke to Ed Kurtz yesterday he asked to receive a copy of the findings before the meeting.

Subject: Flint Water Assessment Conference Call Report

Ed/Randy,

I just completed a phone conference with Dave Guastella regarding the status of the Flint Water Assessment. Here is a brief summary.

- **TYJT** is analyzing cost and inflation factors for the **DWSD** and **KWA** options.
- **DWSD** has an option of using their Model Contract option, which would lower Flint's rates.
- **DWSD** also has the Blended Water option. This could also lower Flint's rates, but would require the City to make some investment upgrades in their Water Plant.
- Another option would be to move the water supply point further east to the Imlay City area. This would lower rates but **DWSD** would also be interested in selling the 72" water main to Flint.
- **TYJT** is evaluating the cost model created by **KWA**, but there are some unknowns that make precise projections difficult.
- **TYJT** believes that **KWA** needs to increase the percentage of their Engineering Contingency to account for some of these unknowns.
- A Bonding Reserve of around 10% is apparently lacking.
- There appears to be insufficient capitalization of the principal and interest over the first 3-years of construction.

- **TYJT** is also evaluating projected Operation & Maintenance costs and projected escalation costs for each proposal.
- **TYJT** is also evaluating projected O&M costs for the Flint Water Plant as it would go into full-time operation.

These are preliminary findings and are still be evaluated. We will also be organizing the December 21st preliminary report presentation over the next week.

If you have any questions on this, please let me know.

Review of TYJT December 21, 2012 Presentation
City of Flint Water Supply Assessment
Prepared by Rowe Professional Services Company

DWSD Supply (Slides 7 through 9)

1. The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

2. Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

3. The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates". Options and rates shown are different than presented by DWSD previously.

	DWSD 11/29/2012	TYJT Estimates
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12.68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11.11

4. Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

5. We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4.7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details.

6. If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

7. If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

8. Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

9. If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses.

Flint River Supply (Slide 10)

1. If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

Data Collected (Slide 14)

1. The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options.

Benchmarking Comparisons (Slide 16)

1. The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor". It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses. The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

2. The KWA will supply raw water; SOCWA and YUCA both supply finished water. Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

3. DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases.

Capital Financing (Slide 17)

1. KWA bonds are planned to be general obligation bonds, backed by member counties.

O&M Inflation Factor (Slide 20)

1. SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.
2. KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

4. Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)
    a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003
    b. Electricity Rates in Michigan (per U.S. Energy Information Administration) have increased an average of 3.2% since 1999.
    c. The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

Finished Water Rate Inflation (Slide 21)

1. TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay). Based on the actual charges by DWSD to Flint. DWSD historical rates are as follows:
    a. 10 year increase in DWSD rates to Flint:: 10.5% annually
    b. Average annual increase through 45 year history: 6.7%

2. Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:
    a. Debt – the amount of debt varies widely between utilities
    b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

3. Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

4. Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators).

Capital Financing with Revenue Bonds (Slide 24)

1. Note that the KWA bonds will be general obligation bonds backed by the member counties.

2. The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today.

3. Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs. Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

4. For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies.

5. Bond holder reserve is not a requirement for general obligation bonds.

6. TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

7. Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs.

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low. The primary differences in cost estimates for the project appear to be the following components:

1. Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080). KWA estimates were based on actual construction costs from recent projectd completed by Genesee County within the last eight years.
   a. 32mgd water pump station including two-10 MG ground storage tanks - $13.4 million
   b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
   c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

   The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan).

2. Redundant Power – There is no need for redundant power; other provisions will provide reliability of supply.

3. Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be

purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

4. Engineering, Legal, Administration & Contingencies
   a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:
      i. The intake design has been completed and all regulatory permits obtained.
      ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of-way. Environmental review and permitting are in process.

   b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

   c. Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

Cost Comparison (Slide 30)

1. The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations.

2. Redundant power is not required; this does not need to be included in the TYJT estimate.

3. Land for LHPS – actual price is $360,000

4. Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding $16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

5. Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

Other Considerations – Redundancy / Reliability (Slide 33)

1. Unfunded Mandates/ Future Regulations
    a. The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water. The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA. Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

2. State Goals
    a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested. However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.
    b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

3. Redundancy
    a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply; customers are responsible for their backup supply.

Other Considerations – Cost Slide 34

1. TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative.
    a. The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis. During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

3. Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water.

4. The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period. The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users.

5. The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011. Although not a KWA cost, the cost of the redundant connections should be considered with all options.

6. The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

7. The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC). The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.
    a. The detailed design (plans and specifications) and permitting have been completed.
    b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

    It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase.

8. Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD. We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too.

9. It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

10. Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built.

Subject: DWSD Proposals for Water Service to Flint
Attachments: City_of_Flint_Water_Service_Proposalcover letter.pdf; Flint Proposals12.20.2012.docx

Follow Up Flag: Follow up
Flag Status: Flagged

Gentlemen,

Please find attached DWSD's proposals for Water Service to Flint. Two proposals are offerred based on the needs and interests of the City of Flint. Hard copies are in the mail.
There remain some unknowns on the timing of various factors affecting the relationship between Flint and Genessee so while the rate proposals are firm, the illustrations remain subject to negotiations.

We are pleased to advance either proposal through further negotiation to a contract.

Happy Holidays!

Best regards,

Sue

December 21, 2012

Mr. Ed Kurtz, Emergency Financial Manager
City of Flint
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Mr. Kurtz:

RE: Water Service Proposals to the City of Flint

Thank you for the conversations over the most recent months that have allowed the Detroit Water and Sewerage Department (DWSD) to understand and appreciate the needs and concerns of the City of Flint as you approach your decision regarding the future water supply for the City. I am pleased to offer two (2) alternative proposals for continued service with DWSD.

I hope that our conversations have demonstrated that DWSD is an organization that has been undergoing substantial change since the new Board of Commissioners was seated in April of 2011, and new authority granted them since. We continue to evolve on the path of operational and financial independence, and that movement has positioned us to be more responsive to our customers and demonstrate our ability to be more effective and efficient.

While we acknowledge and appreciate the past, we are positive that our present and future are, and will be decidedly different, and that our customers and customer communities alike have begun to appreciate that over the past year.

Please review the proposals attached. We remain prepared to evolve the proposals based on the City of Flint's specific requirements, and take the City of Flint's requirements to a final contract on a expedited timeline.

Best regards,

Sue F. McCormick
Director

DWSD Water Service to Flint
12/20/2012 Proposal

General Concept: Flint would enter a 30-year contract with service commitments and usage definitions negotiated in the same manner as employed to result in new contracts for other customers. The parties recognize that the contractual service definitions for Flint are "in flux" and that the contract implementation plan and reopener schedule may require a slightly different approach than followed for most negotiations given the potential changes in demand, usage and point of service and associated timing of each.

Standard Approach: Flint will establish service conditions for full contract implementation:

- As a max day customer @ 12 mgd average day and 18 mgd max day
- With delivery of service ("point of commerce") at the existing location at Baxter and Potter roads at the Genesee County line.

DWSD will establish the rate structure for Flint using the existing water rate methodology applied to these service conditions.

Special Considerations:

- Flint will contract initially as a supplier to Genesee County. The initial demands and usage values are subject to negotiation and have not yet been determined. The assumptions in the proposal reflect DWSD assumed adjustments and that the service to Genesee County will end early in the contract period, necessitating a rather volatile projection of demands and reopener opportunities. Though this is assumed for the purpose of illustrating rate change impacts, DWSD does not require that Flint discontinue service to Genesee County.
- Flint may exercise an option to moving the service delivery point from the existing location at Baxter and Potter roads to Imlay City. The new "point of commerce" would have beneficial impacts to Flint's water rate under the existing water rate methodology, by lowering the allocated delivery costs to Flint. In order to move the point of commerce to Imlay, Flint must assume responsibility for the DWSD 72-inch line between Imlay Station and the current delivery point at Baxter/Potter. The proposal reflects a capital lease approach during the term of the agreement.
    - DWSD would reserve the right to serve existing DWSD customers on the 72-inch line. A wheeling charge, payable to Flint, would take into consideration the portion of the line reserved to provide service to existing DWSD customers, the line capacity reserved and the contractual obligations for maintenance and replacement of the line. DWSD would commit to providing emergency response at DWSD's cost on that portion of the line serving other DWSD customers. Though the wheeling charge is negotiable, the provisions to consider in calculating that charge have been agreed upon and the value of that in the proposal is based on those provisions.
- Flint is making investments in its own system to allow it to meet a portion of its demands from its own water plant. This "blending" approach will reduce the contractual demands and service conditions. Contractually the blending must occur prior to the distribution system so as to provide a water of a singular quality under the control and responsibility of Flint.

D2

- Flint, through the use of its treatment plant and other assets, will provide for any required supply or transmission redundancy and will relieve DWSD of further redundancy considerations including studies and evaluations, design and construction of new facilities to provide redundancy to Flint. Proper maintenance, rehabilitation and replacement of DWSD assets as necessary to assure reliable service to the point of connection continue to be a DWSD responsibility.
- The proposal to Flint includes rate recognition of the avoided cost to the DWSD system based on Flint's allocated share of a hypothetical DWSD investment designed to result in redundant service to Flint. In the figures presented in the proposal, this credit reflects a reduction to Flint of approximately 5 percent.

Implementation Challenges:

- Flint's decision regarding its long-term water supplier is likely to occur on or about January 15, 2013. Recognizing the new service arrangement in the FY 2013-14 rates would is challenging with DWSD standard protocol with customer communities requiring formal contract approval by January 18 to achieve this. A "waiver" of this protocol may need to be considered by the DWSD BOWC to provide first year benefits beginning July 1, 2013.

The attached exhibits illustrate potential implementation scenarios under the circumstances outlined below. The figures are consistent with those that have been shared previously. All figures are in FY 2013 unit costs and dollars and do not reflect changes in DWSD revenue requirements, nor in changes in System cost allocations associated with the changing Flint service characteristics, nor with changes in other customer use.

Based on our conversations, two proposals are offerred, separated by the "point of commerce" designation discussed above.

Proposal 1 – Continued Service at Baxter/Potter

- **FY 2014** – First year of new contract with Flint. Rate savings are similar to those experienced by other customers in their first year under the model contract.

- **FY 2015** – Rate structure modified to reflect "redundancy" credit.

- **FY 2016** – No Change.

- **FY 2017** – Service no longer provided to Genesee County. Flint demands reflect ability to achieve status as "max day" customer.

- **FY 2018** – Flint completes investment necessary to begin "blending" arrangement.

Proposal 2 – Switch Point of Commerce to Imlay City Station

- **FY 2014** – First year of new contract with Flint. Rate savings are similar to those experienced by other customers in their first year under the model contract.

- **FY 2015** – Rate structure modified to reflect "redundancy" credit.

- **FY 2016** – Transaction to transfer 72-inch line is completed, and Flint rate structure is changed to reflect new point of commerce at Imlay City. Estimated rate structure assumes that the wheeling arrangement will offset approximately 25% of the lease/purchase price of the line.

- **FY 2017** – Service no longer provided to Genesee County. Flint demands reflect ability to achieve status as "max day" customer.

- **FY 2018** – Flint completes investment necessary to begin "blending" arrangement.

The schedule is for illustrative purposes only. Other schedules and events are possible. This schedule was selected to illustrate the relative impact of each of the various changes.

Summary of DWSD Cost Allocations to Flint Under Various Scenarios (a)
Flint Only

		Revenue Requirement	Rates and Charges: Fixed	Rates and Charges: Commodity	Rates and Charges: *Avg Unit Cost*
1	**Status Quo**	11,534,200	363,315	12.46	*20.03*

Representative Genesee County Water and Wastewater Projects

Project	Description	All Engineering Fees	Engineer's Estimate	Bid Price	Final Construction Cost	Engineering & Contingency %
Fox Pump Station	30 mgd wastewater pump station & forcemain	$1,829,259		$12,394,273	$12,074,223	
		15.2%				
NEES Project	60" Relief Sewer - included tunneled sections		$54,707,212	$55,985,672	$69,999,429	
					28.0%	
North Water Loop	23 miles 36" and 48" transmission main, pump station, & 20 MG Reservoir	$4,102,610	$29,200,000	$23,570,110	$25,798,529	2.4%
		15.9%			-11.6%	
Henderson Road PS	32 MGD Water Pump Station & Two-10 MG Tanks		$12,046,368	$12,846,077	$13,517,582	
					12.2%	
Pump Station #1	80 MGD wastewater pump station	$1,735,063	$10,269,000	$8,225,400	$8,292,277	-2.4%
		20.9%			-19.2%	

Notes:

Engineering Fees include all planning, soils investigation, design, construction inspection & testing, and construction management costs

Engineering Fees % is based on final construction cost

Engineering and Contengency % is based on engineering fees + amount final construction cost exceeds estimate

Final Construction Cost % is based on difference between final construction cost and engineer's estimate

NEES Project Contractor went out of business during project - increasing cost to finish project

Projects constructed within last ten years

Sent: Thursday, December 27, 2012 2:56 PM
To: Koryzno, Edward (Treasury)
Subject: RE: Follow-up to Flint Water Assessment Meeting

I don't think it was intended to include them. My understanding was it was to be between Flint and Treasury to discuss and evaluate the options. I thought Flint was going to get answers from the County on specific questions and this was, partially, to follow-up on those answers.

I could prep them and we could conference call them in if necessary.

Would you like me to proceed without them?

To: Koryzno, Edward (Treasury)
Subject: RE: Follow-up to Flint Water Assessment Meeting

Yes. I will work with Angela to set-up the meeting.

Here is my list to invite. Anyone else we need to include?

Attendees:
Andy Dillon
Roger Fraser
Ed Koryzno
Brom Stibitz

Randall Byrne
Eric Cline
Ed Kurtz, City of Flint
Jerry Ambrose, City of Flint
Mike Brown, City of Flint

Subject: RE: Follow-up to Flint Water Assessment Meeting

Andy needs to be in the meeting. I anticipate a few more questions from him. Your office can make the arrangements. Unless Andy wants one, or if there is something from KWA that we can't figure out, then simply submitting the final report should be enough.

Ed,

Regarding today's meeting on the Flint project:

- I think we finally agreed on a January 10 meeting with the group from Flint. Who do you want to organize this?
- The final report from TYJT is due January 15. Are we going to want a final presentation from them or do we just accept the report?

Eric

I will be copying you on the email communications as needed now that I know you're the PM. Please let me know if you would like to meet so that I can fill you in on the status of things.

Regarding, information from Flint, it has been challenging to get all the information we have requested. I don't yet know the impact on the schedule, but I will keep you updated.

Please email or call me (313-402-0354) if you have any questions.

KWA Supply

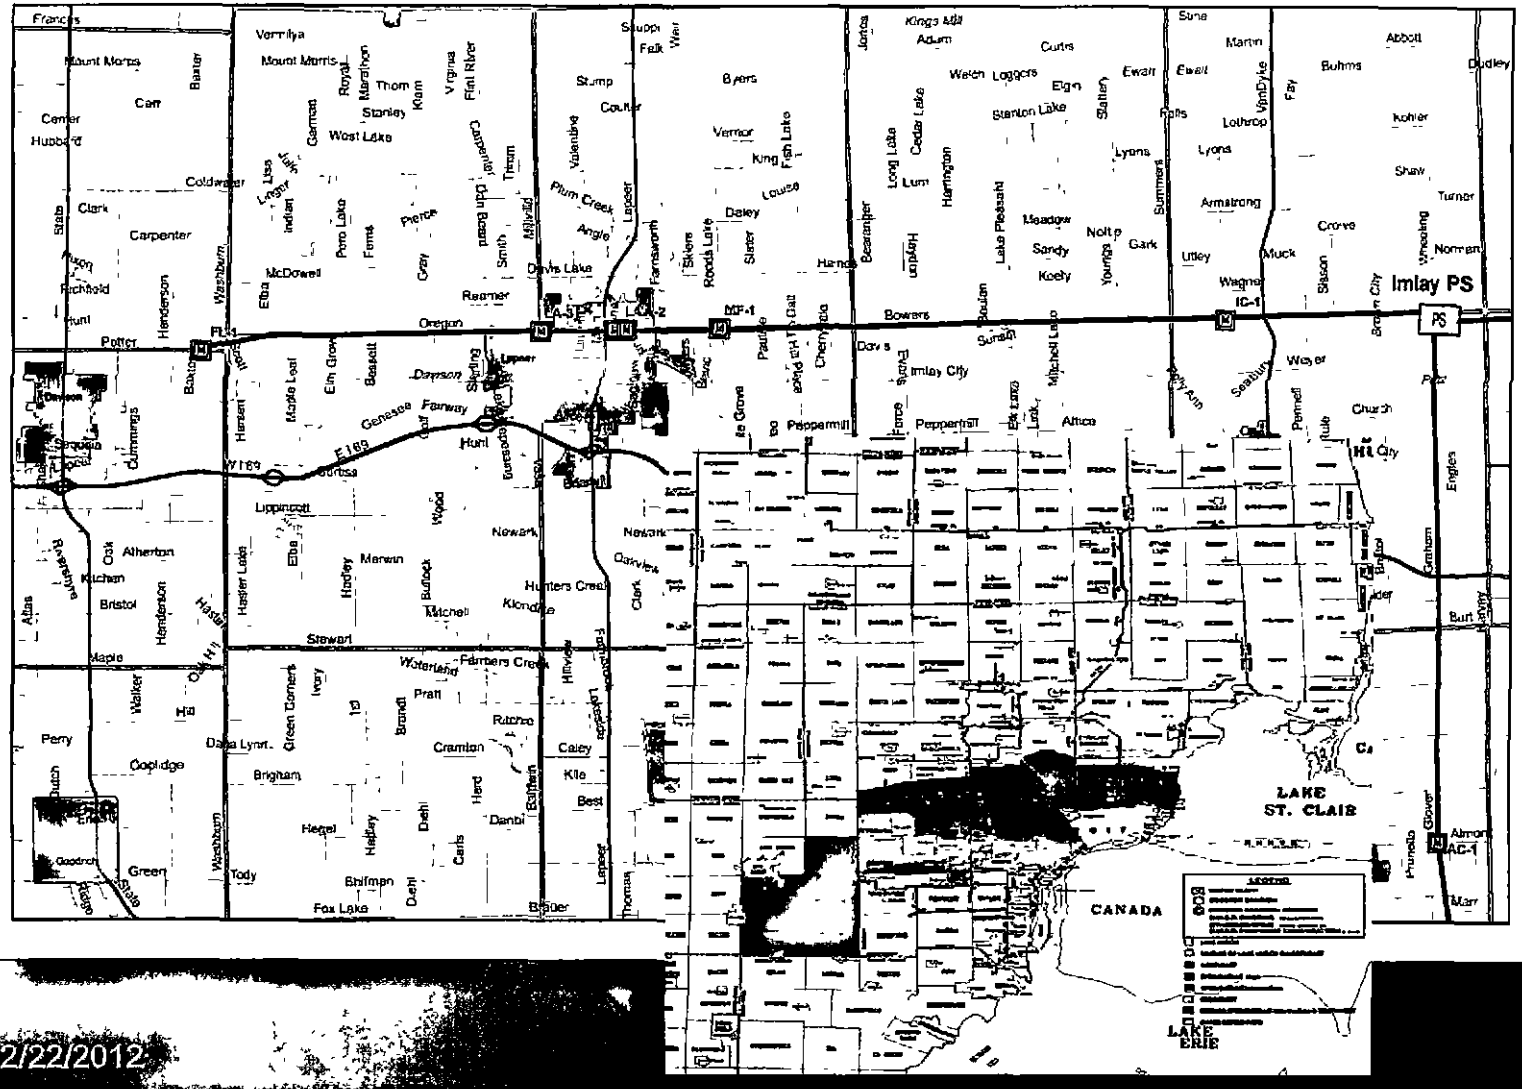
- 60 MGD Raw Water Transmission System
- Flint WTP Treatment Capacity:
  - 18 MGD Maximum Day
  - 12 MGD Average Day

DWSD Supply



DWSD Supply

- Multiple Supply Options Offered
- Supply for current Master Meter at Potter and Baxter
  - 18 MGD Maximum Day Customer
  - 12 MGD Maximum Day Customer/ Flint WTP Capacity: 6 MGD Maximum Day, 4 MGD Average Day (Blending)
  - 8 MGD Maximum Day Customer/ Flint WTP Capacity: 10 MGD Maximum Day, 4 MGD Average Day (Blending)

DWSD Supply

- Supply from Master Meter at Imlay Station
  - 12 MGD Maximum Day Customer/ Flint WTP Capacity: 6 MGD Maximum Day, 4 MGD Average Day (Blending)
  - 8 MGD Maximum Day Customer/ Flint WTP Capacity: 10 MGD Maximum Day, 4 MGD Average Day (Blending)

DWSD Supply Options

2013 – Model Contract

Description	Average Day Demand	TYJT Estimate
18 MGD Maximum Day Customer - P&B	12 MGD	$16.37/MCF
12 MGD Maximum Day Customer – P&B	8 MGD	$16.31/MCF
8 MGD Maximum Day Customer – P&B	8 MGD	$12.68/MCF
12 MGD Maximum Day Customer - Imlay	12 MGD	$14.38/MCF
8 MGD Maximum Day Customer - Imlay	12 MGD	$11.11/MCF

Flint River Supply

- Flint Upgrades Existing WTP
- Supply from Flint River
- Infrastructure Improvements Required for the Dams and WTP

Data Collection

Data Collected

- Meetings
  - DWSD November 19, 2012
  - Flint/KWA November 20, 2012
  - Minutes/information requests provided

Data Collected

- KWA/Flint
  - Lake Huron Water Supply Karegnondi Water Authority (KWA) 9/09
  - Analysis of the Flint River as a Permanent Water Supply for the City of Flint 7/11
  - Cost Comparison, KWA vs. DWSD Letter to Mr. Kurtz, 10/31/12
  - Lake Huron Supply KWA, Appendix 20 Update 10/4/12
  - KWA Articles of Incorporation
  - KWA Bylaws
  - KWA Raw Water Supply Contract
  - Flint WTP Statement of Revenues and Expenditures 09′ – 12′
  - GCDC Division of Water and Waste Services Financial Statements 03′ – 11′
  - Assorted emails with further clarification of questions and documentation

Data Collected

- DWSD
  - Historical Rates and Charges to Flint 04′ – 13′
  - Historical Rates and Charges to Flint with Hypothetical Model Contract 10′ – 13′
  - 2013 Rates and Charges for the following options:
    - 18 MGD Maximum Day Customer at Potter & Baxter
    - 12 MGD Maximum Day Customer at Potter & Baxter (Flint Blending*)
    - 8 MGD Maximum Day Customer at Potter & Baxter (Flint Blending*)
    - 12 MGD Maximum Day Customer at Imlay (Flint Blending*)
    - 8 MGD Maximum Day Customer at Imlay (Flint Blending*)

    *Flint Blending based on DWSD supplying 2/3 and Flint 1/3 of 12 MGD ADD
  - Assorted emails with further clarification of questions and documentation

Basis of Analysis

Benchmarking Comparisons

- KWA O&M Inflation Factor
  - Southeastern Oakland County Water Authority (SOCWA)
  - Ypsilanti Community Utility Authority (YUCA)
- DWSD and Flint WTP Rate Inflation Factor
  - Lansing
  - Grand Rapids
  - Saginaw

Capital Financing

- Revenue Bonds
  - Checked Rating Agencies
  - Identification of Bondholder Requirements

Cost of Construction

- KWA October 2012 Preliminary Engineering Report
- Construction Contractors
- Comparison of KWA Estimate with Other Projects
  - Pumping Stations
  - Transmission Mains
  - Engineering Fee

Operations & Maintenance

Analysis Process – O&M Inflation KWA

- KWA Evaluation: 5% Annually
- GCDC: 10.5%
- SOCWA: -- %
- YUCA: 0.73%
- Annual Inflation Factor Used for KWA: 5%

Analysis Process – Finished Water Rate Inflation DWSD

- DWSD – From Potter/Baxter: 4.4%
  - From Imlay (hypothetical): 2.9%
- Lansing: 4.63% 2005-2012
- Grand Rapids: 1.57% 2004-2011
- Saginaw: 6.96% 2004-2011

- Annual Rate Inflation Factor Used for DWSD at Potter/Baxter or Imlay: 4.4%

Analysis Process – O&M Inflation Flint WTP

- Analyzed Major O&M Costs
  - Labor
  - Power
  - Chemicals
  - Residuals
- Evaluated Power, Chemicals, Residuals, Others
  - Actual Flint WTP O&M
  - Flint River Report 7/11
  - KWA Report 2/09
- Labor Increased by 67% per Flint WTP
- Annual Inflation Rate Used: 4.51%

Financial Evaluation

Capital Financing with Revenue Bonds

- 25 year term with level debt service
- 5% Interest Rate
- 3 Years Capitalized Interest
- 10% Reserve for Bondholders
- 3% Interest on Reserve
- S&P Rating A Without Insurance
- Bond Issuance Costs
  - KWA 2.25% of Principal Borrowed
  - Flint 3.0% of Principal Borrowed

KWA Construction

- Project Elements
  - Intake & Crib
  - Two Pumping Stations
  - Transmission system
    - 48 Miles of 60-inch
    - 18.3 Miles of 36-inch

KWA Construction

- Intake and Crib
  - October 2012 KWA Estimate: $22,076,850
  - Engr./Legal/Admin/Contingency @ 25%: $5,519,213 (Design 90% complete)
  - Property: $2,300,000
  - Total Cost: $29,896,063

KWA Construction

Pumping Stations

Description		KWA Estimate		TYJT Estimate
Pumping Stations		$ 24,618,080		$ 54,573,314
Land for IPS & Reservoirs		--		75,000
Subtotal		$ 24,618,080		$ 54,648,314
Engineering, Legal, Admin. & Contingency	25%	6,154,520	30%	16,394,494
Pumping Stations Subtotal		$ 30,772,600		$ 71,046,808

KWA Construction

Transmission Mains

Description	KWA Estimate		TYJT Estimate	
Transmission Mains		$ 166,202,316		$ 167,419,530
Engineering Legal, Admin & Contingency for construction	25%	41,550,579	30%	50,225,859
Subtotal		$ 207,752,895		$ 217,645,389
Easements				1,166,170
Transmission Subtotal		**$ 207,752,895**		**$ 218,811,559**

KWA Construction

Engineering

Description	KWA Estimate	TYJT Estimate
Design Engineering/PS and Transmission		$ 16,939,581
Construction Management @5% of Project Cost Estimate of $217,645,389		14,434,609
Administration		349,440
Legal/Easement/Contract Documents		831,000
Engineering Subtotal		**$ 32,554,63**

KWA Construction
Cost Comparison

Description	KWA Estimate	TYJT Estimate
Intake/Crib	$ 27,596,063	$ 27,596,063
Pump Stations	$ 30,772,600	$ 71,042,808
Transmission Mains	$ 207,752,895	$ 217,645,389
Power	$ 4,000,000	$ 4,000,000
Redundant Power for PS		$ 1,273,200
Land for LHPS	$ 2,300,000	$ 2,300,000
Design Engineering/PS and Transmission		$ 16,939,581
Construction Management		$ 14,434,410
Administration		$ 349,440
Legal/Easement/Contract Documents		$ 831,000
Easements		$ 1,166,170
Total	**$ 272,421,558**	**$ 357,578,060**
Flint Share @30%	**$81,726,467**	**$107,273,418**

Findings

Other Considerations

Other Considerations - Redundancy / Reliability

- Unfunded mandates/future regulations are more difficult to fund for smaller systems
- Separating the water systems appears to run counter to the Treasury's efforts of consolidating services (EVIP)
- The KWA and DWSD option offer nearly the same redundancy

Other Considerations - Cost

- Over the 25-year Planning Period:
  - DWSD 8 MGD supply option is less cost than the KWA supply per their analysis
  - Four DWSD options are less cost per TYJT's evaluation of the KWA cost analysis (8 MGD & 12 MGD Customer from Imlay and P&B)
- Cost analysis does not include future capital needs such as mechanical and process improvements within the period of analysis
- KWA cost estimate does not appear to include cost of redundant connections between Flint & Genesee WTPs as indicated in Flint River study
- KWA cost estimate does not appear to include IPS land and easement costs for system

Other Considerations - Cost

- KWA cost estimate does not appear to include engineering design cost and other management and administrative costs
- The emergency back up to the KWA supply requires the Flint WTP to maintain two separate treatment trains (further evaluation required to see if there are any water chemistry issues during conversions)
- Flint has indicated that they have a high water loss – this should be addressed first before sizing the KWA system for Flint's needs

Other Considerations - Cost

- The design of the KWA supply and the construction of the system has not been completed; final costs and time to complete are unknown – both can negatively impact Flint's final cost
- There is a high negative impact if the project is not completed within the three year period – payment on the bonds will be due, but revenue source is unknown

Other Considerations - Flint's Autonomy

- Flint and Genesee County are not represented on the DWSD Board of Water Commissioners
- The KWA will supply only Flint and GCDC, however Flint will have a minority vote on the KWA Board and Genesee County will have a majority vote (Board includes members not buying water to have voting authority)
- Under the DWSD option supplying Flint from Imlay will require an agreement with Flint and other DWSD customers off of the 72-inch main (Imlay, Mayfield, Lapeer)

Subject: RE: DWSD Proposal for Flint

Below is Eric's initial observations of the preliminary TYJ&T report and what DWSD' current offer:

I have compared the written proposal received from DWSD to the Charts and PowerPoint provided by TYJT. As the DWSD proposal is written and contains more detail than the graphic summary provided by TYJT, it is difficult to completely determine if all points are covered in both presentation formats.

However, here is what stands out to me.

- The DWSD proposals state that the first year of a contract with Flint would be 2014. TYJT states 2013 as Year One.
- The DWSD proposals discuss a "redundancy credit" to Flint that will result from the blending option by Flint. I do not see this identified in the TYJT information.
- The DWSD proposals make no reference to the 12 or 8 MGD Maximum Day options outlined by TYJT.
- The information provided by TYJT makes no mention of DWSD reserving the right to serve existing customers on the 72" pipeline, if purchased). Nor is there a mention of the wheeling charge (paid to Flint) in the TYJT information.
- DWSD estimates Flint would not begin utilizing a blending option until 2018. Until then, it is assumed that DWSD would provide 100% of water to Flint. This is not referenced in the TYJT information.

This is my first analysis. If you wish additional analysis to be done, please let me know.

Categories: follow-up

I spoke to Mike Brown and he has asked an engineer from Rowe who is associated with the KWA project to determine the impact of the DWSD proposal. Mike's intent is to have the analysis in his hands by January 3. Eric is contacting Dave Guestella from TYJ&T to determine if the proposal contains information absent from their preliminary report.

Subject: RE: Draft Flint Supply Assessment.Questions

Importance: High

Dave,

Good afternoon. I hope you had a good holiday and are planning on a good New Year.

Thanks for the presentation information. Just to follow-up, it appears that no additional presentation on the 15th is being asked for. Should that change, I will let you know.

I have some additional questions I want to clarify with you. Some of these are just internal questions we have and want to make sure we are interpreting your presentation information correctly. I have highlighted my specific questions for clarity.

- You should have received a copy of a letter from DWSD to Flint dated December 21st. As I review the options that they provide Flint, I note some differences with what you outlined as the DWSD options for Flint. **Have you taken these changes into account? If not, what is the impact these "latest" proposals will have?**

Overall, I have some broad, "strategic" questions:

- Anticipating a return of future growth to the City, **what is the maximum MGD DWSD could provide to Flint? What about KWA?** The overall question is whether either entity could provide more water to Flint than is anticipated if they needed to.
- On the flip-side, if decline continues in Flint, **what happens if Flint needs less water than projected? What would that do to the financial projections?**
- **Given Flint's current financial situation, did you analyze the City's ability to actually sell bonds to make any of these improvements?**
- It appears that the overall expenditures required to cover any of the outlined options are going to require water rates to rise almost annually. **Has there been any analysis on what rates might look like and/or what the capacity of the public to pay these rates might be?**

Specifically:

- **What is the total cost for Flint to buy the 72" line from DWSD?** I see a capital cost on that option of $4.7-million. **Does that include the 72" line?** Related to this, **do we know what the projected lifespan of that line is? What would the replacement cost be?** A question we are having is whether Flint would have the financial and/or operational ability to maintain this line. Also, **I am unsure as to what the overall benefit of Flint owning that line is if they remain with DWSD.**
- It appears to me that the O&M costs for the Flint Water Plant are very high. **If Flint were to continue to buy water from DWSD, other than for a back-up, is there any reason they could not avoid those costs by mothballing the plant and having DWSD provide 100% finished water to them?**
- Regarding KWA, perhaps I missed this explanation, but **why are the options for KWA for 12 MGD as opposed to the option for 18 MGD?**

Per our discussion yesterday, please find attached our presentation information.

Dave

Review of TYJT December 21, 2012 Presentation
City of Flint Water Supply Assessment
Prepared by Rowe Professional Services Company

DWSD Supply (Slides 7 through 9)

1. The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

2. Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

3. The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates". Options and rates shown are different than presented by DWSD previously.

	DWSD 11/29/2012	TYJT Estimates
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12.68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11.11

4. Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

5. We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4.7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details.

6. If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

7. If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

8. Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

9. If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses.

Flint River Supply (Slide 10)

1. If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

Data Collected (Slide 14)

1. The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options.

Benchmarking Comparisons (Slide 16)

1. The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor". It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses. The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

2. The KWA will supply raw water; SOCWA and YUCA both supply finished water. Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

3. DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases.

Capital Financing (Slide 17)

1. KWA bonds are planned to be general obligation bonds, backed by member counties.

O&M Inflation Factor (Slide 20)

1. SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.
2. KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

4. Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)
    a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003
    b. Electricity Rates in Michigan (per U.S. Energy Information Administration) have increased an average of 3.2% since 1999.
    c. The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

Finished Water Rate Inflation (Slide 21)

1. TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay). Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows:
    a. 10 year increase in DWSD rates to Flint:: 10.5% annually
    b. Average annual increase through 45 year history: 6.7%

2. Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:
    a. Debt – the amount of debt varies widely between utilities
    b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

3. Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

4. Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators).

Capital Financing with Revenue Bonds (Slide 24)

1. Note that the KWA bonds will be general obligation bonds backed by the member counties.

2. The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today.

3. Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs. Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

4. For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies.

5. Bond holder reserve is not a requirement for general obligation bonds.

6. TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

7. Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs.

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low. The primary differences in cost estimates for the project appear to be the following components:

1. Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080). KWA estimates were based on actual construction costs from recent projectd completed by Genesee County within the last eight years.
   a. 32mgd water pump station including two-10 MG ground storage tanks - $13.4 million
   b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
   c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

   The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan).

2. Redundant Power – There is no need for redundant power; other provisions will provide reliability of supply.

3. Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be

purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

4. Engineering, Legal, Administration & Contingencies
   a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:
      i. The intake design has been completed and all regulatory permits obtained.
      ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of-way. Environmental review and permitting are in process.

   b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

   c. Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

Cost Comparison (Slide 30)

1. The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations.

2. Redundant power is not required; this does not need to be included in the TYJT estimate.

3. Land for LHPS – actual price is $360,000

4. Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding $16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

5. Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

Other Considerations – Redundancy / Reliability (Slide 33)

1. Unfunded Mandates/ Future Regulations
    a. The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water. The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA. Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

2. State Goals
    a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested. However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.
    b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

3. Redundancy
    a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply: customers are responsible for their backup supply.

Other Considerations – Cost Slide 34

1. TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative.
    a. The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis. During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

3. Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water.

4. The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period. The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users.

5. The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011. Although not a KWA cost, the cost of the redundant connections should be considered with all options.

6. The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

7. The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC). The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.
    a. The detailed design (plans and specifications) and permitting have been completed.
    b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

    It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase.

8. Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD. We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too.

9. It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

10. Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built.

Treasurer Dillon;

Please find the attached letter in opposition to Flint/Genesee County contract with the Karegnondi Water Authority. We in Oakland County do not see the business case for this project and the result could cause higher rates for our customers.

Thank you for your consideration.

Re: DWSD Water Services and the City of Flint

Dear Treasurer Dillon:

I am writing to express my concerns with the City of Flint's recent action to pursue a 25-year contract for water supply with the Karegnondi Water Authority. We believe that the business case for the Karegnondi Water Authority has not been sufficiently validated, whereas the savings to the City and Genesee County ratepayers, if the City were to continue its relationship with the City of Detroit, is more immediate and calculable. The City of Detroit maintains that the City and Genesee County ratepayers would save approximately $4 Million annually with a new water supply contract, which is basically the same savings predicted by the KWA. Simply put, it does not make economic sense for the City of Flint to separate itself from the Detroit regional water supply system.

Sincerely,

Jim Nash

>
> After speaking with Andy, Dan, Dennis and John, we have a plan for the next steps in Flint's request to participate in the KWA with Genesee County. Here is what we can confirm publicly, although unless it's a permitting question, we should have Treasury (Terry or I) answer any inquiries.
>
> Ed Kurtz will submit a resolution to join the Karegnondi Water Authority (KWA) to the Treasurer, likely today. Once I receive word that we have officially received, we can confirm that we have it and the Treasurer will thoroughly review the resolution and perform due diligence before making a decision. Under PA 436, the State Treasurer must approve contracts over $50,000 that were not competitively bid.

No date has been set for the Treasurer to complete his review, but, he is fully aware of the tight timelines necessary to get approvals for the upcoming construction season, and will conduct his review accordingly.

That is all we can confirm publicly through next week. Just so you are aware, **and not for public consumption**, a call was placed to DWSD to let them know that Ed Kurtz was submitting his request and that if they have a final best offer that they should submit it very soon. This may prompt them to go to the media, or not, but be prepared if you get a call from that angle.

We need to develop some talking points for the following week, when Andy makes his determination. I will try to put together a draft by the end of the day and send it around for review. If anyone has anything they would like me to add, feel free to send it my way.

Let me know if you have any questions.

-Caleb

Subject: RE: a question about the Flint-Detroit 'water wars' issue

Steve,

Flint Emergency Manager Ed Kurtz has submitted a resolution to join the Karegnondi Water Authority (KWA) to the State Treasurer, it was received late last week. As you are likely aware, under PA 436, the State Treasurer must approve contracts over $50,000, if not competitively bid.

The Treasurer will thoroughly review the resolution before making a decision. No date has been set for the Treasurer to complete the review, but, he is fully aware of the timelines necessary to get approvals for the upcoming construction season, and will conduct the review accordingly.

Good Morning,

I'm looking for an interview or information about the state's opinion on the city of Flint taking part in the KWA pipeline project and the
DWSD's opposition. There was a very interesting article about the
dispute between KWA and DWSD in the Flint Journal.

Hi guys –

Just wanted to loop back and check in re: timing on this issue. Last understanding was that was under close review by state treasurer and that soonest decision would be made is end of this week, beginning of next.

As you're both out this week (☹), just want to make sure we have a mechanism in place to coordinate with us in Gov's comm office as soon as know timing and plan so we can be ready with messaging and any outreach that may be needed. Sounds like this will be contentious one way or the other regardless of the determination so just trying to make sure we're prepared as possible.

Please advise. Thanks!

Attachments: April 8letter to dwsd.doc

Brom,, attached is a copy of the letter I will be sending to DWSD this morning. First, let me apologize for the tenor of the original draft. However, I hope you can sense our frustration with DWSD. Instead of talking to us, DWSD chose to have a consultant issue press releases in our media market and then conduct live interviews on our local radio stations. This has caused the perception in the community that maybe we don't know what we are doing and have been "reckless" in our analysis of the options. Those releases also include language that makes it appear as though they have provided additional options to us that are less expensive than KWA, again giving the perception that we are not being completely truthful with the public. DWSD needs to understand that this is not helpful in creating a viable working relationship. I can also say in relation to the 'bad blood" comment that there is a certain amount of mistrust on the part of the City as it relates to DWSD from the past. Finally, I do appreciate your comments and advise, and am only interested in getting the best long term deal for the City residents. Ed

ELECTRONIC LETTER

April 8, 2013

Sue F. McCormick, Director
Detroit Water and Sewerage Department
735 Randolph, Room 506
Detroit MI 48226

Dear Ms. McCormick:

The City of Flint is in receipt of your email of April 8. In it you indicate you would like to meet to discuss DWSD's recent proposals to Flint. The Emergency Manager, the Mayor and the Genesee County Drain Commissioner are not aware of any "recent proposals". We do see mention of other proposals in the media, but we have received nothing new in writing. In particular Flint takes offense to comments such as "effectively launched the greatest water war in Michigan's history", "reckless push" and a continued reference to "a credible state-sponsored study"that we indicated to you contained several inaccuracies.

It is the City's belief that you made your best offer to us in December of last year. However, having said that, the City of Flint would be willing to review any new options that would be in the best interest of our citizens. Any offer must be in writing, complete in detail, including projected costs over the life of the contract, and provided prior to any meeting. Any offer must also be endorsed by the office of the Detroit Emergency Manager.

Finally, time is of the essence. Please email any of the proposals you referenced in your email to me today.

Sincerely,

Edward Kurtz
Emergency Manager

89 (Rev 02-11)

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

April 11, 2013

Mr. Edward Kurtz
Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

Dear Mr. Kurtz:

Thank you for your March 29, 2013 letter, which is attached for reference. As the Emergency Manager for the City of Flint ("Flint" or "City"), you have asked for my concurrence, pursuant to Public Act 436 of 2012, the Local Financial Stability and Choice Act, to authorize a contract in excess of $50,000.00 not subject to competitive bidding. This request was related to the City entering into an agreement with the Karegnondi Water Authority (KWA) for provision of raw water for the City.

In considering your request, I took note of the following facts in support of Flint joining KWA. First, there is widespread support in the City for this move, including the support of the Mayor, the City Council, and the Emergency Manager. Second, this move will provide a unique opportunity for the City and County to partner on an important project, which will hopefully lead to future regional collaboration. Third, the Department of Environmental Quality is supportive of the City participating in the KWA project. Finally, your representations that this deal will lead to substantial savings for the City over the coming decades, savings that are desperately needed to help with the turnaround of the City of Flint.

It is my understanding that the Detroit Water and Sewer Department is making a final best offer to Genesee County and the City of Flint next Monday, April 15, 2013. As such, this approval will be effective at 5 pm on April 16, 2013 after receiving written notice from the City that either no such offer was presented to the county and the City or that an offer was received and was rejected in good faith based upon specified objections.

For the reasons described above and subject to the conditions set forth herein, pursuant to Section 12 (3) of PA 436 of 2012, I am authorizing you to proceed with adopting the resolution and entering into a contract with KWA.

Sincerely,

Andy Dillon
State Treasurer

Edward J. Kurtz
Emergency Financial Manager

Dayne Walling
Mayor

March 29, 2013

RECEIVED
MAR 29 2013
OFFICE OF THE STATE TREASURER

Andy Dillon, Treasurer
Michigan Department of Treasury
Lansing, MI 48922

Dear Treasurer Dillon:

As per Section 12 (3) "Except as otherwise provided in this subsection, any contract involving a cumulative value of $50,000.00 or more is subject to competitive bidding by an emergency manager. However, if a potential contract involves a cumulative value of $50,000.00 or more, the emergency manager may submit the potential contract to the state treasurer for review and the state treasurer may authorize that the potential contract is not subject to competitive bidding".

KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. Capacity is available to members in increments of 1 million gallons per day know as units. For each unit of a capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $335,300.00 per unit per year until such time as the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract".

Therefore, the Emergency Manager (EM) is asking Treasury to authorize the EM to adopt a resolution to and enter into a contract with KWA for up to 18 MDGS based on the above terms.

If you need additional information, please contact me.

Sincerely,

Edward J. Kurtz
Emergency Manager

Subject: Re: KWA Approval Letter

Thanks, looking forward to seeing the offer from DWSD. Front page article in the Detroit News this morning on the greatest water war in the history of Michigan. In the article they do make reference to substantial termination penalties. Our contract with DWSD goes back to 1965 and does not contain any language relative to termination fees. After 35 years (2000) it only requires a one year notice by either party to terminate the contract. I believed the new "model contracts" which we have not signed do contain termination penalties. I believe this is probably the first volley in what will probably be a legal attempt to delay the process if we go with KWA. Ed

April 15, 2013

Karengondi Water Authority
4160 Beecher Rd.
Flint, Michigan 48532-2617

Ed Kurtz, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, Michigan

Gentlemen:

Over the last several months, governed by a process laid out by the State of Michigan, the Detroit Water and Sewerage Department (DWSD) has proposed a number of alternatives for long term water supply to the City of Flint. Each alternative was offered in the spirit of working in earnest to address the needs, priorities and concerns of the City of Flint and each provided an immediate cost reduction when compared to the current costs of water purchased from DWSD. In the final analysis conducted by Flint, these proposals did not overcome the desire for the Flint/Genesee region to be served by the same system and to have a voice in the future decisions governing the provision of water to this region.

Many of the proposals DWSD has made to Flint during this period are applicable to Flint/Genesee County or KWA with adjustments to demand and use requirements and would provide similar overall benefit. These options remain available for further discussion should the parties' desire. These prior proposals are included in summary form in Attachment 1 as an expanded table 6-1 from the February 2013 State of Michigan Contract No. 271N3200089, City of Flint Water Supply Assessment, submitted by Tucker, Young, Jackson, Tull, Inc. For comparison purposes only, DWSD's new proposal (Flint's 30% allocated share) is inserted.

The proposal scenarios outlined today offer a public/public partnership with options tailored to Flint/Genesee County or KWAs interests. For ease of writing, the remainder of this memo will present this proposal to KWA. Two basic scenarios are presented for consideration, both of which contemplate that KWA would enter a multi-year contract. Service commitments and usage definitions would be negotiated in the same manner as employed that have resulted in new contracts for other customers.

In brief, the proposal provides a unique opportunity to reserve capacity at DWSD's Lake Huron Water Treatment Plant and to participate in decision making for facility operation and capital investment through a joint operating committee. The proposal envisions that KWA would enter into a 30-year contract to purchase treated water directly onsite at DWSD's Lake Huron Water Treatment Plant.

In Scenario 1 the purchased water can either be pressurized or unpressurized. This first scenario results in a "supply only" rate schedule, with a "standby delivery" component to provide for emergency service at the existing Baxter / Potter connection. This scenario provides KWA the ability to construct new transmission owned and operated by KWA.

Scenario 2 maintains the public/public partnership concept and extends it to transmission facilities through which the Lake Huron Water Treatment Plant provides water. This scenario results in a "full service" rate schedule. The standby delivery component is eliminated, since the rate structure to KWA includes costs associated with the transmission system between the Lake Huron Water Plant and the Baxter / Potter connection.

DWSD proposes a modified rate schedule for the customers currently served through the contract with the City of Flint, which includes Flint and Genesee County. This modified schedule is intended to facilitate negotiations for a new water service agreement with the Karegnondi Water Authority (KWA). The scenarios presented herein represent the innovative thinking that DWSD and its new leadership are bringing to the table. Our goal is to provide the lowest cost water solution for the KWA service area.

The potential rate structures are introduced in summary form herein, with preliminary calculations using the proposed rate structures with FY 2013-14 as a baseline. These calculations and the accompanying discussion are based on the assumptions regarding contract terms that approximate recent discussions amongst the parties.

The proposal introduces the concepts, but does not definitively present all of the specifics, appreciating that such specifics are best addressed through negotiations designed to produce a new contractual agreement satisfactory to all parties.

[Remainder of page intentionally left blank]

Scenario 1 – Lake Huron Direct Supply Purchase:

- KWA enters into a long term partnering arrangement with DWSD to purchase all of its primary water supply directly at the DWSD Lake Huron water treatment plant.
- Supply rate schedule is designed to recover only water treatment revenue requirements. This rate schedule does not contain any delivery costs (pumping, transmission, storage, etc.).
- Supply rate schedule is computed based on specific costs associated with the Lake Huron Plant. No other DWSD revenue requirements, including those associated with other DWSD water plants, are included in the rate to KWA.
- Revenue requirements are separated into capital recovery and operation and maintenance expense elements. Baseline revenue requirement data (including operating budget, rate of return, depreciation assumptions, etc.) are identical to those developed for all other wholesale customers.
- KWA is allocated Lake Huron Plant capital revenue requirements based on the proportion of their contracted max day demand (assumed in these calculations at 40.6 mgd) relative to the total capacity at the Lake Huron Plant (400 mgd). The resulting revenue requirements are recovered through a fixed monthly charge.
- KWA is allocated Lake Huron Plant operating revenue requirements based on the proportion of their contracted average daily usage (assumed in these calculations at 24 mgd) relative to the total average daily usage at the Lake Huron Plant (assumed at 125 mgd in these calculations).
- Calculations are conducted for two alternatives. Purchase of *pressurized* water (after high lift pumping) and *unpressurized* water (KWA takes directly from clearwell.)
- Contract includes an arrangement for emergency service at the existing Baxter / Potter connection, and computes a standby charge related to such service.
- The standby charge is computed in the manner set for the by the American Water Works Association (AWWA) in its Manual of Water Supply Practices M1 - "Principles of Water Rates, Fees, and Charges" Manual M1.
    - KWA is allocated one day's worth of transmission related capital revenue requirements.

Scenario 2 – "Full Service" Lake Huron System

- Same as the "pressurized" option in Scenario 1, except that concept is extended to the pumping, storage, and transmission facilities directly served by the Lake Huron Plant
- Transmission rate schedule is computed based on specific costs associated with these facilities. No other DWSD revenue requirements, including those associated with other DWSD transmission mains, etc, are included in the rate to KWA.
- Revenue requirements are separated into capital recovery and operation and maintenance expense elements. Baseline revenue requirement data (including operating budget, rate of return, depreciation assumptions, etc.) are identical to those developed for all other wholesale customers.
- KWA is allocated Lake Huron "transmission system" capital revenue requirements based on the proportion of their contracted max day demand (assumed in these calculations at 40.6 mgd) relative to the total capacity at the Lake Huron Plant (400 mgd). The resulting revenue requirements are recovered through a fixed monthly charge.

- KWA is allocated Lake Huron "transmission system" operating revenue requirements based on the proportion of their contracted average daily usage (assumed in these calculations at 24 mgd) relative to the total average daily usage at the Lake Huron Plant (assumed at 125 mgd in these calculations).
- Standby charge is eliminated.

The resulting potential proposed rate structures under both Scenarios are summarized below.

Potential Proposed DWSD Water Rate to KWA
Lake Huron Direct Scenario

	1 - Supply Rate @ LH Plant		2 - Full Service
	Unpressurized	Pressurized	Wholesale Rate
Supply Rate			
Fixed Monthly Capital Charge - $	219,900	316,600	503,200
Commodity Rate - $/Mcf	2.60	4.16	5.31
Average Unit Cost - $/Mcf	*4.85*	*7.40*	*10.46*
Monthly Standby Charge	167,500	110,300	0
Total Monthly Charge	387,400	426,900	503,200
Total Average Unit Cost - $/Mcf	*6.57*	*8.53*	*10.46*

The direct comparison over the period 2013-2042 is demonstrated in Attachment 2.

As KWA considers this proposal, I offer the following observations for consideration:

- The Public Partnership requires the least near term capital investment and preserves the economy of scale associated with operation of a large regional system resulting in an immediate reduction in the cost of water supply for Flint/Genesee, making the identified and necessary near term investment in local water infrastructure more feasible.
- The Public Partnership provides the opportunity to optimize service level and efficiency through collaborative asset management decision making.
- The Public Partnership provides representation for critical decision making consistent with DWSD newly demonstrated interest in engaging our customers in critical decisions impacting them. This formalizes that interest in contractual terms.
- The Public Partnership reduces the risks identified with a 'go alone' solution, including further declines in use/sales (see graph), project cost overruns or schedule delays and other unforeseen costs inherent in starting a new venture. See Attachment 3
- The DWSD Board of Commissioners has previously approved sale of raw water from the Lake Huron facilities for raw water end use. We remain open to further discussion about the raw water capacity needs and stand ready to provide an affordable commodity option.

DWSD is an organization in transformation. In April of 2011, a new Board of Commissioners was seated with additional autonomy and more direct customer representation. In the past year we have demonstrated the ability to reduce costs, resolve long standing compliance issues and have gained support for establishing a new legal and operational model for DWSD that could enable broadened representation for Flint/Genesee on the Governing Board.

I remain available to discuss this proposal to assure that each of the issues critical to Flint/Genesee are addressed.

Best regards,

Sue McCormick, Director

Subject: RE: KWA and City of Flint

Importance: High

Ed/Randy,

Here are some observations and comments regarding the "Final Offer" from DWSD to Flint.

- The proposal is for 30 years, which is standard for DWSD.
- While the letter from DWSD is addressed to the City of Flint, the entire proposal seems addressed more to KWA and appears designed to apply to KWA as a collective entity.
- The proposal offers to allow the purchase of treated water directly from DWSD's Lake Huron WTP.
- It is unclear if the rates proposed by DWSD remain in-effect for 30-years.
- There is a statement in the cover letter "*Service commitments and usage definitions would be negotiated in the same manner as employed that have resulted in new contracts for other customers.*" This is very vague and implies further negotiation after approval of DWSD's offer. This raises concerns as to if additional costs might become a point of negotiation.
- There is an ill-defined comment that KWA can participate in facility operation and capital investment through a joint committee. More information would be needed on this prior to making a final decision.
- Broadened representation for Flint/Genesee County on the DWSD Governing Board is also implied but not defined. More information would be needed on this prior to making a final decision.

DWSD provides two scenario's for consideration.

- Scenario 1
  - Water purchases can be either *pressurized* or *unpressurized*. These terms are not defined and the impact of selecting an option could potentially impact delivery/transmission costs. I have concerns about proceeding without more clarity on the potential impacts of these options.
  - DWSD indicates that this scenario is a "supply only" rate schedule. Only water treatment costs would be recovered. DWDS would absorb all other delivery costs. It is not clear if this would remain in-effect for 30-years.
  - Capital and operating revenue charges are calculated based upon KWA's usage relative to the entire demand upon the Lake Huron WTP. Again, it is unclear if this is a fixed cost for 30-years.

- Emergency water service would be provided via the Potter and Baxter connection. It is assumed, but not specified, that the primary connection would be via the Imlay City connection.

- KWA would have the ability to construct and own its own transmission lines. It is assumed, but not specified, that no new connection points would need to be constructed to implement Scenario 1.

- Scenario 2

  - This is a "full service" rate option. DWSD provides all production and transmission services through the Potter/Baxter connection. It should be noted that this connection was determined to be more expensive than the Imlay City connection by TYJT.

  - Transmission rates will be calculated only on those costs necessary to supply KWA. No additional transmission rates will be charged. Again, it is unclear if this extends for 30-years.

  - Capital and operating revenue charges are calculated based upon KWA's usage relative to the entire demand upon the Lake Huron WTP. Again, it is unclear if this is a fixed cost for 30-years.

  - Emergency water services are not identified under this scenario.

DWSD provides a summary table of their unit costs but how these figures are arrived at are not clear, so analysis is difficult.

Attachment 1 lists the rank-ordered options (from cheapest to most expensive) identified by TYJT. DWSD Scenario 2 is listed as the least expensive option.

- How the total cost of this option is arrived at is unclear.
- It should be noted that Scenario 1 is *not listed* in *Attachment 1*.
- The previously identified, but unexamined, parallel line option raised by TYJT is listed as the 9th most expensive option. This option is not discussed in the DWSD proposal, so it is unclear how the total cost was arrived at.

The scenarios provided by DWSD could be cheaper than the KWA option, but this proposal lacks specificity and without delaying a final decision and conducting more analysis it is difficult to determine.

It is worth noting that if DWSD is able to provide these "advantageous rates" to Flint/KWA and expand decision-making representation to them, then it should be expected that other DWSD customers will desire similar terms.

It is peculiar that Scenario 1 notes that KWA would have the option to build and own its transmission lines. If no additional connection points are needed to implement this scenario, then why would KWA need to construct new lines (unless this refers to future expansion).

Scenario 2 seems to make KWA a "standard" DWSD customer with, perhaps, some more favorable rates and terms.

Scenario 1 references using the Potter/Baxter connection as an emergency connection. Given the history of back-up connections to DWSD, why is this point presented as almost a "non-issue?" Why then was it not previously implemented for Flint before this time? Also, why is the issue not addressed in Scenario 2?

A complete analysis of this proposal likely will require more information and additional time to complete.

If there are questions on the above comments, please let me know.

Gentlemen,

The cliffnotes version:

Proposal offers a today rate of water for Flint/Genesee of $10.46 as compared to $20.00 paid currently per Mcf - 48% less that could be realized nearly imediately and even more when compared to the increases coming with KWA.
When compared over the 30 year horizon the DWSD proposal saves $800 million dollars or said differently - saves 20% over the KWA proposal.

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
EDWARD J. KURTZ

ELECTRONIC LETTER

April 16, 2013

Andy Dillon
State Treasurer
P. O. Box 30716
Lansing, MI 48909

Dear Treasurer Dillon:

Flint, Genesee County and KWA received an eight page letter from Detroit Water and Sewerage Department (DWSD) offering a framework for a long-term agreement with our region. Two scenarios were presented;

Scenario 1: Water from the Lake Huron Plant.

This offer was dismissed immediately because Flint would still be responsible for their share of the KWA water pipeline delivery system estimated to be $79 million. In addition Flint would not be able to operate the Flint Water Plant in which we have invested over $40 million per MDEQ mandates over the past ten years. Finally, although DWSD shows this as an option and supplied a per month cost projection for the first year, no total costs over the life of the contract were provided.

Scenario 2: "Full Service" Water Supply

This offer was also rejected. DWSD would supply water to Flint/Genesee the same way they currently are today. They would change the method of calculating our bill. The offer would provide a $1.00 per ccf reduction on our usage for the first year, providing a 30 year contract is signed.

After review of the offer, Flint/Genesee has the following concerns:

1. DWSD's offer is a framework subject to negotiations and is not a firm offer.

2. DWSD's offer is based on 40.6 mgd, the KWA plan is based on 60 mgd. Flint/Genesee last summer hit the peak of 40.6 mgd and this DWSD offer provides no room for growth. Growth would result in penalties or added cost.

3. DWSD's offer does not include a guaranteed rate for years two through thirty, nor does it provide a maximum annual increase.

4. DWSD's offer does not provide a redundant supply for GCDC.

5. DWSD's offer does not allow for the use of Flint's existing water plant.

6. The offer indicates that the total cost to Flint over the life of the contract would be $587,990,665. No indication of what annual rate of increase was used in this projection. Flint can only assume it is 4.4% based on the Tucker Young report. It is also based on 40.6 mgds. KWA's proposal is for $649,775,166 based on 60mgds (33% more). Based on 60 mgds DWSD's proposal would be $868,950,738.

On a final note, Flint/Genesee has great concern over the accuracy of the figures provided by DWSD. Attachment 1 indicates that our joint annual cost to DWSD is $50 million; actual cost is less than $25 million. Attachment 2 indicates $800 million in savings over the next 30 years. That is greater than the total cost we would pay DWSD.

Therefore, I will sign the resolution to join KWA at the close of business today.

Sincerely,

Edward J. Kurtz
Emergency Manager

> > Hi Bill,

From a capacity standpoint, supplying KWA is completely feasible under either proposal with no adverse impact to the rest of the DWSD supply network. The proposal lists KWAs contracted max day demand at 40.6 mgd, the design and rated capacity of the Lake Huron Plant is 400 mgd. The DWSD service area average and max day are about 650 and 950 mgd; the other four water plants combined have a rated capacity of over 1100 mgd.

I don't know the details of the cost analysis other than what has been reported by DWSD. It is my understanding that over the 30 year pay back period that full service water provided from DWSD would be more a lot more expensive than what KWA has projected if they separate. Several intermediate proposals of varying cost estimates have been presented without success. KWA was issued a permit last fall for constructing an intake (independent of DWSDs) and I think the plan is to start construction as early as this fall. Then a treatment plant would be constructed to treat the water. Flint has a water plant that draws raw water from the Flint River, but the plan would be to purchase raw water from the KWA intake and treat at their plant, using the River as a backup source. KWA has estimated a project cost of $274 million, DWSD estimated the project cost at $375 million; but I don't know exactly what the scope of work was for those estimates so I'm not sure that it's an apples to apples comparison.

Overall, besides the know impacts to DWSD for loss of revenue and increased cost to the rest of the system users to cover fixed cost, debt, etc., there could be other systems revisiting their proposals to separate. Grosse Ile and a few surrounding communities had looked into forming a water authority and building a plant to serve them; Grosse Pointe Park had submitted incomplete plans a few years back to build their own microfiltration plant. At one point, Grosse Pointe Shores was considering a study to see if they could re-work the Grosse Pointe Farms network to purchase water from them rather than DWSD through GP Woods.

Let me know if you want to discuss this further.

thanks,
Laura

That is the $64,000 question. DEQ is firm that KWA is better. Are they an honest broker? I have to admit the engineering firm Treasury hired (Tucker Young) didn't make their case. No one on our side (DEQ or Treasury) sided with DWSD. I was the lone hold out but I couldn't argue against the defense Flint put forward against the TY report.

Folks - I am disappointed to report that Flint/Genesee rejected the offer last night by press release to the Flint Journal.

The next step will be to send Flint a termination letter. Flint plans on buying water from DWSD for the next 3 years. Under the old contract, a termination letter is sent and then 12 months later DWSD can set new rates for the water delivered in year 2 and 3. The new rates will recover all sunk costs.

I am convinced the DWSD team acted in good faith and put forth an attractive offer. The local politics trumped reason, economics and engineering. I wish the people of Genesee County good luck and that the project saves them all the money promised by the politicians.

DWSD will move on. Our next big issue is the regional authority. I would also expect now that the State Treasurer has indicated there is no Flint/Highland Park linkage, the Department will sue Highland Park for the $12.5 million it owes.

Gentlemen,

The cliffnotes version:

Proposal offers a today rate of water for Flint/Genesee of $10.46 as compared to $20.00 paid currently per Mcf - 48% less that could be realized nearly imediately and even more when compared to the increases coming with KWA.
When compared over the 30 year horizon the DWSD proposal saves $800 million dollars or said differently - saves 20% over the KWA proposal.

Fausone chairs the DWSD Board of Water Commissioners, which is actually a body that exists under the Detroit Charter and is appointed by the Mayor. Fausone's appointment to the board was facilitated by the federal court, as a suburban representative (Bing agreed to name suburban reps; I can't remember if he did it to avoid an order or if Cox ended up issuing one on the matter). The Board's decisions in almost all key matters (rates, contracts) are subject to approval by the City Council, so KO does not need to listen to them.

All members of the board are mayoral appointees who serve at his pleasure, so in theory, KO could even fire Fausone if he tried this. the only potential obstacle is the potential federal court order, which if it exists, would arguably require him to ask Wayne County for a new name. I would need to refresh myself on Cox's orders on this to be sure of the process. Even if Cox technically ordered this, the federal court would likely avoid getting involved if the issue (as this is) was unrelated to the sewer system. I can't see any appeals court upholding a judge's order with that as the basis, and the 6th Circuit made it pretty clear in 07 or 08 that the federal court in this case had no authority over the water side of the system, and the argument that the water and sewer systems are linked via shared management is DOA.

>
> It is also unclear whether DWSD provided its offer directly to Flint and Genesee Co. by the deadline in Treasurer Dillon's letter. However, Flint and Genesee Co. still took the offer under consideration.
>
> Our office concurs with both Flint and Genesee Co. that the offers provided by DWSD were incomplete.
>
> Of the two scenarios provided by DWSD it appeared that only Scenario 2 was listed as potentially being more cost effective. However, this scenario did not address the following:

1. The DWSD scenarios are based on 40 MGD of service capacity. However, the KWA project is providing 60 MGD of initial capacity with potential expansion to 75 MGD in the future. Therefore, in order for a more direct comparison the DWSD scenario would need to increase capacity to 60 MGD, which would increase fixed rate commodity costs as well as the capital costs for the Huron Plant that DWSD was planning to allocate to Flint and Genesee Co., presumably by as much as 50%.

2. DWSD proposals cover a 30 year period to 2042, but fail to recognize that after this period bond payments for the KWA project will be complete and result in a significant reduction in costs for the KWA option.

3. While DWSD indicates that Flint and Genesee Co. would be given "broadened representation", it remains unclear exactly what this means in terms of actual control in the decision making process.

4. This scenario continues to rely on a single transmission system and would require the City of Flint to maintain its WTP for emergency purposes and these costs do not appear to be included. In addition, use of the Flint WTP as an emergency backup would leave Genesee Co. without an adequate backup supply to meet their 30 year needs.

Again, without DWSD providing the specific details of these proposals, it is difficult to provide a true comparative analysis, and as such Flint and Genesee Co. appear to be justified in their rejection of these proposals.

Please let me know if you require any further response.

Ms. Inez M. Brown
City Clerk
City of Flint
2nd Floor, City Hall
1101 S. Saginaw Street
Flint, Michigan 48502

Dear Ms. Brown:

Regarding: Termination of Contract for the Provision of Water Services by the City of Detroit, Water and Sewerage Department

On December 20, 1965, the City of Detroit, through its Board of Water Commissioners, (DWSD) and the City of Flint, Michigan (Flint) entered into a contract for the provision of DWSD treated water to Flint and the distribution by flint of that water to other Genesee County communities. Section 18 of that Agreement[1] provides:

18. The Board [DWSD] shall supply and sell water to the City [Flint] from the water system of the City of Detroit, and the City shall receive and purchase such water in accordance with the terms of this Agreement for an indefinite period of time but at least for a period of thirty-five (35) years from the date hereof. This Agreement may be terminated by either party after expiration of said 35-year period, upon one year's written notice served upon the other party by delivering the same to the Secretary of the Board or to the Clerk of the City as the case may be, or at any time upon mutual consent of both parties.

Please take notice that pursuant to this section, 18, of the above-referenced Agreement, DWSD is terminating this Agreement one year from today's date (April 17, 2014).

Sincerely yours,

Sue F. McCormick
Director

[1] Although the Agreement between DWSD has been subsequently amended, Section 18 remains unchanged and in full effect.

Ok to book during that window. Can it be in Detroit? This delay likely means Flint will be pregnant w KWA by then.

We let Kurtz come w he and two or three and DWSD Fausone w same # as Flint.

Also, invite Wyant and Key engineer. One from Tucker Young.

Dennis, I didn't send Governor report from DEQ (email I sent you) but will now. Is there a max # of people for this?

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

SUMMARY REPORT

TO: Brom Stibitz, Senior Policy Advisor; Department of Treasury

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Flint Water System Summary

DATE: April 18, 2013

Summary

In November 2012 the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The purpose of this study was to provide objective analyses to the State Treasurer and Flint's Emergency Financial Manager (EFM) in order to secure future potable drinking water for the City.

In December 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, five options were presented: These options ranged from the Flint Water Plant providing 100% water, to 100% provision of untreated Lake Huron Water by KWA, to 100% provision of treated drinking water by DWSD, or provision of variable amounts of water from DWSD using a combination of blended DWSD water and Flint River water.

From the presentation of the preliminary report in December 2012 to the submission of the final report by TYJT in January 2013, a number of developments made arriving at a final decision very difficult.

- DWSD provided the City of Flint with at least two modified proposals to consider.
- A debate ensued between TYJT and KWA's principal engineering firm regarding the others' conclusions and estimates for construction of the KWA pipeline.
- The Flint EFM eliminated all options except the 100% DWSD option or joining KWA.

In January 2013, the OFR provided a comprehensive report to the State Treasurer analyzing three questions: 1) The projected construction costs and why Treasury believed the projections provided by Flint/KWA were acceptable; 2) Identification of the construction contingencies; and 3) Identification of the options Flint will utilize in the event of a construction cost overrun or a delay in construction. At the end of this report, the OFR recommended to the State Treasurer that KWA presented the best future option for future potable water. The OFR also concluded that KWA appeared to be the cheaper option; the quality of water would improve; Genesee County appeared willing to assist the City in securing the financing for their portion of the project; the KWA project could signify the beginning of better collaboration between the City of Flint and Genesee County; and the KWA project had both political and popular support.

Between January and April, intense scrutiny of the various proposals was undertaken by Treasury and Flint officials. Treasury officials met with officials from Genesee County to gain a better understanding of the KWA project. In February 2013, Genesee County opened bids for construction of the Lake Huron intakes. This bid opening represented the first meaningful step toward commencing construction of the KWA system. The bid was $3-million less than projected.

In March 2013, Treasury was notified that DWSD had contacted Flint to negotiate with the City to retain them as a customer. On April 12, 2013, the State Treasurer authorized the Flint EFM to join KWA, pending review of any final offer from DWSD. A final offer was received from DWSD on April 15, 2013.

DWSD's final offer provided two options. The first option was for a "supply only" rate schedule. Only water treatment costs would be recovered and DWDS would absorb all other delivery costs. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon DWSD's Lake Huron WTP. KWA would also have the ability to construct and own its own transmission lines.

The second option was a "full service" rate option. DWSD would provide all production and transmission services. Transmission rates would be calculated only on those costs necessary to supply KWA and no additional transmission rates would be charged. Capital and operating revenue charges would be calculated based upon KWA's usage relative to the entire demand upon the Lake Huron WTP.

Independent analyses of DWSD's final offer by the OFR, the Flint EFM, and the Department of Environmental Quality (DEQ) generally reached the same conclusions:

- DWSD's offer was a framework subject to negotiations and was not a firm offer.
- The offer provided by DWSD was incomplete.
- DWSD's offer did not include a guaranteed rate beyond year one, nor did it limit maximum annual rate increases.
- The DWSD scenarios were based on 40 MGD of service capacity. However, the KWA project provides 60 MGD of initial capacity with potential expansion to 75 MGD.
- DWSD indicates that Flint/ Genesee County would be given "broadened representation," it is unclear exactly what this means in terms of actual control in the decision making processes.
- The DWSD offer relies on a single transmission system and would require the City of Flint to maintain its WTP for emergency purposes. In addition, it would leave Genesee County without an adequate backup supply to meet their needs.
- DWSD's offer included an attachment that listed the rank-ordered options (from cheapest to most expensive). DWSD Scenario 2 is listed as the least expensive option (but it is unclear how the total cost of this option was arrived at). DWSD Scenario 1 was not listed.
- DWSD provided a summary table of their unit costs but how these figures are arrived at was not clear, so analysis proved difficult.

Without specific details from DWSD on this proposal, a true comparative analysis is difficult to provide. As such the Flint EFM rejected the DWSD proposal and agreed to join KWA.

If further information on this issue is needed, please let me know.

Mr. James Fausone
Chair
Board of Water Commissioners
Detroit Water and Sewerage Department
Detroit, Michigan

Re: KWA Proposal

Dear Mr. Fausone:

This is in response to your request for our advice regarding certain financial and procedural aspects relating to the proposal made by the Karegnondi Water Authority ("KWA") to the City of Flint ("Flint") to replace the Detroit Water and Sewerage Department ("DWSD") as Flint's water supplier.

As bond counsel for the City of Detroit (the "City") in connection with the issuance by the City, on behalf of DWSD, of over $650 million in sewer system bonds last year, we are familiar with DWSD, the water and sewerage systems and those matters most important to the successful financing of system improvements.

For purposes of this letter, we have reviewed, among other documents and correspondence, the City of Flint Water Supply Assessment, "*Preliminary Findings*," of Tucker, Young, Jackson, Tull, Inc., dated December 21, 2012 (the "Tucker Young Report"). We understand that the Tucker Young Report has been central to the discussion regarding whether or not the proposed KWA proposal should be pursued.

In our view, the financial analysis of the transaction and its consequences require reference to two subjects not materially considered by the Tucker Young Report or otherwise in connection with the KWA proposal. Among the most important are the effects on system debt service coverage and operating reserves. The Tucker Young Report notes that, among others, debt service coverage ratios and the funding of operating reserves were not specifically analyzed. The result could be a very significant understatement of costs. In this regard, we also note that the interest rates suggested for future Flint or system debt are, at best, purely speculative, if not considerably understated.

Debt Service Coverage

The debt service coverage ratio of any governmental body is a major consideration in the credit analysis of our national rating agencies. In this regard, one of the City's major underwriting firms, Siebert Brandford Shank & Co., LLC, has provided a comparative analysis of the credit ratings and debt service coverage ratios of several water systems, including the DWSD water system. The ability of a governmental body to pay its indebtedness is succinctly reflected in its debt service coverage ratio. National rating agencies have different credit criteria in this regard. Standard & Poor's Ratings Services requires a 1.5 debt service coverage ratio to assign a "strong" credit rating, while Fitch Ratings demands a debt service coverage ratio above 2.0.

The Ordinance governing the issuance of indebtedness for DWSD requires that the ratio of rates and charges to expenses be no less than 1.2 for senior debt.

In contrast, the KWA data reflects debt service coverage only in its financial proforma, which translates to a debt service coverage ratio of only 1.0, based on expectations, not experience. That ratio is extremely poor and unlikely to support any meaningful debt at any rate other than an unreasonably high one. This subject demands considerably more attention before a determination regarding the viability of the KWA proposal should be made.

Operating Reserves

In addition to the need for more analysis of the debt service coverage potential in connection with the KWA proposal, the strength of the potential operating reserves of the system must be considered. Our national rating agencies consider cash on hand as an indication of financial strength or weakness. The absence of cash to withstand negative unforeseen circumstances is a major negative factor in the rating analysis. Evidence of a three to twelve month operating reserve is extremely important. To our knowledge, there is no evidence of the means by which a meaningful operating reserve will be developed under the KWA proposal.

Act 436 Procedural Issue

Another issue of major importance is the procedure by which the KWA proposal has been or will be considered. The Local Financial Stability and Choice Act, Act 436, Michigan Public Acts of 2012 ("Act 436"), requires, in Section 12(3) thereof, that contracts with a cumulative value of $50,000 or more be subject to competitive bidding, absent authorization by the State Treasurer to abandon bidding.

The circumstances under which Flint is considering the KWA proposal are totally unclear as to whether this provision has been satisfied. To our knowledge, based on correspondence we have seen to date, the State Treasurer has not specifically waived the competitive bidding process. Moreover, we are not aware that any specific bidding requirements were published or

any information regarding evaluation criteria (of which, in complete disregard of customary and accepted governmental policy and practice, there appear to be none) disseminated. On what basis, then, can Flint legally proceed, particularly in view of the chronology of proposals submitted. No meaningful review of the DWSD's proposal viz-a-viz the KWA proposal conceivably could have been performed. Consequently, it can be concluded that the technical requirements of Act 436 were not satisfied and that a fair and intelligent analysis of competing contracts was clearly not made.

Public Policy

Finally, matters of public policy must be considered under circumstances as significant as these. Among such considerations are the existence of substantial public infrastructure with excess capacity, demographic data showing shrinking demand in the service area, the enthusiastic momentum behind the creation of a regional authority of which DWSD would be the structural foundation and the reduction in customer costs by a substantial percentage as reflected in the DWSD proposal, all of which militate substantially in favor of the DWSD proposal.

We have endeavored to summarize only a few of the more salient points relating to the analysis of the proposed KWA proposal in light of the proposals made by DWSD to continue the current relationship with Flint. Certainly, other matters of significance can and should be considered which may further affect the credibility of the KWA proposal.

Very truly yours,

CLARK HILL PLC

April 24, 2013

Ed Kurtz, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, Michigan

Dear Mr. Kurtz,

I am pleased to offer this Water Supply proposal for continued long-term water supply service to the City of Flint and Genesee County. DWSD is committed to becoming the provider of choice for Water service in Southeast Michigan and looks forward to the opportunity to partner with the City of Flint/Genesee County as the region moves forward. The proposal herein offers Flint the immediate opportunity for a 45% reduction in the cost of water supply saves the Flint/Genesee region over $900 million dollars as compared to the KWA alternative over the 30 year contract period.

On December 20, 1965, the Cities of Detroit and Flint entered into a Water Service Agreement (Agreement) for the City of Detroit Water & Sewerage Department (DWSD) to provide treated water to Flint and for Flint to provide DWSD water to other areas of Genesee County. That Agreement had a 35-year minimum and an indefinite maximum term and is currently in effect. There has been one Amendment to that Agreement dated July 18th, 1990. That amendment addressed a Flint request to reduce the minimum consumption requirement in the agreement by changing "Article 8 (A and B)". This amendment resulted in significantly lower costs to Flint. All other provisions of the Agreement remained unchanged. For over a decade the cities of Detroit and Flint have been in discussions for a successor Water Service Agreement to replace the Agreement currently in place. During the course of those discussions many different service alternatives have been considered but the cities have been unable to agree on terms that would allow their current Agreement to be replaced by a successor water service agreement.

In recent months, via a process largely governed by the State of Michigan, DWSD has proposed a number of alternative approaches for long-term water supply to the Flint/Genesee region. During a meeting with the State on April 19th a process and schedule was outlined that provided DWSD the opportunity to deliver a final proposal to Flint for continued service to the Flint/Genesee region. The proposal herein provides a public/public partnership approach in response to the water service requirements set forth by Flint / Genesee County / KWA as of April 22, 2013 (attached).

The following discussion and exhibits are designed to present the highlights of our submittal, and specifically respond to the points set forth in the request. In summary, our proposal reflects a public/public partnership approach with Flint that is designed to launch a cooperative arrangement toward solving water supply challenges in the Flint/Genesee region in a manner that best meets the interests of Flint and is equitable across the DWSD service area. Our proposed approach is responsive to the specification and has direct benefits to Flint/Genesee. Notably:

- Provides Flint, as partner with a capacity share in the Lake Huron Water Treatment Plant, the advantage of treatment costs calculated from a facility that has a lower cost of production compared to DWSDs other treatment plants; this capacity obligation is secured by a contractual obligation to successors and assigns;
- Effectively negates the distance and elevation factor that exists in the current rate structure to Flint, calculating transmission costs based on the line from the Lake Huron plant to the Baxter/Potter connection;
- Provides redundant (back-up) water supply at the Imlay City Pump Station and reflects fair recognition that Flint will provide a level of "reliability" on its own that DWSD currently provides to other wholesale customers, through construction and ownership of redundant transmission from the Imlay pump station West to Baxter/Potter or other point of connection as determined by Flint further maximizing Flint's interest in ownership of assets.

Highlights of our proposal:

Contract Structure – It is proposed that Flint would enter into a public/public partnership with DWSD that would reflect more input into and control over system investments and cost variables. The contract between Flint and DWSD would include "purchased capacity rights" in the "Lake Huron System" (defined below) based on the specific demands in an Exhibit B to the new contract, presumably the demands would be those included in the specifications attached. This is consistent in nature to DWSD's model contract that has been in place since 2008.

Revenue Requirement Responsibility – Limited to the costs associated with the "Lake Huron System", which includes the Lake Huron Water Treatment Plant and Intake and the transmission, pumping and storage facilities between the Lake Huron Plant and the delivery to Flint at the Baxter/Potter connection. Baseline revenue requirement data (including operating budget, rate of return, etc.) are identical to those developed for all other wholesale customers. No other DWSD costs will be allocable to Flint.

Proposed Rate Structure – Revenue requirements for the Lake Huron System will be recovered through a fixed monthly charge to recover allocated capital revenue requirements, plus a commodity charge to recover annual operating expenses. A separate fixed monthly charge is recovers the allocated "emergency standby" capital revenue requirements.

Redundancy Solution – Emergency backup supply is provided to the Imlay pump station, with the associated standby charge. A second transmission water main from the Imlay City Pumping Station west to either the current connection at Baxter/Potter roads or to another location to be determined by Flint, as necessary to meet the full redundancy requirements specified is assumed for comparison purposes. To maximize Flint's interest in ownership, it is proposed that this line will be constructed by Flint or KWA, and owned and operated by Flint or KWA. No costs associated with this transmission line are included in the proposed rate structure summarized in Exhibit 1. For the purposes of comparison of alternatives we have included an estimated annual revenue requirement for constructing such line, and these costs are reflected in the projections summarized in Exhibits 2 and 3. The costs for the second line included herein are consistent with those identified by TYJT in a follow-on effort to their report dated February 2013 on the

"twinned" line approach. Should Flint decide that it is not their preference to own this new transmission line, DWSD is receptive to other approaches, including DWSD financing and ownership.

Representation on the DWSD Board of Commissioners – DWSD is receptive to this concept and will pursue modification of the current governance structure to accommodate it.

Rate Increase "Guarantee" - DWSD proposes a guarantee that the capital portion of the Lake Huron System rate structure (the fixed monthly charge) will not increase for the life of the contract, unless additional capital investment is made in current and future Lake Huron System facilities. The only project in the current Capital Improvement Plan for the Lake Huron System is replacement of one low lift pump that is included in the fixed cost calculation. (Throughout this proposal the O&M escalation for the various revenue requirements are consistent with those applied in the TYJT evaluation conducted for the state.) In addition to the governance representation noted above and additionally through contractual treatment as a "partner" in a Lake Huron Operating Committee (proposed to have two Flint representatives and two DWSD representatives) Flint will have a level of control of such investments, and therefore a level of control over future capital revenue requirements included in the Flint rate structure. At Flint's option, an independent audit of the Lake Huron System costs can be requested annually and conducted by a mutually agreed upon firm and at a mutually agreeable cost.

Capacity - Flint will be entering a unique partnering agreement, initially purchasing capacity rights of 40 MGD in the Lake Huron Facility. The initial contract capacity would be set at 40 MGD per the specification. In addition, the contract will provide a reopener process every five years during which KWA may increase the contracted demands. DWSD will then allocate costs to Flint based on the new capacity requirement in the same manner as the initial allocation. This provision will accommodate potential growth in the KWA region without requiring Flint to encumber the full cost of projected future demands in early stages of the contract.

Proposed Rate Calculation

The annual revenue requirements are calculated (using FY 2013-14 as the baseline) as those that are allocable to the Lake Huron System. For purposes of this proposal, the Lake Huron System is defined as including:

- The Lake Huron Water Treatment Plant and related structures (intake, etc.)
- The 120" water main from the Lake Huron Plant to the Imlay City Pumping Station
- The Imlay City Pumping Station and related structures (reservoir, etc.)
- The 72" main from the Imlay City Pumping Station to the connection to Flint at Baxter/Potter Road

The Flint relative shares of the allocated Lake Huron System revenue requirement are based on the specifications provided by Flint. Capital costs have been allocated based on relative max day demands (for the plant) and peak hour demands (for the transmission facilities). Operation and Maintenance expenses have been allocated based on relative average day demands for all facilities.

The rate structure proposed herein recovers the allocated FY 2013-14 revenue requirements. All capital revenue requirements are proposed to be recovered through a fixed monthly charge. All operation and maintenance revenue requirements are proposed to be recoverable through a commodity rate applied to actual water purchases. An "average unit cost" per Mcf has been calculated based on the specification provided to illustrate the total revenue requirement expressed as a unit cost of projected water sales.

The analytical results of the proposal are illustrated in the attached table (Exhibit 1). Page 1 of this table shows the calculation of the proposed rate structure for FY 2013-14. As mentioned above, the fixed monthly charge associated with current capital costs of the Lake Huron System (shown on Line 1) will never increase so long as the purchased capacity requirement stays constant. Changes to the fixed monthly charge can increase only with (a) additional purchased capacity through the contract re-opener process (permissive to Flint), or (b) additional investment in Lake Huron System facilities for which Flint has both partnership input at the operating committee level and governance representation on the Board.

Page 2 of Exhibit 1 provides background to the rate structure calculation and illustrates the allocation of FY 2013-14 revenue requirements associated with the Lake Huron System facilities to Flint based on the contract demands set forth in the specifications document. It also illustrates the calculation of the emergency standby charge. This charge is designed to reflect the reservation of one day's worth of average daily capacity in the portions of the DWSD "backbone" (treatment and major transmission) system from which Flint will not receive "regular" service - and in which it will not be a "partner".

TYJT's report on the City of Flint Water Supply Assessment from February of this year included a number of tables and charts that compare revenue requirements to Flint under various alternatives. Attached herein is an updated Table 6.1 (Exhibit 2) which compares the cumulative annual cost of each option from the TYJT report with the new proposal included. We've also included an Exhibit 3 which is similar in format to Figure 6.1 in the TYJT report. However the data in this exhibit is a bit more inclusive, as it accumulates ALL of the annual utility costs for the KWA service area. DWSD submits that these exhibits illustrate the comparative advantage of DWSD's current proposal to the KWA proposal, and demonstrate the significant cost advantage provided with the innovative public/public partnership approach we are proposing.

In the nature of an executive summary or overview, we have submitted a companion power point presentation that calls out many of the significant features of this proposal. This is firm offer that is available with the rate season beginning July 1, 2014, however we remain open to discussion and negotiation.

Best regards,

Sue McCormick, Director
Detroit Water & Sewerage Department

Specification Sheet for Evaluating Water Service Options to Flint and/or KWA/Genesee County (KWA/GC) Service Area

Issued: April 22, 2013

Purpose: The purpose of this document is to 1) clarify the water service requirements so that DWSD may submit a proposal responsive to the current requirements of Flint and/or KWA/GC and 2) provide a framework for a comparable and equitable analysis of water service proposals from DWSD, KWA/GC, and/or any other parties.

- **Scope**: DWSD's proposal will be evaluated based on water service delivery to(select one):

  Flint only **or** Flint and KWA/GCC

2. **Objectives**: Identify the outcomes and criteria that serve as the basis for evaluating water service based on the scope defined in Q. 1 above.

- **Maintain current supply standards**
- **Reduce our cost share of DWSD system we don't use**
- **Stabilize rate**
- **Increase control over cost variables (be an owner, not a user)**
- **Redundant service at Baxter Potter**

3A. Treated Water Capacity Worksheet (5 Year Increments 2013-2042)

		2013	2018	2023	2028	2032	2037	2042
	Flint							
	Pressure Range							
	Max Day(MGD)							
	Peak Hour(MGD)							
	Avg Day (MGD)							
	KWA/GC							
	Pressure Range	**50 PSI Winter 65 PSI Summer**						
	Max Day(MGD)	**40**	**43**	**47**	**50**	**53**	**57**	**60**
	Peak Hour(MGD)	**44**	**47**	**52**	**55**	**58**	**63**	**66**
	Avg Day (MGD)	**25**	**27**	**29**	**31**	**33**	**35**	**35**
	Total							
	Pressure Range							
	Max Day(MGD)							
	Peak Hour(MGD)							
	Avg Day (MGD)							

3B. Raw Water (End Use) Capacity Worksheet (5 Year Increments 2013-2042) in excess of the specified treated water requirements

		2013	2018	2023	2028	2032	2037	2042
	Flint							
	Pressure Range							
	Max Day(MGD)							
	Peak Hour(MGD)

	KWA/GC							
	Pressure Range	0						
	Max Day(MGD)	0						
	Peak Hour(MGD)	0						
	Avg Day (MGD)	0						
	Total							
	Pressure Range	0						
	Max Day(MGD)	0						
	Peak Hour(MGD)	0						
	Avg Day (MGD)	0						

4. **Provide Redundancy/Reliability alternatives for Treated Water?** Circle yes or no for each

For Flint: Yes or No For KWA/GC **Yes**

Option 1 -Full redundancy-2nd source (specify delivery point)

--Baxter Potter or second point into Genesee County

Option 2 – Redundancy via storage (specify location point and volume)

--Not Applicable

5. **Permission to blend?** **No**

If Yes, specify any operating requirements/limitations to blending.

6. **Representation:**

On DWSD Board? **Yes**

On DWSD Operating Committee? **Yes**

7. **Capital Costs:** Capital improvements/upgrades requested to achieve water service objectives.

--See No. 4

8. **Pricing**: Cost of service based on a rate model specific to named facilities and auditable account structure.

Alternative 1: **Annual rate** proposed based on budget and estimated usage, billed monthly based on metered usage.
Electable option: Subject to annual audit and true up in the next full rate year after close of audit. **NA**

Alternative 2: Annual fixed amount proposed based on budget and estimated usage; billed monthly in 12 equal monthly bills. Subject to annual audit and true up in the next full rate year after close of audit. **NA**

Alternative 3: Customer specified pricing requirement(s)
- Redundant service as a separate fixed rate

- Annual fixed amount with a commodity charge based on service from Port Huron and pipeline only.

- Capital cost and O & M for Port Huron operations only

9. **Other Criteria:** Identify any other criteria or materials that DWSD should provide for an objective evaluation of DWSD provided service compared to non-DWSD options.

- All current and future costs not to increase by more than 4.7% annually over the life of the contract

A Public/Public Partnership to Provide Water Service to Flint/KWA

Submitted by City of Detroit Water & Sewerage Department
April 24, 2013

Water Service Process

- April 22, 2013 – Flint Emergency Financial Manager (EFM) provides specifications to DWSD
- April 24, 2013 – DWSD submits proposal to Flint EFM
- April 25, 2013 – Flint/Detroit EFMs confer
- April 26, 2013 – Target date for decision

Water Service Objectives

Flint and Genesee County's Objectives

1. Be a system owner, not a user
2. Reduce cost
3. Stabilize rates for the long term
4. Obtain service redundancy
5. Maintain water quality standards

1. Be a system owner, not a user

This proposal provides for:

A. A partnership with DWSD for a capacity share in the Lake Huron Water Treatment Plant
B. A Lake Huron System operating committee to control facility investment and O&M costs
C. Introduction to modifying current DWSD's governance structure to provide board representation for Flint/Genesee County

2. Reduce Cost

This proposal provides for:

A. Water Supply costs based solely on Lake Huron System
B. Eliminating the distance and elevation factor
C. A **fixed** monthly charge for allocated capital revenue requirements
D. A **commodity charge** to recover annual O&M expenses based on actual water purchases
E. A **fixed** monthly charge for "emergency standby" capital costs to accommodate reliability from other DWSD assets

2. Reduce Cost (continued)

The proposal provides for significant cost reduction over the life of the contract when compared to both the current DWSD rate structure and the KWA Scenario.

Projected Annual Flint / GCDC Purchased Water Costs
$ millions

	Current Rate Structure	Proposed Rate Structure	Variance	% Variance
2015	25 55	14 18	(11 37)	-45%
2020	32 14	17 55	(14 59)	-45%
2025	40 44	22 00	(18 44)	-46%
2030	50 87	27 59	(23 29)	-46%
2035	64 00	34 82	(29 18)	-46%
2040	80.53	44 48	(36 05)	-45%

The proposal results in immediate and continuing reduction in DWSD rates of 45%.

Projected TOTAL Water Costs to the Flint/GCDC Service Area
FY 2016-17 - $ millions

	KWA Scenario	DWSD Proposal	Variance
DWSD Purchased Water	0 00	14 97	14 97
KWA Operating and Capital Costs	43 94	0 00	(43 94)
Flint/GCDC Op and Capital Costs	64 15	50 74	(13 41)
TOTAL	108 09	65.71	(42 38)

The proposal is less costly than the KWA Scenario throughout the contract. Total savings to the Flint region are over $900 million.

3. Stabilize rates for the long term

This proposal provides for:

A. No increase in the Lake Huron System fixed capital monthly charge for the life of the contract unless new capital investment incurred
B. No capital investment is made unless recommended by a new Lake Huron Operating Committee (proposed to have two Flint representatives and two DWSD representatives).
C. An independent audit of the Lake Huron System costs can be requested annually

3. Stabilize rates for the long term
(continued)

D. No increase in capital and standby costs as long as purchased capacity requirement is constant
E. If increased capacity requested through contract re-opener process (permissive to Flint), change in costs based on new allocated share

3. Stabilize rates for the long term
(continued)

F. Initial contract based on purchasing capacity rights of 40 MGD in the Lake Huron Facility

G. Contract reopener every five years to accommodate potential growth of KWA region

4. Obtain Service Redundancy

This proposal provides for:

A. Redundant supply provided by DWSD at the Imlay City Pump Station
B. KWA constructs redundant transmission (from the Imlay pump station West to Baxter/Potter or other)
C. Existing investment in Flint water treatment plant continues to be utilized

5. Maintain water quality standards

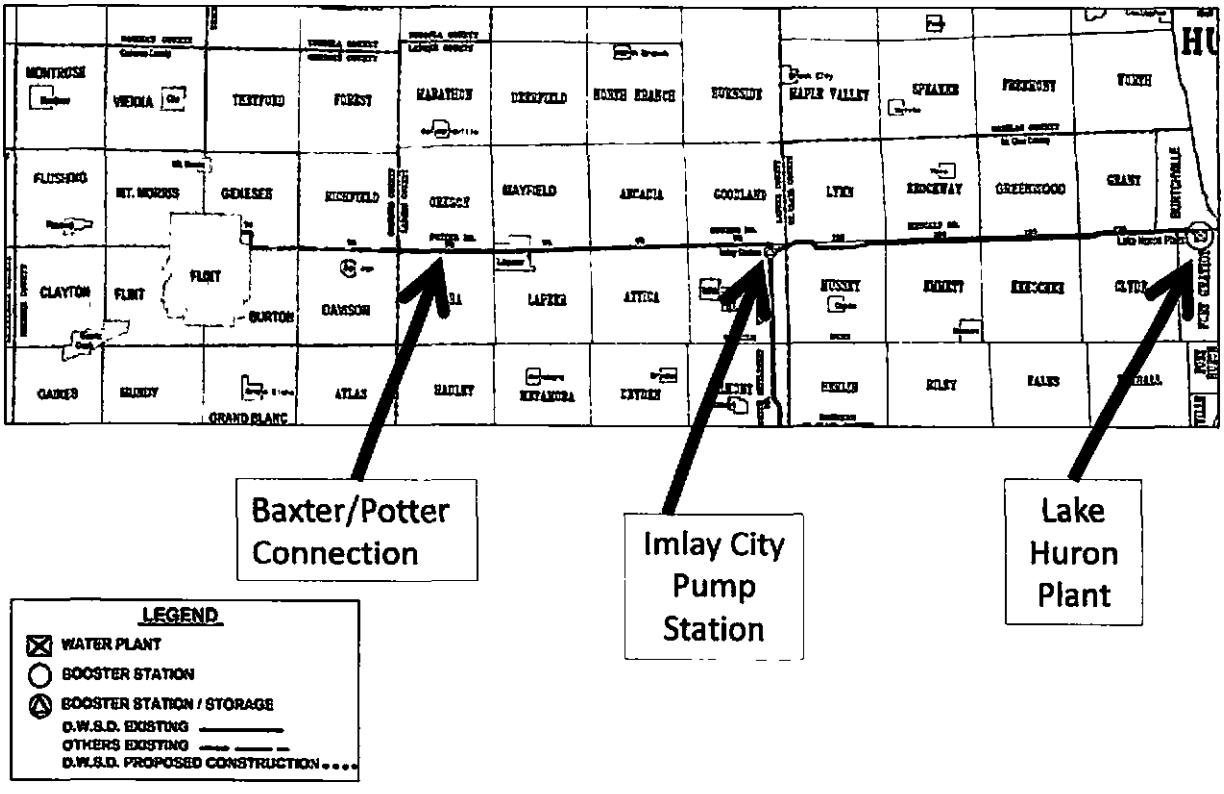
This proposal provides for:

A. Ongoing access to DWSD's water which meets or surpasses all federal and state standards for quality and safety
B. Meets pressure requirements requested in Flint/Genesee County proposal specifications
C. As a partner, Genesee County will have DWSD's experience and customer community resources to ensure water quality standards

"Lake Huron System" Defined

- ✓The Lake Huron Water Treatment Plant and related structures (intake, etc.)
- ✓The 120" water main from the Lake Huron Plant to the Imlay City Pumping Station
- ✓The Imlay City Pumping Station and related structures (reservoir, etc.)
- ✓The 72" main from the Imlay City Pumping Station to the connection to Flint at Baxter/Potter Road

Lake Huron System Map



Rate History – Past & Future

Flint/DWSD Rate Adjustments, Ten Year History

Fiscal Year	Unit Cost Rate	% Change
2004	$ 11.06	
2005	10.24	-7.4%
2006	10.56	3.1%
2007	11.09	5.0%
2008	11.35	2.3%
2009	13.07	15.2%
2010	14.32	9.6%
2011	15.85	10.7%
2012	17.53	10.6%
2013	19.12	9.1%
2014	20.39	6.6%
Ten Year Geometric Average		**6.31%**

Future

- ✓ Fixed capital costs
- ✓ Fixed emergency standby costs
- ✓ Commodity charge based on allocated share of Lake Huron System
- ✓ Voice in capital and O&M cost levels
- ✓ Ability to audit cost detail

Next Steps

- This presentation highlights key points of proposal presented April 24, 2013. See proposal for complete explanation.

- Proposal review proposal process – DWSD welcomes opportunity to address questions and clarifications

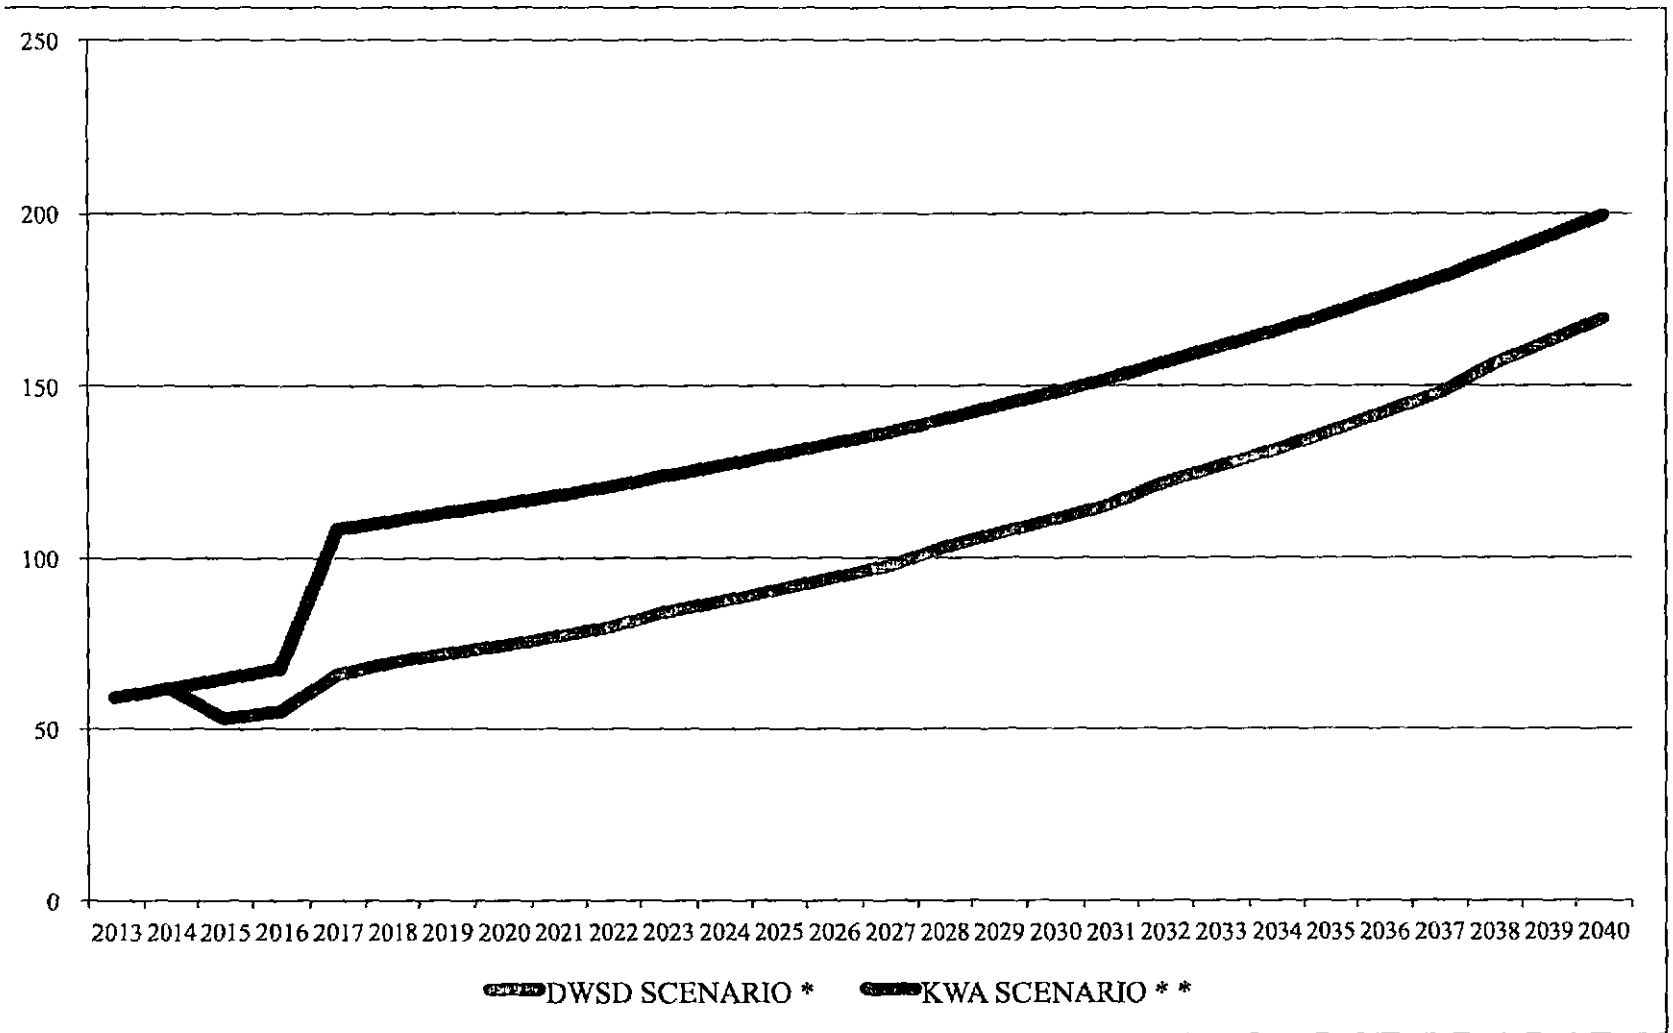
DWSD 4/23/2013 Proposal	3,202.18	1
Estimate of KWA Scenario	4,123.89	2

Reflects ALL WATER UTILTY costs, including local Flint / GCDC requirements.

EXHIBIT 3

SUMMARY OF **TOTAL** PROJECTED WATER COSTS TO FLINT/GCDC - SCENARIO COMPARISON *($ millions)*



NOTE - This chart reflects estimated TOTAL water utility costs for the KWA Service Area, including local requirements of the Flint and GCDC Systems.

* Includes current annual capital costs for purchase of capacity in current LH System, based on escalated capacity from specifications. Does not include any additional future LH System capital costs. Includes LH System operating costs and standby charges for the rest of the System.

** It has come to our attention that the KWA Scenario will require construction of 14 days of raw water storage. Costs associated with such a project have not been published and are not included in this comparison.

Subject: RE: Flint/GC Presentation

Mr. Dillon:

We have reviewed DWSD's final offer to Flint/ Genesee County of April 24, 2013 and find it responsive to Flint's concerns and their water demand requirements. The offer appears to mitigate all the potential risks to Flint (joining KWA) identified by TYJT in our February 2013 Report to you and our subsequent meetings.

We have one recommendation for consideration related to service redundancy (refer to bottom of page 2 and top of page 3 & Item 4, page 10 of the power point presentation material of DWSD's offer document): TYJT would recommend that Flint asks DWSD to construct the second redundant line from Imlay Station to Flint and possibly purchase the existing 72 inch Flint- Owned line from Baxter/Potter (FL-1) to the Flint WTP. This redundant line cost could either be allocated to the entire DWSD water system (common to all allocations) or the cost could be included under the new water rate to Flint (should push to be included in the common to all allocations). TYJT believes that this would result in the following benefits:

1. Since Flint is unable to cost- effectively bond capital, the cost of financing could be easily obtained by DWSD;
2. DWSD has detailed and unique engineering experience for large and lengthy transmission mains design and construction; and
3. Long term operation and maintenance of the piping would be the responsibility of one entity, thus mitigating in the future who may be responsible for water main failures (breaks, leaks, hydraulic transients, etc.).

With the twin line, redundancy will be afforded to Flint's supply which will help in eliminating the dependency on the WTP/Flint River (except for the use of the high lift pumps) and thus generating tremendous O&M savings.

Please let us know if need any additional support.

Regards,
George Karmo, P.E., BCEE

Mr. Croft and Mr. Kurtz,

Attached is the back-up data that we believe is responsive to your request below. Please keep in mind that the information provided was developed in order to provide Flint with an "apples to apples" comparison of rates between the DWSD and KWA scenarios based upon current rate assumptions under the contract in place through April 2014.

As always, please feel free to call with any questions.

Matt

Subject: DWSD's responses to Flint's Questions

Good Afternoon Ms. McCormick,

We appreciate your response to our additional questions, Mr. Kurtz would like to know if you could provide a quick summary to the following inquiry.

On page two, in paragraph one, it is stated that "the total Water Utility Costs through 2042 are only $3,215.04 million, or $908.85 million less than the KWA scenario."

We are curious what formula DWSD used to calculate the $908.85 million dollars less than KWA?

We are meeting this afternoon to review your responses and any additional information on this issue would be greatly appreciated.

Thank you,

--

DWSD / KWA Executive Summary Outline

Premise and Approach

- Review most recent audited financial statements to establish baseline water revenues from Flint and Genesee County (GCDC), and how such revenues are applied.
- Estimate how baseline will be impacted under two scenarios
  - Continued purchase of treated water from DWSD
  - Construction of new KWA raw water supply system and treated water supply system for Genesee County and construction of modifications to Flint Water Treatment Plant
- Compare estimated short, mid, and long term financial projections for each scenario

Assumptions – common to both scenarios

- Current application of revenues is most accurately depicted by published audited financial statements for most recently fiscal years
  - FY ended December 31, 2011 for Genesee County Drain Commission (GCDC)
  - FY ended June 30, 2012 for City of Flint
- Most recently audited figures for Flint / Genesse County operating expenses, capital expenses, etc. are representative – inflate at 4.51%, ***consistent with TYJT report***

Assumptions – DWSD Scenario

- DWSD water rate schedule
  - DWSD rate structure to Flint / Genesee County is amended to reflect 4/24/2013 DWSD proposal, adjusted to reflect immediate reservation of 60 mgd capacity
  - DWSD rate escalation (for commodity and standby elements) at 4.7%, ***consistent with TYJT Report***

Assumptions – KWA Scenario

- KWA scenario begins in FY 2017, at which time purchased water from DWSD would cease
- Other than normal rate adjustments DWSD does not amend rate structure to Flint / GCDC
- KWA scenario costs
  - KWA Raw Water Pipeline and Appurtenances Construction = $357.58 million, ***consistent with TYJT report***
  - Flint Water Treatment Plant Construction Improvements = $7.1 million, ***consistent with TYJT report***
  - GCDC Water Treatment Plant Construction Improvements = $110 million, ***consistent with 2009 KWA Preliminary Engineering Report***
  - All construction costs are financed in terms set forth in the TYJT Report
    - 3 years of capitalized interest
    - Fully funded bond reserve account
    - Bond issuance expenses at 2.25%
  - In addition, revenues are assumed to need to generate 1.20x coverage of annual debt service
  - Flint Water Treatment Plant Operating costs = $8.27 million starting in 2017, ***consistent with TYJT report***
  - GCDC Water Treatment Plant Operating costs = $1.82 million starting in 2017, ***consistent with unit costs from the 2009 KWA Preliminary Engineering Report***

Subject: Re: dwsd

Brom, I hope the Governor's office and Treasury share the same "outrage" that I have over this article. The Governor specifically asked all parties not to talk to the press. I am not sure the State understands the kind of issues these articles create in our community. I have honored the Governor's request and will continue to do so until Monday. It is this exact kind of behavior that has occurred over the past 12 years, and frankly, we cannot work with people that have so little respect for and lack of professionalism in this matter. Again, let me say I am not taking this personally, and can handle the heat that will come from this, but it is flat out wrong. Ed

Ed Kurtz and Kevyn Orr spoke this afternoon. Ed indicated that Flint will not accept the last offer from DWSD. His formal letter is attached.

I spoke with both (separately) after the call. They both indicated that they had a good conversation, and that they sincerely look forward to working with the other in good faith over the next couple years.

Kevyn indicated that he would follow up with Sue McCormack, and that his direction will be that there be no more talking to the press about the issue. Ed plans to stay silent on the deal until Monday, at which time he will address the issue in a matter of fact matter, and stay away from any divisive language regarding the issue.

RE: DWSD Offer Evaluation

Dear Mr. Orr:

DWSD's offer of a Public/Public Partnership appears on the surface to offer significant cost of water savings, particularly in the near-term. However, further analysis exposes several flaws and weaknesses with the offer that reduce any potential appeal. First, the offer continues to use a grossly inaccurate estimate of the KWA operating and capital costs over the next thirty years. This one estimate is off by at least $800 million and perhaps by as much as $1 billion over that timeframe. And since DWSD claims "total savings to the Flint region are over $900 million", they have relied on this flawed estimate of KWA cost to make this claim. This offer also relies on a projection based on very little capital expenditures, no repairs on a system that is past its life expectancy, and annual rate increases of 4.7% over the next 30 years.

Secondly, and of much greater concern to Flint and GCDC, DWSD's offer of partnership would not so much foster a true collaborative relationship, but instead contractually transfers significant liability and risk for the next thirty years. DWSD's offer states the contract "would reflect more input into and control over system investments and cost variables." Unfortunately, these future investments and cost variables are not contained in the DWSD cost estimates. DWSD has included a fixed monthly charge to recover allocated capital revenue requirements, but this number is largely for past expenditures and debt costs, and does not include the significant future capital costs which will be required to maintain their nearly 50 year-old system. Once again quoting from the

DWSD April 24th offer letter under the Rate Increase Guarantee section – "DWSD proposes a guarantee that the capital portion of the Lake Huron System rate structure (the fixed monthly charge) will not increase for the life of the contract, unless additional capital investment is made in current and future Lake Huron System facilities." No one disputes that additional capital costs will be required that will total in the millions of dollars.

The DWSD offer is able to appear to offer savings on the surface since they have offloaded much of the above future capital costs. But to do so, DWSD has had to gloss over or simply ignore these large future expenditures. If these unaccounted for capital costs were to be calculated and added to the 30 year Flint and GCDC cost of water estimates, the DWSD offer becomes one in which the savings swing far to the advantage of the Karegnondi Water Authority.

Sincerely,

Edward J. Kurtz

ATTACHMENT 1

This offer has more risk involved than previous proposals. KWA would be responsible for between 20% and 100% of the repair costs on the pipeline and related assets from Port Huron

The numbers in the offer do not make sense. DWSD indicates savings of over $900 million while KWA's total cost over 30 years is less than $650 million.

Offer is based on very little capital improvements, no repairs and a 4.7% annual increase over the life of the contract.

There are no rate guarantees after the first year for capital, O & M or consumption.

KWA would be responsible for redundancy at a cost of $94.68 million per DWSD's estimate.

Does not guarantee a rate structure if system regionalizes or DWSD regionalizes, or Detroit enters bankruptcy.

Flint and Genesee County could have a connected waste/water system that serves all or part of five counties.

The potential for further consolidation of services between the city and the county i.e...water, wastewater, 911, etc,

This partnership will give Flint ownership of its own water supply system with real representation on its board of directors, making all treatment and delivery system decisions.

Flint's participation allows them to utilize its own water treatment facility that it has invested 50 million into and only currently exercises four days per year.

The investment gives us a new pipeline with a life expectancy of 75 years, as well as a 2nd product, untreated water. Under DWSD we would have no ownership after the end of the contract, and a new pipeline would still need to be built.

A 30 year contract with DWSD keeps us on a system that is 48 years old with a design life of 75 years. There will be necessary major investments or replacement costs that are not accounted for in this DWSD proposal.

KWA guarantees its capitol rate for 25 years. The capitol rate is 90 % of the total costs.

The commodity charge of $1.30 per mcf is mainly driven by energy costs. The whole operation will employ 5-7 people.

A thirty year contract with DWSD will lock Flint into hundreds of employees, labor costs and legacy costs.

The combination of low financing, labor and material make this the optimal time for this investment. At our meeting with the governor on April 19th Detroit acknowledged a second pipeline had to be built.

KWA could be used as a backup emergency supply for the existing 48 year old pipeline.

It brings a total economic package to our community i.e. We have the I-69 corridor, I-75 interchange, the rail system connected to Port Huron, and one of the busiest airports in the state. Owning our own water supply completes that package and keeps $25 million in our community.

Mr. Fausone's continued insistence on a 12 month timeline to calculate the termination fees leaves a question mark on the costs.

Construction Costs

- Rowe/AECOM/J & H $272,000,000
- TYJT $357,000,000

  Include: 10% bond coverage (dispelled)

  30% additional engineering (dispelled)

  Back-up power (dispelled)

- DWSD Starts at: $357,000,000 and adds:

  $134,630,000 for bond sizing

  $11,074,500 for bond sale cost

  For a total of: $503,274,500

  Plus need to collect $6,984,000 per year extra for bond coverage (20%)

  Now we need:

  20% bond coverage

  30% additional engineering

  38% bond sizing

We dispelled TYJT numbers; now DWSD starts with those numbers and adds more They add the same costs to Flint and GCDC construction costs (baseline figures and assumptions – KWA)

Baseline Figures and Assumptions - KWA Scenario

	DWSD Water Rate Structure			
	Fixed	Standby	Commodity	
2014	738,006	#N/A	13.01	Service ceases after 2016

Kevyn--perhaps I am not knowledgeable enough on the specific facts here, but I find this to be a strange letter because he only attacks the calculations without offering his own assessment, proposing an alternative or threatening to pull out. Maybe that is a good sign rather than a bad one. You, I, Ken and Heather should discuss on Monday, or when we see you.
I am anxious to hear what Sue thinks.

RECEIVED
APR 29 2013
OFFICE OF THE STATE TREASURER

April 24, 2013

Mr. Andy Dillon, Treasurer
Michigan Department of Treasury
Lansing, Michigan 48922

Dear Mr. Dillon:

Regarding: Rate Proposal for Flint / Genesee County

As you are aware, during our meeting on Friday, April 20, 2013, the Detroit Water and Sewerage Department (DWSD) was requested to provide a rate proposal to Flint and Genesee County by today based upon the specifications that Flint provided to DWSD on Monday, April 22, 2013. Early this morning, DWSD responded to that request with several documents that were also provided to your office by electronic communication.

In addition to the proposal document, the State of Michigan requested that DWSD include cost figures concerning DWSD's stranded costs associated with capital investment made by DWSD over the years related to serving both Flint and Genesee County as water customers. This issue of "stranded costs" has received significant media attention over the past several months, and my impression is that the State was looking for a clear figure so that there could be subsequent discussion and negotiation over all costs associated with Flint's decision on whether to join Karegondi Water Authority (KWA).

As you may know, State law requires that public utilities such as DWSD must base their rates upon the actual cost of service to particular customers. Additionally, state law limits the length of utility contracts to thirty years, while the useful life of capital assets in the water utility can greatly exceed that thirty year term.

Unfortunately, the computation of stranded costs for DWSD's capital investments in capacity and transmission attributable to Flint's and Genesee's consumption of DWSD water, is a complex calculation that cannot be performed with any level of certainty over the short time period provided by the State of Michigan for this analysis. Further, I have been advised by DWSD's General Counsel that it would not be prudent to engage in a process of trying to guestimate a price range for such a complex computation.

RECEIVED
5/1/2013

Based upon DWSD's termination of Flint's existing water contract last week, DWSD has roughly twelve months to determine the appropriate cost structure for Flint and Genesee's water consumption over the remaining term of their non-contracted water service from DWSD. DWSD will, however, endeavor to finalize the rate impact of the stranded costs by the end of the current calendar year.

Please rest assure that DWSD's computation will be in accordance with State Law which dictates that such rates will not result in a rate structure that would generate a profit for DWSD. Our intent is simply to compute the rates so that costs properly attributable to Flint and Genesee County will not be borne by the remaining DWSD water customers.

Sincerely,

Sue McCormick
Director

DWSD's responses to Flint's Questions

April 25, 2013

Question 1: How does this proposal conflict with Article 14 ("Ensuring Equality of Contract Terms") of the existing contracts, which will result in a re-shuffling of cost and bring Flint/GCDC back to its original costs?

Response: This proposal is fully consistent with Article 14 of the Model Water Contract. Specifically, Article 14 provides that any existing customer can receive the benefit of a future contract provided to a different customer *provided that the existing customer assumes all of the new contract terms.* In other words, an existing customer cannot select one or two more preferable provisions without accepting the remaining terms that could be viewed as less preferable.

DWSD's proposal to Flint/KWA is unique in several aspects that would likely not be attractive to other existing customers of the system. Most notably, DWSD's proposal to Flint/KWA not only relieves DWSD of any financial obligation to provide redundancy for water service, but it also requires the customer to maintain its own treatment plant for redundancy. Additionally, the Flint/KWA proposal develops a fixed cost for the customer to guarantee a minimum capacity over the life of the contract. DWSD's other contracts allow for adjustments both up and down based upon changes in demand.

Question 2a: To compare apples to apples, KWA provides 60 mgd capacity. DWSD only provides 40 mgd. Will DWSD require purchase of 60 mgd capacity today or can we purchase 40 mgd today and reserve 20 mgd for later? Is there a premium penalty or no additional cost?

Response: The DWSD Proposal provides 60 MGD capacity in a stepped fashion consistent with the specification, providing Flint/GC the ability to adjust for actual growth rather than incur a larger initial obligation. Given the excess capacity in the system, there is little likelihood that capacity would not be available if and when it is needed by Flint/GC. However, Flint/GC may reserve 60 MGD capacity throughout the contract term. The new exhibits attached and dated 4/25/13 have been revised to reflect a contract reservation of 60 MGD throughout the term of the contract and would replace Exhibit 1 and Exhibit 3 previously provided.

Even with the reservation of this additional capacity, the total Water Utility Costs through 2042 are only $3,215.04 million, or $908.85 million less than the KWA scenario. This would result in a 37% decrease in rates for Flint in year one from current rates. This relative decrease would grow over the life of the contract.

Question 2b: Will DWSD stipulate that our cost cannot be increased due to regionalization?

Response: This broad question covers a number of topics. First, DWSD has proposed a contract cost structure that includes fixed charges to the greatest extent possible consistent with State Law. This structure provides significant protection from future rate increases. As was indicated by Mr. Kevyn Orr during our meeting on Friday, April 19, 2013, it is the view of DWSD and the City of Detroit that there will be a strong business case to justify suburban wholesale customers participating in any payment stream to the City of Detroit based on finance cost improvements associated with DWSD becoming a regional authority. Additionally, if Flint participates in the governance structure of the new Authority, it will be part of the deliberative process to agree upon the payment stream.

Question 3: DWSD indicated that the current capital improvement plan only includes replacement of one low lift pump. It has also come to our attention that the DWSD is contracting for a new capital improvement plan as of April 24, 2013.

Response: DWSD's CIP is updated annually. On April 24, 2013 the Board of Water Commissioner's (BOWC) approved a contract for an update to the Water Master Plan. The Water Master Plan is anticipated to provide insight relevant to future CIP's including asset management strategies that would extend the life of existing assets for the lowest NPV, however, the CIP is a separate and distinct effort.

Question 4: How old is the current CIP? Will Flint have input on the CIP? Please provide a better definition of "level of control" as used in your letter.

Response: The CIP is updated annually and on a schedule that is timed to run concurrent with development of the Annual Budget. The current CIP was adopted by the BOWC on January 23, 2013.

Question 5: What happens if substantial changes occur to the Port Huron Plant/Pipeline for the benefit of other customers?

Response: DWSD acknowledges that it is possible that there are investments in the Lake Huron system that might be made solely for the benefit of other customers of the DWSD system. Should investments of this nature be made, their cost would be excluded from the calculation of Flint's obligations. It is also possible that investments in the Lake Huron system might only benefit the Flint/GC Back up supply. Should this occur, any such adjustment would affect a minor component of the overall costs to Flint.

Question 6: Please explain why we are 20% of "other" (meters, outreach etc. – 7.5, 125, 25, 20%, 1.5).

Response: The 20% allocation of cost is a flow proportional allocation.

Question 7: If Lapeer is not part of the system, are we 100% of pipeline?

Response: Yes, if the GLCUA flow is removed from the line, Flint's flow requirement is 100% of the flow on the section of transmission main west of Imlay City.

Question 8: If we are responsible for 100% of the capital of the pipeline and 100% of the operations of the pipeline, why not turn it over to Flint? What would be the sale price?

Response: While it is not totally clear to DWSD what the question envisions in terms of the definition of the "pipeline" proposed to be sold to Flint, DWSD has in prior proposals and continues today to be open to discussing the opportunities to sell infrastructure to Flint/KWA as part of a long-term public/public partnership contractual arrangement. In prior proposals, offers specific to the 72 inch transmission main envisioned such a potential sale subject to more specific negotiations which might include reservation of wheeling rights to DWSD to service additional customers, address issues of competition associated with the use of the asset, etc.

While DWSD remains open to discussion, given the nature of the transaction, it is not possible to specify a purchase price or other terms at this time.

Question 9: When would this rate become effective, July 1, 2013 or July 1, 2014?

Response: The proposal indicates that these rates and charges are available as early as July 1, 2014. Rates and Charges for the FY beginning July 1, 2013 have already been adopted by the Board of Water Commissioners as necessary to meet the system's overall revenue requirements.

Question 10: As part of the discussions on Friday, April 19, 2013, should Flint/GCDC separate from Detroit, would DWSD be willing to enter into a contract extension for water supply during the construction period (3 years)? At what cost or premium would DWSD charge? And what is the basis for that charge?

Response: Again, this is a rather difficult question to answer with any specificity. As you may be aware, pursuant to Judge Sean F. Cox's order of November 4, 2011, the Board of Water Commissioners has full and final authority to approve rates for all suburban customers of DWSD. DWSD would certainly be willing to provide interim service to Flint during the construction phase of KWA on terms and rates as established by the Board of Water Commissioners. To the extent that your question is seeking clarification on the portion of charges that would be attributable to "stranded costs," I would refer you back to the letter dated April 24, 2013 that I sent to State Treasurer Dillon, with a copy to Ed Kurtz. Please keep in mind that the rates charged during the interim period would be consistent with state law requirements that would prohibit DWSD from charging rates that would generate a "profit" for DWSD.

Question 11: Would DWSD be willing to sell the section of pipeline from Imlay to Baxter and Potter if Lapeer also joins KWA? What would the cost be? If DWSD is willing to sell the pipeline, would they be willing to sell water to KWA on a standby basis? If so, what would be the cost?

Response: As stated previously, DWSD would be willing to look at opportunities to sell certain sections of pipeline to Flint as part of a public/public partnership arrangement.

Should Flint opt to join KWA and no longer be a customer of DWSD, DWSD would still be willing to look at opportunities to sell existing pipeline to Flint, with appropriate reservations of wheeling rights and non-compete clause language.

With regards to DWSD's interest in entering negotiation for potential standby service to KWA, should Flint leave the DWSD system, DWSD has previously indicated that we are open to discussion. Pricing of standby service in this proposal for a public/public partnership is on a significantly discounted basis as reflected in the attached Exhibit 1, page 2. DWSD has not calculated what a standby charge might be as related to the unspecified requirements to another utility.

Pleyte, Beth (Treasury)

Subject:	Brief Director Clinton on DWSD and SAW Applications (with Director Dan Wyant and DEQ Staff)
Location:	Director Clinton's Office Treasury 1st Floor - Executive Conf Room
Start:	Tue 12/10/2013 2:15 PM
End:	Tue 12/10/2013 3:00 PM
Show Time As:	Tentative
Recurrence:	(none)
Meeting Status:	Not yet responded
Organizer:	Thelen, Mary Beth (DEQ)
Required Attendees:	Clinton, Kevin (TREASURY); Wyant, Dan (DEQ); Shekter Smith, Liane (DEQ); Creal, William (DEQ); Butler, Sonya (DEQ); Anderson, Madhu (DEQ); Saxton, Thomas (Treasury) (SaxtonT@michigan.gov)
Optional Attendees:	Willard, Veronica (DEQ); Doyle, Maureen (Treasury); Shaler, Karen (DEQ); Sygo, Jim (DEQ); Smith, Laura (DEQ); Patterson, Leigh (DEQ)
Importance:	High

Adding Tom Saxton to the list of attendees. Thank you.

Update: Director Clinton's office has confirmed Tuesday, December 10, 2:15-3:00 at the Treasury Bldg, 1st Floor.

Hi Mary Beth-
We are on the 1st floor; please ask for me or Treasurer Clinton at the Security Desk.
Yes, I have reserved our Executive Conference room (1st floor) for this meeting.

Maureen Doyle
Executive Assistant to the Treasurer
Department of Treasury
430 West Allegan Street
Lansing, MI 48922
(517) 241-2624

Note: See below for participants. Jim Sygo, FYI.

This is a placeholder date – Director Clint's office to confirm date/time.
Maureen, please let me know if this date/time works for Director Clinton. Director Wyant asked that a meeting be scheduled this week if possible. He can meet on Tuesday, Wednesday as I can adjust his schedule in some areas or before 10:00 on Thursday. He is out of town after 10:00 on Thursday and out of town on Friday. I picked this date and date for now as it looked pretty good for most of our staff on Outlook as well as possibly Director Clinton.

Dear Director Clinton,

Per your conversation with Director Dan Wyant on Friday evening, December 6, he has asked that I schedule ½ hour to 40 minutes with you to brief you on DWSD and SAW Applications. Outlook calendar appears to be good for Tuesday, December 10, 2;15-3:00 for you but I'll wait for Maureen to confirm that with me.

Note to DEQ Staff:
Bill Creal, Director asked that you attend with him on the water side of issues.
Liane or Sonya: Director asked that one of you attend on the drinking water side of issues. If this date is selected, Liane, you appear to be out of town, Sonya, can you change your schedule or have someone else handle the conference call that is on your schedule?
Madhu, Director asked that you attend as the Policy Director.

Maureen, I will be in a lot of meetings on Monday but Karen Shaler will also be checking my emails as well.

We can come to the Treasurer's office – we want to make it convenient for you.

Thank you.

Mary Beth

LANSING

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

Bullet Points – City of Flint

Recent developments within the City of Flint have been reviewed. A number of positive changes continue or are planned to be occurring in the City. These accomplishments are identified as:

- Darnell Early has become Flint's new Emergency Manager, taking over for Mike Brown in early October.
- Four new members were elected to the Flint City Council in November.
- On Saturday, December 14, 2013, the Michigan Municipal League will be conducting a training session for all Flint City Council members. This training is to help facilitate and prepare City officials for a transition back to local control.
- A 21-member Blue Ribbon Commission, consisting of stakeholders, residents, and business and civic leaders, has been appointed to study the City's governance methods and make recommendations to improvements once local control is restored.
- The City has adopted its first new Master Plan since 1960. This plan will help address the City's urban blight, the allocation of resources to raze derelict properties and help improve residents' overall quality of life.
- James Tolbert has been appointed the new City Police Chief.
- Violent crime has been reduced by 30% from one year ago.
- Construction has begun on the Karegnondi Water Authority pipeline, which will provide new, reliable drinking water to City residents at a lower cost.
- The Emergency Manager has ordered an outside party to review the City's water rates for the first time in over ten years.
- The City is partnering with the State of Michigan, the Michigan State Housing Development Authority (MSHDA), the U.S. Department of Treasury, the Genesee County Land Bank and neighborhood leaders to implement a $20.1 million initiative to help demolish more than 1,600 vacant and foreclosed residential properties. This is the largest residential blight removal project in the City's history.
- The Genesee Towers, the tallest building in the City, is scheduled for demolition on December 22, 2013 after being vacant since 2001 and condemned in 2004.

- The City's GM Assembly Plant is moving forward with an 850,000 square foot paint shop expansion, which will add or retain 150 jobs.

- The financial planning company Oliver LaGore VanValin Investment Group will be relocating into the City, moving into the historic Durant Building.

- The City's abandoned Buick City facility will see its first new activity in over ten years when American Cast Iron Pipe launches a new production operation at the facility, which will create at least 50 jobs.

- The City has received its first application for the development of a commercial district in over a decade. The Universal Group plans on relocating Universal EMS and a home health care company to Flint and expanding its operations as the headquarters for five additional Universal companies.

Unfortunately, the City of Flint remains burdened by a significant accumulated deficit, which city officials are working to eliminate, very high retiree legacy costs, reduced grant revenues, and hundreds of millions of dollars in unmet capital infrastructure needs. Despite this, the City continues to make progress on multiple fronts. The City's accumulated deficit has been reduced from $19 million to $12.5 million as of June 30, 2013, crime rates are dropping, systemic blight is being addressed, and economic development projects are moving forward.

We are available for additional research into this matter.

Bullet Points – Flint Community Schools

Recent developments with Flint Community Schools are being monitored and reviewed on a weekly basis. A number of concerns have arisen in recent weeks which are identified below:

- As of June 30, 2013, the District's deficit was ($10.4 million) up from the ($3.7 million) deficit as of June 30, 2011. Without additional budget cuts, the deficit is expected to grow to ($11.4 million) this year.

- Not included in the deficit is approximately $8.6 million of funds transferred from the Genesee Area Skill Center to the District's general fund. The audit identified the transfers as a violation of Michigan law and the contract with the Genesee ISD.

- The District's most recent Deficit Elimination Plan submitted to MDE does not eliminate the deficit as required by law and is predicated on an 18% wage reduction for teaching staff and outsourcing of all functions except teaching and administration; both initiatives are speculative at this point.

- As of June 30, 2013, the District was delinquent approximately $10.7 million in its MPSERS retirement payments and remains delinquent approximately $1.6 million.

- Since the 2006-2007 school year when the District showed a $15.1 million positive fund balance, the District has lost nearly 57% of its student population (16,825 for 2006-2007 vs. an estimated 7,280 for 2013-2014).

- The District expects to experience a recurring cash shortfall beginning late December or early January. The District is currently holding checks and not entering accounts payable in order to remain cash positive. The cash shortfall will

- The District has made a request to issue $15.2 million in additional state aid notes to shore up its cash position and pay outstand obligations to MPSERS, MSC and other current operating expenditures. Currently the District has not found a bank willing to make the loan.

- The Mott Foundation is providing financial support by paying for various consultants who are assisting the District in developing plans to 'right size' and balance operating expenditures with available revenues.

GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

DATE: December 11, 2014

TO: Kevin Clinton, State Treasurer

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: City of Flint Sole Source Contract Approval – Water Meters

On December 04, 2014 the City of Flint requested approval to purchase 594 residential and commercial water meters in the amount of $110,811 from Metron-Farnier, LLC. Public Act 436 of 2012 requires that any no-bid contract with a value exceeding $50,000 must receive approval from the State Treasurer.

Justification by the City

Follow-up from the City indicates that the residential and commercial water meters from Metron-Farnier, LLC are compatible with the City's current Automatic Meter Reading (AMR) system. These new water meters are required to process requests for water turn-ons and to replace nonfunctioning older meters. The City's current stock of residential water meters is at a critically low level with approximately 40 water meters on hand.

Recommended Action

Approval of this EM Resolution is being requested. The City has indicated funding for this purchase is available. No adverse impacts resulting from this purchase have been identified.

Attached for review is a copy of the Emergency Manager Resolution that authorizes this purchase.

If additional information is desired, please let me know.

14-0400

(Bid No. 15000059)

EM SUBMISSION NO.: EME6432014

PRESENTED: 12-5-14

ADOPTED: _____

BY THE EMERGENCY MANAGER:

RESOLUTION TO METRON-FARNIER FOR RESIDENTIAL AND COMMERCIAL WATER METERS

BY THE EMERGENCY MANAGER

RESOLUTION

The Utilities/Water Service Center has requested the immediate need to purchase 594 each residential and commercial water meters to process requests for water turn-ons and to replace non-functioning older meters; and

Metron-Farnier, LLC, 5661 Airport Blvd., Suite B, Boulder Colorado is the manufacturer for said meters supported by its current delivery system. Funding will come from the following account number 590-540.207-726.000 ($110,811.00); and

IT IS RESOLVED, that the Department of Purchases and Supplies, upon the Emergency Manager's approval, is hereby authorized to issue a purchase order to Metron-Farnier, LLC for 594 each residential and commercial water meters in the amount of $110,811.00 (Sewer Fund)

RESOLUTION STAFF REVIEW

DATE: 11-17-14

Agenda Item Title: Water Meters

Prepared By: Cheri Priest, WSC Administrative Manager

Background/Summary of Proposed Action: The City of Flint has nearly 36,000 water meters, in which approximately 30% of said meters are well past their expected life cycle and are overdue for replacement. The City is currently in the process of obtaining bids to determine the most feasible and cost effective solution for replacing meters. At this time, Metron-Farnier is the sole source that will still be able to meet all of our requirements. The current stock of residential water meters is at a critically low level with approximately 40 water meters on hand. The Water Service Center is requesting the purchase of 594 residential & commercial meters, 560 5/8" meters, 30 1" meters & 4 2" meters.

The City also faces challenges in seeking new meters that adhere to the NSF/ANSI Standard 61 (which requires no lead in meters), prevent theft of water and scrapping of meters, while maintaining compatibility of the current remote reading system. It is not feasible to change what brand/type of meter that we use every time a meter order is placed. This would cause the City to have to have separate remote reading systems for different meters. Not only would this be cost prohibitive, it would also be extremely labor intensive.

Financial Implications: Adequate funding exists in the below listed accounts

Budgeted Expenditure? Yes ☒ No☐ Please explain if no:

Account No.: 590-540.207-726.000 $110,811.00

Pre-encumbered? Yes ☒ No☐ Requisition # 140001214

Other Implications (i.e., collective bargaining): None

Staff Recommendation: Recommend Approval

FROM: Wayne Workman, Deputy State Treasurer

SUBJECT: City of Flint Sole Source Contract Approval – Water Meters

On December 04, 2014 the City of Flint requested approval to purchase 594 each residential and commercial water meters in the amount of $110,811 from Metron-Farnier, LLC. These models are compatible with the City's current Automatic Meter Reading (AMR) system and are required to process requests for water turn-ons and to replace nonfunctioning older meters. The City's current stock of residential water meters is at a critically low level with approximately 40 water meters on hand.

As the monetary value of this proposal exceeds $50,000, section 12(3) of P.A. 436 is implicated. To satisfy this section, the State Treasurer must approve this request. Because the purchase of these meters is necessary in order for the City to provide services to its residents, I recommend that this contract be approved.

If additional information is desired, please let me know.

72 (Rev. 11-13)

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

R. KEVIN CLINTON
STATE TREASURER

December 11, 2014

Darnell Earley, Emergency Manager
City of Flint
1101 South Saginaw Street
Flint, MI 48502

Mr. Earley:

I am in receipt of your request received December 04, 2014 in which you are requesting approval to purchase 594 residential and commercial water meters in the amount of $110,811 from Metron-Farnier, LLC to replace older, nonfunctioning models.

Pursuant to PA 436 of 2012, any no-bid contract with a value exceeding $50,000 must receive approval from the State Treasurer. I am approving this request based on the City's need for meters to provide basic services to the community.

State Treasurer Approval:

I, R. Kevin Clinton, State Treasurer for the State of Michigan, pursuant to the authority assigned by Public Act 436 of 2012, do hereby:

__✓__ Approve Submitted Recommendation

_____ Deny Submitted Recommendation

Sincerely,

R. Kevin Clinton, State Treasurer
Michigan Department of Treasury

GF DEFICIT - $19.1-MILLION
WATER FUND DEFICIT - $8.8-MILLION

12-17-13: Three EM Resolutions reviewed. Two recommended for Approval. Follow-up to City on 1 Resolution (Engineering). Information received from City. Approval recommended.

- ***EM Spending Resolutions – December 17 (~~One Pending~~);***.

12-16-13: Two EM Resolutions reviewed. Approval recommended.

- ***EM Spending Resolutions – December 16***.
- ***EM Spending Resolutions – July 18, July 25, August 2, August 14, August 27; September 4; September 16; September 19; September 27; October 3; October 4; October 11; October 16; October 24; October 29; November 6; November 15; November 22; December 6; December 16***.
- **Governor Talking Points.**
- ***Removal of Elected Officials***.
- ***45-Day Plan Analysis***.
- ***Income Tax Analysis***.
- ***EFM Reports – Q3;*** **Q4**.
- ***Consent Judgment - $507,350 Delphi; $79,212 Herald Publishing.***
- ***TAB – Summary Report;*** **MSUE Study.**
- **Outstanding Issues.**
  - The **$19-million GF deficit** needs to be monitored to ensure that projected declines occur in FY 2013.
  - The **$8-million Water Fund deficit** needs to be monitored given the issues related to the water system.
  - The level of **Tax Revenue** needs to be monitored given its apparent tenuous levels.
  - **Overtime** in the **Fire Department** is excessive and needs to be monitored.
  - The status of **ongoing litigation** should be monitored. **Also, I find no record of receiving any quarterly litigation reports.**
  - Monitoring should be conducted to ensure the anticipated **DEP** is filed in a timely manner.
  - The **OPEB** debt needs to be monitored.

- The development of **a 5-year Strategic Plan** and multi-year budgets is a positive step. This process should be monitored and it is possible that the OFR could also assist.
- Monitoring of the **Bank Reconciliation** process should occur to ensure improvement.
- Monitoring of the **MERS** transition should be monitored to ensure no additional issues develop.
- Regarding **Unplanned Transfers Out**:
  - 2 of the 7 transfers were **over $1-million**.
  - 6 of the 7 transfers were **over $100,000**.
  - **Sanitation** required a transfer of **$1.8-million**. It is unclear what the reasons were or how this will be corrected moving forward.
  - **Building Safety** required a transfer of **$1.1-million**. It is unclear what the reasons were or how this will be corrected moving forward.
- Regarding **Departmental Over-Expenditures**:
  - 2 of the 7 departments overspent by **over $2-million.**
  - 5 of the 7 departments overspent by **over $300,000**
  - **Public Safety** overspent by **$6-million**.
  - **Community Development** overspent by **$2-million**.
  - **Transportation** and **Parks & Recreation** overspent by nearly $1-million each; **$922,669** and **$871,250** respectively.

12-11-13: Talking Points for Governor drafted and transmitted to OFR SAM and OFR Admin.

- **Governor Talking Points.**

12-06-13: 3 EM Spending Resolutions reviewed. Approval recommended. EM calls upon Councilmember Mays to resign in-light of recent arrest and subsequent conduct.

    - **Overtime** in the **Fire Department** is excessive and needs to be monitored.
    - The status of **ongoing litigation** should be monitored. **Also, I find no record of receiving any quarterly litigation reports.**
    - Monitoring should be conducted to ensure the anticipated **DEP** is filed in a timely manner.
    - The **OPEB** debt needs to be monitored.
    - The development of **a 5-year Strategic Plan** and multi-year budgets is a positive step. This process should be monitored and it is possible that the OFR could also assist.
    - Monitoring of the **Bank Reconciliation** process should occur to ensure improvement.
    - Monitoring of the **MERS** transition should be monitored to ensure no additional issues develop.
    - Regarding **Unplanned Transfers Out**:
        - 2 of the 7 transfers were **over $1-million.**
        - 6 of the 7 transfers were **over $100,000.**
        - **Sanitation** required a transfer of **$1.8-million.** It is unclear what the reasons were or how this will be corrected moving forward.
        - **Building Safety** required a transfer of **$1.1-million.** It is unclear what the reasons were or how this will be corrected moving forward.
    - Regarding **Departmental Over-Expenditures**:
        - 2 of the 7 departments overspent by **over $2-million.**
        - 5 of the 7 departments overspent by **over $300,000.**
        - **Public Safety** overspent by **$6-million.**
        - **Community Development** overspent by **$2-million.**
        - **Transportation** and **Parks & Recreation** overspent by nearly $1-million each; **$922,669** and **$871,250** respectively.

09-05-13: Directed to issue all follow-ups to Cities on EM Spending Resolutions. Follow-up to Flint on 2 of 3 resolutions.

    - The level of **Tax Revenue** needs to be monitored given its apparent tenuous levels.
    - **Overtime** in the **Fire Department** is excessive and needs to be monitored.
    - The status of **ongoing litigation** should be monitored. **Also, I find no record of receiving any quarterly litigation reports.**
    - Monitoring should be conducted to ensure the anticipated **DEP** is filed in a timely manner.
    - The **OPEB** debt needs to be monitored.

- The development of **a 5-year Strategic Plan** and multi-year budgets is a positive step. This process should be monitored and it is possible that the OFR could also assist.
- Monitoring of the **Bank Reconciliation** process should occur to ensure improvement.
- Monitoring of the **MERS** transition should be monitored to ensure no additional issues develop.
- Regarding **Unplanned Transfers Out**:
  - 2 of the 7 transfers were **over $1-million**.
  - 6 of the 7 transfers were **over $100,000**.
  - **Sanitation** required a transfer of **$1.8-million**. It is unclear what the reasons were or how this will be corrected moving forward.
  - **Building Safety** required a transfer of **$1.1-million**. It is unclear what the reasons were or how this will be corrected moving forward.
- Regarding **Departmental Over-Expenditures**:
  - 2 of the 7 departments overspent by **over $2-million**.
  - 5 of the 7 departments overspent by **over $300,000**.
  - **Public Safety** overspent by **$6-million**.
  - **Community Development** overspent by **$2-million**.
  - **Transportation** and **Parks & Recreation** overspent by nearly $1-million each; **$922,669** and **$871,250** respectively.

03-13-13: Analysis of MTT Stipulation. Informed OFR.

- ***EFM Reports* – Q1; Q2; Q3; Q4.**
- ***Consent Judgment - $507,350 Delphi; $79,212 Herald Publishing.***
- ***TAB – Summary Report.***
- **Outstanding Issues.**
  - The **$19-million GF deficit** needs to be monitored to ensure that projected declines occur in FY 2013.
  - The **$8-million Water Fund deficit** needs to be monitored given the issues related to the water system.
  - The level of **Tax Revenue** needs to be monitored given its apparent tenuous levels.
  - **Overtime** in the **Fire Department** is excessive and needs to be monitored.
  - The status of **ongoing litigation** should be monitored. **Also, I find no record of receiving any quarterly litigation reports.**
  - Monitoring should be conducted to ensure the anticipated **DEP** is filed in a timely manner.
  - The **OPEB** debt needs to be monitored.
  - The development of **a 5-year Strategic Plan** and multi-year budgets is a positive step. This process should be monitored and it is possible that the OFR could also assist.
  - Monitoring of the **Bank Reconciliation** process should occur to ensure improvement.
  - Monitoring of the **MERS** transition should be monitored to ensure no additional issues develop.
  - Regarding **Unplanned Transfers Out**:
    - 2 of the 7 transfers were **over $1-million**.
    - 6 of the 7 transfers were **over $100,000**.
    - **Sanitation** required a transfer of **$1.8-million**. It is unclear what the reasons were or how this will be corrected moving forward.
    - **Building Safety** required a transfer of **$1.1-million**. It is unclear what the reasons were or how this will be corrected moving forward.
  - Regarding **Departmental Over-Expenditures**:
    - 2 of the 7 departments overspent by **over $2-million**.
    - 5 of the 7 departments overspent by **over $300,000**.
    - **Public Safety** overspent by **$6-million**.
    - **Community Development** overspent by **$2-million**.
    - **Transportation** and **Parks & Recreation** overspent by nearly $1-million each; **$922,669** and **$871,250** respectively.

03-12-13: Summary Report regarding TAB issue provided to OFR Admin. Recommendation that City retain an EFM.

Can you guys please touch base with the City and Tucker to make sure that their analysis takes into account the details from DWSD?

Subject: RE: DWSD Proposal for Flint

Below is Eric's initial observations of the preliminary TYJ&T report and what DWSD' current offer:

I have compared the written proposal received from DWSD to the Charts and PowerPoint provided by TYJT. As the DWSD proposal is written and contains more detail than the graphic summary provided by TYJT, it is difficult to completely determine if all points are covered in both presentation formats.

However, here is what stands out to me.

- The DWSD proposals state that the first year of a contract with Flint would be 2014. TYJT states 2013 as Year One.

- The DWSD proposals discuss a "redundancy credit" to Flint that will result from the blending option by Flint. I do not see this identified in the TYJT information.
- The DWSD proposals make no reference to the 12 or 8 MGD Maximum Day options outlined by TYJT.
- The information provided by TYJT makes no mention of DWSD reserving the right to serve existing customers on the 72" pipeline, if purchased). Nor is there a mention of the wheeling charge (paid to Flint) in the TYJT information.
- DWSD estimates Flint would not begin utilizing a blending option until 2018. Until then, it is assumed that DWSD would provide 100% of water to Flint. This is not referenced in the TYJT information.

This is my first analysis. If you wish additional analysis to be done, please let me know.

This came in the mail from DWSD on the Friday before Christmas. I have not reviewed it to know whether the proposals it contains match up to those presented by TYJT last week.

Subject: Questions Regarding the City of Flint's Decision about KWA vs. DWSD
Importance: High

Ed/Roger,

Per your request, here are some questions regarding the proposals by both KWA and DWSD that our review of the information provided in the preliminary report from TYJT has raised. I believe it beneficial for the EFM team in Flint to review these questions prior to our January 10 meeting. We are also trying to organize an internal meeting on Monday to discuss this entire issue before we meeting with Flint.

- What is the current rate Flint is paying to DWSD for water? How many MGD is Flint currently purchasing? What is the current cost for water that Flint is currently paying?
- Is there an estimated amount that the Flint water system is currently losing? How is this loss impacting current or future purchases from either DWSD or KWA? My recollection from our meeting with Flint officials and TYJ&T, the estimated loss is 25%
- Is there a plan to address water loss? Is there a projected cost for these repairs? From the same meeting I recall Flint officials stating that they have replaced 3,000+ of a total 4,000+ water meters.
- What is the City's current repair/maintenance budget for the water system?

- How old is the Flint Water Plant? What is its projected lifespan?
- How large is the current staff at the Water Plant? What staffing level would be required to run the plant at full capacity?
- Does the City's Water Fund have a budget surplus? Are any funds available for additional repairs, staffing, capital improvements, etc.?
- What is the current maximum production capability of the Flint Water Plant? What is the current annual cost to run the plant?
- Given the current financial situation, does the City have the ability to sell the bonds necessary to make the improvements being proposed for the Water Plant?
- It appears that the overall expenditures required to cover any of the outlined options are going to require water rates to rise almost annually. Has there been any analysis on what rates might look like and/or what the capacity of the public to pay these rates might be?
- The December 21st letter from DWSD to Flint outlines some different options for Flint than what was presented by TYJT. Is the EFM team aware of these changes? What are the potential impacts?
- Is the projected cost to acquire the 72" Line from DWSD $4.7-million? The December 21st Letter discusses a "lease" of this line. Is this a true lease or a lease-to-own situation?
- What is the projected lifespan of this line? What is the annual maintenance cost? What is the replacement cost? Does Flint have the capability to maintain this line?
- Has any consideration been given to if any of the options can provide Flint with water above the current projections in the event that the City experiences unexpected growth? Do we know the maximum MGD DWSD can provide? Do we know the maximum MGD KWA can provide?
- Has any consideration been given to the operational or financial impacts if decline continues in Flint and what this will do to water purchases and debt payments?
- Given the very high O&M costs for the Flint Water Plant, could the City "mothball" the Water Plant and have DWSD provide 100% finished water?
- Could the City partner with KWA to increase the size of their water plant and purchase 100% of water from them? Could the City use DWSD as a backup? Could KWA purchase or lease Flint's water plant for redundancy?
- Has any consideration been given by Flint to negotiate better terms with either KWA or DWSD?

If there are any additional questions or you wish to discuss this further, please let me know.

Subject Review of December 21, 2012 Presentation – City of Flint Water Supply Assessment

Dear Mr. Kurtz

As requested, we have reviewed the analysis of water supply alternatives for the City of Flint which was presented to the State Department of Treasury by Tucker, Young, Jackson, and Tull, Inc (TYJT) on December 21, 2012 Our review is attached and summarizes the primary differences between the TYJT assessment and our previous studies and provides explanations of why we believe there are differences

We have also reviewed the options for continued DWSD supply included in the TYJT presentation. It is not clear whether these are presented as specific offers on behalf of DWSD or included as examples for analysis, but we have noted some items which we believe should be addressed and considered as these options are compared.

If there are questions, please contact me

Sincerely,
ROWE Professional Services Company

James E. Redding, P.E.
Vice President / Director of Engineering

Review of TYJT December 21, 2012 Presentation
City of Flint Water Supply Assessment
Prepared by Rowe Professional Services Company

DWSD Supply (Slides 7 through 9)

1. The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

2. Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

3. The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates". Options and rates shown are different than presented by DWSD previously.

	DWSD 11/29/2012	**TYJT Estimates**
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16 31
8 mgd Maximum Day -P&B		$12.68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11.11

4. Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

5. We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4.7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details.

6. If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

7. If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

8. Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

9. If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses.

Flint River Supply (Slide 10)

1. If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

Data Collected (Slide 14)

1. The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options

Benchmarking Comparisons (Slide 16)

1. The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor". It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses. The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

2. The KWA will supply raw water; SOCWA and YUCA both supply finished water. Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

3. DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases.

Capital Financing (Slide 17)

1. KWA bonds are planned to be general obligation bonds, backed by member counties.

O&M Inflation Factor (Slide 20)

1. SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.
2. KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

4. Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)
    a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003
    b. Electricity Rates in Michigan (per U.S. Energy Information Administration) have increased an average of 3.2% since 1999.
    c The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

Finished Water Rate Inflation (Slide 21)

1. TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay). Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows:
    a. 10 year increase in DWSD rates to Flint:: 10.5% annually
    b. Average annual increase through 45 year history: 6.7%

2. Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:
    a. Debt – the amount of debt varies widely between utilities
    b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

3. Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

4. Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators).

Capital Financing with Revenue Bonds (Slide 24)

1. Note that the KWA bonds will be general obligation bonds backed by the member counties.

2 The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today.

3 Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs. Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

4. For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies

5. Bond holder reserve is not a requirement for general obligation bonds.

6. TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

7. Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs.

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low The primary differences in cost estimates for the project appear to be the following components:

1. Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080). KWA estimates were based on actual construction costs from recent projectd completed by Genesee County within the last eight years.
   a. 32mgd water pump station including two-10 MG ground storage tanks - $13.4 million
   b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
   c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

   The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan).

2. Redundant Power – There is no need for redundant power, other provisions will provide reliability of supply.

3. Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be

purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

4. Engineering, Legal, Administration & Contingencies
   a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:
      i. The intake design has been completed and all regulatory permits obtained.
      ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of-way. Environmental review and permitting are in process.

   b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

   c. Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

Cost Comparison (Slide 30)

1. The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations.

2. Redundant power is not required; this does not need to be included in the TYJT estimate.

3. Land for LHPS – actual price is $360,000

4. Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding $16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

5. Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

Other Considerations – Redundancy / Reliability (Slide 33)

1. Unfunded Mandates/ Future Regulations
    a The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water. The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA. Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

2. State Goals
    a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.
    b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

3. Redundancy
    a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply; customers are responsible for their backup supply.

Other Considerations – Cost Slide 34

1. TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative.
    a The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis. During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

3. Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water.

4. The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users.

5. The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011. Although not a KWA cost, the cost of the redundant connections should be considered with all options.

6. The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

7. The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC). The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.
    a. The detailed design (plans and specifications) and permitting have been completed.
    b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

    It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase.

8. Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD. We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too

9. It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

10. Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built.

Project Costs - TYJT Slides 26 through 30

	KWA	TYJT

Eric

I ran some rough numbers and I would say that the twin pipe for Flint's 18 MGD demand next to the 72-inch main would probably be a 24 or 30-inch pipe and approximately cost $50M. I hope this helps.

Eric

Sorry for the delayed response; in addition to the holidays we also moved our office. We are just getting things organized.

Below is my response to your questions. Please review and let me know if you have any questions.

Additionally, as we discussed at the presentation. We will wait to hear back from you regarding the January 10th meeting with Flint and what adjustments will be needed to the schedule. However, we will begin drafting the report.

Importance: High

Dave,

Good afternoon. I hope you had a good holiday and are planning on a good New Year.

Thanks for the presentation information. Just to follow-up, it appears that no additional presentation on the 15th is being asked for. Should that change, I will let you know.

I have some additional questions I want to clarify with you. Some of these are just internal questions we have and want to make sure we are interpreting your presentation information correctly. I have highlighted my specific questions for clarity.

- You should have received a copy of a letter from DWSD to Flint dated December 21st. As I review the options that they provide Flint, I note some differences with what you outlined as the DWSD options for Flint. **Have you taken these changes into account? If not, what is the impact these "latest" proposals will have?**

  Yes, we did receive a copy from the Director dated, December 21st. The proposals appear to be similar to what we presented for the 18 MGD maximum day customer from P&B and from Imlay. However, the attached exhibits referenced were not attached for us to review the specific rates.

Overall, I have some broad, "strategic" questions:

- Anticipating a return of future growth to the City, **what is the maximum MGD DWSD could provide to Flint? What about KWA?** The overall question is whether either entity could provide more water to Flint than is anticipated if they needed to.

Regarding the KWA, we do not have specifics on the route and profile so we can't do a hydraulic analysis to determine the additional capacity that could be provided by their proposed system. However, prior hydraulic analyses of the existing 72-inch main has shown that in excess of 90 MGD can be supplied to Flint by DWSD.

- On the flip-side, if decline continues in Flint, **what happens if Flint needs less water than projected? What would that do to the financial projections?**

Regarding both proposals we need to know the volume of water purchased to do a reasonable estimate. With regards to KWA, since the percentage of the water supplied would be reduced, we would need to confirm that their capital investment obligation would be reduced accordingly based on Flint's percentage of the total volume.

- **Given Flint's current financial situation, did you analyze the City's ability to actually sell bonds to make any of these improvements?**

As we indicated in our presentation, this is a concern. It has been assumed that the KWA bonds would be backed by Genesee County; however, Flint would still need to bond for the improvements at their WTP.

- It appears that the overall expenditures required to cover any of the outlined options are going to require water rates to rise almost annually. **Has there been any analysis on what rates might look like and/or what the capacity of the public to pay these rates might be?**

We were not requested to analyze the capacity of the public to pay the water rates, so I can't respond to that question. However, we did include the rate increase in all of our scenarios. It is shown on our spreadsheets as, "Escalation/Inflation Rate."

Specifically:

- **What is the total cost for Flint to buy the 72" line from DWSD?** I see a capital cost on that option of $4.7-million. **Does that include the 72" line?** Related to this, **do we know what the projected lifespan of that line is? What would the replacement cost be?** A question we are having is whether Flint would have the financial and/or operational ability to maintain this line. Also, **I am unsure, once you account for O&M costs and bond payments, if there is enough overall benefit to Flint owning that line is if they remain with DWSD.**

The $4.7M shown is for the purchase of the 72-inch line. It is the best estimate DWSD has provided so far, but the actual cost would be dependent on negotiations between DWSD and Flint. The bond payments are included in our analysis. DWSD has also offered to "role" the cost into the annual Flint water rate. Our analysis did indicate that the Imlay option was less expensive than for most of the other options.

The pipe itself is a pre-stressed concrete cylinder pipe (PCCP) that has excellent life expectancy. Assuming that the water main was installed in the late 60's I would suspect that the life expectancy to be beyond the planning period we analyzed.

- It appears to me that the O&M costs for the Flint Water Plant are very high. **If Flint were to continue to buy water from DWSD, other than for a back-up, is there any reason they could not avoid those costs by mothballing the plant and having DWSD provide 100% finished water to them?**

The issue has been related to MDEQ requiring that Flint have a backup supply in case their service is interrupted by a loss of the 72-inch main. Flint is supplied off a single line and that is why the redundancy is required.

- Regarding KWA, perhaps I missed this explanation, but **why are the options for KWA for 12 MGD as opposed to the option for 18 MGD?**

The 12 MGD is the daily average. KWA has indicated that their system can provide the maximum day demand to Flint as well.

- **Is there any financial sense for Flint to close its plant and KWA builds theirs bigger to accommodate them?**

That option was not investigated and we do not know the associated cost of the Genesee County plant. However, each community was pointing to an inter-agency agreement that would allow them each to provide a backup supply to the other. That would not be possible with just one plant.

- Regarding your spreadsheet for the KWA Proposal 2, I note that it appears you are using numbers ($7.758-million) from Proposal 1 in calculating some of the capital costs. **Is this correct?**

Yes, this is the $7.1M projected in the 2009 report that was adjusted for inflation at 3%/year for three years.

I recognize what you provided was a preliminary report, but these are some questions I noted as your information was reflected upon. I would appreciate your comments on these questions.

Please note that I will not be in the office again until January 3, so please copy Randall Byrne, OFR Manager, on any responses.

Subject: RE: Rowe review

Importance: High

I have reviewed this and, personally, I don't think I would want to base my justification to make final decisions about the better option based upon this. One could get the impression that KWA is the better option because Rowe says that it is.

This report appears to be primarily a rebuttal of TYJT's preliminary report; though there are a couple of possibly valid points that could be checked out. No supporting data is provided.

Two significant things jump out at me after reading this:

1) There are a number of references to data that is not included, so it is very difficult to determine whose numbers are accurate.

2) It is very unlikely that KWA completed all of the activities that they list as lowering costs (permits, land purchases, easements, preliminary engineering, etc.) since our December meeting with Flint. Then why was TYJT not provided some of this information when they were doing their analysis. They appear to be faulted for not taking some of these items into account, but it seems like they should have received this data in order to make a sound analysis.

We can discuss this further tomorrow.

Subject: Rowe review

Attached is the review from Rowe, Ed

Review of TYJT December 21, 2012 Presentation
City of Flint Water Supply Assessment
Prepared by Rowe Professional Services Company

DWSD Supply (Slides 7 through 9)

1. The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

2. Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

3. The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates". Options and rates shown are different than presented by DWSD previously.

	DWSD 11/29/2012	TYJT Estimates
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12.68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11.11

4. Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

5. We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4.7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details.

6. If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

7. If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

8. Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

9. If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses.

Flint River Supply (Slide 10)

1. If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

Data Collected (Slide 14)

1. The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options.

Benchmarking Comparisons (Slide 16)

1. The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor". It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses. The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

2. The KWA will supply raw water; SOCWA and YUCA both supply finished water. Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

3. DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases.

Capital Financing (Slide 17)

1. KWA bonds are planned to be general obligation bonds, backed by member counties.

O&M Inflation Factor (Slide 20)

1. SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.
2. KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

4. Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)
    a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003
    b. Electricity Rates in Michigan (per U.S. Energy Information Administration) have increased an average of 3.2% since 1999.
    c. The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

Finished Water Rate Inflation (Slide 21)

1. TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay). Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows:
    a. 10 year increase in DWSD rates to Flint:: 10.5% annually
    b. Average annual increase through 45 year history: 6.7%

2. Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:
    a. Debt – the amount of debt varies widely between utilities
    b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

3. Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

4. Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators).

Capital Financing with Revenue Bonds (Slide 24)

1. Note that the KWA bonds will be general obligation bonds backed by the member counties.

2. The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today.

3. Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs. Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

4. For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies.

5. Bond holder reserve is not a requirement for general obligation bonds.

6. TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

7. Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs.

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low. The primary differences in cost estimates for the project appear to be the following components:

1. Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080). KWA estimates were based on actual construction costs from recent projectd completed by Genesee County within the last eight years.
   a. 32mgd water pump station including two-10 MG ground storage tanks - $13.4 million
   b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
   c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

   The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan).

2. Redundant Power – There is no need for redundant power; other provisions will provide reliability of supply.

3. Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be

purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

4. Engineering, Legal, Administration & Contingencies
   a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:
      i. The intake design has been completed and all regulatory permits obtained.
      ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of-way. Environmental review and permitting are in process.

   b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

   c. Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

Cost Comparison (Slide 30)

1. The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations.

2. Redundant power is not required; this does not need to be included in the TYJT estimate.

3. Land for LHPS – actual price is $360,000

4. Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding $16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

5. Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

Other Considerations – Redundancy / Reliability (Slide 33)

1. Unfunded Mandates/ Future Regulations
    a. The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water. The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA. Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

2. State Goals
    a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested. However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.
    b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

3. Redundancy
    a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply; customers are responsible for their backup supply.

Other Considerations – Cost Slide 34

1. TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative.
    a. The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis. During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

3. Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water.

4. The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period. The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users.

5. The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011. Although not a KWA cost, the cost of the redundant connections should be considered with all options.

6. The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

7. The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC). The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.
    a. The detailed design (plans and specifications) and permitting have been completed.
    b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

    It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase.

8. Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD. We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too.

9. It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

10. Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built.

Dear Mr. Cline,

RE: SOW No. 271Q3209, Flint Municipal Water Supply Assessment

Subject: Response to Rowe Professional Services Company Comments on TYJT's December 20, 2012 Presentation

The purpose of this letter is to respond to the subject comments provided to TYJT on January 9, 2013. The comments are provided below followed by our response. The presentation is provided as an attachment for reference.

It should be noted that due to the time constraints identified, our evaluation was completed in a very short duration. Our analysis is therefore based on the limited information that was provided. We believe that the assumptions made are valid, however; if further analysis is required, TYJT suggests that more information such as the KWA route including topography and easement information, pump station siting, condition of the Flint WTP, and water chemistry information related to blending is obtained.

Furthermore, per the Treasury's direction, Flint has indicated that they do not want to pursue the stand-alone option of only using their plant nor do they want to consider being supplied from the Imlay Station because they are concerned with long-term costs associated with the 72" line. Therefore, responses to comments specific to these options are not provided.

DWSD Supply (Slides 7 through 9)

Rowe Comment No. 1: The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

TYJT's Response: Flint's email dated 12/6/12 indicates that the average production rate when they operate the plant is 11 MGD. It was assumed that plant water quality produced was sufficient to meet the necessary water quality requirements since it is to serve as a backup to the DWSD supply.

If softening is required then its cost required for maximum flow rate analyzed would need to be included. Another question that should be addressed is if softening is required, why it is not part of the current treatment for the backup supply.

Furthermore, from the meeting on November 20, 2012, KWA indicated that the Flint River would serve as a backup supply to the KWA system. This would mean that the Flint WTP would have to maintain two treatment trains; one for lake water and one for river water. Depending on how long the plant would have to operate as a backup could trigger the need under the KWA option to improve the river infrastructure as the Flint WTP would need to produce up to 18 MGD.

Rowe Comment No. 2: Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

TYJT's Response: As indicated in our previous response; it was assumed that the plant has capacity to supply up to 11 MGD. Furthermore, per the LAN/Rowe report on the Flint River dated July 2011, the summary on Page 12 states that without making any modifications to the river infrastructure, the water plant is limited to 11.6 MGD. Therefore, if the maximum needed from the plant under the various scenarios presented is 10 MGD, no additional work to the dams should be required.

Rowe Comment No. 3: The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates". Options and rates shown are different than presented by DWSD previously.

	DWSD 11/29/2012	**TYJT Estimates**
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12.68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11.11

TYJT's Response: The rates presented were provided by DWSD and are provided as an attachment to this response.

Rowe Comment No. 4: Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

TYJT's Response: Per DWSD, the allocated costs of service and rates computed for Flint follow an "all else being equal" application of the current (FY 2012-13) DWSD unit costs. This is consistent with the figures used in discussions with Flint representatives previously. Whenever the actual service requirements get applied, the lower DWSD System units associated with lower Flint units will raise the unit costs for all customers, creating a moderate impact for all customers. This has been described to Flint representatives.

As such, in DWSD's discussions with Flint they've identified these figures as hypothetical results indicative of rate calculations, as opposed to firm offers. So, while the rates are still estimates until the volume and type of the purchase is determined, it can be assumed that the actual rates will be similar to the estimates shown.

Rowe Comment No. 5: We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4.7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details.

TYJT's Response: In the Treasurer's email to TYJT, dated January 9, 2013, this option is no longer being considered by Flint. Therefore, a response is not required.

Rowe Comment No. 6: If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

TYJT's Response: In the Treasurer's email to TYJT, dated January 9, 2013, this option is no longer being considered by Flint. Therefore, a response is not required.

Rowe Comment No. 6: If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

TYJT's Response: In the Treasurer's email to TYJT, dated January 9, 2013, this option is no longer being considered by Flint. Therefore, a response is not required.

Rowe Comment No. 6: Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

TYJT's Response: TYJT has not been party to the discussions regarding a reliability credit, so we assume that the rates used in our presentation do not include the credit.

Rowe Comment No. 9: If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses.

TYJT's Response: In the Treasurer's email to TYJT, dated January 9, 2013; this option is no longer being considered by Flint. Therefore, a response is not required.

Flint River Supply (Slide 10)

Rowe Comment No. 1: If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

TYJT's Response: Please refer to our response to Comments No. 1 and No. 2 for Slides 7 through 9.

Data Collected (Slide 14)

Rowe Comment No. 1: The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options.

TYJT's Response: Please refer to our response to Comments No. 1 for Slides 7 through 9.

Benchmarking Comparisons (Slide 16)

Rowe Comment No. 1: The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor". It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses. The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

TYJT's Response: It is widely acceptable to compare O&M costs of similar facilities and communities and Benchmarking the Flint WTP rate was one item used in determining the best way to account for inflation associated with O&M costs for the planning period. Based on our analysis, we believe that the 4.51% is appropriate. It is also worth noting that in the letter to Mr. Kurtz from the Flint Finance Director, Mr. Ambrose, he used and inflation factor of 5% for the Flint WTP operations with the KWA system.

Rowe Comment No. 2: The KWA will supply raw water; SOCWA and YUCA both supply finished water. Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

TYJT's Response: Benchmarking the KWA rate was one item used in determining the best way to account for inflation associated with O&M costs for the planning period. Additionally, per Mr. O'Brien's statement in our meeting on November 20, 2012, he suggested that we use GC-WWS inflation rate. Over the last 10 years, GC-WWS increase was 10.5%.

Based on our analysis, we believe that the 5% is appropriate. It is also worth noting that in the letter to Mr. Kurtz from the Flint Finance Director, Mr. Ambrose, he used and inflation factor of 5% for the KWA system.

Rowe Comment No. 3: DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases.

TYJT's Response: This is incorrect. Please see the attachment provided by DWSD that shows the historical rates for Flint.

Capital Financing (Slide 17)

Rowe Comment No. 1: KWA bonds are planned to be general obligation bonds, backed by member counties.

TYJT's Response: Reference is made to an email from Mr. Kurtz, dated 12/4/12 that indicated revenue bonds would be used to finance the capital needs of KWA and this has been our basis of analysis. We would need to recalculate the capital cost if general obligation bonds are used.

It is worth noting that general obligation bonds are backed by the full faith and credit of the issuer. Our previous discussions with Flint indicated that they were not even sure if they could get a bond rating. Furthermore, Genesee County indicated that they would not back Flint's share of the obligations. We are surprised that general obligation bonds are now being considered.

O&M Inflation Factor (Slide 20)

Rowe Comment No. 1: SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.

TYJT's Response: Please refer to our response to Slide 16, Comment No. 2.

Rowe Comment No. 2: KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

TYJT's Response: Please refer to our response to Slide 16, Comment No. 2.

Rowe Comment No. 3: The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

TYJT's Response: Please refer to our response to Slide 16, Comment No. 2.

Rowe Comment No. 4: Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)

a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003

b. Electricity Rates in Michigan (per U.S. Energy Information Administration) have increased an average of 3.2% since 1999.

c. The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

TYJT's Response: Please refer to our response to Slide 16, Comment No. 2.

Finished Water Rate Inflation (Slide 21)

Rowe Comment No. 1: TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay). Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows:

a. 10 year increase in DWSD rates to Flint: 10.5% annually

b. Average annual increase through 45 year history: 6.7%

TYJT's Response: Please provide documentation of the referenced increases. Per our response to Slide 7 through 9, Comment No. 3, DWSD has provided their historic rates over the past 10 years. It could also be argued that these rate increases are skewed higher than they will be in the future since a dramatic reduction in water sales due to the recession required DWSD's fixed costs to be distributed over less units.

Rowe Comment No. 2: Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:

a. Debt – the amount of debt varies widely between utilities

b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

TYJT's Response: Rowe's comment is noted.

Rowe Comment No. 3: Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

TYJT's Response: DWSD's rates do include these variables as their rates are inclusive of their total costs; operations and fixed. It is also worth noting that once the KWA construction begins, Flint fixed costs will be set regardless of their actual water use.

Rowe Comment No. 4: Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators).

TYJT's Response: Please see our response to Slide 16, Comment No. 3.

Capital Financing with Revenue Bonds (Slide 24)

Rowe Comment No.1: Note that the KWA bonds will be general obligation bonds backed by the member counties.

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1.

Rowe Comment No. 2: The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today.

TYJT's Response: We believe that it was prudent to use 5% as a conservative assumption. This is consistent with the KWA study.

Rowe Comment No. 3: Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs. Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1.

Rowe Comment No. 4: For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies.

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1.

Rowe Comment No. 5: Bond holder reserve is not a requirement for general obligation bonds.

TYJT's Response: Please refer to our response to Slide 17, Comment No. 1.

Rowe Comment No. 6: TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

TYJT's Response: Although the current interest rate is less than 1% it was assumed that current fiscal policy could not be sustained for 30 years. Therefore 3% was assumed. Note that this is interest coming back to KWA and actually reduces the total cost.

Rowe Comment No. 7: Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs.

TYJT's Response: The reserve was only applied over the duration of the loan.

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low. The primary differences in cost estimates for the project appear to be the following components:

Rowe Comment No. 1: Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080). KWA estimates were based on actual construction costs from recent projects completed by Genesee County within the last eight years.

a. 32 mgd water pump station including two-10 MG ground storage tanks - $13.4 million
b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan).

TYJT's Response: Of the three projects identified only the first one is a water system project; the other two are wastewater lift stations. Since these estimates are based on a preliminary design, TYJT believes that our estimate is a more prudent representation of cost.

Rowe Comment No. 2: Redundant Power – There is no need for redundant power; other provisions will provide reliability of supply.

TYJT's Response: TYJT disagrees with this statement. Backup power is a standard practice in the water industry. Furthermore, a loss of power at either pumping facility will prevent the supply of water to both Flint and Genesee County. TYJT is not aware of what "other provisions" are being provided.

Rowe Comment No. 3: Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

TYJT's Response: Our analysis has been based on the information provided to us. Revising and changing numbers will require another analysis.

Rowe Comment No. 4: Engineering, Legal, Administration & Contingencies:

a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:

   i. The intake design has been completed and all regulatory permits obtained.

   ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of- way. Environmental review and permitting are in process.

b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

c. Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

TYJT's Response: In an email from Mr. O'Brien on December 5, 2012, the design is less than 15% complete on the pipeline and the final route is only 90% confirmed. Since these estimates are based on a preliminary design, TYJT believes that our estimate is a more prudent representation of cost.

The $72,139,566 is for construction contingencies only. This figure includes $5,519,213 for ELAC of 25% per KWA's cost estimate for the intake construction which is reasonable for a project at the 90% design completion. The balance of the construction contingency of $66,620,335 is based on 30% contingency since the design for the transmission mains and the IPS is at only 15% preliminary design.

The $32,554,431 is a budget for:

a. completing the design of the IPS and transmission mains to 100% bidding stage,

b. construction management fee for the firm responsible to oversee the construction startup and commissioning of the project,

c. legal and survey fee to acquire the land and 277 easements (per KWA 2009 report), and

d. for the KWA staff to administer the project.

In summary the $72 million is for construction contingency and the $32 million is for the engineering and administration of the project.

Cost Comparison (Slide 30)

Rowe Comment No. 1: The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations.

TYJT's Response: Please see our response to Slide 26 through 29, Comment No. 1.

Rowe Comment No. 2: Redundant power is not required; this does not need to be included in the TYJT estimate.

TYJT's Response: Please see our response to Slide 26 through 29, Comment No. 2.

Rowe Comment No. 3: Land for LHPS – actual price is $360,000

TYJT's Response: The $2.3 million for land came from the KWA Preliminary Engineering Report, dated September 2009 and Appendix 20 the updated report, dated October 4, 2012. Paragraph 2.3.2 (page 3) of Appendix 2 of the Preliminary Engineering Report dated September 2009 states, "Genesee County purchased 230 acres of land in Worth Township, Sanilac County in 2002. The land was purchased for the potential use as a water supply facility. The land was purchased for $2.3 million." This same $2.3 million is shown as the cost for the land (Figure 1-KWA Water Supply Project Cost) in, Appendix 20 October 2012 Preliminary Engineering Report Update- Final Report.

Rowe Comment No. 4: Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding 16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

TYJT's Response: TYJT did not double count the ELAC. TYJT broke down the ELAC into engineering fee for design, legal cost to acquire easements and land for the project, KWA administrative and management cost, and construction management fee. These cost amount to approximately $32.5 million. The 30% contingency listed in TYJT's cost estimate is a construction contingency since the design is at 15% (other than the intake) according to John O'Brien's statement during the meeting with the City of Flint on November 20, 2012.

Rowe Comment No. 5: Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

TYJT's Response: Appendix 5 of the KWA 2009 report listed the cost for land acquisition for the Lake Huron Transmission at $615, 740, for the North Transmission Main at $214,300, and the Flint Transmission at $336,130 for a total of $1,166,170. TYJT estimated the land cost for the IPS and

reservoir only at $75,000 since the LHPS land has already been purchased by Genesee County. TYJT estimate for easements and land (not the LHPS) to be $1,241,170 versus Rowe's recent information of $1,140,000 for a difference of $101,000. For all practical matter TYJT and KWA estimates are the same.

Other Considerations – Redundancy / Reliability (Slide 33)

Rowe Comment No. 1: Unfunded Mandates/ Future Regulations

a. The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water. The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA. Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

TYJT's Response: This is obviously hard to quantify since identifying regulation requirements over 30 years is hard to determine. However, it is widely understood that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.

Rowe Comment No. 2: State Goals:

a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested. However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.

b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

TYJT's Response: Reference is made to the Treasury policy that promotes consolidation of resources and services. Therefore, two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (Lapeer, Mayfield, Imlay City) separating to form another water system is counter to the initiative.

Rowe Comment No. 3: Redundancy:

a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply; customers are responsible for their backup supply.

TYJT's Response: Agreed; however, from the meeting on November 20, 2012, KWA indicated that the Flint River would serve as a backup supply to the KWA system. This would mean that the Flint WTP would have to maintain two treatment trains; one for lake water and one for river water. Whether there is sufficient space or additional capital required for the WTP was not investigated as part of this study.

Other Considerations – Cost Slide 34

Rowe Comment No. 1: TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative.

a. The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis. During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

TYJT's Response: Please see our response to Slide 7 through 9, Comment No. 1. Furthermore, our operating costs for the Flint WTP were increased per the analysis provided to KWA for review.

Rowe Comment No. 2: For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

TYJT's Response: Please see our response to Slide 7 through 9, Comment No. 1 and No. 2.

Rowe Comment No. 3: Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water.

TYJT's Response: Please see our response to Slide 7 through 9, Comment No. 1. Additionally, we used the chemical costs from February 2009 preliminary design report adjusted for inflation.

Rowe Comment No. 4: The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period. The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users.

TYJT's Response: The point made here is that replacement costs of equipment were not included; e.g., pumps, motors, etc.

Rowe Comment No. 5: The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011. Although not a KWA cost, the cost of the redundant connections should be considered with all options.

TYJT's Response: Noted, but the redundancy is limited since both of the water systems would be supplied by KWA and a loss of power to one of the pumping facilities without backup power would interrupt the supply.

Rowe Comment No. 6: The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

TYJT's Response: Please see our response to Slide 7 through 9, Comment No. 1.

Rowe Comment No. 7: The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC). The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.

a. The detailed design (plans and specifications) and permitting have been completed.

b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase.

TYJT's Response: Please see our response to Slide 30, Comment No. 4.

Rowe Comment No. 8: Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD. We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too.

TYJT's Response: Please see our response to Slide 33, Comment No. 3.

Rowe Comment No. 9: It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

TYJT's Response: It would be recommended to determine what the water loss is in Flint and what the implication would be on sizing the KWA pipe. A determination could then be made once this analysis was performed.

Rowe Comment No. 10: Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built.

TYJT's Response: Noted.

Please let us know how we should proceed. Should you have any questions or need any additional information, please contact me.

Sincerely,
TUCKER, YOUNG, JACKSON, TULL, INC.

UPDATE TO TREASURY REGARDING THE CITY OF FLINT EVALUATION OF WATER SERVICE DELIVERY

1. It is the goal of the City of Flint to assure the delivery of water to its residents and businesses at the lowest cost possible over the long term. City officials have expended considerable amounts of time over the past many months evaluating three primary options: water service delivery by KWA, continued water service delivery by DWSD, and sole reliance on the Flint River. At this time we continue to consider the KWA and DWSD options, but do not believe that sole reliance on the Flint River would be in the best interests of the City.
2. We have previously provided Treasury with an analysis of the KWA and DWDS options. At this time, depending on the final outcome of negotiations regarding future costs, either option could be the best for the City.
3. Treasury engaged the services of Tucker, Young Jackson, Tull, Inc. (TYJT) of Detroit to review the assumptions underlying the KWA option. Their assessment was recently presented to City officials and raised several questions as to the credibility of the KWA option. City officials shared the TYJT assessment with Rowe Engineering and the Genesee County Water and Waste Services and requested their response to the TYJT analysis.
4. Rowe Engineering met with City Officials to review their response to the TYJT assessment and provided the attached report. In our judgment, Rowe adequately addressed the significant concerns raised by TYJT, including those related to pump station costs, land acquisition costs, legal, engineering and contingency estimates, and bonding costs. Consequently, it is our belief that the KWA proposal as outlined in October, 2012, is credible, and should continue to be used in evaluating the City's options.
5. Further, our review of the proposal from DWSD (December 21, 2012) raises questions which must be addressed. For example, the DWSD proposal indicates that the cost reductions would be phased in over five years. Further, no actual projected dollar amounts for the first year or subsequent years were included in the proposal. The City has asked DWSD, based on a projected water usage, to supply the City with projected dollar and unit costs over the next five years. The Detroit proposal also does not address projected future rate increases. (See attached Proposal and Rate information)
6. Based on the Proposal from Detroit along with projected rates for FY13 provided November 9, 2012 by DWSD, The City has developed a cost analysis of the following options:
    a. Detroit Proposal 1 with a 6.8% annual rate of increase
    b. Detroit Proposal 1 with a 4.4% annual rate of increase
    c. KWA based on the Rowe study

    It is important to note that a review of the City's records reflects a 10.5% average increase over the past 10 years. For the entire history of our contract with DWSD the average annual increase has been 6.7%. Note that the TYJT's analysis was based on the 2004 through 2014 years which showed a -7.4% rate increase in the first year (2004), while ignoring the 2003 year which showed a 38.1% rate

increase. The time period of 2002 through 2012 was used to calculate Genesee County' rate. (See attached Rate Analysis)

The City's projections for the above referenced options over the 30 year life is as follows: (See attached Cost Analysis)

a. Detroit Proposal 1 with a 6.8% annual rate of increase---$890,513,917
b. Detroit Proposal 1 with a 4.4% annual rate of increase---$705,602,181
c. KWA based on the Rowe study--$649,241,254

7. One of the options provided by TYJT on page 9 of their slides projects a rate of $11.11/MCF. If DWSD can provide that rate along with a guarantee of future rates not to exceed their projection of 4.4% over the life of the contract, the City would sign a contract with Detroit. It is the City's belief that the WSW would also sign a contract.
8. If the City of Flint signs a contract with Detroit the following provisions should also be agreed upon:
    a. The City would have a seat on the Technical Advisory Board
    b. The City would have a seat on the DWSD board
    c. That the City could opt out if the conditions as Proposed by DWSD are not agreed to
9. All things being equal the City believes the following are also important:
    a. The availability of raw water to the City and County for economic development in heavy/light industry, food processing and agriculture
    b. The possibility of creating a Mid-Michigan Regional Water/Sewer Authority
10. For the sake of regional integrity, it would also be a step backwards for the City of Flint and Genesee County to be on different water supply systems. It is in the City's best interest to be able to pursue shared services with nearby municipalities and counties
11. The City would also reiterate the critical nature of long term costs. The City is not well served with decisions that work for the short term but not the long.

Subject: KWA/DWSD

Andy asked for a little followup on our conversations. Can you guys have someone put together a written response to these questions ASAP?

1) Please show the different projected construction costs provided by TYJT and in the presentation by Flint this week. If different, please indicate why we believe the Flint #s are acceptable projections.
2) Please show the contingency on construction included in both projections.

3) What are the protections that Flint has in the case of a) cost overruns on construction, and b) a delay in the construction timeline that forces Flint to use DWSD water longer.

Thanks.

Subject: Flint Supply Assessment

Eric

To follow up on our discussion yesterday about Flint now not wanting to blend their water, I took a look at the rates assuming a parallel line was installed along the 72-inch route. If DWSD agrees that it is a Common to All (CTA) cost then there should be no impact on Flint's rate directly. With this assumption I took out the cost of operating the Flint WTP, since it would no longer be needed for back up to the 72-inch line. The summary is shown below. As you can see, the 18 MGD option from DWSD would then be less cost than the KWA costs (their estimate or ours).

Dave

Option	Costs through 2042	Ranking
Flint WTP Only	$ 590,441,893	1
DWSD 18 MGD Max Day at P&B	$ 605,004,098	2
DWSD 8 MGD Max Day at Imlay	$ 634,795,488	3
KWA 10/31/12 Update	$ 649,775,166	4
DWSD 8 MGD Max Day at P&B	$ 672,671,705	5
KWA-1	$ 707,279,715	6
DWSD 12 MGD Max Day at Imlay	$ 725,576,803	7
DWSD 12 MGD Max Day at P&B	$ 762,110,308	8
KWA -2	$ 766,784,313	9

CITY OF FLINT CONFERENCE CALL NOTES

WATER ASSESSMENT PROJECT

JANUARY 16, 2013

PARTICIPANTS: Randall Byrne, Eric Cline, Ed Kurtz, Howard XXX

System Leaks:

- A plan is being developed to address leaks within the system.
- Currently 100 leaks are known and awaiting repair. Estimated cost of $50,000.
- System loss is estimated at 20%. Two prior leaks in major transmission lines have "skewed" losses.
- System improvement is a major budget priority for next fiscal year.
- Repairs are a staffing and overtime issue within the Water Services Department. Timely response has been a persistent issue.
- Active hydrant replacement program.
- $1.5-million spent on replacement of 4,900 meters; 1/3 of total.

Blending:

- Remains a viable option, but only if DWSD becomes cheaper than KWA.
- City cannot acquire future rate projections from DWSD
- DWSD only provides short-term cost savings.

Plant Operations:

- Confident in longevity of the Water Plant. Majority of equipment <10 years old.
- Plant needs a minimum of $200,000 in upgrades; $3.5-million capital upgrades planned if KWA selected.
- No need to soften water unless an 8 MGD option with DWSD is selected; will add $5.00/mcf to treatment costs.
- MEDQ had effectively condemned two (2) dams.
- No analysis of TYJT's cost analysis on sole reliance on Flint River and the Water Plant. Rowe indicated that projections are inaccurate.
- Consulting Engineer is Rick Freeman from Rowe.

Bond Issuance:

- County will sell all bonds (G.O. bonds) for all KWA construction.
- SRF/DWRF loans will be necessary for upgrades if DWSD is selected.

KWA Deal:

- The EFM has an upcoming meeting with KWA to negotiate a way to prevent short-term rate increases.
- Flint would buy into approximately 30% of the KWA system.

Declining Usage:

- Water costs would decline if usage drops because the City only pays for what it uses.
- Fixed costs under the KWA option remain even if usage drops because Flint is buying a fixed % of the system.

Contingency:

- Flint would likely pay 30% of any cost overruns because they are buying a 30% "stake" in the KWA system.

City of Flint Water Analysis

Options/Issues

1. Issues:
    a. TYJT v. ROWE
    b. DWSD information on rates
    c. Insufficient analysis of DWSD December 21st Proposal
    d. Flint ability to efficiently operate water plant into the future
    e. Analysis of system/plan to address water loss
    f. Long term ability to finance and future rates
2. Options:
    a. Delay-60 days
        i. Independent Consultant?

EMERGENCY MANAGER CITY
EFM ED KURTZ
CITY ADMINISTRATOR MIKE BROWN
GF DEFICIT - $19.1-MILLION
WATER FUND DEFICIT - $8.8-MILLION

01-17-13: Q4 2012 EFM report analyzed.

- ***EFM Reports*** – ~~Q4 2012~~; **Q1; Q2; Q3; Q4.**
- **Outstanding Issues.**

    - The **$19-million GF deficit** needs to be monitored to ensure that projected declines occur in FY 2013
    - The **$8-million Water Fund deficit** needs to be monitored given the issues related to the water system.
    - The level of **Tax Revenue** needs to be monitored given its apparent tenuous levels.
    - **Overtime** in the **Fire Department** is excessive and needs to be monitored.
    - The status of **ongoing litigation** should be monitored. **Also, I find no record of receiving any quarterly litigation reports.**
    - Monitoring should be conducted to ensure the anticipated **DEP** is filed in a timely manner.
    - The **OPEB** debt needs to be monitored.
    - The development of **a 5-year Strategic Plan** and multi-year budgets is a positive step. This process should be monitored and it is possible that the OFR could also assist.
    - Monitoring of the **Bank Reconciliation** process should occur to ensure improvement.
    - Monitoring of the **MERS** transition should be monitored to ensure no additional issues develop.
    - Regarding **Unplanned Transfers Out:**

        - 2 of the 7 transfers were **over $1-million.**
        - 6 of the 7 transfers were **over $100,000**
        - **Sanitation** required a transfer of **$1.8-million** It is unclear what the reasons were or how this will be corrected moving forward.
        - **Building Safety** required a transfer of **$1.1-million.** It is unclear what the reasons were or how this will be corrected moving forward.

    - Regarding **Departmental Over-Expenditures:**

        - 2 of the 7 departments overspent by **over $2-million.**
        - 5 of the 7 departments overspent by **over $300,000.**
        - **Public Safety** overspent by **$6-million.**
        - **Community Development** overspent by **$2-million.**
        - **Transportation** and **Parks & Recreation** overspent by nearly $1-million each; **$922,669** and **$871,250** respectively

01-15-13: Received Q4 EFM Report.

GOVERNOR

ANDY DILLON
STATE TREASURER

ANALYSIS

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Flint Water System Status Assessment

DATE: January 22, 2013

On November 26, 2012, the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The overarching purpose of this study was to provide objective analysis to the State Treasurer and to Flint's Emergency Financial Manager (EFM) in order to secure potable drinking water for the City for the foreseeable future. The Office of Fiscal Responsibility (OFR) has been the lead office representing Treasury on this project.

On December 21, 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, TYJT outlined 5 options that they had analyzed. These options were: 1) 100% water provision by the City of Flint Water Plant from its water source of the Flint River; 2) 100% provision of untreated Lake Huron Water by KWA (which would require treatment by the Flint Water Plant); 3) Effective 100% provision of treated drinking water by DWSD; 4) Provision of variable amounts of water from DWSD through the existing Potter & Baxter mains (this option called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs); and 5) Provision of variable amounts of water from DWSD through the 72" Imlay City main (this option also called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs). Each of the blending options looked at Flint purchasing 4, 8, or 12 Million Gallons per Day (MGD) from DWSD and blending the balance in river water to achieve their maximum daily water needs of 18 MGD. The Imlay City option also provided for DWSD to sell the 72" main to the City of Flint, which would then become the operational and maintenance responsibility of Flint.

From the presentation of the preliminary report on December 21 to the planned submission of the final report to the State by TYJT, a number of developments have occurred that have resulted in a final decision becoming more complex to make. First, the City of Flint received slightly modified proposals from DWSD; one on December 21, 2012, and the second on January 10, 2013.

On January 8, 2013, the OFR received, via the City of Flint, a written response from Rowe Professional Services Company (Rowe), the principal engineering firm for KWA, disputing a number of the conclusions reached by TYJT regarding the construction of the KWA pipeline. It should be noted that

Rowe Professional Services Company is the consulting engineering firm for KWA and they also provide engineering services to Genesee County and the City of Flint.

The Flint EFM also provided information to the Department of Treasury at a January 10, 2013, meeting disputing several of TYJT's conclusions. A written rebuttal to the Rowe report was received from TYJT on January 14, 2013. A follow-up conference call was also held with Flint officials on January 16, 2013.

Also on January 14, 2013, the State Treasurer requested information to three questions. The three questions are summarized as follows: 1) Show the different projected construction costs provided by TYJT and by the City of Flint/KWA. If these costs are different, explain why Treasury believes that the projects provided by Flint/KWA are acceptable; 2) identify the construction contingencies included in the TYJT and Flint/KWA projections; and 3) identify the options Flint will utilize in the event of a construction cost overrun or a delay in construction by KWA. For purposes of this analysis, all responses have been organized to respond to the questions posed by the State Treasurer.

Projected Construction Costs:

Based upon the provided construction estimates, TYJT estimates the KWA construction costs at **$357.6-million**. KWA estimates construction costs at **$272.4-million**. There is a lack of agreement on which of these estimates is more accurate.

Given all of the available information to the OFR, the following details make arriving at a clear recommendation difficult. Below is a summary of these details.

City of Flint Water System

- At a January 10, 2013, meeting with Treasury, Flint officials eliminated the 100% Water Plant option, using the Flint River as a 100% water source (which was cheapest option, as determined by TYJT).
- According to Flint officials, their water system experiences water losses, at a minimum, between 20-30%. Despite assurances that a plan is being developed to address losses, the true condition of the water system is not clearly known. Percentage losses of this size would suggest an impact upon current (and future) water purchases if not addressed. Further, it is logical to conclude that water loss has some impact upon making future usage and cost projections.
- Funding sources for any City water system upgrades are unclear. TYJT based many of their cost models on the issuance of revenue bonds. At the January 10, 2013, meeting, Flint officials indicated that the County would issue G.O. bonds for all KWA-related work. The January 8 report from Rowe also indicated that G.O. bonds would be issued.
- Flint officials also indicated that approximately $3.5-million in capital upgrades is needed for the Water Plant if the KWA option is selected. It is unclear if this cost would be part of any County G.O. bond issuance.
- Flint officials have also indicated that if DWSD is selected as a final option then any needed plant upgrades will likely require SRF/DWRF loans to complete.

DWSD Options

- At the January 10 meeting, Flint officials eliminated all of the DWSD Imlay City options (which were the cheapest DWSD options) over concerns of owning and maintaining the 72" water main.
- It is also the understanding of the OFR that Flint officials will only consider any of the blending options originally proposed to DWSD if they are certain that it is a cheaper option than KWA.

Blending was one of the initial criteria that TYJT was asked to evaluate by Treasury and was an option raised by the City of Flint.

- Further, the blending options to purchase only 8 MGD from DWSD and blend the balance of water from the Flint River appear to be no longer viable. According to Flint officials, blending more than 1/3 of the total water volume will require water softening to be added to the process; adding approximately $5.00/mcf (one-thousand cubic feet). One million gallons of water is approximately 133.7mcf, so treatment costs could raise $669/MGD.
- There is no agreement on the estimates used to project future water rates that will be charged by DWSD. The information provided by DWSD regarding water rates they charged Flint over the past 10-years does not appear to match the rates Flint officials stated that they have paid. TYJT maintains that DWSD rates are a matter of public record and rate information was provided directly by DWSD. Flint officials state that invoices received from DWSD indicate higher rates.

KWA Options

- There is a complete lack of agreement regarding the most accurate cost estimates for construction.
- KWA has made no provisions for redundant power at the pumping facilities. TYJT included the provision of redundant power in their estimates and notes that this is an industry standard. TYJT estimates that adding redundant power adds $1.3-million to the total project cost.
- TYJT based many of their cost models on the issuance of Revenue Bonds. Revenue bonds were initially being considered over concerns that Flint would not have the capacity to issue General Obligation bonds. At the January 10, 2013, meeting, Flint officials indicated that Genesee County would issue G.O. bonds for any system upgrades related to the KWA option. The January 8 report from Rowe also indicated that G.O. bonds would be issued.

Given the above points, it appears that the only options remaining under consideration by Flint are the 100% DWSD option (which TYJT estimated to be more expensive than either of the KWA cost options) and joining KWA.

Given the above information, additional discussions among all parties might be necessary to further refine project details and arrive at a conclusion on which option to pursue.

Project Contingency:

Construction contingency costs, also known as Engineering, Land, Administration, and Contingency costs (ELAC) are summarized in an attached chart developed by Rowe for the City of Flint. KWA/Rowe estimates total construction at $272.4-million, with **$53.2-million** (25%) for ELAC contingencies. TYJT estimates total construction at $357.6-million, with **$104.6-million** (42.9%) for ELAC contingencies.

Construction Cost Overrun/Construction Delay Options:

The OFR is not aware of any contingency plans developed by either KWA or the City of Flint to address construction cost overruns or significant construction delays. As the City of Flint would purchase approximately 30% of the KWA system, any additional debt levied to complete the project would likely require the City to assume 30% of that cost.

If further analysis on this issue is needed, please let me know.

Subject: Flint Water Parallel Line Option
Importance: High

Ed/Randy,

I spoke with Dave Guastella regarding the DWSD Parallel Line option. Here is what our conversation covered.

- DWSD open to constructing a parallel line as Common-to-All cost. It would run from Imlay City through Potter & Baxter. Approximately 30 miles.
- DWSD would roll the cost into all customer rates over 30-years. Flint, thereby, would avoid capital costs. DWSD said that they could calculate impact on rates about one day after an estimated cost of construction is developed.
- Dave indicated that the line could be built to bypass failures. It would also contain interconnects so water could be transferred between the lines.
- Flint will probably have to construct line from the Water Plant (about 2 miles) to connect to the new line for true redundancy.

Let me know how you wish to proceed with this new information.

Subject: FW: Flint Supply Assessment Additional Service

Eric

The purpose of this email is to request compensation for the effort that is in addition to the original scope of work. We have identified additional tasks below to describe the work and the level of effort required. The estimated fees for each task would be billed on a time and material basis, not to exceed the total shown for the work described.

Task 3.3: This task would include the effort that has been expended thus far in analyzing and responding to additional comments and options presented by the KWA and DWSD. The work has included consultation with Treasury personnel,

analyzing comments provided by KWA to the December 20th presentation, and our detailed response to the KWA comments. All documentation of this work has been provided to Treasury.

Estimated Level of Effort: $7,000

Task 3.4: The Treasury has requested that TYJT perform a site visit of the Flint WTP and evaluate the plant as it relates to its capacity to sufficiently treat river water and proposed lake water. This effort would include the services of a process engineer and chemist with expertise in water treatment (see bio below). Work would include review of pertinent reports and documentations as well as monthly operating reports and water quality data. The scheduled site visit would be completed and then a memorandum of findings would be produced and provided to the Treasury.

Estimated Level of Effort: $8,500

Task 3.5: This task would be used to cover other services that may be required until the determination is made by the Treasury regarding the best solution for supplying the City of Flint with potable water. This work would be as required and approved by the Treasury to include additional consultation, participation in meetings, and documentation of findings.

Estimated Level of Effort: $10,000

Per the contract TYJT will continue to charge services on a time and material basis in accordance with the approved rate schedule. Approval of this additional work is requested.

Thank you,

Dave

Ms. Janice Skadsen's Bio:

Ms. Skadsen is an environmental scientist and project manager with extensive experience in water quality issues, particularly as they relate to drinking water systems, including water treatment processes, source water issues, distribution water quality, and regulatory development and compliance.
She was a water quality manager for the City of Ann Arbor for 13 years and has a thorough knowledge of water quality needs from the client's perspective. As Ann Arbor's water quality manager,

Ms. Skadsen works for the national firm, CDM Smith and provides her expertise to their clients for projects throughout the country.

Flint Water Supply Questions

Office of Fiscal Responsibility

January 24, 2013

1. Please describe your latest cost estimate of construction. When will the intake be let for bids? Is it still estimated to cost $23,000,000? Why is KWA the most cost effective option for the City of Flint? Please describe.

2. Identify the construction contingencies included in the project and why you believe your estimate is accurate than Tucker, Youngs?

3. How will Flint pay for any costs, overruns, or a delay in construction by KWA?

4. IF Flint joins KWA, do you still intend on purchasing Flint's 72" main to supply the Genesee County System?

5. Will Flint be able to finance its water plant capital upgrades of approximately $5,000,000 by using Genesee County G.O. bonds? Will Flint's share of KWA financing be provided by Genesee County G.O. Bonds?

6. What emergency power backup is provided by the KWA project?

7. Does Flint need to purchase 30% of the KWA capacity if Flint repairs the water leakage in other their distribution system (estimated at 30%)?

8. What does Genesee County believe will be their finished water cost to customers once its treatment plant is complete and online? How much cheaper is this than Detroit?

9. Can Flint's water plant, if joined with KWA, treat both lake water and river water, which is extremely important if it is provided as emergency backup water to KWA? Will KWA provide funding for this?

10. Would KWA purchase Detroit's 72" main if given the opportunity? If so, why?

11. How does Flint plan on paying the premium charge for water from DWSD while the KWA system is under construction?

Subject: FW: TYJT request for additional compensation

Randy and Eric,

A draft response for issuance per our meeting follows (just let me know if/when it should be issued):

"Mr. Guastella,

Treasury Purchasing recently received a request to increase the current Municipal Water Supply Assessment contract. The request was is in the amount of $7,000. It is unclear if the additional amount is outside the contract's scope.

Please provide the following:

1. A detailed work breakdown of the $7,000 (e.g., task or deliverable being performed that is out-of-scope)
2. Section of DTMB contract where the $110/hour Senior Financial Advisor rate is identified
3. Section of DTMB contract where the $214.68/hour Principal-in-Charge rate is identified.

I will follow-up with a phone call. Contact me with any questions.

Thanks,

Tom Falik

Subject: RE: TYJT request for additional compensation

Randy,

Per our phone discussion, general comments follow:

1. Out-of-scope work is not normally allowed unless prior approval and the contract is updated
2. A detailed breakdown of the $7,000 should be received (e.g., how much for 4-hour Flint trip and how much for out-of-scope work, if any?)
3. It is not clear at this point if the contract allows these extra charges without sufficient detail to determine if its in-scope or out-of-scope from the contract
4. At this time, it does not appear we should be liable for additional charges due to the following:
   A. The final report has not been provided per section 1.022A.3
   B. Contractor recognized the importance and necessity of including all applicable costs for a relative comparison (Sample Project Plan attachment, section 3.1)
   C. How many Data Collection and Review meetings did Contractor attend with both DWSD and KWA? Two for both were assumed in Sample Project Plan attachment, section 3.1
   D. Contractor understood additional evaluation criteria/factors may need to be identified and used in consultation with Treasurer (Sample Project Plan attachment, section 3.2). An additional cost was not identified
   E. Contractor anticipated incorporating comments from Treasury's review and submit a final document for use (Sample Project Plan attachment, section 3.2). An additional cost was not identified
   F. Contractor did not note an additional cost for general meetings at conclusion of work (Sample Project Plan attachment, section 4).
   G. Contractor acknowledged analysis was based on limited info in January 14 letter. Did they identify limited information available before evaluation?
   H. Some of the information appears to be collected before the actual contract start date per January 14 letter (reference to November 20, 2012 meeting for various responses.

Contact me with any questions.

ANALYSIS

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Updated Flint Water System Status Assessment

DATE: January 31, 2013

On November 26, 2012, the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The overarching purpose of this study was to provide objective analysis to the State Treasurer and to Flint's Emergency Financial Manager (EFM) in order to secure potable drinking water for the City for the foreseeable future. The Office of Fiscal Responsibility (OFR) has been the lead office representing Treasury on this project.

On December 21, 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, TYJT outlined 5 options that they had analyzed. These options were: 1) 100% water provision by the City of Flint Water Plant from its water source of the Flint River; 2) 100% provision of untreated Lake Huron Water by KWA (which would require treatment by the Flint Water Plant); 3) Effective 100% provision of treated drinking water by DWSD; 4) Provision of variable amounts of water from DWSD through the existing Potter & Baxter mains (this option called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs); and 5) Provision of variable amounts of water from DWSD through the 72" Imlay City main (this option also called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs). Each of the blending options looked at Flint purchasing 4, 8, or 12 Million Gallons per Day (MGD) from DWSD and blending the balance in river water to achieve their maximum daily water needs of 18 MGD. The Imlay City option also provided for DWSD to sell the 72" main to the City of Flint. which would then become the operational and maintenance responsibility of Flint.

From the presentation of the preliminary report on December 21 to the planned submission of the final report to the State by TYJT, a number of developments have occurred that resulted in making a final decision more difficult. These developments were:

- The City of Flint received slightly modified proposals from DWSD; one on December 21, 2012, and the second on January 10, 2013.
- On January 8, 2013, the OFR received, via the City of Flint, a written response from Rowe Professional Services Company (Rowe), the principal engineering firm for KWA, disputing a number

of the conclusions reached by TYJT regarding the construction of the KWA pipeline. It should be noted that Rowe Professional Services Company is the consulting engineering firm for KWA and they also provide engineering services to Genesee County and the City of Flint.

- The Flint EFM also provided information to the Department of Treasury at a January 10, 2013, meeting disputing several of TYJT's conclusions. A written rebuttal to the Rowe report was received from TYJT on January 14, 2013. A follow-up conference call was also held with Flint officials on January 16, 2013 to further discuss these issues.

Also on January 14, 2013, the State Treasurer requested information to three questions. The three questions are summarized as follows: 1) Show the different projected construction costs provided by TYJT and by the City of Flint/KWA. If these costs are different, explain why Treasury believes that the projects provided by Flint/KWA are acceptable; 2) identify the construction contingencies included in the TYJT and Flint/KWA projections; and 3) identify the options Flint will utilize in the event of a construction cost overrun or a delay in construction by KWA.

On January 28, 2013, Deputy Treasurer Roger Fraser, State Administrative Manager Randall Byrne and I met with Flint Officials (Mayor Dane Walling, Emergency Financial Manager Ed Kurtz, City Administrator Mike Brown, Flint Finance Director Jerry Ambrose, Public Works Administrator Howard Croft, and Flint Utility Administrator Duffy Robinson) and representatives from KWA Water Authority that included Genesee County Drain Commissioner Jeff Wright, Genesee County Water and Sewer Administrator John O'Brien, and Jim Redding of Rowe Engineering.

Some clarifications to ongoing questions were provided at this meeting. Also, at this meeting, EFM Kurtz stated that he believes the KWA option is the cheaper alternative over time. He also stated that he believes that the Mayor and City Council will support the KWA Project.

On January 29, 2013, the OFR received a preliminary copy of the Final Report of the analysis performed by TYJT. This report is currently under review, but some relevant information has been highlighted below.

For purposes of this analysis, all responses have been organized to respond to the questions posed by the State Treasurer on January 14, 2013.

Projected Construction Costs:

Based upon the provided construction estimates, TYJT estimates the KWA construction costs at **$357.6-million**. KWA estimates construction costs at **$272.4-million**. There is a lack of agreement on which of these estimates is more accurate.

Given all of the available information to the OFR, the following details make arriving at a clear recommendation difficult. Below is a summary of these details.

City of Flint Water System

- At a January 10, 2013, meeting with Treasury, Flint officials eliminated the 100% Water Plant option, using the Flint River as a 100% water source (which was cheapest option, as determined by TYJT).
- According to Flint officials, their water system experiences water losses, at a minimum, between 20-30%. Despite assurances that a plan is being developed to address losses, the true condition of the water system is not clearly known. Percentage losses of this size would suggest an impact upon current (and future) water purchases if not addressed. However, at the January 28 meeting, it was stated that Flint is billing for 85% of the water is distributes and the majority of loss comes from fires,

deficient water meters, and theft. It is reasonable to conclude that at this time verification of true system losses is likely difficult to achieve. Further, it is logical to conclude that water loss will have some impact upon making future usage and cost projections.

- Funding sources for any City water system upgrades are unclear. TYJT based many of their cost models on the issuance of revenue bonds. At the January 10, 2013, meeting, Flint officials indicated that the County would issue G.O. bonds for all KWA-related work. The January 8 report from Rowe also indicated that G.O. bonds would be issued. However, at the January 28 meeting, KWA officials emphatically stated that revenue bonds would be issued for this project.
- Flint officials indicated that approximately $3.5-million in capital upgrades is needed for the Water Plant if the KWA option is selected. At the January 28, 2013 meeting, it was stated that Genesee County will permit Flint to participate in its revenue bond sale for KWA for Flint's 30% share of capacity in the KWA System and for plant upgrades. Given Flint's current financial situation, were this participation to occur, it will be a positive development for the City because it is likely Flint would have a very difficult time issuing bonds on the strength of its own credit rating.
- Flint officials have also indicated that if DWSD is selected as a final option then any needed plant upgrades will likely require SRF/DWRF loans to complete.

DWSD Options

- At the January 10 meeting, Flint officials eliminated all of the DWSD Imlay City options (which were the cheapest DWSD options) over concerns of owning and maintaining the 72" water main.
- It is also the understanding of the OFR that Flint officials will only consider any of the blending options originally proposed to DWSD if they are certain that it is a cheaper option than KWA. Blending was one of the initial criteria that TYJT was asked to evaluate by Treasury and was an option raised by the City of Flint.
- Further, the blending options to purchase only 8 MGD from DWSD and blend the balance of water from the Flint River appear to be no longer viable. According to Flint officials, blending more than 1/3 of the total water volume will require water softening to be added to the process; adding approximately $5.00/mcf (one-thousand cubic feet). One million gallons of water is approximately 133.7mcf, so treatment costs could raise $669/MGD.
- There is no agreement on the estimates used to project future water rates that will be charged by DWSD. The information provided by DWSD regarding water rates they charged Flint over the past 10-years does not appear to match the rates Flint officials stated that they have paid. TYJT maintains that DWSD rates are a matter of public record and rate information was provided directly by DWSD. Flint officials state that invoices received from DWSD indicate higher rates. At the January 28, 2013 meeting, EFM Kurtz stated that DWSD is charging Flint and Genesee County between $24- and $25-million per year for water purchases.
- Even if Flint was to continue with DWSD supplying water, it is understood that the MDEQ will likely require DWSD to address the issue of redundancy for Flint during the term of the new water contract by constructing an additional water main from Oakland County to the City of Flint. This project has been in conceptual stages for many years but never implemented.

KWA Options

- There is a complete lack of agreement between the KWA and TYJT analyses regarding the most accurate cost estimates for construction.

- As previously indicated, there was some dispute on whether General Obligation or revenue bonds would be issued for construction of KWA. At the January 28, 2013 meeting it was clarified that revenue bonds will be issued for this project.
- It was announced at the recent January 28 meeting that bids will be opened for construction of the KWA lake water intake on February 26, 2013. Interest in the construction of the intake has apparently been very high. County Water and Sewer Administrator O'Brien noted that the size of the intake will be the same whether Flint joins KWA or not. It was also noted that the construction of the pipeline will be done by multiple contractors. This will save time and allow more Michigan contractors to bid on the project.
- County Drain Commissioner Wright also indicated at the January 28 meeting a willingness to discuss how KWA might mitigate the $7- to $8-million cost of the "premium" rate that would be charged to the City of Flint by DWSD for the City to purchase water while KWA was being constructed. These costs are of great concern to Flint officials if the KWA option is selected.
- KWA has made no provisions for redundant power at the pumping facilities. TYJT included the provision of redundant power in their estimates and notes that this is an industry standard. TYJT also notes that DWSD currently has redundant power for all of the major facilities currently supplying Flint.

  Standby power was discussed at the January 28 meeting and KWA officials clarified that the water plant will have redundant power but that the pumping stations will not. The stated reasons for not including redundant power were cost containment, that Flint can use the Flint River as a backup water supply in the event of an extended power outage and that the KWA systems' water storage capacity will allow for 7 days of reserve supply. County Drain Commissioner Wright stated that KWA will look at installing standby power later but can utilize portable generators at the pumping stations, if necessary. TYJT estimates that adding redundant power adds $1.3-million in new costs.

Given the above points, it appears that the only options remaining under consideration by Flint are the 100% DWSD option (which TYJT estimated to be more expensive than either of the KWA cost options) or joining KWA.

Project Contingency:

Construction contingency costs, also known as Engineering, Land, Administration, and Contingency costs (ELAC) are summarized in an attached chart developed by Rowe for the City of Flint. KWA/Rowe estimates total construction at $272.4-million, with **$53.2-million** (25%) for ELAC contingencies. County Water and Sewer Administrator O'Brien clarified at the January 28, 2013 meeting that there is a 15% contingency for unforeseen issues and 10% "extra." TYJT estimates total construction at $357.6-million, with **$104.6-million** (42.9%) for ELAC contingencies.

Construction Cost Overrun/Construction Delay Options:

The OFR is not aware of any contingency plans developed by either KWA or the City of Flint to address construction cost overruns or significant construction delays. The final TYJT Water Supply Assessment Report does reference an October 31, 2012 letter from KWA to EFM Kurtz in which KWA estimates that a 15% cost overrun and a one-year operational delay is possible. The OFR is verifying this reference. How a delay of this magnitude would financially impact Flint's participation in this project is uncertain.

County Drain Commissioner Wright stated at the January 28 meeting that, if necessary, KWA has the authority to borrow more funds to complete the project in the event that delays or cost overruns necessitate the borrowing of more funds. As the City of Flint would purchase approximately 30% of the

KWA system, any additional debt levied to complete the project would likely require the City to assume 30% of that cost. However, Mr. O'Brien also stated that the January 28 meeting that KWA expects to purchase an insurance policy to insure against delays to the project. Drain Commission Wright also indicated that if construction bids come-in significantly higher than estimated that KWA will likely reassess its approach to this project.

Summary:

Overall, comparing these two options is very difficult because they are very different types of operations. DWSD is a "known" entity and the system is already in-place and in operation. DWSD may also be the cheaper option in the short term. However, selecting DWSD requires a 30-year commitment, the unknown aspect of future rate increases is very concerning to Flint officials and there appears to be considerable local resistance to continuing with DWSD.

KWA is a new venture and the "unknowns" exist at the initial phases of the project. KWA has the potential to be the cheaper, long-term cost for the City of Flint after the bond debt for construction is retired. The upfront costs and the premium water charges assessed by DWSD while KWA is being constructed are of great concern to City officials. The potential inclusion of Flint in the issuance of revenue bonds by Genesee County and the potential for KWA to assist the City in mitigating some of these premium charges could greatly reduce those concerns. Significant construction delays and/or cost overruns could greatly add to the cost of this project, which could add to the financial burden on Flint. However, there appears to be good cooperation between City and County officials in discussing this project and there also appears to be community support for the City of Flint joining KWA. It should also be noted that this level of engagement and dialogue between city and county officials because of this project could continue to grow and lead to additional areas of cooperation and collaboration.

If further analysis on this issue is needed, please let me know.

S:\OFR\Cities\City of Flint\KWA Water Authority\UPDATED FLINT DWSD KWA ASSESSMENT Version VI.01-31-13 doc

2/1/13 ED KURTZ - FLINT

Solid Waste - Union notification vote 2/1 @ 11:00 AM
Strike vote set for 2/4, replace first Monday in March, Gary spoke 2/6. Flint is finalizing terms, application. Assembled decent severance package

KWA - Roger asked for info to resolve "sq foot" issues (+ professional services) 2.3 million to KWA, $5 million express water carries DWSD (for buying out of wholesale contract) $530K dollar of current system, approx $50K per month until completion. W.M told Flint hardass to of "hi-ways" Selecting $2.3 million, Flint owns 72" of pipe from Baxter (Potter) Road, serves southern county for Oran Comm. County of fund to buy line for $2.3 million ($530K lease + $50K per month) Flint city attny Dan Hacky could see changing for more than cost of water. Line began to Potter/Baxter 72" line, Detroit agreed to sell line to Flint, Also agreed to sell to to the County. (County will buy Flint line). KWA will buy line for DWSD. Proposal would include DWSD buy back of for City & County, depends upon price / using wholesale contract price

FPOA - filed lawsuit, asking for reinstatement of pension benefits cut by Mike Brown told FPOA

(2)

2/1/13

ED KURTZ – FLINT

will not negotiate & defend lawsuit, Unions did not disclose lawsuit to 312 Arbitrator,

- ~~MCSWA~~ – hooky @ Model Center - Hang Jury Anthrax same a Committee

Fire Union – MZ ~~was~~ here today, on track to be $300K over budget in OT. Hiring then, Interviewing either get OT in Jan or 3/27 when 12 hr. shift, part-time fire fighters, can't reduce staff because of SAFER grant,

Fire Chief – interviewing candidates next week, candidates come from inside by Tues, from hiring chief, from Flint FF

Regional Concept – KWA partnership, follow up as what can we do together, expand w Dixie Commerce to discuss sewer County run treatment plant, cut & plug regains, water report/reading turn ons/offs, ~~can~~ invest to sewer, ~~to~~ Lapeer water by 7/1/13. Major issues 1) bond debt, 2) legacy costs

Sheriff Issues – Task force issue, Ed not w Sheriff dept, not w MSP Citizen Council, very good rep w MSP, disagrees w Sheriff, Sheriff is not [illegible] task force

(3)

2/1/13

ED KURTZ — FLINT

Went from 60 detectives to 12 detectives now on high profile violent crime. Many terminated contract w/ Sheriff to run book

Police Dept - problems w/ procedures, work w/ neighborhood Bennett Jones (Mott Grant expires 6/13 fund for Burton urges, no city fund + 10 police officers, 1 sergeant, will pay for bldg upgrades & Neal Chapman Criminal Coordinator Council Director

10 officers on the street

Budget — Assembly 5 yr budget, Jerry not w/ Snyder or the DEP, Treas. Dr recovery to will respond in 2 weeks, not in dire need of cash, problem occurs in April/May, can't borrow $19 mill, inability to repay to

NSP I & II — work done down $400K, down from $5 million. Bought 8 D.C. HUD parks, demolition of 600, Smith Village 39 units occupancy went 20, prob sold right west

Land Bank Properties - $9K, $6K w/ structures LB as your partner, real estate performed by LB, City got $400K / LB got $500K 22%. Many stock went 72% to 6.4% poor condition substandard West & North of Flint River, most dem. for NW neighborhood still stable.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

DATE: February 1, 2013

TO: Andy Dillon, State Treasurer

FROM: Brom Stibitz, Senior Policy Advisor

SUBJECT: Flint Background Information

This memorandum summarizes the recent financial history of the City of Flint, as well as more recent efforts by the Emergency Financial Manager to rectify the financial emergency.

Background

On August 29th through September 12th, 2011, the Department of Treasury conducted a preliminary review (under the former PA 4 of 2011) of the finances of the City of Flint to determine whether or not probable financial stress existed. On September 12, 2011, the State Treasurer concluded that probably financial stress existed in the City of Flint and recommended the appointment of a Review Team. On September 30, 2011, the Governor appointed a Review Team, which met during the months of October and November. In its written report to the Governor on November 7, 2011, the Review Team confirmed the findings of the preliminary review and concluded that a financial emergency existed in the City of Flint and that no satisfactory plan existed to resolve the emergency. Because of this finding, the Review Team recommended the appointment of an Emergency Manager.

These reviews found, or confirmed, the following:

- The City had incurred cumulative deficits in many of its funds over several years. The following are fund deficits from 2007 to 2011:

Fund	2007	2008	2009	2010	Unaudited 2011
General	--	$(7,046,820)	$(10,113,744)	$(14,621,546)	$(11,149,907)
Building Department	--	(1,550,369)	--	(576,276)	(1,251,459)
Central Maintenance	$(226,349)	(4,233,859)	(3,183,144)	(1,922,489)	*(2,029,230)
Data Processing	(778,458)	(245,488)	(72,773)	--	--
EDC	(26,772)	(10,721)	(58)	(7,404)	--
EDC Oak Business Ctr	(28,403)	(19,843)	(5,285)	(24,898)	--
Garbage Collection	--	--	--	(909,283)	(1,444,581)
Golf Course	(473,294)	(1,909,377)	--	(282,670)	*(576,861)
Self Insurance	--	--	--	--	(33,580)
Parks & Recreation	--	--	--	(163,096)	(185,255)
Senior Citizens	--	--	--	--	(26,709)
Water Supply	--	--	--	(5,795,973)	*(9,009,825)
Total	$(1,533,276)	$(15,016,477)	$(13,375,004)	$(24,303,635)	$(25,707,407)

*Estimated

- General fund expenditures exceeded revenues since 2007 and fund deficits had existed since 2008, as follows:

	6/30/2007	6/30/2008	6/30/2009	6/30/2010	Unaudited 6/30/2011
Revenues	$69,212,013	$66,823,137	$63,937,302	$57,189,454	$52,201,018
Expenditures	70,908,742	79,475,612	66,703,149	64,741,451	58,969,882
Excess/Deficiency	(1,696,729)	(12,652,475)	(2,765,847)	(7,551,997)	(6,768,864)
Other Sources (Uses	(866,831)	(568,589)	(478,527)	3,044,195	10,598,701
Net Change	(2,563,560)	(13,221,064)	(3,244,374)	(4,507,802)	3,829,837
Beginning Fund Balance	8,915,254	6,351,694	(6,869,370)	(10,113,744)	(14,621,546)
Ending Fund Balance	$6,351,694	$(6,869,370)	$(10,113,744)	$(14,621,546)	$(10,791,709)

- The City relied upon transfers from the water supply fund and the sewage disposal fund for general City operations. In 2009, City officials increased overhead charges from the water supply fund and the sewage disposal fund from $1 million to $2.4 million. Also in 2009, City officials began charging a return upon investments against the water supply fund and the sewage disposal fund of $2.9 million. Combined, City officials had been utilizing $5.3 million of water supply and the sewage disposal money for general fund operations annually. This amount of annual appropriation was not a loan and was not expected to be repaid to these funds.

- In addition to the foregoing activity, City officials had borrowed from other funds to compensate for cash shortages. For example, at June 30, 2010, the general fund owed other funds a total of $18,002,907, of which $11,698,376 was owed to the sewage disposal fund, $1,059,914 was owed to the local street fund, $1,683,733 was owed to the public improvement fund, and $2,139,590 was owed to the self-insurance fund.

- The City continued to experience a cash shortage. In early 2011, the City borrowed $8.0 million in fiscal stabilization bonds, pursuant to Public Act 80 of 1981, the Fiscal Stabilization Act, to assist with cash flow shortfalls. However, there remained many negative cash balances in the City's records as of June 30, 2011.

- The City's pension system was less than 60 percent funded. Benefits were based upon factors ranging from 1.7 to 2.6 of final average compensation. As of June 30, 2008, which was the last actuarial report for the 2010 audit period, there were 1,676 active members compared to 2,820 retirees. The unfunded accrued pension liability was over $39 million, with a one-year increase in the net pension obligation of $1,202,047. Additionally, the 2010 audited financial records indicate that the City had over $860 million in unfunded other post-employment benefit (OPEB) liabilities.

- Between 2001 and 2010, City officials reduced staffing from total full-time equivalent positions of 1,525.8 to 767. Many of these reductions came from Police (336 to 122) and Fire (216 to 110). The City continued to reduce staff.

- Interviews with City staff painted a picture of elected officials who were unwilling to make the decisions necessary to align expenditures with revenues. Examples included the adoption of budgets with knowingly overestimated revenues, knowingly underestimated expenditures, or both; reluctance to amend the budget in a timely fashion to account for revenue reductions; and lack of follow-through on cost saving initiatives.

Emergency (Financial) Manager Actions

Since the declaration of financial emergency in November of 2011, Emergency Manager Mike Brown and Emergency Financial Manager Ed Kurtz have worked to return the city to financial solvency. The first step was stabilizing the finances of the City in order to provide basic services to citizens. Facing a projected gap of $25 million between projected revenues and expenditures, the Managers worked to close the gap through a mixture of revenue increases and expenditure decreases. Accomplishments over the last 14 months include:

- Adoption and implementation of a balanced FY 13 budget. Mid-year projections from the City indicate that the budget remains in balance, and is expected to end the year without adding to the accumulated deficit.
- SAFER grant of $6.9 million and 21st Century Community Policing grant of $743,000 awarded, helping to stabilize fire and police operations in the City.
- An ongoing partnership with the State on public safety issues included partnerships between Flint police and the MSP as well as funding to support reopening the City lockup.
- New labor agreements implemented which reduced employee expenses by the equivalent of 20% of wages.
- Reduction of unfunded OPEB liabilities from $900 million to roughly $400 million. This reduced the Annual Required Contribution (ARC) from $60 million to $22 million.
- Substantial reduction of the City workforce.
- Voter approval of a 5 year 6 mill millage to support police and fire operations.
- Creation of a City-wide lighting authority reduced general fund subsidy of operation, maintenance and improvement of the City's lights.
- Implementation of a residential waste collection fee (replacing a 3 mill levy) and contracting out of solid waste removal and recycling have reduced general fund subsidy of waste operations.
- Outsourcing of the City's golf courses.
- Water and sewer rates adjusted to stabilize operations of the operation.
- Transfer of the Flint Employee Retirement System to Municipal Employee Retirement System (MERS).
- Improvement of the pooled cash position by over $12 million compared to the previous year.

Next Steps

Though the managers have been able to stabilize the finances and operations in the City, much work remains to be done. The audited financial information for the year ending June 30, 2012 shows a $19.2 million general fund deficit. Given the substantial level of cuts already implemented, the EFM does not believe that it is possible for the City to implement the level of cuts that would be necessary to eliminate this deficit over a 5 year period.

The plan to eliminate the deficit, as laid out in the draft Deficit Elimination Plan (DEP), relies on Treasury approval for the City to borrow $12 million, either through an Emergency Loan from the State, or through another appropriate mechanism such as a fiscal stabilization bond. (This borrowing would also help stave off an impending cash crisis, which is expected to be an issue in April or May.) The remaining $7.2 million would be eliminated through as yet to be identified spending cuts over the next 5 years in the following amounts: $1 million, $1 million, $1.45 million, $1.75 million, and $1.9 million.

Treasury still has some concerns with the DEP as proposed. The primary concern is that the City has not identified additional cuts or revenues to cover the appropriation for deficit reduction over the next 5 years. Without this detail, it is impossible for Treasury to assess the feasibility of actually setting aside enough money to reduce the deficit. This is especially true given that the City expects further reductions in property tax revenues over that same time period.

The EFM has laid out a process by which the City will develop the budget for FY 14. Through this same process, he will also come up with a second year planning budget and a rough projection of the next three years that will include detail on how the deficit will be eliminated. At a high level, the plan includes the following steps, and is expected to be completed over the next 8 weeks:

- The budget development starts with the 5 year strategic plan that has already been developed by the leadership team at the City. This plan identifies the most important elements of City service that must be provided for the City to survive.

- Based on the details of the strategic plan, the EFM will work with a core management team of department heads and supervisors to determine the core functions that are to be continued, as well as objections, strategies, and metrics to measure success. The budget will be based on these core functions, and the manager expects that they will be forced to look at the absolute minimum services a City can provide.

- The EFM expects that the functional areas that will continue will be police, fire, roads, water, and sewer, as well as some services required by statute such as planning, zoning, and building safety.

- Once the core team puts together the draft budget, it will be presented to a larger group which includes the Mayor, Council, and community representatives.

- After 2 or 3 sessions with this larger group, they will present the proposed budget to the public.

Treasury will remain involved with the City throughout this process. Based on the outcome, Treasury will be in a better position to approve or reject the proposed DEP.

Other Issues

- The EFM is nearing a decision on whether to join the Karegnondi Water Authority (KWA) or continuing with the Detroit Water and Sewer Department (DWSD). Treasury has been consulted throughout this process. A decision is expected in the coming weeks.

- On March 28, the effective date of the replacement emergency manager legislation (PA 436 of 2012), Mike Brown will once again be eligible to be the Emergency Manager. A decision will need to be made. Ed Kurtz, the current EFM, is not interested in remaining in the role.

It is and I agree.

I told Dave that if he had ideas to discuss to submit in writing so we had no additional issues.

Wanted everyone to be aware that this came in.

Eric

In recent discussions with the DWSD Director, the new option of twinning the 72-inch main with another main was discussed. DWSD believes that that twinned line from the Imlay Station to FL-1 (master meter at Potter and Baxter) would be a Commont to All (CTA) cost and therefore allocated over the entire customer base.

However, from FL-1 to the WTP would probably not count as a CTA cost. DWSD would consider rolling the cost of the extension from FL-1 to the WTP into Flint's rate.

DWSD stated that for them to assess the rate impact of twinning the 72-inch water main, they would need an estimate of the engineering and construction cost. If you would like us to put together this estimate, please let me know. I believe we have the 72-inch pipeline profile in house and that will help us to better estimate the cost associated with river crossings, tunneling, etc. of the actual route.

In recent discussions with the DWSD Director, the new option of twinning the 72-inch main with another main was discussed. DWSD believes that that twinned line from the Imlay Station to FL-1 (master meter at Potter and Baxter) would be a Commont to All (CTA) cost and therefore allocated over the entire customer base.

However, from FL-1 to the WTP would probably not count as a CTA cost. DWSD would consider rolling the cost of the extension from FL-1 to the WTP into Flint's rate.

DWSD stated that for them to assess the rate impact of twinning the 72-inch water main, they would need an estimate of the engineering and construction cost. If you would like us to put together this estimate, please let me know. I believe we have the 72-inch pipeline profile in house and that will help us to better estimate the cost associated with river crossings, tunneling, etc. of the actual route.

THOUGHTS FROM THE EFM AFTER 6 MONTHS ON THE JOB

There are many significant issues facing the city going forward. Let me reflect on some of the more obvious ones.

LAND USE AND PROPERTY TAXES

1. Property taxes will continue to decline over the next three to four years with the projected decline in 2014 estimated to be 17%.
2. Much of the redevelopment is being done by the non-profit sector and will not be subject to property taxes.
3. The neighborhoods continue to decline with another 1,700 parcels turned over to the Land Bank and now exempt from taxes. (Note: we were able to demo 600 homes this fiscal year but added another 1,700 to the potential list of demos.) The City would need $50 to $60 million dollars for demo alone.
4. With a few exceptions, Wards 3 and five could effectively be renamed "Land Bank City".
5. Approximately 36% of the city's housing stock is either vacant, or in poor to substandard condition.
6. In addition to the residential properties there are a significant number of commercial properties that need to be demoed.
7. The proposed elimination of the personal property tax will also have a negative impact on the cities revenue. Other than public safety, only 80% of the lost revenue will be recovered.
8. Banks are now doing what they accused their customers of doing. They are walking away from foreclosed properties that they own and dumping them on the City and eventually the land bank.
9. It costs the City and the Land Bank approximately $1.2 million per year to mow all the vacant property twice.
10. By the time the Land Bank receives the properties (3 years), they are basically stripped of all electrical, plumbing, etc and are not salvageable
11. The people of the City passed a 6 mil property tax increase exclusively for public safety. However, by the end of the six years it will be offset by the continued decline in property values.

IN SUMMARY, PROPERTY MANAGEMENT WILL HAVE TO BE A TOP PRIORITY FOR THE CITY OVER THE NEXT SEVERAL YEARS.

INCOME TAX

1. Income taxes which we initially projected to increase slightly, will now, with the announced closing of Delphi East probably decline.
2. The City is considering the possibility of raising the income tax. But this process requires legislative action and a vote of the people. This could be the straw that breaks the Camel's back.

FEES

1. The City has implemented fees for street lighting and garbage pick up. (The Garbage fee replaced a 3 mil property tax for that purpose. If a property was

1. The city continues to operate its own 911 center that is funded by a surcharge on phone service. As more and more people rely on methods other than land lines, the revenue continues to decline. The center is currently being subsides by more than $500,000 from the general fund annually.

COURTS

1. The 68th District court continues to be a significant cost factor to the city and is extremely busy.

IN SUMMARY, PUBLIC SAFTETY CONSUMES 71% OF THE GENERAL FUND REVENUE PLUS THE TWO MILLAGE, ONE FOR 2MILS (POLICE ONLY) AND ONE FOR 6 MILS (POLICE AND FIRE ONLY). IT IS PROJECTED THAT STAFFING LEVELS WILL DECREASE BY 15 IN FISCAL 15, UNLESS THERE IS ADDITIONAL REVENUE CREATED. THIS PROJECTION IS BASED ON THE PREMISE THAT THE CITY WILL CONTINUE TO RECEIVE $3 MILLION ANNUALY IN GRANT ASSISTANCE FROM VARIOUS SOURCES. BARING THAT, THE NUMBER OF EMPLOYEE REDUCTIONS WILL BE LARGER. THE 911 SYSTEM SHOULD BE MERGED WITH THE COUNTY AND THE 67TH DISTRICT COURT SHOULD BE MERGED WITH THE 68TH. THE POTENTIAL FOR COMBINED SERVICES IN POLICE AND FIRE SHOULD BE CONSIDERED.

INFRASTRUCTURE

STREETS

1. In a recent assessment 26% of the City's streets received the lowest grades while only 10% received the highest. Regardless of the condition, the City will, by policy, use all of its Local Street Funds to maintain the current status as much as is possible. That means all funds will be used for sealing cracks, fixing potholes, etc. No replacement of existing roads will be done.
2. Our Major Street Fund dollars will be used mostly to meet our required match for MDOT projects projected to be $575,000 in 2014.

IN SUMMARY, UNLESS ADDITIONAL REVENUE BECOMES AVAILABLE, OUR ROADS WILL AT BEST BE STABALIZED, BUT PROBABLY CONTINUE TO DETERIORATE

WATER AND SEWER

1. The charges for water and waste have increased by over 100% in the last 18 months, to the point that the average charge for a City of Flint resident is about double that of a Genesee county resident.
2. Currently there are over 8,000 accounts 60 days or more past due with at total dollar value of just under $3 million.

3. The condition of our water and sewer infrastructure is, to say the least, not very good. Our treatment plants, both water and sewer are in good shape because of the continued mandates from DEQ for upgrades. However, this has also created significant bond debt to go with it, and, has resulted in limited capability of providing improvements to the in-city water delivery network and sanitary network
4. There is a constant backlog of unrepaired water main leaks, defective meters, turn ons/turnoffs, with insufficient staff to deal with them
5. Both funds are in deficit and have little money to address infrastructure.
6. Significant bond debt as well as legacy costs make partnering or selling of the system difficult
7. The City is finalizing a decision on its water supply for the next 30 years. Although it appears that KWA will be significantly less costly over the life of the contract, costs will continue to go up regardless of which option we take. A significant concern is that because a significant portion of the cost associated with KWA is fixed, with the continued exodus from the city, fewer and fewer customers will pay increased rates to cover bond costs. A draft of s study on the sewer system indicated it will take an estimated $20 to $30 million to repair the system.
8. There is currently over $2 million of past due water bills attached to the affidavit process. The relatively small deposit required $100.00 for a renter to get an affidavit results in many renters simply walking away and forfeiting their deposit, because the water bill is significantly more than the deposit. In addition on many occasions a new tenant moves in without filing an affidavit and the water continues to be billed to the former tenant, resulting in large amounts of bad debts. With an affidavit, the landlord is not responsible for the cost of water. In addition, there are individuals/companies that will illegally turn a persons water back on or in some cases actually bypass the meter. One of the largest causes of unbilled water is theft, along with fires and leakage. Again, there is a lack of staff to monitor and enforce. The City is increasing the water deposit amount to $350.
9. The current water charge policy basically does not reward someone for conserving water. The fixed charge is a significant part of the cost. Maybe, the City should look at the potential for a consumption only charge.

IN SUMMARY, WATER RATES WILL CONTINUE TO GO UP FOR RESIDENTS OF THE CITY, BUT HOPEFULLY AT A MUCH LOWER RATE THAN IN THE PAST. IT WILL BE VERY DIFFICULT TO GENEREATE REVENUE FOR INFRASTRUCTURE UNTIL RATES BECOME MORE COMPETITIVE WITH THE COUNTY.

PARKS AND SENIOR CENTERS AND GOLF COURSES

1. The City currently has over 60 parks as well as dozens of boulevards, triangles, etc to maintain. The parks are supported by a property tax levy that now produces less than $400,000 per year. In addition forestry is included in the parks budget. Basically with the exception of a few parks that have been adopted, they are not

well maintained. In addition, several of the parks are not much more than a small piece of land that is underutilized.

2. The City can not operate Senior Centers effectively or economically. Centers will have to be outsourced, operated by Senior Center Boards, or closed. The only funds available will be funds obtained from the county wide millage for that purpose.
3. The City currently owns four golf courses. Three have been leased to a provider, who operated two of them in summer 2012. Though the lease has not been without concerns, the coursed will continue to be leased again this year. This group does intend to open the third course, possibly this season. The fourth course has been leased to a different group and is not operating and in bad condition. The City should probably look to sell the golf courses.

IN SUMMARY, ADDITIONAL REVENUE WILL HAVE TO BE FOUND, OR SEVERAL PARKS WILL HAVE TO BE ADOPTED OR CLOSED, SENIOR CENTERS MUST BE SELF SUFFICIENT OR CLOSE AND THE GOLF COURSES SHOULD BE SOLD.

STAFF

1. The City is currently functioning with a shared Assessor, part time Treasurer, contracted Risk Management and IT Directors. The Finance Director, Infrastructure Director, City Administrator, as well as others, are independent contractors. All departments are probably understaffed, but Human Resources, which is where everything starts, including labor relations, is probably the most apparent.

LEGACY COSTS

1. Although tremendous strides have been made in reducing the unfunded liability, retiree health care costs still have an unfunded balance of approximately $350 million.
2. Even though the City's pension fund has consistently under performed most municipal plans, it had remained under the direction of a local pension board. In fiscal 2013, the plan was moved from FERS to MERS, which saved the City significant dollars in administration and fees. However, the pension fund is currently funded at less than 50%, with an unfunded liability of approximately $450 million.

IN SUMMARY, LEGACY COSTS WILL BE A SIGNIFICANT ISSUE GOING FORWARD. AS GENERAL FUNDS DECREASE, AND FEWER EMPLOYEE'S CONTRIBUTE TO THE FUND. THE CITY COULD FACE CHOICES OF FUNDING LEGACY COSTS OR PROVIDING SERVICES.

LAWSUITS

1. The City still has several pending lawsuits that could have a significant negative financial impact on the City such as health care and water charges. The Health care lawsuit could cost the city upwards of $3 million. The water charge lawsuit, filed by the President of the City Council, would either put the water department effectively out of business, or if covered with General Funds, cause the City to no longer be viably and probably forced to file for bankruptcy.

IN SUMMARY, A NEGATIVE OUTCOME IN ANY OF THE LAW SUITS WOULD HAVE A DEVISTATING IMPACT ON THE CITY.

GOVERANCE

MAYOR

1. He is trying. Although the mayor talks a good show and writes well, he has blinders on as it relates to the true financial condition of the City as referenced by his recent State of the City address. He has done a decent job with economic development, a role to which we assigned him. Financially, I think he believes if he says it often enough, it will happen.

COUNCIL

1. All I can think of saying about the council is "Are we really going to turn the City back over to them?" In my view, they are basically dysfunctional, and not capable of acting responsibly or timely. Their meetings tend to be unprofessional and confrontational with each other.

assessed at less than $50,000 the cost to the owner went up. If more than $50,000 the cost went down. I am not sure either fee, because of vacant properties will, at the current assessment, generate enough income to cover the costs. Based on statistics from the Land Bank and the Master Planning process, there could be as many as 14,000 unlicensed rentals in the City. If licensed and inspected, it could generate and additional $1 million in revenue. However, it has to be determined if the revenue would cover the costs of the program. There also appears to be hundreds maybe thousands of unlicensed business in the City. This also represents unrealized revenue as well as a disservice to those to do apply and pay for an annual license. Again, revenue versus expenses would need to be evaluated.

2. In addition the City is now billing for such things as fire runs, police response to accidents, etc. None of these charges are well received by the public, and have had significant administrative issues.

IN SUMMARY AS IT RELATES TO REVENUE, THERE ARE FEW ADDITIONAL PLACES THE CITY CAN LOOK FOR INCREASED REVENUE, WITH THE INCOME TAX BEING THE MOST LIKELY. WHETHER OR NOT FEES FOR THINGS LIKE RENTAL INSPECTIONS AND BUSINESS LICESNSE WOULD EXCEED THE COST OF COLLECTION NEEDS TO BE ADDRESSED.

PUBLIC SAFETY

POLICE

1. By almost any measurement the police department is understaffed. We currently have a total of 140 employees in our police department including both sworn and civilian. Even with the passage of the 6 mil increase in property taxes exclusively for "public safety" and the commitment by ordinance of 55.5% of general fund revenues to police and fire, the number of officers will decline beginning in Fiscal 15. The department has been reorganized and significant improvements in response time, etc have been made. The State's help in providing funding to reopen the lockup and the addition of several state troopers to the city have helped significantly. Currently, eleven of the officers are paid for by a Mott grant that expires June 30, 2013 and will not be renewed..

FIRE

1. The city currently has 93 total employees, staffing five stations. The EMT service has been discontinued. Thirty nine of the current employees are paid for by a SAFER grant that expires in the spring of 2014. The city is currently setting aside some of the funds from the new millage to cover that loss. It is possible that the city by Fiscal 15 will be reduced to a maximum of three stations, possible two.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

DATE: February 8, 2013

TO: Governor Rick Snyder

FROM: Andy Dillon, State Treasurer

SUBJECT: Status of Financially Distressed Local Governments

	JANUARY			DECEMBER		
	Cities	Schools	**Total**	Cities	Schools	**Total**
EM/EFM	5	3	**8**	5	3	**8**
Consent Agreement	3	0	**3**	3	0	**3**
Watch List	7	2	**9**	6	2	**8**

Per your request, this memorandum summarizes the status of selected financially distressed units of local government. The following units of local government now are subject to Public Act 72 of 1990, the Local Government Fiscal Responsibility Act.

GENERAL ISSUES

Cities Close to an Exit by EFM:

- Ecorse – While most of the financial issues are resolved, the City Council without the State's involvement, has the authority, through practice and a loosely worded city charter, to meddle in the day-to-day operations of the City, including supervising staff and setting their pay. Efforts to obtain an Inter Local Agreement have been frustrated by the unwillingness of a majority of Council to see the need for the oversight contemplated by the ILA. While we continue to work on a compromise, worst case is that we will impose a transition advisory board (TAB) under PA 436 in late March.

- Pontiac – As explained below, Mr. Schimmel has a short list of projects to complete before he leaves this summer. Imposition of a TAB will be recommended.

Retiree Health Care – In most of the EFM cities, and certainly in those cities that are struggling but not yet in receivership, the cost of promised retiree health care is a major concern. In Pontiac and Flint where changes in retiree health care were imposed under PA 4, lawsuits are pending leaving the effects of those changes uncertain. In Pontiac, the annual liability is about $6.0 million, which is also the amount of the City's current annual operating deficit. Allen Park's annual liability is approxi-

mately $2.5 million and Flint's is nearly $20 million, half of which is in the general fund. While Flint and Pontiac have each taken steps to reduce the annual expense of the health coverage the retirees enjoy, those changes are being challenged. In most of our EFM cities, this issue is a difficult obstruction to fiscal balance. Pontiac, our most extreme case, currently has 52 current employees in the health care system compared to approximately 1200 retirees receiving health care. Treasury is working to develop a standard process to use when addressing retiree health care spending.

Law Enforcement – Based on the recent meeting with the Michigan State Police, it has become clear that increased coordination between Treasury and MSP is necessary. This is especially true in cities such as Flint and Detroit, where the City is both under some level of Treasury supervision and also has increased MSP presence. Treasury will initiate these discussions.

EMERGENCY MANAGER – Cities

City of Allen Park

- Update: Joyce Parker was appointed Emergency Financial Manager by the Emergency Loan Board on October 25, 2012, with duties beginning October 29. She also serves, part-time, as the Emergency Financial Manager for the City of Ecorse.

- For fiscal year ending June 30, 2012, the City had an operating surplus of $2,973,862, or 18% of general fund revenues of $16,202,731. However, when transfers out of the general fund are taken into account, the financial picture is much worse. The City transferred $4.7 million (net of transfers in) from the general fund, including a $2.4 million transfer associated with studio debt and a $2.5 million transfer to cover retirement health care. Based on these numbers, the City's unrestricted accumulated general fund deficit is $1,090,225 or 6.7% of revenues.

- In the audit for fiscal year ending June 30, 2012, the City's audit firm expressed doubts of the City's ability to continue as a going concern.

- The EFM has submitted an application for an emergency loan. The Department is reviewing the application to assure the City's request is consistent with their financial needs, but Treasury is not inclined to approve the loan until other options have been explored.

- A two year operating millage was on the November 6 ballot, which was for four mills and was defeated. Treasury is exploring the potential to restructure the studio debt. The EFM has listed the movie studio property for sale and is preparing a detailed Deficit Elimination Plan. The City's financial distress is exacerbated by the minimum staffing requirements contained in the public safety collective bargaining agreements and the cost of retiree health care.

- The Road Out: With our recent entrance into Allen Park, several general strategies are in play. As noted above, the budget is in deficit primarily because of the movie studio debt and the retiree health care obligations. However, labor contracts have minimum manning provisions that need to be resolved, and there are several areas of ongoing expense that can be reduced. Among other things, the EFM's draft deficit elimination plan also includes personnel reductions (including police and fire), wage reductions, pension plan changes, active and retiree health care changes, reduction in sick days and holiday payouts, and revenue enhancements for rubbish and lights. Ms. Parker believes that it may be possible to balance these financial issues short of bankruptcy. However, that option is also being explored.

City of Benton Harbor

- Joe Harris was appointed Emergency Financial Manager on August 8, 2012. He was first appointed Emergency Financial Manager on April 1, 2010. The Emergency Loan Board terminated Mr. Harris' contract effective January 31, 2013 and appointed Mr. Tony R. Saunders II as the new EFM effective February 1, 2013. Prior to taking this appointment, Mr. Saunders worked on the staff of City Council Members in Detroit and, for the last year, has been assisting the City of Highland Park on behalf of the Department of Treasury.

- For the fiscal year ending June 30, 2012, Benton Harbor had an operating shortfall of $1,125,798, exceeding general fund revenues of $6,555,653 by 17%. The unrestricted accumulated general fund deficit is $2,285,483 or 34% of general fund revenues. The unrestricted deficit increased slightly over 2011 by approximately $56,000.

- The previous Emergency Financial Manager submitted an application for an emergency loan in the amount of $3,900,000. Along with the application, the previous EFM included an updated deficit elimination plan, FY 2013 budget, a cash flow statement, and an accounts payable listing. Based on these reports, the City will experience a cash shortage in the general fund by April 2013 and has outstanding payables, as of December 31, 2012, of $2.6 million. The Department has asked the incoming EFM to review the financial data to determine if the amount of the loan request is appropriate.

- Update: All City issues on the November 6 ballot were defeated including a charter amendment to restructure Council's reporting relationships with staff. A 10 mill operating levy that expired in 2011 was defeated, as was a proposed 2.0694 mill Headlee override. Absence of these revenues would mean the $1.4 million reduction in annual revenues which began in July, 2012, will continue for the cash strapped City. In response to this shortfall the EFM approved, with City commission support, a 10 mill special assessment Public Safety millage which was levied with the winter taxes. It is expected that another effort will be made in the coming months to obtain approval of the 10 mill operating levy that would replace the special assessment.

- The Road Out: Mr. Saunders will review all City operational expenses in an effort to rationalize annual expenses and eliminate deficit spending. The large amount of accounts payable

is a near-term focus. The water plant is a major liability, particularly since users in Benton and St. Joseph Townships have withdrawn from the system due to ongoing political and financial management concerns. The City charter needs to be updated, the performance of City Council needs to be improved, and ongoing liabilities for retiree health care are also an issue. Treasury had anticipated that withdrawal from the City would be a near-term possibility if charter issues could be overcome. However, these recent revenue issues and the demise of the water system customer base, make a near-term exit more challenging. The new EM understands our desire to make our exit as soon as possible.

City of Ecorse

- Joyce Parker was appointed Emergency Financial Manager on August 8, 2012 by the Emergency Loan Board. She was first appointed Emergency Financial Manager on October 30, 2009. She continues to serve Ecorse on a part-time basis while she also serves as Emergency Financial Manager for the City of Allen Park.

- City Council is cool toward an interlocal agreement proposed by Treasury that would create an advisory board under the Urban Cooperation Act, PA 7 of 1967 (Ex. Session) and create a seamless transition process away from an EFM, allowing Ms. Parker to end her service there. A majority of Council believe such an advisory board is unnecessary. Treasury staff is redrafting the ILA to address some of the suggestions made by Council. After AG review, the revised agreement will be reviewed with the Council.

- For the fiscal year ending June 30, 2012 the City had a general fund balance of $2,419,220 or 18.8% of general fund revenues of $12,904,604 and experienced an operating surplus for the first time in several years.

- The Emergency Financial Manager's assignment is essentially complete and she is working part-time.

- The Road Out: The work of the EFM is essentially done. The remaining concern is with the City Council and the City charter language which allows substantial day-to-day involvement of the City Council. Discussions continue on an interlocal agreement to establish a Transition Advisory Board, as explained above. If this voluntary approach is not successful, a TAB can be imposed with the advent of PA 436 in late March.

City of Flint

- Edward Kurtz was appointed Emergency Financial Manager on August 8, 2012 by the Emergency Loan Board. He succeeded Mike Brown who was appointed Emergency Manager on November 29, 2011. The Emergency Financial Manager is anticipated to be in Flint for more than one year. Mr. Kurtz is taking a minimal salary as EFM, while Mike Brown now works as City Administrator, appointed by Mr. Kurtz. It is assumed that Mike Brown will be reappointed as EM in late March, and that Mr. Kurtz will be retained until June to consult with the City on the FY 2014 budget.

- For fiscal year ending June 30, 2012, the City incurred a general fund operating shortfall of $10,169,828 exceeding general fund revenues of $51,497,686 by 20%. This resulted in an unrestricted accumulated general fund deficit of $19,184,850, which is 37% of general fund revenues.

- Update: The City of Flint has been participating with Genesee County on the feasibility of the City's use of a planned water pipe line from Lake Erie that would serve a large portion of Genesee County as an alternative to water supplied by DWSD. An engineering firm selected by Treasury to conduct an independent evaluation of Flint's choices for water supply presented their findings on December 18th. This is a critical long-term decision for Flint and the region. The economics show that but for the excess cost of DWSD water during the three year period of the Karegnondi Water Authority (KWA) pipeline construction, the City will be benefitted by lower water costs in the long term by using the KWA water and treating the water in Flint at their own, existing, water treatment plant. A recent proposal shows that with cooperative efforts with the County, those excess costs can be minimized.

- The Budget for the current fiscal year encompasses both revenue increases and expenditure reductions in an effort to achieve a balanced budget. For example, the budget includes assessments for waste collection, for the operation, maintenance, and improvement of street lights, and a 25 percent increase in water and sewer rates. Voters overwhelmingly approved a 6 mill public safety millage in November that will substantially improve the FY 14 budget. On the expenditure reduction side, the budget reduces the City's workforce by 150 positions (20 percent), and includes employee concessions and a restructuring of employee health care benefits. Retiree health care has been eliminated for future employees. Litigation is pending in federal court to preclude changes to retiree health care. The Emergency Financial Manager estimates that retiree health care costs will increase by $3.5 million during the current fiscal year if he is prevented from implementing the planned changes.

- The City has recently submitted a five year deficit elimination plan that anticipates submittal of an emergency loan application of $12 million to address the accumulated deficit. The remainder of the unrestricted accumulated general fund deficit will be eliminated through $7.1 million in reductions. The City has not yet identified specific cuts but will do so as it works through the development of its fiscal year 2014 budget. The Department is assisting the City with the identification of possible reductions.

- The City's plan to contract for the first time with a private contractor to provide solid waste removal and recycling services was delayed because of an Unfair Labor Practice (ULP) filed by AFSCME. The union presented an alternate plan, which the EFM evaluated and deemed economically unsatisfactory. The City is required to meet with the union to discuss the impacts of the proposed change. The anticipated savings from this initiative is $1 million and the contractor is willing to hire former Flint employees who previously performed this service.

- The Road Out: This is the first year of the EFM's balanced budget and they are currently on track with the budget. Major remaining issues are resolving public safety staffing and effectiveness; establishing new and cooperative approaches to water and sewer services; funding and maintaining infrastructure; defining and sustaining blight eradication strategies; funding OPEB liabilities.

City of Pontiac

- Lou Schimmel was appointed Emergency Financial Manager by the Emergency Loan Board on August 8, 2012. He was first appointed Emergency Manager on October 6, 2011. The Emergency Financial Manager is anticipated to complete his work by mid-2013, but a viable oversight mechanism, such as a Transition Advisory Board (TAB) under PA 436 of 2012, will be necessary for this to happen.

- For fiscal year ending June 30, 2012, the City had an operating shortfall of $1,249,049 exceeding general fund revenues of $38,709,018 by 3%. This resulted in an unrestricted accumulated general fund deficit of $4,748,117 or 12% of general fund revenues. For fiscal year 2013, the City's financial position will benefit from the transfer of the Pontiac Wastewater Treatment Plant. From the assets received, $8.4 million was used to pay off a loan to the general fund from the water/sewer fund; $6 million was used for retiree healthcare bringing the 2013 budget into balance; $3.4 million will be applied to the accumulated deficit from fiscal year 2012.

- The EFM reports that FY2014 would be balanced except for the $6.0 million required for health care costs associated with retired non-public safety employees, and those who are still active employees. Retired public safety employees (there are no active Pontiac public safety employees) are covered by an existing VEBA.

- The Emergency Financial Manager continues to minimize the number of unused vacant properties in the City that are city-owned. The demolition of the Phoenix Center and sale of land project remains on hold after Oakland County Circuit Court Judge Michael Warren issued an injunction barring the City from demolishing the Phoenix Center. Settlement negotiations are proceeding.

- The announced partnership with Oakland County for a restructuring of the ownership of the Pontiac Wastewater Treatment Plant is essentially complete. The capitalization of assets created by the transfer generated approximately $55 million, which was used to reduce bond debt related to Fiscal Stabilization bonds, Water Supply system, Sewage Disposal system, and Building Authority. The transaction has dramatically improved the City's cash position while also eliminating most of the City's outstanding debt, and preserving a reasonable fund for infrastructure maintenance within the City. It is also projected that Pontiac users of the system will enjoy significant reductions in their costs for sewer services in future years.

- Update: The EFM continues to reduce general fund expenses. He has successfully negotiated cost reductions with the City's waste pickup contractor; secured agreement from, the Chief Judge to control the City's subsidy to the 50th District Court by having the Court process its own employee payroll and pay court employees out of its own account instead of the City's general fund account; and he contracted out all remaining DPW services including the snow plowing of major streets with the Oakland County Road Commission.

- The Road Out: Mr. Schimmel expects to leave this summer and strongly supports the use of a transition advisory board. His list of tasks remaining are: Phoenix Center Demolition; sale of DPW building to Consumers Energy; auction of surplus stuff; provide for the redevelopment of the Hayes Jones Community Center; sale of various properties, including golf course; and substantially reduce the $6.0 million annual deficit related to retiree health care.

EMERGENCY MANAGER - SCHOOLS

Detroit Public Schools

- Roy Roberts was appointed Emergency Manager on May 16, 2011 and Emergency Financial Manager on August 8, 2012.

- For fiscal year ending June 30, 2012, the District incurred a general fund operating shortfall of $41,865,408 exceeding general fund revenues of $892,452,098 by 4%. This resulted in an unrestricted accumulated general fund deficit of $83,465,550, which is 9% of general fund revenues. The deficit was significantly reduced by issuance of long-term debt.

- A second $6 million State aid note transaction closed on February 1st to assist in covering the costs associated with the transfer of DPS schools to the Education Achievelment Authority (EAA). The note will mature on July 22, 2013.

- Treasury staff has begun meeting with the EAA to gain not only a better understanding of the EAA's financial & cash situation but how those risks may impact DPS's financial situation. This effort will focus initially on the impact of possible additional school transfers to the EAA (with the loss of enrollment to DPS), the transition of Title I funds, & the "lease – management" MOU between the EAA & DPS. (Concerning the latter item, the $10 million EAA obligation may not be paid when due this August. While this may not have an accounting impact it would impact DPS's cash flow.)

Highland Park Schools

- Update: Don Weatherspoon was appointed Emergency Financial Manager on October 29, 2012.

- The District has not filed its financial audit for its fiscal year ending June 30, 2012 which was due November 15th. The audit is taking longer than expected due to the lack of sufficient record keeping and staff continuity. We have been advised the audit should be complete in the next two weeks

- On August 16, the Emergency Loan Board approved an emergency loan for the School District in the amount of $4.41 million in order for the School District to repay its August 2011 State aid note and meet other short-term expenses. To date, the District has drawn $3.98 million of the loan proceeds.

- On January 18th, the Emergency Loan Board approved a 2nd emergency loan for the School District in the amount of $3.0 million. The issuance of a second emergency loan was anticipated as the first loan was used primarily to repay the District's outstanding State Aid Note in order to avoid a default. The proceeds of the second emergency loan will be used to pay critical vendors and it is expected the EFM would obtain vendor discounts in exchange for quick payment.

- It is anticipated the role of the Emergency Financial Manager will be greatly reduced in the next 12-18 months as prior liabilities are settled and processes are put in place to manage current operations including oversight of the charter school system.

Muskegon Heights Public Schools

- Don Weatherspoon was appointed Emergency Financial Manager on August 8, 2012.

- The District has not filed its financial audit report for fiscal year ending June 30, 2012 which was due November 15th. The audit is taking longer than expected due to the lack of sufficient record keeping and staff continuity. We have been advised the audit should be complete in the next two weeks.

- On August 16, the Emergency Loan Board approved an emergency loan for the School District in the amount of $7.6 million in order for the School District to repay its August 2011 State aid note and meet other short-term expenses. To date, the District has drawn all of the loan proceeds.

- On January 18th, the Emergency Loan Board approved a 2nd emergency loan for the School District in the amount of $3.5 million. The issuance of a second emergency loan was anticipated as the first loan was used primarily to repay the District's outstanding State Aid Note in order to avoid a default. The proceeds of the second emergency loan will be used to pay critical vendors and it is expected the EFM would obtain vendor discounts in exchange for quick payment.

- It is anticipated the role of the Emergency Financial Manager will be greatly reduced in the next 12-18 months as prior liabilities are settled and processes are put in place to manage current operations including oversight of the charter school system.

CONSENT AGREEMENT - CITIES

City of Detroit

- For fiscal year ending June 30, 2012, the City had an operating surplus of $105,842,769. However, when transfers out of the general fund are taken into account, the City's financial position is much worse. The City transferred $236,542,790 with the largest transfer going to the transportation fund for $87.2 million, $61.2 million to the debt service fund, and $80.9 million for interest payments on the pension obligation certificates. This resulted in an unrestricted accumulated deficit of $327,956,700 or 30% of general fund revenues of $1,100,342,313.

- Update: The cash position of the City has continued to deteriorate through the first half of the 2013 fiscal year. After the City's projection of its cash position at the June 30, 2013 year end deteriorated over $60 million over the course of three months (roughly September – November), a renewed emphasis was placed on cash preservation (discussed further below). Absent any further actions, current City projections indicate a negative cash position of roughly $110 million at the June 30 year end. In the past, the City has temporarily "managed" negative cash by postponing property tax distributions to debt service funds and other taxing jurisdictions.

- Update: The plan developed by the City and its advisors, with input from Treasury, includes measures that are estimated to net approximately $117 million in improvements by June 30. This includes roughly $33 million of changes that result in permanent savings, $63 million of short term cash opportunities (including many items that simply defer payments), and release of $20 million in escrow proceeds currently controlled by Treasury. Included among the "permanent savings" are employee furloughs, headcount reductions, suspension of pension accrual (non-union employees), health care premium sharing increased to 30% (non-union employees), vendor cuts, and increase of fees. If implemented on a timely basis, these countermeasures should allow the City to maintain a positive cash position through the end of the year.

- Update: The City is in substantial compliance with the terms of the Milestone Agreement negotiated to control the terms of withdrawal of escrowed funds. This gives the City access to an additional $20 million for which the draw request was received today. The Treasurer has indicated the desire to maintin a $50 million reserve, which means that further draws are unlikely.

- Update: The operational and restructuring firms have all had contracts approved by City Council and have begun work. On February 1, a first draft of the 5 year plan for the City was presented to the Review Team. The plan would eliminate the deficit within 5 years

by significantly lowering employee costs. Changes include a reduction of an additional 500 FTEs, freezing all pension vesting for one year, moving all employees to a defined contribution plan after that, and capping health care expenditures at $125 million a year (compared to a current spend of roughly $190 million). Other potential savings being considered include additional headcount reductions/furloughs, asset sales, debt restructuring, and revenues.

- Update: The Financial Review Team appointed under PA 72 continues its work. The report is due to the Governor on February 16 and there are no plans to ask for an extension as of this date.

- Update: After City Council once again failed to approve the State lease for Belle Isle, Mayor Bing announced the closure of 50 parks and reductions to recreation operations to make up for the foregone cost savings the lease would have provided.

City of Inkster

- The City of Inkster operates under a Consent Agreement which was implemented effective February 28, 2012.

- For fiscal year ending June 30, 2012, the City had a general fund operating shortfall of $3,171,524 or 19% of general fund revenues of $15,859,971. The FY12 shortfall increased the City's general fund unrestricted accumulated deficit to $3,604,783 or 22% of general fund revenues.

- For FY13, the City reduced staffing by 20% and made other expenditure reductions. Current budget forecasts suggest a year end deficit of $1.7 million, consistent with the DEP. The City's deficit elimination plan anticipates the FY14 budget will be balanced. Staff from OFR regularly visit with Inkster and finds them holding their own.

City of River Rouge

- The City of River Rouge operates under a consent agreement which was implemented effective December 15, 2009.

- For fiscal year ending June 30, 2012, the City had a general fund operating surplus of $1,302,690 or 11% of general fund revenues of $11,989,601. The surplus has reduced the unrestricted accumulated general fund deficit to $1,039,067 or 8.6% of general fund revenues of $11,989,601. The 2012 accumulated deficit is approximately half of the previous year's deficit so progress is evident. However, the 2012 operating surplus is a result of the receipt of approximately $1.9 million in legal settlements. Had the legal settlements not occurred, the 2012 accumulated deficit would be an estimated $2,900,000. OFR staff visits with River Rouge and feels comfortable that their ongoing efforts to reduce costs, such as the recent implementation of a public safety officer model for combined police

and fire services will help the City achieve its FY14 budget objective of balanced revenues and expenditures.

LOCAL UNITS OF INTEREST

City of Hamtramck

- For fiscal year ending June 30, 2012, the City had a general fund operating shortfall of $3,303,385 which is 22% of general fund revenues of $14,827,148. This deficit eliminated the general fund balance and resulted in an unrestricted accumulated deficit of $753,733 or 5% of general fund revenues. The cause of the imbalance was the result of the loss of revenue due to the expiration of the Poletown tax increment financing agreement and the failure of the City to reduce its expenditures accordingly.

- The City has submitted an application for an emergency loan for $3 million. The Department is reviewing the application to determine if the City qualifies. In addition to the emergency loan, the City is pursuing the issuance of a tax anticipation note to address its cash shortage expected to occur in March 2013.

- Late last year, the City Council voted to request a financial review by the State. Prior to initiating the requested review, Treasury asked for and the City has submitted a deficit elimination plan (DEP). The plan relies heavily on the receipt of an emergency loan, an increase in rental inspection fees, and an increase in traffic violation revenues. Given the inadequacy of the DEP, Treasury is initiating a preliminary review on Monday, February 11.

City of Highland Park[1]

- For fiscal year ending June 30, 2012, the City had a general fund operating surplus of $1,293,462 or 12% of general fund revenues of $10,718,332. This increased the City's unrestricted general fund balance to $2,199,762 or 20% of general fund revenues. The positive fund balance is a result of the restatement of accrued state revenue from the fiscal year 2011 financial statements and, in large part, the forgiveness of a $4 million payable due to DTE in 2011.

- The City's updated general fund projections indicate the City will reach a deficit situation during FY 2018. Should the City resolve the financial issues related to the Water system the

[1] Several EFMs have been appointed in Highland Park. While the financial emergency in the City remains in effect, no replacement EFM has been appointed. Treasury is working with the Mayor and Council, without an EFM appointment, to get the City out of the business of providing public services.

2018 date could be extended. Office of Fiscal Responsibility staff is working with local officials to develop and implement cost savings.

- Update: The Mayor has announced the City's intent to discontinue using their water treatment plant after attempting to implement MDEQ mandated improvements to the plant. Initial improvements were estimated at $340,000, but escalated to an estimated $5.9 million after valves and other essential parts of the system were found to be inoperable. The estimated cost to demolish the facility is $3.6 million. Currently, the City is purchasing water from DWSD. Negotiations continue between the City and DWSD with the intent of DWSD operating the City's utility systems. One challenge to finalizing this arrangement is the $8 million the City owes DWSD for sewage treatment. Treasury and City officials expect a proposal from DWSD which contains the prerequisites for a cooperative venture to proceed and also addresses the amortization of the City's sewer debt to the DWSD.

- On January 4, 2013, a Quo Warranto request to have Mayor DeAndre Windom, City Council President Chris Woodard, and City Councilman Rodney Patrick removed from office was dismissed. The request is based on the allegation that their oaths of office were not filed in a timely fashion, and that each of these individuals is "in default" to the City, which, under the City Charter, would preclude them from holding office.

- The Road Out: Highland Park's broken water system needs multiple strategies for resolution. DWSD is the major focus here for delivery of treated water and administration of water and sewer bills. The City's existing water treatment facilities are in need of demolition, which will be expensive. In addition to typical OPEB liabilities, H.P. also has a major, bank-funded debt because of a court order related to delinquent payments to police pension funds. That debt will need restructuring in the next 24 months. The continuing effort to minimize the services the City provides makes the City a prime candidate for participation in regional public safety.

The following units of local government are not currently subject to Public Act 72 of 1990, the Local Government Fiscal Responsibility Act:

Royal Oak Township

- The township had an operating deficit of $132,358 and an unrestricted general fund balance of a negative $34,821 at year end 2011. The unrestricted deficit was 3.6% of general fund revenues. However, the operating deficit is 14% of general fund revenues. The unrestricted deficit decreased significantly from 2010 to 2011; a negative $284,416 in 2010 to a negative $34,821. This appears to be related, in part to a 2011 interfund transfer between the Parks and Recreation Fund (dedicated millage) and the Senior /Transportation fund. There is no money budgeted to repay the loan. There is also a loan with a local bank that was not obtained in accordance with regulations, as well as accusations of credit card misuse. A new Supervisor, Clerk, and Treasurer were elected in November and the Treasurer contacted Treasury for assistance. Staff from the Office of Fiscal Responsibility has met with the new Treasurer, in response to her request as well

as the new Clerk. Staff is continuing its discussions with both individuals to assist in improving the Township's financial practices.

City of Taylor

- For fiscal year ending June 30, 2012, the City had a general fund operating shortfall of $3,905,004 exceeding general fund revenues of $40,444,430 by 9.6%. This excessive spending eliminated the prior year general fund balance and resulted in a general fund unrestricted accumulated deficit of $5,359,732. The general fund borrowed $2 million from the water and sewer funds with no apparent commitment for repayment within a prescribed time period.

- The City fell short of its deficit elimination projections by a minimum of $1.0 million. The majority of this can be attributed to Public Safety, which exceeded its budget expenditures by $881,610. Consequently, the City has submitted an updated deficit elimination plan. Staff is reviewing the updated plan to determine if it is reasonable and achievable and will require the City to submit monthly reports to monitor its adherence to the new plan

- The relationship between the Mayor and City Council remains contentious. Rather than work together to solve the City's fiscal dilemmas, the City Council tends to make emotional decisions that seem intended to confront the Mayor. Sometimes, those decisions result in further aggravation of the City's financial condition.

County of Wayne

- Because the County's fiscal year corresponds to the calendar year, current audited financial results are not yet available for FY2012. Based on recent unaudited financial data provided by the County for its 2012 fiscal year, it appears the County will have an increase in the general fund deficit of $21 million, for an accumulated total deficit of $148 million.

- A revised deficit elimination plan has been submitted. Staff is working with the County to resolve several issues within the plan such as the transfer of assets from other funds and unsupported reductions to eliminate the general fund deficit.

- Update: Phase II of the State's consulting engagement contract with Pierce, Monroe & Associates to examine the funds of elected officials and other select departments is expected to be completed by the February deadline. The examination of the substantial balance amount in the Treasurer's Delinquent Tax Revolving Fund should also be completed by February. Anticipated future County borrowing, if any, will be conditioned to require changes in the financial behavior within County government. Treasury remains very concerned about the probability of jail construction cost overruns.

SCHOOL DISTRICTS OF INTEREST

Benton Harbor Area Schools

- On September 17, the Emergency Loan Board approved an emergency loan for the School District in the amount of $2.0 million to assist the District in making payroll and meeting other short term obligations. The note proceeds have been escrowed and are being released upon approval from the Treasurer. While the district had originally indicated a desire for a larger emergency loan, Treasury agreed to the smaller number, with the option to renew the discussion once the district could demonstrate that the budget was in structural balance. As of late January, the District is in compliance with loan reporting requirements. Roughly $100,000 of loan proceeds remains in escrow.

- The District has made substantial progress toward bringing expenses in line with revenues. This includes contracting out services, closing buildings, and negotiating employee savings. Despite these actions, it is still unclear that the budget has been brought to structural balance. The Michigan Department of Education is currently reviewing the newest deficit elimination plan, in consultation with Treasury.

- On January 31st, the District submitted a request for a second emergency loan in the amount of $4.0 million to pay aged payables. The application is currently being reviewed, however current projections reviewed by Treasury show that the District can survive on a cash basis through the end of the school year, but this may leave Accounts Payable in an untenable situation, with the risk of critical vendors discontinuing service. Treasury is currently working with the District on options for tax anticipation notes (which the district has utilized in previous years) and potentially a second emergency loan. As noted previously, a second emergency loan is predicated upon this being the last step toward a structurally balanced budget.

- A preliminary review completed on December 20, 2011 by the Michigan Department of Education found probable financial stress in the District. However, based on actions taken by the District to reduce costs, the State Superintendent of Public Instruction did not recommend appointment of a Review Team

- The School District closed FY 12 with a general fund deficit of $16.1 million on total revenues of $31.9 million. For FY 13 revenues are expected to decrease more than $2 million.

- The District borrowed $9.8 million through the Michigan Finance Authority's August 2012 SAN program. This represents 62.5% of their projected FY13 state school aid. The statutory maximum borrowing amount is 70% of state school aid.

Inkster Schools

- The District's pupil count dropped from 3,173 in 2010 to 2,294 for the current year; a 27% drop in enrollment.
- The District's deficit was $9.3 million in 2010 increasing to $12.8 million in 2012.
- The District borrowed $12.3 million in August 2012 for cash flow purposes; the note matures August 20, 2013. An emergency loan would be needed before August 20 in order to repay the note and avoid a default; however, in the interim, approximately $103,000 of state school aid will be intercepted each month (February – July) to offset the outstanding balance on the note.
- Updated cash flows were received on January 31st and it still appears the District can operate through June although payables have grown from a little over $1 million to $2.7 million.
- The District submitted its board approved deficit elimination plan to MDE on January 21st which outlines a K-8 District with a potential charter of the high school effective July 1st. We will work with MDE to review the plan, however we have noted the following:
    - The plan does not cash flow and fails to take into account repayment of the outstanding state aid note resulting in a $7 + million cash shortfall in August.
    - The proposed DEP does not eliminate the GF deficit until sometime after 2017, likely not until 2021.
    - The plan assumes all the current K-8 students will remain in the District.
- Discussions have been held with MDE regarding initiating a preliminary review under P.A 72 and a meeting is being has been scheduled next week for February 13th with Dennis Muchmore to discuss options.

LITIGATION SUMMARY

1. *AFSCME 25, et al* v *Governor, et al.* This action was filed in United States District Court (Eastern District). The claim is that modifications by the Emergency Manager for Detroit Public Schools to collective bargaining agreements violated various constitutional provisions (e.g., the Contracts Clause and Takings Clause).

   Status: Cross motions for summary disposition were pending. A motion hearing was held on November 1, 2012, and the Court took the matter under advisement.

2. *Bland* v *Brown, Kurtz, et al.* This action was filed in Genesee County Circuit Court. This is an action for declaratory and injunctive relief and mandamus. The claim is that the Emergency Manager transferred the assets of the Flint Retirement System to the Municipal Employees Retirement System of Michigan (MERS) in violation of Act 4. Section 19(1)(m)(iii) of the Act authorizes such a transfer provided the recipient pension fund is actuarially funded at a level of 80 percent or more. The claim is that MERS as of December 31, 2010 was funded at only 76 percent.

   Status: A pre-trial conference was held the last week of October 2012.

3. *Brown* v *Snyder.* This action was filed in Ingham County Circuit Court. The claim is that Act 4 is unconstitutional, facially and as applied. The State sought a protective order in regards to discovery which the trial court denied. On appeal, the Court of Appeals vacated the denial of the requested protective order and remanded. The trial court hearing on remand is September 26, 2012.

   Status: The case was dismissed. The parties on November 19, 2012, signed stipulations and a voluntary dismissal.

4. *Citizens United Against Corrupt Government, et al* v *City of Detroit, et al.* This action was filed in Ingham County Circuit Court. The claim is that a contract by Mayor with an outside law firm violates City charter.

   Status: Awaiting a hearing date.

5. *Citizens United Against Corrupt Government,* et al v *Detroit Financial Advisory Board.* This action was filed in the Court of Appeals. This is an action for *quo warranto*. The claim is that, among other things, no portion of the Financial Stability Agreement, including the Financial Advisory Board, survived the disapproval of Act 4 by the voters.

   Status: The case is pending having been filed on December 10, 2012.

6. *Citizens United Against Corrupt Government,* et al v *Detroit Financial Review Team.* This action was filed in Ingham County Circuit Court. The claim is that negotiation of the Fi-

nancial Stability Agreement, as well as two provisions of the Financial Stability Agreement, violated Act 4. The case was dismissed by the Ingham County Circuit Court.

Status: Plaintiff filed a claim of appeal with the Court of Appeals and plaintiff's brief is due on December 26, 2012.

7. *Coletta et al* v *David Clark et al.* This action was filed in Wayne County Circuit Court and has been certified as a class action involving approximately 9,000 plaintiffs. This is an action for declaratory and injunctive relief and damages. The claim is that trustees of the City of Detroit's General Employees Retirement system and the Police and Fire Retirement system violated various laws and breached certain fiduciary duties in regards to the investment of pension assets.

8. *Davis* v *Detroit Financial Advisory Board.* This action was filed in Ingham County Circuit Court. The claim was that the Board violated the Open Meetings Act.

   Status: The case was dismissed.

9. *Davis* v *Detroit Financial Review Team, et al.* This action was filed in Ingham County Circuit Court. The claims were that review teams were subject to the Open Meetings Act and that the Detroit Financial Review Team had acted in violation of a trial court order. The Court of Appeals held on May 21, 2012, that review teams are not subject to the Open Meetings Act, but remanded to the trial court for an evidentiary hearing on the issue whether defendants should be held in contempt. Subsequently, the trial court declined to hold an evidentiary hearing and plaintiff appealed that decision to the Court of Appeals.

   Status: Payment of plaintiff's costs and attorney fees rendered moot the need for an evidentiary hearing.

10. *Davis* v *Highland Park Financial Review Team* (referred to as *Highland Park II* to distinguish it from the first Highland Park case which claimed that review teams were subject to the Open Meetings Act). This action was filed in Ingham County Circuit Court. The claims are that the terms of review team members expire 60 day (90 day with an extension) after appointment and that Act 4 violated Section 29 of the Headlee Amendment. The trial court dismissed the former claim, but held that Act 4 did violate the Headlee Amendment.

    Status: Plaintiff failed to file a brief.

11. *Davis* v *Parker.* This is an action for *quo warranto*. This action was filed in the Court of Appeals after the foregoing case was filed in Ingham County Circuit Court. The claims are that the Emergency Financial Manager has no entitlement to her office because the statutory process of Act 72 was not followed and that Act 72 is not revived because it was repealed by Act 4.

Status: The Court of Appeals denied application for leave to proceed by *quo warranto*.

12. *Davis* v *Rick Snyder, Michael Flanagan, and Joyce Parker*. This action was filed in Ingham County Circuit Court. This is an action for declaratory judgment. The claims are that the statutory process of Act 72 was not followed, that Act 72 does not authorize the grandfathering of actions taken under Act 4, and that the criteria for appointment of emergency managers under Act 4 and emergency financial managers under Act 72 differ.

    Status: A motion hearing is scheduled on January 30, 2013.

13. Davis v Roberts. This action was filed with the Michigan Supreme Court. The action is for quo warranto. The claims are that the Emergency Financial Manager has no entitlement to his office because the statutory process of Act 72 was not followed and that Act 72 is not revived because it was repealed by Act 4. The Court of Appeals previously denied relief and held that Act was revived.

14. *Davis* v *State of Michigan, City of Detroit, et al.* This action was filed in Ingham County Circuit Court. The claim is that the financial stability agreement violates the Headlee Amendment. The trial court denied plaintiff's motion for an evidentiary hearing, but allowed depositions. The Court of Appeals granted the State's application for leave to appeal. Defendants filed a reply brief on September 27, 2012.

    Status: The Court of Appeals held oral arguments on December 5, 2012. The matter is awaiting decision.

15. *DPOA* v City of Detroit. This action was filed in Wayne County Circuit Court. This was an action for injunctive relief. The claim was that duty to engage in Act 312 arbitration survived the duty to bargain under the Public Employment Relations Act. On August 30, 2012, the Court granted the State's motion to intervene, dissolved a previously entered temporary restraining order, refused to enter a preliminary injunction, and determined that the City's employment terms are controlling until a new agreement is reached. The Court dismissed the case.

    Status: DPOA filed with the Court of Appeals a claim of appeal and motion to stay, the latter of which the Court denied.

16. *DPOA* v *City of Detroit*. This action was filed in the Court of Claims (Ingham County Circuit Court). The claim is that the duty to engage in Act 312 arbitration survived the duty to bargain under the Public Employment Relations Act.

    Status: Supplemental briefs have been filed by all parties who are awaiting a decision.

17. *FPOA* v *City of Flint*. This action was filed in Genesee County Circuit Court. This is an action for injunctive relief. The claim is that an Emergency Manager order which im-

posed a labor contract should be invalidated because the statute under which it was issued, Act 4 of 2011, no longer is in effect.

18. *Kincaid* v *Kurtz*. This action was filed in Genesee County Circuit Court. This is an action for *quo warranto* against the Flint Emergency Financial Manager. The claim is that the appointment of the Emergency Financial Manager is unconstitutional because Act 72 was repealed by Act 4 and, per the anti-revival statute (MCL 8.4), Act 72 was not revived upon the suspension of Act 4. Plaintiff's amended complaint and brief as requested by the Court were due on November 19, 2012. A hearing was scheduled on November 26, 2012. The Court granted a motion to adjourn the November 26, 2012, hearing which was rescheduled for December 20, 2012.

    Status: The case was dismissed on December 20, 2012.

19. *NCO Acquisitions, LLC, et al* v *Governor, et al*. This action was filed in United States District Court (Eastern District). The claim is that termination lease by Emergency Manager for Detroit Public Schools violated the Contracts Clause and Takings Clause of the federal Constitution.

    Status: The parties have filed cross motions for summary disposition and a hearing has been scheduled for January 9, 2013.

20. *Roberts* v *Murray, et al, and Detroit Board of Education*. This action was filed in Wayne County Circuit Court. This was an action for injunctive relief filed by the Emergency Financial Manager with a cross claim for injunctive relief by the School Board. The Court adopted the position set out in Attorney General Opinion No. 7267 that Act 72 is revived during the suspension of Act 4. The Court also held that actions taken under Act 4 prior to the time of its suspension remained valid.

    Status: Not available.

21. *Sutton v Brown*. This action was filed in Ingham County Circuit Court. The claim was that the appointment of Mike Brown as Emergency Manager for the City of Flint violated the Headlee Amendment. On August 8, 2012, the trial court dismissed the complaint due to lack of service by plaintiff.

    Status: The case was dismissed.

22. *Valenti* v *Snyder, et al*. This action was filed in United States District Court (Eastern District). The claim is that the Detroit financial stability agreement violated the contracts clause, procedural due process, and amounted to a tortious interference with contractual relations. The Court concluded that the suspension of Act 4 rendered the case moot, but that the case could be revisited depending upon the outcome of the Act 4 referendum.

Status: The case was dismissed, but on January 24, 2013, plaintiffs filed a motion with the court to reopen the case.

23. *Watkins, et al* v *the Governor, State Treasurer, and Attorney General.* This action was filed in Ingham County Circuit Court on behalf of two members of the Pontiac City Council, four members of the Benton Harbor City Commission, and all nine members of the Flint City Council. This is an action for mandamus or, in the alternative, declaratory, and injunctive relief. The plaintiffs seek to have the reappointments of the seven existing emergency financial managers declared invalid on grounds that the suspension of Act 4 did not revive Act 72.

    Status: The case was dismissed. At a motion hearing on December 5, 2012, the Ingham County Circuit Court denied plaintiffs' requested relief and granted summary disposition in favor of the State.

24. *Welch et al* v *Brown, Kurtz, et al.* This action was filed in United States District Court (Eastern District). This is a class action for injunctive relief and damages. The claim is that changes implemented by the Emergency Manager under Act 4 and to be implemented under Act 72 to retiree healthcare violate certain constitutional and contractual rights of retirees. At a hearing on September 6, 2012, the Court declined to grant an injunction. Instead, the Court directed the parties to meet. The Court was of the opinion that plaintiffs appeared to misunderstand the nature of changes to their coverage and should first meet with city representatives to discuss those changes.

    Status: The meeting between plaintiff's counsel and City's counsel was held and plaintiffs are expected to continue litigation.

Subject: Proposal to Address Short Term Funding Issues Associated with KWA

Good afternoon Mr. Fraser:

Per Ed Kurtz, please find attached the City of Flint's proposal to address the short term funding issues associated with choosing KWA as the city's water source.

Maxine Murray
Executive Assistant to
Mayor Dayne Walling
Edward J. Kurtz, Emergency Financial Manager
Michael K. Brown, City Administrator

Dayne Walling
Mayor

Proposal to Address Short-Term Funding Issues Associated With Choosing KWA as the City of Flint's Water Source

Flint officials have spent numerous hours considering the options of securing quality water at an affordable price for city residents and businesses. There have been many discussions with KWA and County officials, state officials, and representatives of the Detroit Water and Sewer System. Our conclusion is that participation in the KWA project will be in the best interests of the City of Flint, both in financial terms and in the future development of the region. Over the next 30 years, we project that participation in KWA will be less costly than continued participation with DWDS by at least $58 million and as much as $293 million.

The one issue of concern is the short term costs associated with joining KWA while continuing as a customer of DWSD who is paying a 15% penalty for failure to enter into a 30 year contract with DWSD. The issue is significant financially:

1. The up front cost of KWA during the 3 year construction period is projected to be $2,325,600.
2. The costs associated with continuing to pay DWSD an approximate 15% premium for not signing a 30 year model contract is projected to be $5,504,524, assuming an annual rate increase of 4.4% for each of the three years.

I am pleased that we have identified a strategy which will mitigate this concern:

1. With respect to the up front costs of KWA, the City and the Genesee County Water and Waste Services (GCWWS) have agreed in principal that the City's six miles of 72" pipeline located in Genesee County will be transferred to GCWWS in lieu of the projected $2.3 million up front payment. While this is subject to documentation of value, we believe that the value of the pipeline to GCWWS is at least $2.3 million. It would be our intent to lease that pipeline to the GCWWS for three years for $2.3 million and then deed it to GCWWS for one dollar when the pipeline is completed and KWA is delivering water to Flint. Once the City is part of KWA, the pipeline has no value to the City.

2. With respect to the ongoing penalty costs imposed by DWSD, it would be KWA's intent to enter into negotiations with DWSD to purchase their 72 inch pipeline which runs from Lapeer to Genesee County. This pipeline would have no value to DWSD when KWA is operational with Flint as a partner. In principle, the KWA offer would include contracting with DWSD at a reasonable rate to be the backup for KWA, including the elimination of the 15% penalty to Flint for the 3 years that KWA construction is underway and Flint is purchasing water from DWSD. The elimination of this penalty has the potential to reduce the cost of water to Flint during the three year construction period by some $5 million.

We believe that this strategy has long term benefits to Flint, KWA, and DWSD. First, it makes use of existing infrastructure which would otherwise be abandoned as KWA goes forward. Secondly, it reduces the current projected costs of building KWA. And finally, it benefits DWSD by providing them a continuing revenue stream as the provider of redundancy. However, should we be unsuccessful in negotiating an equitable arrangement with DWSD, we will pursue an alternative strategy.

Development of this proposal has opened the possibility of additional cooperative arrangements between the City of Flint and the GCWWS. We have agreed to begin discussions on the possibility of the GCWWS contracting to operate the Flint Water System. The plan would be to reach a conclusion before the start of the next fiscal year. If an agreement is reached, then negotiations would begin immediately on waste water treatment as well. This could be the start of a regional water and sewer authority.

KPMG

City of Flint

Water Supply Project
Key Considerations

November 2012

AUDIT • TAX • ADVISORY

The City of Flint Water Supply Project

Project Needs

- **Protecting public interest** – the City should articulate, protect and promote public policy objectives and interest while obtaining the best long-term solution.
- **Explore all options** – with respect to the options already considered, the City should understand the financial impact over the long-term of those options (KWA vs. DWSA); and which option provides a long-term cost effective solution to meet water demands.
- **Balance project risks and costs** – the City of Flint should identify and analyze project risks and develop an optimal risk allocation and procurement strategy that balances risk and cost to the City.
- **Minimize financial impact** – the City should evaluate the financial implication of the procurement options on all of the requisite infrastructure on the City's credit rating, balance sheet and water rates with a view to obtaining a lifecycle cost based solution.
- **Governance** – the City should assess various governance elements – e.g., voting rights, operation and maintenance requirements and associated costs, water entitlements, future expansion/contraction, binding vs. non-binding decisions, etc.
- **Procurement process** – the City should develop a project scope and procurement strategy that maximizes competitive interest in the project.

Unique Challenges

- A thorough understanding of and experience with key contractual issues are critical:
  - Multi-jurisdictional project and inter-relationship with stakeholder goals;
  - Access to financing instruments;
  - Performance requirements;
  - Operational considerations;
  - Insurance and bonding requirements;
  - Warranties and guarantees of work products;
  - Environmental approvals and regulatory permits;
  - Procurement method;
  - Payment mechanism; and
  - Potential impact on the water rates.

KPMG

© 2012 KPMG LLP, a member firm of the KPMG network of independent member firms affiliated with KPMG International a Swiss cooperative All rights reserved Printed in US KPMG and the KPMG logo are registered trademarks of KPMG International a Swiss cooperative

Project Risks

- The Lake Huron Water Supply Project involves a risk profile and procurement considerations that are different from a typical capital project.
- An appropriate and acceptable balance of risk and control is required after careful consideration of tradeoffs:
  - Demand and offtake risk;
  - Planning, design, engineering;
  - Regulatory approvals and permits;
  - Geotechnical / Site conditions;
  - Hazardous substances;
  - Financing risk;
  - Project costs and schedule delays;
  - Construction and materials;
  - Construction defects;
  - Contractor insolvency;
  - Operations risk; and
  - Performance risk

KPMG

Allocating Project Risks

- The Lake Huron Water Supply Project can be procured under a range of different contract models.
- The contract model defines the roles of public and private sector partners and how project risks are shared.

	Design	Construction	Operate & Maintain	Finance
Design Bid Build (DBB)	○	○	○	○
Design Build (DB)	●	●	○	○
Design Build Operate/ Maintain (DBOM)	●	●	●	○
Design Build Finance Operate/Maintain (DBFOM)	●	●	●	●

○ Risk retained by The City of Flint ● Risk transferred to Private Sector

- The long term risks for the City of Flint in implementing the Lake Huron Water Supply Project can be very different depending upon how the procurement is structured.

KPMG

Lessons Learned from Other Projects

- Issue that will need to be considered based on our experience (we understand that a number of these already are under consideration) include consideration of:
  - Authority (KWA) membership and voting rights;
  - Clear articulation of funding options and implementation, including membership responsibility apportionment
  - Facilities ownership and management, including competing facility (e.g., DWSA)
  - Governance – board membership, terms, responsibilities, and officers
  - Taxing authority on local jurisdictions
  - Water supply needs for developing areas vs. developed areas
  - Cost allocation for future capital projects – e.g. based on usage, entitlements, etc.
  - Rate setting methodology – e.g. based on actual usage, capacity, fixed capital costs and variable O&M costs, etc.
  - Financing structure for major capital project (e.g., tax-exempt bond funding, PayGO, alternative or private finance etc.)
  - Consideration of the whole of life management and costs of the options being considered including what happens at the end of the useful life of the capital assets

Key success factors

- Strong project leadership
- Clearly defined project scope and objectives
- Availability of internal public sponsor resources and external advisory support
- Thorough planning and risk assessment in the early stages
- Project solution that takes operational requirements into consideration
- Well defined, fair and transparent procurement process
- Committed project timeline
- Proactive communication with senior staff, elected officials and stakeholders
- Early and meaningful dialogue with the industry
- Political and public support
- Long term service level to consumers

Subject: RE: UPDATED FLINT DWSD KWA ASSESSMENT

Importance: High

Roger has reviewed this and he had the following comments:

- We dodged the question of why TYJ&T costs estimates were double KWA.
- We need to reconcile the difference adequately.
- Recommendations "rings hollow" without more detail.
- If TYJ&T is "full of %&#%, there is a lack of substance to justify it
- Report is Too Bland!
- Andy's questions should be early in the report and there should be a direct linkage.

I want you to revisit the report given Roger's comments and make the necessary changes.

Let me know if you have any questions.

LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

ANALYSIS REPORT

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Updated Flint Water System Status Assessment

DATE: February 15, 2013

Analysis Summary

On November 26, 2012, the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The overarching purpose of this study was to provide objective analyses to the State Treasurer and to Flint's Emergency Financial Manager (EFM) in order to secure potable drinking water for the City for the foreseeable future. The Office of Fiscal Responsibility (OFR) has been the lead office representing Treasury in this project.

On January 14, 2013, the State Treasurer requested responses to three questions: 1) Show the different, projected construction costs provided by TYJT and by the City of Flint/KWA. If these costs are different, explain why Treasury believes that the projects provided by Flint/KWA are acceptable; 2) identify the construction contingencies included in the TYJT and Flint/KWA projections; and 3) identify the options Flint will utilize in the event of a construction cost overrun or a delay in construction by KWA.

This has been a very difficult project to analyze because of the number of proposals to consider, differences of opinion about the conclusions of various engineering analyses that have been conducted, the fact that the analyses are comparing an existing, operational water system with one that has not yet been designed, and conditions within the City of Flint that make it difficult to assess their true water needs.

However, despite these difficulties, I believe that **KWA** presents the best future option to provide potable water for the City of Flint in the future. Long-term, KWA appears to be the cheaper option; the quality of water will almost certainly improve; Genesee County appears willing to assist the City securing the financial resources for their portion of the project; this project could signify the beginning of better collaboration between the City of Flint and Genesee County; the KWA project has both political and popular support.

The following details how this recommendation was arrived at:

Background:

On December 21, 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, TYJT outlined 5 options that they had analyzed. These options were: 1) 100% water provision by the City of Flint Water Plant from its water source of the Flint River; 2) 100% provision of untreated Lake Huron Water by KWA (which would require treatment by the Flint Water Plant); 3) Effective 100% provision of treated drinking water by DWSD; 4) Provision of variable amounts of water from DWSD through the existing Potter & Baxter mains (this option called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs); and 5) Provision of variable amounts of water from DWSD through the 72" Imlay City main (this option also called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs). Each of the blending options looked at Flint purchasing 4, 8, or 12 Million Gallons per Day (MGD) from DWSD and blending the balance in river water to achieve their maximum daily water needs of 18 MGD. The Imlay City option also provided for DWSD to sell the 72" main to the City of Flint, which would then become the operational and maintenance responsibility of Flint.

From the presentation of the preliminary report on December 21 to the submission of the final report to the State by TYJT on January 29, 2013, a number of developments occurred that made analysis and arriving at a final decision very difficult. They were:

- DWSD provided the City of Flint with at least two modified proposals to consider.
- TYJT and Rowe Professional Services Company (Rowe), the principal engineering firm for KWA (and Genesee County and the City of Flint), began disputing the others' conclusions and estimates regarding the construction of the KWA pipeline.
- The Flint EFM also disputed several of TYJT's conclusions. At a January 10, 2013, meeting with Treasury, the EFM also eliminated the 100% Water Plant option, using the Flint River as a 100% water source (which was cheapest option, as determined by TYJT).
- At a January 10, 2013 meeting, Flint officials eliminated all of the DWSD Imlay City options (which were the cheapest DWSD options) over concerns of owning and maintaining the 72" water main. They also eliminated consideration of any of the blending options originally proposed to DWSD, in part over concerns of added costs to soften the water. This effectively left the only options remaining under consideration by Flint to be the 100% DWSD option (which TYJT estimated to be more expensive than either of the KWA cost options) or joining KWA.

I believe that TYJT's analysis was hampered by the very short timeframe in which they attempted to conduct this analysis; which, may have led to be being more conservative in some of their estimates. I believe that some of the comparable systems used in their analysis may not have been the best options but given that KWA is still in the design phase, may represent the best selection of comparable. I also believe, for whatever reasons, that all of the information (from both DWSD and KWA) TYJT needed to effectively analyze these options was not provided to them.

Projected Construction Costs:

Based upon the provided construction estimates, TYJT estimates the KWA construction costs at **$357.6-million**. KWA estimates construction costs at **$272.4-million**. TYJT states in their final report that they received "limited information" from KWA, which might have resulted in more conservative estimates.

The primary differences between the two estimates center around 1) the cost of constructing the pumping stations; 2) land acquisition costs; 3) contingency costs (discussed below); 4) the provision of

construction management services; 5) design costs; and 6) redundant power at the pumping stations. Cost estimates were reasonably similar by both firms in other areas except for those noted above.

The cost of constructing the pumping stations is the biggest difference between the two estimates **($24.6-million vs. $54.5-million)**. TYJT stated that they believe KWA had not designed the pumping stations to the point where more accurate numbers could be achieved. TYJT also stated that their estimates were based on construction costs for a similar project in SE Michigan. KWA maintains that construction costs in Genesee County are much lower than in SE Michigan and that they have extensive experience in construction projects that will help keep costs in-line. KWA has also stated that the construction of the transmission pipeline will be done by multiple contractors in order to save time and allow more Michigan contractors to bid on the project.

TYJT added **$1.2-million** to their estimates for land and easement acquisition. KWA has stated that they have already secured nearly all of the land and easement accesses needed for this project. It is likely that TYJT was unaware of this when they developed their estimates.

TYJT also added 5% **($14.4-million)** to their estimated base cost for construction management services. TYJT has stated that KWA has not taken these costs into account. KWA maintains that they have accounted for them and these costs will not be that high.

Nearly **$18-million** was added to TYJT's estimates for design costs and legal work for the design of both the pumping stations and the transmission pipeline. KWA maintains that they have accounted for these expenses.

TYJT also included **$1.3-million** in new costs for standby power at the pumping stations. KWA has made no provisions for redundant power at the pumping facilities. TYJT included the provision of redundant power in their estimates and notes that this is an industry standard. KWA officials have stated that the new water plant will have redundant power but that the pumping stations will not. The stated reasons for not including redundant power were cost containment, that Flint can use the Flint River as a backup water supply in the event of an extended power outage and that the KWA systems' water storage capacity will allow for 7 days of reserve supply. KWA has also stated that they will look at installing standby power later but can utilize portable generators at the pumping stations, if necessary.

If the additional costs are not included, then the TYJT and the KWA estimates are within 5% of each other. This may/may not be acceptable differences, but I believe the only way to verify the accuracy of either estimate would be to utilize a third engineering firm to independently review both TYJT and KWA's estimates.

Project Contingency:

Construction contingency costs, also known as Engineering, Land, Administration, and Contingency costs (ELAC) are summarized in an attached chart developed by Rowe for the City of Flint. KWA/Rowe estimates total construction at $272.4-million, with **$53.2-million** (25%) for ELAC contingencies. County Water and Sewer Administrator John O'Brien clarified at a January 28, 2013 meeting that there is a 15% contingency for unforeseen issues and 10% "extra." TYJT estimates total construction at $357.6-million, with **$107.3-million** (30%) for ELAC contingencies.

TYJT stated that they believe that 25% ELAC for a project of this scope that is (at the time of the final report) less than 15% designed is insufficient; hence the more conservative estimate. The 5% difference in ELAC costs adds nearly $40-million to the TYJT estimate.

Construction Cost Overrun/Construction Delay Options:

The OFR is not aware of any contingency plans developed by either KWA or the City of Flint to address construction cost overruns or significant construction delays. The final TYJT Water Supply Assessment Report does reference an October 31, 2012 letter from KWA to EFM Kurtz in which KWA anticipates a "worse-case scenario" of a 15% cost overrun and a one-year operational delay. KWA projects, under this scenario, that water from DWSD would be cheaper than KWA until 2020 as opposed to 2016; reducing projected cumulative savings from $19-million to $3.9-million by Year 8 (2020).

County Drain Commissioner Jeff Wright stated at a January 28 meeting that, if necessary, KWA has the authority to borrow more funds to complete the project in the event that delays or cost overruns necessitate the borrowing of more funds. However, Mr. O'Brien also stated that the January 28 meeting that KWA expects to purchase an insurance policy to insure against delays to the project. Drain Commission Wright also indicated that if construction bids come-in significantly higher than estimated that KWA will likely reassess its approach to this project.

Conclusions:

It is likely that TYJT's estimates are overly conservative. Their own analysis concludes that KWA's projections are cheaper than their estimate of the KWA project. Even with a 15% cost overrun and a one-year delay (Worst-case scenario), KWA's estimate is still lower than TYJT. All estimates for KWA are cheaper than the 100% DWSD option (all other DWSD options were eliminated from consideration by the EFM).

That is not to say that the KWA estimates are without fault. KWA is a new venture and the "unknowns" exist at the initial phases of the project. KWA has the potential to be the cheaper, long-term cost for the City of Flint after the bond debt for construction is retired. Significant construction delays and/or cost overruns could greatly add to the cost of this project, which could add to the financial burden on Flint.

Realistically, the true cost for this project will likely be in the middle of the two estimates. The bids for construction of the KWA lake water intake will be opened on February 26, 2013. Comparison of the bids and the estimates for intake construction could be an indicator of the more valid estimate.

There are also some additional factors that are outside of the three questions asked by the State Treasurer that influence a final recommendation on this project. The first is DWSD. DWSD is a "known" entity and the system is already in-place and in operation. DWSD may also be the cheaper option in the short term. However, selecting them requires a 30-year commitment and the unknown aspect of future rate increases is very concerning to Flint officials. All estimates show KWA being cheaper to Flint than DWSD after capital costs are retired. There also appears to be considerable local resistance to continuing a relationship with DWSD.

The upfront costs and the premium water charges assessed by DWSD while KWA is being constructed are of great concern to City officials. Flint officials have indicated that approximately **$3.5-million** in capital upgrades is needed for the Water Plant if the KWA option is selected. However, at a January 28, 2013 meeting, County Drain Commissioner Wright indicated that Genesee County will permit Flint to participate in its revenue bond sale for KWA for Flint's 30% share of capacity in the KWA System and for plant upgrades. Given Flint's current financial situation, were this participation to occur, it will be a positive development for the City because it is likely Flint would have a very difficult time issuing bonds on the strength of its own credit rating. The Drain Commissioner also indicated a willingness to discuss how KWA might mitigate the $7- to $8-million cost of the "premium" rate that would be charged to the City of Flint by DWSD for the City to purchase water while KWA was being constructed.

Recommendation:

A recommendation is being made to support the City of Flint joining KWA. Given, the conservatism of TYJT's estimates and the fact that all KWA estimates are cheaper than the 100% DWSD option, KWA appears to be the logical choice. EFM Kurtz has stated that he believes the KWA option is the cheaper alternative over time. There appears to be public support for the KWA project and EFM Kurtz has also stated that he believes that the Flint Mayor and City Council will support the KWA Project.

Also, the potential inclusion of Flint in the issuance of revenue bonds by Genesee County and the potential for KWA to assist the City in mitigating some of the DWSD premium charges could greatly reduce Flint's financial concerns.

There also appears to be good cooperation between City and County officials in discussing this project and this level of engagement and dialogue between city and county officials because of this project could continue to grow and lead to additional areas of cooperation and collaboration.

If further analysis on this issue is needed, please let me know.

David - This is to confirm Friday's 130pm meeting. Please send me the location. I met with Mr. Dillon today and he said to get with TYJT and discuss the Flint issue. I believe he was giving you and me full authority to meet and discuss. Feel free to call or email him. So , I would like to bring Director McCormick with me tomorrow and see the new digs and talk about Flint. Does that work? Jim

Local Government Continuing Agenda
Please submit updates at least one hour before meetings begin

Discussion Points:
Governor's Monthly Memo update
Real estate transfer tax
Increased reporting requirements triggers
Act 72: Have all cities submitted their requirement since the switch to PA 72?
DEP reporting requirements
Wayne County DTRF
Cities that require Pension and OPEB analysis - We have received 11 actuarial reports from Benton Harbor, Ecorse, Flint, Highland Park, Harper Woods, Inkster, Muskegon Heights, Pontiac, River Rouge, Taylor and Wayne County. Detroit and Hamtramck have not submitted information and a follow up letter will be sent. (ek 1/7/13)
EFM salaries
Dashboard Software-Two meetings with DTMB scheduled

Local Units:
Allen Park – Discussed emergency loan with Joyce Parker. A.P. will need loan by the end of Feb. Joyce would like to be approved for $6M and will need $2M immediately to address cash flow. The remaining $4M can be held in escrow if they need it. Joyce is putting together DEP and is looking at the sale of movie studio as well as options to reduce retiree healthcare costs (ss 1/8)

Joyce is discussing shared services with Taylor's Mayor Lamarand. Initial focus is on fire. Meeting is scheduled with Andy for 11:30 a.m. Friday, 2.1.13. Joyce plans a review of her DEP and financial plan with OFR and Roger during the week of Feb. 4. (rf 1.30)

City of Benton Harbor – Tony Saunders has had positive discussions with the Mayor and a majority of the Commission members. Tony has met with Joe Harris and spent about five hours talking about Joe's efforts. Pending his start at the end of this week, Tony has been doing impressive due diligence on the City and meeting with many folks. (rf 1.30)

The latest emergency loan amount remains uncertain. Tony wants to evaluate the near-term needs before a loan app is finalized.

Benton Harbor Area Schools

City of Dearborn Heights

City of Detroit – After Roger and Ed met with Steve Hilfinger, it appears the three of us are not impressed with the proposal prepared for and submitted by Kriss Andrews. We are arranging to meet with Chris Gannon of Conway MacKenzie to strategize about the proposals and what an execution plan would look like.

MEDC is interested in the status of Treasury's discussions with the City on their plans for PDD, and more broadly, the Treasurer's bigger picture views on the City's plans for PDD. This would include what if

anything is included in any agreements relating to milestones for draws on the escrow funds as it relates to PDD reforms. (ek 1/14)

Detroit Public Schools –

Ecorse – A revised version of the ILA will be presented to Ecorse next week. (RF 1.30)

Village of Elberta

Flint – Roger, Randy and Eric met with City officials, County Drain Commissioner and staff, and Rowe Engineering for talk about the KWA. Details were shared regarding the status of the project; the history of the City and the County in dealing with DWSD; opportunities for additional collaboration with the County on water and sewer projects; and how the County could help the City with the higher costs of DWSD water during the first three years of the KWA project (construction). Staff sees KWA as the better long-term solution to the City's water issues, with the one caveat being the higher DWSD costs. Ed Kurtz is optimistic that those higher costs can be addressed in ways that will not compromise the City's finances. City staff are convinced that they must plan for no more increases in water rates. (rf 1.30)

Handy Township

Highland Park City – L.G. is working on a long term plan for the City to have submitted by 2.15.13. (rf 1.30)

Highland Park Schools

Hamtramck – A preliminary review is recommended. Suzanne will explain. (rf 1.30)

Harper Woods –

Inkster – MDEQ is requiring the city to install CSO improvements as part of an order by Judge Fiekens and estimated to cost $20+ million. OFR staff attended a meeting on 12/17 with city staff and MDEQ staff to assess the necessity of the improvements given the city's current financial condition. (ek 12/17)

City of Muskegon Heights –

Muskegon Heights Public Schools

City of Pontiac – Lou submitted an updated project list. Should be able to go to a TAB in summer. (rf 1.08)

Pontiac School District

The preliminary review by the Department of Education found the existence of probable financial stress, but recommended that a financial review team not be appointed. As with Benton Harbor Schools, this recommendation is inconsistent with Section 12 of Act 4. (FH)

City of River Rouge – OFR staff is conducting an analysis of the PPT legislation's impact to the City. (ek 1/14)

Royal Oak Township – Staff was contacted by the newly elected Treasurer re: possible violations of PA 2 and Pa 33. Staff is reviewing documents provided by the Treasurer. (ek 1/8)

The FY 2013 budget has not been adopted and there are questions about authorizing payroll on 1/17/13; confidence in township attorney and financial consultant is low. (ek 1/14)

City of Taylor – The City has inappropriately borrowed from other funds to cover up cash flow issues. The deficit is $5M and the feeling is that the council won't take the deficit seriously but the mayor doesn't seem able to come up with a reasonable plan either. (ss 1/8)

Joyce and Roger will be meeting with the Mayor to discuss service sharing. (rf 1.08)

Wayne County – Roger, Ed and OFR staff met with Community Mental Health personnel during December to discuss CMH's desire to participate in Phase II via an MOU similar to the one with DHS. OFR staff is preparing both a Statement of Work and a corresponding MOU. (ek 1/8)

Phase II contract -The majority of fieldwork required in the contract has been completed. Most of the contract items are more than 90% complete. The Contractor believes that a draft of the report will be completed by the end of the month. The addendum for the delinquent tax revolving fund is approximately 90% complete according to the Contractor. (ek 1/8)

Carla Sledge has submitted a draft DEP eliminating the deficit by 2017. DEP is limited on details so will need to discuss its acceptance. The County is also submitting an application for a TAN this month (ss 1/8)

Webber Township – OFR staff met with Township Supervisor and OFR staff is preparing an engagement proposal to prepare multiyear forecast for consideration by Township Board. (ek 1/14)

Treasury intervened in this case in July and is working with the Township and the property owners toward a settlement. Our perception is that the current assessed values will not be sustained. (RF 11.13)

Prior Approval Applications (ss 12/11)
Mount Clemens ($5.7M) – under review by LAFD
Lansing Township DDA ($7.5M)-under review by LAFD
Village of Prescott ($690,000) – under review by LAFD
City of Flint Hospital Building Authority ($71M) – Incomplete application

Emergency Loan Applications- cannot exceed $35 million total (ss 9.25)
Allen Park-$2 million (application received and under review)

Benton Harbor-$3 million (application received and under review)
Hamtramck - $3 million (application received and under review)

Additional

Melvindale – Cash flow shortage, budget violations (ss 12/11). OFR staff had a phone conference with the Administrator, City Attorney and Finance Director on 1/11, as part of enhanced DEP reporting requirements. Staff is preparing a proposal for an engagement.(ek 1/14)
Lincoln Park – Contacted by the City Manager on 1/11 who stated the city will be out of cash in April. OFR staff is examining most recent audit for possible causes. (ek 1/14)

Action Items 12-11

Suzanne is going to send Cary to talk to the Wayne County Prosecutor regarding cuts and TAN conditions
Suzanne is reviewing the Brownstown Township DDA audit
Tom Saxton and John Barton will notify Jack Martin about the need for a draw request. Releasing $10 million to Detroit after verifying November milestones have been met.
John Barton is sending some bullet points about Pontiac to Andy
Benton Harbor- Andy meeting with Governor on Wednesday, talking to Ed and Roger Wednesday morning about how to resolve toxic environment before Andy meets with the Governor.
I am calling Phil Pierce regarding the Wayne County DTRF
I am also adding the necessary agenda items to our land bank conference call agenda

Additional:
Adding Real Estate Transfer Tax to the next meeting agenda
Adding Increased Reporting Requirements triggers to the next meeting agenda

ANALYSIS REPORT

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Updated Flint Water System Status Assessment

DATE: February 21, 2013

Analysis Summary

On November 26, 2012, the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The overarching purpose of this study was to provide objective analyses to the State Treasurer and to Flint's Emergency Financial Manager (EFM) in order to secure potable drinking water for the City for the foreseeable future. The Office of Fiscal Responsibility (OFR) has been the lead office representing Treasury in this project.

On January 14, 2013, the State Treasurer requested responses to three questions: 1) Show the different, projected construction costs provided by TYJT and by the City of Flint/KWA. If these costs are different, explain why Treasury believes that the projects provided by Flint/KWA are acceptable; 2) identify the construction contingencies included in the TYJT and Flint/KWA projections; and 3) identify the options Flint will utilize in the event of a construction cost overrun or a delay in construction by KWA.

This has been a very difficult project to analyze because of the number of proposals to consider, differences of opinion about the conclusions of various engineering analyses that have been conducted, the fact that the analyses are comparing an existing, operational water system with one that has not yet been designed, and conditions within the City of Flint that make it difficult to assess their true water needs.

However, despite these difficulties, I believe that **KWA** presents the best future option to provide potable water for the City of Flint in the future. Long-term, KWA appears to be the cheaper option; the quality of water will almost certainly improve; Genesee County appears willing to assist the City in securing the financial resources for their portion of the project; this project could signify the beginning of better collaboration between the City of Flint and Genesee County; the KWA project has both political and popular support.

The following details how this recommendation was arrived at:

Background:

On December 21, 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, TYJT outlined 5 options that they had analyzed. These options were: 1) 100% water provision by the City of Flint Water Plant from its water source of the Flint River; 2) 100% provision of untreated Lake Huron Water by KWA (which would require treatment by the Flint Water Plant); 3) Effective 100% provision of treated drinking water by DWSD; 4) Provision of variable amounts of water from DWSD through the existing Potter & Baxter master meter (this option called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs); and 5) Provision of variable amounts of water from DWSD through the 72" Imlay City main (this option also called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs). Each of the blending options looked at Flint purchasing 4, 8, or 12 Million Gallons per Day (MGD) from DWSD and blending the balance in river water to achieve their maximum daily water needs of 18 MGD. The Imlay City option also provided for DWSD to sell the 72" main to the City of Flint, which would then become the operational and maintenance responsibility of Flint.

From the presentation of the preliminary report on December 21 to the submission of the final report to the State by TYJT on January 29, 2013, a number of developments occurred that made analysis and arriving at a final decision very difficult. They were:

- DWSD provided the City of Flint with at least two modified proposals to consider.
- TYJT and Rowe Professional Services Company (Rowe), the principal engineering firm for KWA (and Genesee County and the City of Flint), began disputing the others' conclusions and estimates regarding the construction of the KWA pipeline.
- The Flint EFM also disputed several of TYJT's conclusions. At a January 10, 2013, meeting with Treasury, the EFM also eliminated the 100% Water Plant option, using the Flint River as a 100% water source (which was cheapest option, as determined by TYJT).
- At a January 10, 2013 meeting, Flint officials eliminated all of the DWSD Imlay City options (which were the cheapest DWSD options) over concerns of owning and maintaining the 72" water main. They also eliminated consideration of any of the blending options originally proposed to DWSD, in part over concerns of added costs to soften the water. This effectively left the only options remaining under consideration by Flint to be the 100% DWSD option (which TYJT estimated to be more expensive than either of the KWA cost options) or joining KWA.

I believe that TYJT's analysis was hampered by the very short timeframe in which they attempted to conduct this analysis; which, may have led to be being more conservative in some of their estimates. I believe that some of the comparable systems used in their analysis may not have been the best options but given that KWA is still in the design phase, may represent the best selection of comparable. I also believe, for whatever reasons, that all of the information (from both DWSD and KWA) TYJT needed to effectively analyze these options was not provided to them.

Projected Construction Costs:

Based upon the provided construction estimates, TYJT estimates the KWA construction costs at **$357.6-million**. KWA estimates construction costs at **$272.4-million**. TYJT states in their final report that they received "limited information" from KWA, which might have resulted in more conservative estimates.

The primary differences between the two estimates center around 1) the cost of constructing the pumping stations; 2) land acquisition costs; 3) contingency costs (discussed below); 4) the provision of

construction management services; 5) design costs; and 6) redundant power at the pumping stations. Cost estimates were reasonably similar by both firms in other areas except for those noted above.

The cost of constructing the pumping stations is the biggest difference between the two estimates (**$24.6-million vs. $54.5-million**). TYJT stated that they believe KWA had not designed the pumping stations to the point where more accurate numbers could be achieved. TYJT also stated that their estimates were based on construction costs for a similar project in SE Michigan. KWA maintains that construction costs in Genesee County are much lower than in SE Michigan and that they have extensive experience in construction projects that will help keep costs in-line. KWA has also stated that the construction of the transmission pipeline will be done by multiple contractors in order to save time and allow more Michigan contractors to bid on the project.

TYJT added **$1.2-million** to their estimates for land and easement acquisition. KWA has stated that they have already secured nearly all of the land and easement accesses needed for this project. It is likely that TYJT was unaware of this when they developed their estimates.

TYJT also added 5% (**$14.4-million**) to their estimated base cost for construction management services. TYJT has stated that KWA has not taken these costs into account. KWA maintains that they have accounted for them and these costs will not be that high.

Nearly **$18-million** was added to TYJT's estimates for design costs and legal work for the design of both the pumping stations and the transmission pipeline. KWA maintains that they have accounted for these expenses.

TYJT also included **$1.3-million** in new costs for standby power at the pumping stations. KWA has made no provisions for redundant power at the pumping facilities. TYJT included the provision of redundant power in their estimates and notes that this is an industry standard. KWA officials have stated that the new water plant will have redundant power but that the pumping stations will not. The stated reasons for not including redundant power were cost containment, that Flint can use the Flint River as a backup water supply in the event of an extended power outage and that the KWA systems' water storage capacity will allow for 7 days of reserve supply. KWA has also stated that they will look at installing standby power later but can utilize portable generators at the pumping stations, if necessary.

If the additional costs are not included, then the TYJT and the KWA estimates are within 5% of each other. This may/may not be acceptable differences, but I believe the only way to verify the accuracy of either estimate would be to utilize a third engineering firm to independently review both TYJT and KWA's estimates.

Project Contingency:

Construction contingency costs, also known as Engineering, Land, Administration, and Contingency costs (ELAC) are summarized in an attached chart developed by Rowe for the City of Flint. KWA/Rowe estimates total construction at $272.4-million, with **$53.2-million** (25%) for ELAC contingencies. County Water and Sewer Administrator John O'Brien clarified at a January 28, 2013 meeting that there is a 15% contingency for unforeseen issues and 10% "extra." TYJT estimates total construction at $357.6-million, with **$107.3-million** (30%) for ELAC contingencies.

TYJT stated that they believe that 25% ELAC for a project of this scope that is (at the time of the final report) less than 15% designed is insufficient; hence the more conservative estimate. The 5% difference in ELAC costs adds nearly $40-million to the TYJT estimate.

Construction Cost Overrun/Construction Delay Options:

The OFR is not aware of any contingency plans developed by either KWA or the City of Flint to address construction cost overruns or significant construction delays. The final TYJT Water Supply Assessment Report does reference an October 31, 2012 letter from KWA to EFM Kurtz in which KWA anticipates a "worse-case scenario" of a 15% cost overrun and a one-year operational delay. KWA projects, under this scenario, that water from DWSD would be cheaper than KWA until 2020 as opposed to 2016; reducing projected cumulative savings from $19-million to $3.9-million by Year 8 (2020).

County Drain Commissioner Jeff Wright stated at a January 28 meeting that, if necessary, KWA has the authority to borrow more funds to complete the project in the event that delays or cost overruns necessitate the borrowing of more funds. However, Mr. O'Brien also stated that the January 28 meeting that KWA expects to purchase insurance policies to insure against delays to the project. It has been suggested that a one-year delay in completion could increase project costs by as much as $20-million. Further discussion with Mr. O'Brien reveals that KWA is looking into purchasing a "wrap-around" policy against construction delays and a builders' risk policy; the costs of which are still being determined by KWA. Drain Commission Wright also indicated at the January 28 meeting that if construction bids come-in significantly higher than estimated that KWA will likely reassess its approach to this project.

Conclusions:

It is likely that TYJT's estimates are overly conservative. Their own analysis concludes that KWA's projections are cheaper than their estimate of the KWA project. Even with a 15% cost overrun and a one-year delay (Worst-case scenario), KWA's estimate is still lower than TYJT. All estimates for KWA are cheaper than the 100% DWSD option (all other DWSD options were eliminated from consideration by the EFM).

That is not to say that the KWA estimates are without fault. KWA is a new venture and the "unknowns" exist at the initial phases of the project. KWA has the potential to be the cheaper, long-term cost for the City of Flint after the bond debt for construction is retired. Significant construction delays and/or cost overruns could greatly add to the cost of this project, which could add to the financial burden on Flint.

Realistically, the true cost for this project will likely be in the middle of the two estimates. The bids for construction of the KWA lake water intake will be opened on February 26, 2013, with the expectation of presenting a recommendation for bid award on March 20. Comparison of the bids and the estimates for intake construction could be an indicator of the more valid estimate.

There are also some additional factors that are outside of the three questions asked by the State Treasurer that influence a final recommendation on this project. The first is DWSD. DWSD is a "known" entity and the system is already in-place and in operation. DWSD may also be the cheaper option in the short term. However, selecting DWSD requires a 30-year commitment and the unknown aspect of future rate increases is very concerning to Flint officials. EFM Kurtz has stated that the City has experienced rate volatility over the history of its relationship with DWSD. According to the EFM, the average historical annual rate increase for the City is **6.7%**, but over the past 10-years the average annual rate increase has been **10.5%**.

All estimates show KWA being cheaper to Flint than DWSD after capital costs are retired. There also appears to be considerable local resistance to continuing a relationship with DWSD.

The upfront costs and the premium water charges assessed by DWSD while KWA is being constructed are of great concern to City officials. Flint officials have indicated that approximately **$3.5-million** in capital upgrades is needed for the Water Plant if the KWA option is selected. However, at a January 28,

2013 meeting, County Drain Commissioner Wright indicated that Genesee County will permit Flint to participate in its revenue bond sale for KWA for Flint's 30% share of capacity in the KWA System and for plant upgrades. Given Flint's current financial situation, were this participation to occur, it will be a positive development for the City because it is likely Flint would have a very difficult time issuing bonds on the strength of its own credit rating. The Drain Commissioner also indicated a willingness to discuss how KWA might mitigate the $5- to $6-million cost of the "premium" rate that would be charged to the City of Flint by DWSD for the City to purchase water while KWA was being constructed.

On February 4, 2013, a proposal was received from EFM Kurtz that outlined a two-phased approach to resolve the cost of this premium charge. First, the City will transfer six miles of 72" water main owned by the City that extends into Genesee County in lieu of the **$2.3-million** up-front payment the City would have to make for construction of the KWA system. The second phase involves KWA entering into negotiations with DWSD to purchase their 72" water main that runs from Imlay City to Genesee County and agreeing to purchase water from DWSD for redundant purposes in-exchange for DWSD eliminating the **15%** premium rate to Flint during the three-year KWA construction period.

Recommendation:

A recommendation is being made to support the City of Flint joining KWA. Given, the conservatism of TYJT's estimates and the fact that all KWA estimates are cheaper than the 100% DWSD option, KWA appears to be the logical choice. EFM Kurtz has stated that he believes the KWA option is the cheaper alternative over time. There appears to be public support for the KWA project and EFM Kurtz has also stated that he believes that the Flint Mayor and City Council will support the KWA Project.

Also, the potential inclusion of Flint in the issuance of revenue bonds by Genesee County and the potential for KWA to assist the City in mitigating some of the DWSD premium charges could greatly reduce Flint's financial concerns.

There also appears to be good cooperation between City and County officials in discussing this project and this level of engagement and dialogue between city and county officials because of this project could continue to grow and lead to additional areas of cooperation and collaboration.

If further analysis on this issue is needed, please let me know.

City of Flint Water Rate History

Year (Date Effective)	Average Monthly Water/Sewer Bill*	Percentage Change in Water/Sewer Rates	Water Fund** Total Operating Revenue	Water Fund** Unrestricted Net Position	Water Fund** Capital Improvements
2010	$64	12%	$31,956,754	-$5,795,973	$2,091,160
1/15/2011	$82	29%	$36,762,663	-$12,443,265	$1,403,916
9/16/2011	$111	35%			
7/1/2012	$111	26%	$44,854,439	-$8,758,091	$755,681
2013	$140	0%	$49,903,868	$834,447	$147,462
07/01/13 to 06/30/14	$140	0%	$43,552,152	$760,745	$3,301,700
07/01/14 to 06/30/15	$149***	6%	N/A	N/A	N/A

Note* Water rate information is based on average usage of 7 units per month with a 5/8" residential remote meter.

Note** Water fund information was compiled from the City of Flint's CAFR filed with the Michigan Department of Treasury.

Note*** Billing breakdown contained in attached memo.

City Operations – An initial review of several departments across the City indicates a significant need for a comprehensive IT infrastructure upgrade and City-wide integration of its centralized processes

Function	Observations
IT	▪ The technology infrastructure, support capabilities and governance appear to be in very poor condition ▪ The IT function is currently in a stage of transition in terms of people and investment. There is heavy reliance on third party advisors and little ownership by the departments utilizing the function ▪ The existing systems are antiquated and inefficient in structure. As an example, the Police system is run off of dozens of Access databases – which are relied upon to track critical data such as crime and intelligence data. Moreover, the ability to assess the patrol/arrest process time allocation is limited ▪ Police have received grants that make possible a system upgrade. However, the grant funding does not adequately cover the cost of process redesign, which will be a critical step in getting value from the IT upgrade ▪ It is apparent that the basic infrastructure and resources would need to be stabilized prior to optimizing specific systems. This includes a long term IT governance, disaster recovery and management / resource plan ▪ Telecommunication contracts appear to provide an opportunity for improvement. The current cost is in excess of $1M projected for FY14. It is possible that the restructuring of these contracts to match the needs of the City may result in savings as much as 40%
Purchasing/ Accounting	▪ The current process and tools limit the ability to empower the department heads to track and manage budget / actual accountability and impacting also the ability to encumber current funds and limit multi-year rollovers. There is some expectation that the new accounting systems will provide the tools to improve these processes ▪ Vendor management, IFB and RFP process needs to be enhanced to ensure that Bid to Delivery process is tracked
Water and Sewer	▪ The City is experiencing significant issues surrounding the large increases in water costs. Water rates have more than doubled in the past 2 years and that has resulted in declining collections. The City has more than 8,000 or ~25% customers past due and does not yet have a strategy / process / resources to address this issue ▪ The City only has the capacity to perform 150 shut-offs a week. Given the level of delinquencies, it is clear there are not resources to properly enforce collections ▪ The City has also identified a growing issue surrounding unbilled water. This is a result of both fire department usage (driven by high number of fires) and theft.

Subject: Flint Water Parallel Line Option.Update

Importance: High

Randy,

Per your request, here is an update on this parallel line option as it relates to the Flint Water System Analysis.

- Below is a summary of the initial conversation I had with TYJT on this issue. This information was sent on January 22, 2013.

- On pages 17-18 of the Final Report provided by TYJT, this option was referenced. The report states the following:

Additionally, in recent conversations with the Treasury another option was discussed that could potentially be the most cost-effective solution.
Currently the Flint WTP serves as a backup if service is lost through either the DWSD or KWA pipeline. If the a twin pipe paralleling the DWSD 72-inch water main were constructed with interconnects with the 72-inch line, then the new water main could serve as the backup to Flint and the Flint WTP could be abandoned or potentially sold to Genesee County for their use.

The construction of the parallel pipeline would be considered in the DWSD capital expenditure as a Common to All (CTA) cost. This means that the capital cost of the pipeline would be shared by all DWSD customers and not just by Flint.
Preliminary analysis of this option appears to be the most cost-effective of all the options discussed. However, a more thorough cost analysis is warranted and this approach would require an agreement between Flint and DWSD.

- On February 15, 2013, I was informed of a meeting between DWSD and TYJT regarding this option. Apparently, this meeting was authorized by the State Treasurer. The DWSD Director and Chair of the Board met with Dave Guastella, Vice President of TYJT. Mr. Guastella informed me that DWSD was inquiring how the Flint issue will move forward. They also, apparently, repeated their openness to the parallel line option and indicated willingness, were this option to move forward, to relocate the master meter from Potter & Baxter to the Flint WTP. This would eliminate the need for Flint to construct a connecting line to the master meter. DWSD also indicated that relocating this master meter could also be completed as a Common-to-all-Cost project.

This is all of the additional information I have at this point.

Please advise me on how you wish me to proceed.

Subject: RE: Treasury Flint Water Supply Assessment

We've been working on the final touches to our KWA report, which includes our recommendation. However, we learned within the past few days that Tucker Young apparently met with Andy and is exploring another alternative. Do you have any information about that?

I asked for some additional edits on the Highland Park plan, which has been evolving along with the KWA report.

Jim

The purpose of this email is to summarize our discussion from our meeting on February 15th for the Treasury who was not in attendance. They are copied on the email along with the Director and our staff who were present at the meeting. Please review the bullet items below and "Reply to All" if you have any revisions. TYJT is prepared to assist in any way possible to resolve the Flint supply issue.

- TYJT provided DWSD with a copy of the final report titled, "City of Flint Water Supply Assessment, February 2013."
- In addition to the options presented in the report, TYJT discussed the possibility of moving the metering point for Flint to Flint's WTP and twinning the existing pipeline so that the Flint WTP could be abandoned. The second line would serve as the required redundancy to Flint.

  Moving the metering point to the Flint WTP would potentially allow for the entire cost of twinning the existing 72-inch main to be covered in DWSD's rate calculations as a Common to All cost that would get allocated as capital over the entire DWSD wholesale customer base. Since DWSD costs by customer are based on distance and elevation components it was recognized that moving the supply point west would increase the distance, but that the elevation of the plant appeared to be lower than the current supply point at Potter & Baxter. Therefore, the distance component may be off set in some degree by the elevation component. TYJT provided preliminary costs for twinning the pipeline to DWSD to aid in their calculation. DWSD indicated that they would estimate the rate impacts to Flint and get back with TYJT.

There was a brief discussion related to whether DWSD would buy the existing Flint main between the existing metering point at Potter & Baxter and the Flint WTP. It was found that a better understanding related to the condition of this main and its value would need to be evaluated.

- The DWSD Board of Water Commissioners is comprised of Detroit representatives and representatives from Oakland, Macomb, and Wayne Counties. Adding a representative from Genesee County was discussed. DWSD needs to look at charter restrictions and the judge's ruling to determine how this issue could be addressed.
- There was concern expressed as to whether KWA representatives are representing the actual opinions of the individual communities within the counties being supplied by DWSD. A discussion of possibly holding presentations of the Treasury findings to the individual communities was discussed.
- In general, the meeting was very positive with DWSD willing to address the issues Flint has identified so that the Department can retain Flint as a customer.

Dave

Roger:

The parallel line that DWSD would construct is from Imlay City to Flint. The benefit to Flint is that they may be able to abandon their water plant because the 2nd line would provide the redundancy that is required as per TYJT. The benefit to DWSD is that they would retain the City of Flint as a customer.

Randy,

The updated assessment appears fine. Thanks for the additional work.

The Flint parallel water line option is not one I understand. It is not clear why construction of a new line paralleling the 72" line from Port Huron would be of interest to DWSD and a benefit, not only to Flint, but also to the metro area users of the DWSD water services. Do we have any confirmation of DWSD's interest is this approach?

I am forwarding to you the updated KWA Assessment and a question regarding another option that was not included in this Assessment. It was discussed by Tucker Young and DWSD last Friday, but we have nothing in writing from DWSD committing them to this proposal, nor do we have any engineering data to compare this option with the others. Please review Eric's comments to me and advise as to the best course of action.

Thanks,
Randy,

Attachments: Flint Water Parallel Line Option.Update; UPDATED FLINT DWSD KWA ASSESSMENT.Version VIII.02-21-13.doc

Attached is our assessment of the KWA issue in Flint. The questions Andy raised are specifically addressed.

As you may recall, while receiving water from DWSD, an ongoing requirement, imposed by DEQ, is for a backup water system in Flint in case of failure of the DWSD service. To that end, Flint has been required to maintain their water plant, even though it rarely has been used. In the parallel line option, Tucker Young suggests that the need for Flint to maintain their water plant while receiving water from DWSD, might be resolved by running a parallel line from Imlay City that would provide a second means of delivery for DWSD treated water. That parallel line could, in the thoughts of Tucker Young, also resolve certain backup issues for other parts of the DWSD system.

We are unaware of any discussions with DWSD on this issue. An obvious concern would be where the cost for the parallel line fits in DWSD capital planning. From Flint's perspective, the value proposition has to be concerning as the City spent approximately $45 million upgrading the plant recently, still has debt to pay related to those improvements, and would be faced with the longer term issue of what to do with the plant. Use by the County was suggested. Because of the low geographic elevation of the Flint plant, its use as other than a backup for the Genesee County water services would be difficult.

Based on what we understand of the somewhat dynamic circumstances around this decision, the KWA option still seems best for Flint.

Subject: Flint Water Parallel Line Option.Update

Importance: High

Randy,

Per your request, here is an update on this parallel line option as it relates to the Flint Water System Analysis.

- Below is a summary of the initial conversation I had with TYJT on this issue. This information was sent on January 22, 2013.

- On pages 17-18 of the Final Report provided by TYJT, this option was referenced. The report states the following:

Additionally, in recent conversations with the Treasury another option was discussed that could potentially be the most cost-effective solution.
Currently the Flint WTP serves as a backup if service is lost through either the DWSD or KWA pipeline. If the a twin pipe paralleling the DWSD 72-inch water main were constructed with interconnects with the 72-inch line, then the new water main could serve as the backup to Flint and the Flint WTP could be abandoned or potentially sold to Genesee County for their use.

The construction of the parallel pipeline would be considered in the DWSD capital expenditure as a Common to All (CTA) cost. This means that the capital cost of the pipeline would be shared by all DWSD customers and not just by Flint.
Preliminary analysis of this option appears to be the most cost-effective of all the options discussed. However, a more thorough cost analysis is warranted and this approach would require an agreement between Flint and DWSD.

- On February 15, 2013, I was informed of a meeting between DWSD and TYJT regarding this option. Apparently, this meeting was authorized by the State Treasurer. The DWSD Director and Chair of the Board met with Dave Guastella, Vice President of TYJT. Mr. Guastella informed me that DWSD was inquiring how the Flint issue will move forward. They also, apparently, repeated their openness to the parallel line option and indicated willingness, were this option to move forward, to relocate the master meter from Potter & Baxter to the Flint WTP. This would eliminate the need for Flint to construct a connecting line to the master meter. DWSD also indicated that relocating this master meter could also be completed as a Common-to-all-Cost project.

This is all of the additional information I have at this point.

Please advise me on how you wish me to proceed.

Subject: Flint Water Parallel Line Option
Importance: High

Ed/Randy,

I spoke with Dave Guastella regarding the DWSD Parallel Line option. Here is what our conversation covered.

- DWSD open to constructing a parallel line as Common-to-All cost. It would run from Imlay City through Potter & Baxter. Approximately 30 miles.
- DWSD would roll the cost into all customer rates over 30-years. Flint, thereby, would avoid capital costs. DWSD said that they could calculate impact on rates about one day after an estimated cost of construction is developed.
- Dave indicated that the line could be built to bypass failures. It would also contain interconnects so water could be transferred between the lines.
- Flint will probably have to construct line from the Water Plant (about 2 miles) to connect to the new line for true redundancy.

Let me know how you wish to proceed with this new information.

STATE OF MICHIGAN
DEPARTMENT OF TREASURY
LANSING

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

ANALYSIS REPORT

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: Updated Flint Water System Status Assessment

DATE: February 21, 2013

Analysis Summary

On November 26, 2012, the Department of Treasury commissioned the firm of Tucker, Young, Jackson & Tull, Inc. (TYJT) to analyze options for the City of Flint to either remain a customer of the Detroit Water & Sewer Department (DWSD) or to join the Karegnondi Water Authority (KWA) in Genesee County. The overarching purpose of this study was to provide objective analyses to the State Treasurer and to Flint's Emergency Financial Manager (EFM) in order to secure potable drinking water for the City for the foreseeable future. The Office of Fiscal Responsibility (OFR) has been the lead office representing Treasury in this project.

On January 14, 2013, the State Treasurer requested responses to three questions: 1) Show the different, projected construction costs provided by TYJT and by the City of Flint/KWA. If these costs are different, explain why Treasury believes that the projects provided by Flint/KWA are acceptable; 2) identify the construction contingencies included in the TYJT and Flint/KWA projections; and 3) identify the options Flint will utilize in the event of a construction cost overrun or a delay in construction by KWA.

This has been a very difficult project to analyze because of the number of proposals to consider, differences of opinion about the conclusions of various engineering analyses that have been conducted, the fact that the analyses are comparing an existing, operational water system with one that has not yet been designed, and conditions within the City of Flint that make it difficult to assess their true water needs.

However, despite these difficulties, I believe that **KWA** presents the best future option to provide potable water for the City of Flint in the future. Long-term, KWA appears to be the cheaper option; the quality of water will almost certainly improve; Genesee County appears willing to assist the City in securing the financial resources for their portion of the project; this project could signify the beginning of better collaboration between the City of Flint and Genesee County; the KWA project has both political and popular support.

The following details how this recommendation was arrived at:

Background:

On December 21, 2012, staff from TYJT met with representatives from the Department of Treasury and the City of Flint to provide a preliminary report on their findings. At this meeting, TYJT outlined 5 options that they had analyzed. These options were: 1) 100% water provision by the City of Flint Water Plant from its water source of the Flint River; 2) 100% provision of untreated Lake Huron Water by KWA (which would require treatment by the Flint Water Plant); 3) Effective 100% provision of treated drinking water by DWSD; 4) Provision of variable amounts of water from DWSD through the existing Potter & Baxter master meter (this option called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs); and 5) Provision of variable amounts of water from DWSD through the 72" Imlay City main (this option also called for Flint to treat and *blend* river water into DWSD water in order to reach their daily needs). Each of the blending options looked at Flint purchasing 4, 8, or 12 Million Gallons per Day (MGD) from DWSD and blending the balance in river water to achieve their maximum daily water needs of 18 MGD. The Imlay City option also provided for DWSD to sell the 72" main to the City of Flint, which would then become the operational and maintenance responsibility of Flint.

From the presentation of the preliminary report on December 21 to the submission of the final report to the State by TYJT on January 29, 2013, a number of developments occurred that made analysis and arriving at a final decision very difficult. They were:

- DWSD provided the City of Flint with at least two modified proposals to consider.
- TYJT and Rowe Professional Services Company (Rowe), the principal engineering firm for KWA (and Genesee County and the City of Flint), began disputing the others' conclusions and estimates regarding the construction of the KWA pipeline.
- The Flint EFM also disputed several of TYJT's conclusions. At a January 10, 2013, meeting with Treasury, the EFM also eliminated the 100% Water Plant option, using the Flint River as a 100% water source (which was cheapest option, as determined by TYJT).
- At a January 10, 2013 meeting, Flint officials eliminated all of the DWSD Imlay City options (which were the cheapest DWSD options) over concerns of owning and maintaining the 72" water main. They also eliminated consideration of any of the blending options originally proposed to DWSD, in part over concerns of added costs to soften the water. This effectively left the only options remaining under consideration by Flint to be the 100% DWSD option (which TYJT estimated to be more expensive than either of the KWA cost options) or joining KWA.

I believe that TYJT's analysis was hampered by the very short timeframe in which they attempted to conduct this analysis; which, may have led to be being more conservative in some of their estimates. I believe that some of the comparable systems used in their analysis may not have been the best options but given that KWA is still in the design phase, may represent the best selection of comparable. I also believe, for whatever reasons, that all of the information (from both DWSD and KWA) TYJT needed to effectively analyze these options was not provided to them.

Projected Construction Costs:

Based upon the provided construction estimates, TYJT estimates the KWA construction costs at **$357.6-million**. KWA estimates construction costs at **$272.4-million**. TYJT states in their final report that they received "limited information" from KWA, which might have resulted in more conservative estimates.

The primary differences between the two estimates center around 1) the cost of constructing the pumping stations; 2) land acquisition costs; 3) contingency costs (discussed below); 4) the provision of

construction management services; 5) design costs; and 6) redundant power at the pumping stations. Cost estimates were reasonably similar by both firms in other areas except for those noted above.

The cost of constructing the pumping stations is the biggest difference between the two estimates (**$24.6-million vs. $54.5-million**). TYJT stated that they believe KWA had not designed the pumping stations to the point where more accurate numbers could be achieved. TYJT also stated that their estimates were based on construction costs for a similar project in SE Michigan. KWA maintains that construction costs in Genesee County are much lower than in SE Michigan and that they have extensive experience in construction projects that will help keep costs in-line. KWA has also stated that the construction of the transmission pipeline will be done by multiple contractors in order to save time and allow more Michigan contractors to bid on the project.

TYJT added **$1.2-million** to their estimates for land and easement acquisition. KWA has stated that they have already secured nearly all of the land and easement accesses needed for this project. It is likely that TYJT was unaware of this when they developed their estimates.

TYJT also added 5% (**$14.4-million**) to their estimated base cost for construction management services. TYJT has stated that KWA has not taken these costs into account. KWA maintains that they have accounted for them and these costs will not be that high.

Nearly **$18-million** was added to TYJT's estimates for design costs and legal work for the design of both the pumping stations and the transmission pipeline. KWA maintains that they have accounted for these expenses.

TYJT also included **$1.3-million** in new costs for standby power at the pumping stations. KWA has made no provisions for redundant power at the pumping facilities. TYJT included the provision of redundant power in their estimates and notes that this is an industry standard. KWA officials have stated that the new water plant will have redundant power but that the pumping stations will not. The stated reasons for not including redundant power were cost containment, that Flint can use the Flint River as a backup water supply in the event of an extended power outage and that the KWA systems' water storage capacity will allow for 7 days of reserve supply. KWA has also stated that they will look at installing standby power later but can utilize portable generators at the pumping stations, if necessary.

If the additional costs are not included, then the TYJT and the KWA estimates are within 5% of each other. This may/may not be acceptable differences, but I believe the only way to verify the accuracy of either estimate would be to utilize a third engineering firm to independently review both TYJT and KWA's estimates.

Project Contingency:

Construction contingency costs, also known as Engineering, Land, Administration, and Contingency costs (ELAC) are summarized in an attached chart developed by Rowe for the City of Flint. KWA/Rowe estimates total construction at $272.4-million, with **$53.2-million** (25%) for ELAC contingencies. County Water and Sewer Administrator John O'Brien clarified at a January 28, 2013 meeting that there is a 15% contingency for unforeseen issues and 10% "extra." TYJT estimates total construction at $357.6-million, with **$107.3-million** (30%) for ELAC contingencies.

TYJT stated that they believe that 25% ELAC for a project of this scope that is (at the time of the final report) less than 15% designed is insufficient; hence the more conservative estimate. The 5% difference in ELAC costs adds nearly $40-million to the TYJT estimate.

Construction Cost Overrun/Construction Delay Options:

The OFR is not aware of any contingency plans developed by either KWA or the City of Flint to address construction cost overruns or significant construction delays. The final TYJT Water Supply Assessment Report does reference an October 31, 2012 letter from KWA to EFM Kurtz in which KWA anticipates a "worse-case scenario" of a 15% cost overrun and a one-year operational delay. KWA projects, under this scenario, that water from DWSD would be cheaper than KWA until 2020 as opposed to 2016; reducing projected cumulative savings from $19-million to $3.9-million by Year 8 (2020).

County Drain Commissioner Jeff Wright stated at a January 28 meeting that, if necessary, KWA has the authority to borrow more funds to complete the project in the event that delays or cost overruns necessitate the borrowing of more funds. However, Mr. O'Brien also stated that the January 28 meeting that KWA expects to purchase insurance policies to insure against delays to the project. It has been suggested that a one-year delay in completion could increase project costs by as much as $20-million. Further discussion with Mr. O'Brien reveals that KWA is looking into purchasing a "wrap-around" policy against construction delays and a builders' risk policy; the costs of which are still being determined by KWA. Drain Commission Wright also indicated at the January 28 meeting that if construction bids come-in significantly higher than estimated that KWA will likely reassess its approach to this project.

Conclusions:

It is likely that TYJT's estimates are overly conservative. Their own analysis concludes that KWA's projections are cheaper than their estimate of the KWA project. Even with a 15% cost overrun and a one-year delay (Worst-case scenario), KWA's estimate is still lower than TYJT. All estimates for KWA are cheaper than the 100% DWSD option (all other DWSD options were eliminated from consideration by the EFM).

That is not to say that the KWA estimates are without fault. KWA is a new venture and the "unknowns" exist at the initial phases of the project. KWA has the potential to be the cheaper, long-term cost for the City of Flint after the bond debt for construction is retired. Significant construction delays and/or cost overruns could greatly add to the cost of this project, which could add to the financial burden on Flint.

Realistically, the true cost for this project will likely be in the middle of the two estimates. The bids for construction of the KWA lake water intake will be opened on February 26, 2013, with the expectation of presenting a recommendation for bid award on March 20. Comparison of the bids and the estimates for intake construction could be an indicator of the more valid estimate.

There are also some additional factors that are outside of the three questions asked by the State Treasurer that influence a final recommendation on this project. The first is DWSD. DWSD is a "known" entity and the system is already in-place and in operation. DWSD may also be the cheaper option in the short term. However, selecting DWSD requires a 30-year commitment and the unknown aspect of future rate increases is very concerning to Flint officials. EFM Kurtz has stated that the City has experienced rate volatility over the history of its relationship with DWSD. According to the EFM, the average historical annual rate increase for the City is **6.7%**, but over the past 10-years the average annual rate increase has been **10.5%**.

All estimates show KWA being cheaper to Flint than DWSD after capital costs are retired. There also appears to be considerable local resistance to continuing a relationship with DWSD.

The upfront costs and the premium water charges assessed by DWSD while KWA is being constructed are of great concern to City officials. Flint officials have indicated that approximately **$3.5-million** in capital upgrades is needed for the Water Plant if the KWA option is selected. However, at a January 28,

2013 meeting, County Drain Commissioner Wright indicated that Genesee County will permit Flint to participate in its revenue bond sale for KWA for Flint's 30% share of capacity in the KWA System and for plant upgrades. Given Flint's current financial situation, were this participation to occur, it will be a positive development for the City because it is likely Flint would have a very difficult time issuing bonds on the strength of its own credit rating. The Drain Commissioner also indicated a willingness to discuss how KWA might mitigate the $5- to $6-million cost of the "premium" rate that would be charged to the City of Flint by DWSD for the City to purchase water while KWA was being constructed.

On February 4, 2013, a proposal was received from EFM Kurtz that outlined a two-phased approach to resolve the cost of this premium charge. First, the City will transfer six miles of 72" water main owned by the City that extends into Genesee County in lieu of the **$2.3-million** up-front payment the City would have to make for construction of the KWA system. The second phase involves KWA entering into negotiations with DWSD to purchase their 72" water main that runs from Imlay City to Genesee County and agreeing to purchase water from DWSD for redundant purposes in-exchange for DWSD eliminating the **15%** premium rate to Flint during the three-year KWA construction period.

Recommendation:

A recommendation is being made to support the City of Flint joining KWA. Given, the conservatism of TYJT's estimates and the fact that all KWA estimates are cheaper than the 100% DWSD option, KWA appears to be the logical choice. EFM Kurtz has stated that he believes the KWA option is the cheaper alternative over time. There appears to be public support for the KWA project and EFM Kurtz has also stated that he believes that the Flint Mayor and City Council will support the KWA Project.

Also, the potential inclusion of Flint in the issuance of revenue bonds by Genesee County and the potential for KWA to assist the City in mitigating some of the DWSD premium charges could greatly reduce Flint's financial concerns.

There also appears to be good cooperation between City and County officials in discussing this project and this level of engagement and dialogue between city and county officials because of this project could continue to grow and lead to additional areas of cooperation and collaboration.

If further analysis on this issue is needed, please let me know.

Subject: KWA

Roger, the county opened the bids today for the KWA intake construction in Lake Huron. The low bid, from a "very reputable" contractor came in at $24,622,000, about $3,000,000 less than the Tucker Young estimate in the study they did for Treasury. The County authorized the borrowing up up to $35,000,000 for the project. It is now estimated that the total cost with engineering, legal and contingencies will be less than $31,000,000. Good news for KWA and the county. Just as an aside, four of the five bids were less than the Tucker Young projection. Ed

Steve,

I am wondering, if somehow, I could send a letter to the Governor regarding the water bills in the City of Flint. Effective 3-1-13, the City will now require a $350 service fee for turning on water to a home. Shut off accounts and new water applications. Plus a $75 deposit on top of that.

The fee was $100. This is on top of a change that took effect just a few months ago of increasing the water fee to $53 per month just to have water in the home. Then the usage is on top of that. This is the city managers way of trying to balance their budget.

People in Flint cannot afford this. DHS cannot afford this. It is hurting our SER funding and my CP/CP funding. People in Flint cannot live with these rates. I feel somehow the Governor needs to hear about this.

I have asked numerous times to meet with the City manager with no luck. My own Board member is an advisor to the city manager and I have asked him to set up a meeting and he has not.

What can we do to get the Governor's ear?

Randy Rauch

Mike & Ed,

The Governor's office has been hearing from Department of Human Services workers with concerns for what the recent changes in water policy (rates, hookup deposits, etc) are doing to low income residents in the City.

We need to get them something in writing on why the recent changes were necessary. Also, if there is anything we are doing to help the low income population in the rules, can you please point that out.

Can you guys help us put something together?

A call to Randy Rauch to discuss the situation might help too.

City Of Flint Water History Facts

Current Treatment Plant was put into service in 1954.

Current 72" main pipeline was completed in 1970.

Flint signed a 30 year contract with Detroit Water and Sewer Department in the mid 1960's.

The contract with DWSD has expired and we are currently operating on a yearly extension.

In 2006 Flint completed a $48,000,000 upgrade of the existing Water Plant (required by the MDEQ & for backup only).

Flint's Water & Sewer System is approximately a $300,000,000 Enterprise.

Flint's Water & Sewer System is designed to deliver water to over 200,000 people with over 1,500 miles of infrastructure.

Flint's most recent census count shows a population of approximately 102,000 in 2010.

Flint's census population in 2000 was approximately 124,000.

The water system had over 45,000 customers in June of 1999.

The water system had just over 36,000 customers by June 2011.

The "Fixed Costs" that must be covered to maintain the system and deliver quality water have increased over time.

CITY OF FLINT
WATER NON-PAYMENT TURN-OFF POLICY

1. Water services to any customer may be shut off if the account is not paid until after 30 days after the due date. (City ordinance 46-52 (h))

2. Non-payment turn-offs are done only Monday through Thursday. The Customer Service Center does not schedule non-payment turn-offs on Fridays, Saturdays, Sundays, or most recognized holidays.

3. Illegal usage, broken payment arrangements and NSF (non-sufficient funds) turn-offs are done at any time without additional notice.

4. Turn-off notices are mailed to delinquent customers fifteen (15) days before actual turn-off.

5. The water customer is responsible for maintenance of all plumbing in the premises including connection to City water mains or sewer lines.

6. If a customer disputes a water bill and is unable to resolve the issue with Customer Service personnel, the customer may request an administrative review. Further information on any water account may be obtained by calling (810) 766-7015 or visiting the Customer Service Center at 1st Floor, City Hall, 1101 S. Saginaw St.

Preliminary Options for Future City of Flint Water Sources

Consider a New Negotiated Contract with Detroit Water and Sewer Department

PRO'S	CON'S
No upfront capital costs	Lack of control over new / fixed changes
Possibility to negotiate a lower rate	Past practices
Ability to "Blend" water sources to further control costs	

Consider a Contract with the Karegnondi Water Authority

PRO'S	CON'S
Voting member of KWA board	Capital cost (debt service)
Ability to "Blend" water sources to further control costs	Uncertainty of final costs
Raw water is an asset for attracting new buisnesses	

Blended Use of the Flint River

PRO'S	CON'S
Helps control cost of water	

*** CURRENTLY NO DECISIONS HAVE BEEN MADE REGARDING THE FUTURE WATER SOURCE

Improvements for City of Flint Water System

Reduce Leakage

- **Finalize a Preventative Maintenance Plan**
  - (Planning started in January 2012, requires funding, … part of Operational Costs)
  - Will help identify repair area's

- **Reduce water theft**

- **Replace water meters**
  - We currently have an eighteen month plan to replace all meters with more efficient "*Smart Meters*"

- **Encourage routine household checks**
  - "Faulty" toilets are a significant reason for household water loss. and unexpected larger bills.

Other Leakage concerns

- ✓ Transmission Loss
- ✓ Fire Hydrants
- ✓ Incorrect water bills
- ✓ Non-Payment

Response to Treasury regarding water rates, etc.

The cost of water and sewer in the City of Flint has become one of the most vexing issues facing the Emergency Financial Manager. When the Emergency Manager was appointed in December 2011 the water system had a $20 million deficit. In order to address this deficit the EM was forced to increase water and sewer rates by over a combined 120% in the past 18 months.

When the previous EFM left the City in 2004, the water system has a reserve of approximately $60 million. In the intervening years several things occurred: for three of five years (2007-2011) no rate increases were passed along to customers even though Detroit charged increases of over 10% per year; in the years when increases were passed along those amounts did not equal the actual cost of the system; the City chose to use the equity built up in the Water and Sewer funds until that was no longer available; a large lawsuit was settled; the City must pay for the $48 million MDEQ upgrades required at the Water Treatment Plant; and unbilled or unpaid water and sewer charges increased significantly.

In the past 18 months water and sewer rates have been increased to reflect the actual costs to operate the water and sewer system. Major leaks in the distribution system have been repaired. Unpaid water and sewer usage is now being addressed and the water affidavit process is part of this problem.

The City of Flint currently allows landlords to put the water and sewer billing in the name of the renter. This affidavit process holds the landlord harmless for any water costs. The deposit for the affidavit has been set at $100, which is the lowest in the County. The deposit fees in the County range from a low of $100 to a high of $500. The City is raising its rate to $350, which puts us about in the middle of the range. Depending on usage, this will cover 60 to 90 days' water charges and reduce the amount of uncollected billing. Keep in mind, any water not paid for is eventually charged to those who do pay through increased rates.

Because the deposit is so low in relation to the current charges, renters quickly owe more than the deposit, and find it easier to simply walk away from the rental and forfeit the deposit. This results in the City being on the hook for the unpaid bills. Currently there are 4,893 affidavits, and 4029 of them (82%) past due. This facctor alone totals to just under $3 million. In addition, when the renter walks away, the City has no way of knowing that the property is vacant. Many times the landlord rents the property again, without filing an affidavit, and the water continues to be charged to the former renter, again adding uncollected bills to the City. In the past the collection rate for past due accounts, when turned over to a collection agency, has been about 3% on average. Keep in mind that this is a deposit, not a fee, and can be refunded when the renter leaves the property. Also, the landlord can avoid the renter's deposit requirement by keeping the water and sewer billing in his name.

The City is also studying the potential to hold the landlord accountable for the water charges under certain conditions, such as failure to notify the City when a renter leaves and then renting the property again without filiing a new affidavit.

The City recognizes that the high cost of water is a factor which is causing low income residents to choose to leave the City and the increase in the deposit fee might accelerate that choice. However, many of the surrounding communities charge a higher deposit than does the City o Flint. Renters are leaving the City because they can get better housing for less money, live in safer neighborhoods with better schools, have their water charges decrease by about half, and have their insurance rates reduced by approximately 50%.

Water and sewer costs have resulted in about 8,000 current customers to be more than 60 days past due. Many are senior citizens who have lived in Flint their entire life, paid their taxes, etc. and now find themselves unable to pay their water bill. This concerns the City more than the issue of deposits. We have put in place for this year the ability for citizens to direct a part of their city tax refund to help people with their water bills, and we are reviewing other options as well as scheduled meetings with agencies involved in helping low income people with their bills.

We further recognize that we have staffing issues and water theft to address. The City is able to complete about 120 water shut-offs per week. At that rate we can not keep up with delinquent account shut-offs. The city also reconginzes that water theft through meter by-pass or unauthorized turn-on must be resolved.

Ultimately, the City must find a way to hold down future increases in the cost of water, to bring them more in line with the Genesee County water customers. To this end the City has recommended to Treasury, that the City leave the Detroit Water System and join KWA with Genesee County, Lapeer and Sanilac Counties and the City of Lapeer. We believe this is the most significant long term factor in stabilizing costs to the water customers in the City of Flint.

I will press Brom on #1.

There is no conversation of which I am aware regarding a TAB in the near term for Flint. In his state of the city speech, Walling made his position clear that he and the Council could manage this.

FYI - Ed shared a couple of items that I thought you should be aware of:

1. KWA – The County is sending Bids for engineering services to size the pipeline on 3/22/13. Per Ed this is the absolute deadline for making a decision to participate Obviously he would like Treasury to share a decision with him ASAP. He also asked me to share with you that PA 72 does not appear to have a $50k spending limit that PA 4 had and he is willing to proceed with the Project, independent of Treasury, if you desire.

2. Mayor Walling meeting w/ Governor – The Mayor is meeting with the Governor on 3/8/13 to discuss the TAB. Ed said that If Treasury is contemplating moving in this direction please let him know because it impacts the budget he will prepare. They are currently preparing a five-year budget. Appointment of a TAB only requires two year budget and certain charter provisions will increase costs to the City.

Since the first of the year, the major issue in Flint has been the decision regarding long term water service in Flint. The choice is to maintain service with treated water from DWSD, or to participate with Genesee County in the construction of a raw water pipeline from Lake Huron to Flint (the KWA or Karegnondi project). City officials are clearly inclined toward the local project. A decision is needed in the next two weeks and is being held up, primarily, because of expressed State concerns about the benefits of one approach versus the other.

Subject: Flint EM Achievements

Caleb, attached is a fairly detailed document we received in January that describes EM achievements since day one.

EM/EFM Achievements & Progress

Major Events:

December, 2011:

- Immediate reduction in administrative expenses of more than $600,000.
- Establishment of new budgetary guidelines calling for more discretion in departmental spending and ways in which to operate the City more efficiently at a reduced cost.
- Establishment of an EM Advisory Council for the purpose of gathering input and suggestions from members of the community.
- Creation of 5 volunteer advisory committees, one each centered on public safety, finance, infrastructure, legacy and community development for the purpose of helping to develop a business and operational plan for the State Treasurer.

January, 2012:

- Business and Operational Plan submitted and approved by the Treasurer of the State of Michigan.
- Continual reorganization and elimination of departments to improve efficiency and reduce costs.

February, 2012:

- Held Ward Forums to gather input from the community and share the primary focus of the business and operational plan in each of Flint's nine wards by the Emergency Manager.
- Deficit Elimination Plan for FY 2011 submitted and approved by the Treasurer of the State of Michigan.

March, 2012:

- Development and implementation adjustments in retiree health care to reduce costs while preserving their benefits.

- Grant agreement between the City of Flint and the State of Michigan Department of Community Health Crime Victims Services Commission reached to provide health services for the victims of violent crime.

April, 2012:

- Balanced Budget adopted cutting $22 million in expenses.
- Tentative Collective Bargaining Agreements reached with Flint's AFSCME Local 1799, POLC Captains and Lieutenants' Union, POLC Sergeants' Union and IAFF Firefighters Union.
- Healthcare for active employees and retirees reduced.
- 3 mill waste collection levy replace with residential waste collection fee, recycling service added starting in 2013.
- Management and Maintenance of the City's four golf courses undertaken by Flint City Golf, LLC and Mott Park Public Golf Course Association.

May, 2012:

- New City of Flint Public Safety Plan introduced with ongoing implementation of outlined strategies.
- Michigan State Police patrol and detective partnerships implemented and expanded to enhance police presence in Flint.
- $3.5 million to support reopening of the City Lockup approved and received from the State of Michigan.
- SAFER grant application approved, $6.9 million grant awarded.
- Water & Sewer rates adjusted to reflected true cost of service, thereby stabilizing the finances of the operation.
- Special Assessment on street lighting done with the purpose of dedicating General Fund revenue to police and fire operations in order to preserve existing staffing levels.
- Ginosko Development Co. chosen as new developer of Smith Village with MSHDA approval.

- All five advisory committees convened for input on amendments to the business and operational plan.

June, 2012:

- New Labor Contracts implemented which reduced employee expenses by the equivalent of 20% of wages.
- Police and Fire staffing levels stabilized and maintained without layoffs.
- COPLOGIC online police reporting system for non-emergencies implemented.
- 6 month Financial &Operating Plan submitted to the State with amendments and achievements.
- Development of a plan with the Mott Foundation to extend and revise community policing grant, including funding for the Public Safety Administrator and Criminal Justice Advisory Committee Coordinator.
- All requirements met to receive 100% of State shared revenue allocation for FY 2013.
- Began implementation of Legacy Committee recommendations to transfer Flint Employee Retirement System (FERS) to Municipal Employee Retirement System (MERS).

August, 2012:

- Department of Energy Grant settled without any restrictive effects on the possibility of future grant applications and awards.
- Agreement between City of Flint and Flint Community Schools for the funding and operation of a PEG (Public, Educational & Governmental) television studio reached.
- Michigan State Housing Development Authority (MSHDA) approved developer Ginosko Development Corporation chosen to continue and complete construction at the Smith Village development site.
- Genesee Towers sold to Uptown Reinvestment, relieves City of Flint of considerably large insurance liability.

- Agreement reached between Genesee County Sheriff and City of Flint for the operation of the Flint Holding Facility (Lockup).
- Agreement reached between City of Flint and the Food Bank of Eastern Michigan for the renovation and maintenance of Brennan Park.
- 21st Century Community Policing grant awarded to Flint by the Mott Foundation in the amount of $743,000.
- Contract between City of Flint and Diponio Contracting for the upgrade of City infrastructure awarded.

September, 2012:

- Waivers of assessments or fees for entitled property owners by City Treasurer authorized.

October, 2012:

- Flint City Police Lockup reopened.
- Smith Village construction resumes with new developer.

November, 2012:

- Police and Fire Protection Millage put on ballot and passed.
- Demolition resumes in locations identified as posing a threat to public safety.

December, 2012:

- Transition to 800 Mhz police & fire communications complete.
- Cost of waste collection reduced by utilization of third party vendor

Yearlong Efforts:

- Unfunded Other Post-Employment Benefits (OPEB) liability reduced by over $500,000,000.
- HUD repayments for ineligible expenses reduced by over half.

- Cost saving transfer from Flint Employees Retirement System (FERS) to Michigan Employee Retirement Service (MERS) voted for by the Flint Employee Retirement Board.
- Audit of FY 2011 underway.
- Stabilizing cash flow each month.
- Comprehensive evaluation of City water system and options for providing water undertaken.
- Process of Master Plan for the City of Flint research and preparation underway.

Coming Soon:

- Decision on water provision and operation.
- Indigent Water Fund for eligible water customers.

Subject: KWA Follow-up
Attachments: Project Costs for Flint.DWSD KWA Analysis.01-22-13.pdf

Importance: High

1) **Attachment** – Attached.

2) **KWA Projections Cheaper Than DWSD** – There are two references in the report regarding this. The first is on Page 2 (4th Bullet Point) and on Page 4 (1st Paragraph under *Conclusions*). Both comments are referring to **construction costs** not future rates. Specifically, these comments are comparing the 100% DWSD water provision option is more expensive than either KWA's own construction estimate or TYJT's estimate of KWA construction costs. This comparison is visually presented on Page 17 of TYJT's Final Report.

3) **Impact of Parallel Line Option** – No substantive analysis has been conducted on this option so the impact is unclear. To develop a solid recommendation, a study (possibly using TYJT) would have to be commissioned. In a February 22, 2013 e-mail to Brom Roger stated:

As you may recall, while receiving water from DWSD, an ongoing requirement, imposed by DEQ, is for a backup water system in Flint in case of failure of the DWSD service. To that end, Flint has been required to maintain their water plant, even though it rarely has been used. In the parallel line option, Tucker Young suggests that the need for Flint to maintain their water plant while receiving water from DWSD, might be resolved by running a parallel line from Imlay City that would provide a second means of delivery for DWSD treated water. That parallel line could, in the thoughts of Tucker Young, also resolve certain backup issues for other parts of the DWSD system.

[Cline, Richard (Treasury)] This is a very complex issue and is not easily summarized. If there is interest in this concept, more hard engineering needs to performed before a better impact analysis can be performed.

If you have further questions, please let me know.

STATE TREASURER

SUMMARY REPORT

TO: Edward Koryzno, Administrator; Office of Fiscal Responsibility

FROM: Eric Cline. Unit Operations Specialist

SUBJECT: City of Flint Transition Advisory Board Request

DATE: March 12, 2013

Summary

On March 11, 2012, the Office of Fiscal Responsibility (OFR) was asked to provide summary comments regarding a potential request by the City of Flint to be removed from Emergency Financial Manager (EFM) status. A determination needs to be made whether a Transition Advisory Board (TAB) will be installed and the City can be allowed to move away from EFM status.

The OFR has analyzed the operations of the City and has identified areas of concern. The operational areas reviewed included: 1) The General Fund; 2) the FY 2011-2012 budget adopted by the Flint City Council; 3) the Water and Sewer system; 4) OPEB Liabilities; 5) Public Safety; 6) Community Development.

While required reporting information provided by the EFM has shown that the City of Flint is making some progress in alleviating its fiscal distress, it is unlikely that the City is ready to leave EFM status or have a Transition Advisory Board appointed.

The following details these conclusions:

FY 2011-2012 Budget:

The following issues were noted within 2011-2012 Budget.

- The budget was adopted by the City Council with an **annual budget deficit** and a **Fund Balance deficit.**
- Audited Final Expenditures were **$63.4-million** vs. audited Revenue of **$51.4-million.**
- The annual budget deficit for FY 2012 was **$11.4-million.**
- Interfund Transfers for Sanitation, Building Safety, Parking, Neighborhood Policing, Parks, Fleet Management, and Senior Centers were incorrectly budgeted at **<$4.7-million.>**
    - 2 of the interfund transfers' deficits were **over $1-million.**

- The Public Safety, Community Development, Transportation, Recreation, Judicial, General Government, and Legislative operations exceeded budget by a combined **$10.2-million.**
    - 2 of the departments overspent by **over $2-million.**
- Major and Local Streets have a budgeted annual deficit of **$326,000.**

General Fund:

Structurally, some weaknesses remain in the General Fund and several financial procedural issues remain needing correction. Based upon EFM reporting, the following is noted:

- An accumulated **$19-million General Fund deficit** remains.
- The EFM's amended budget projects deficit elimination in **49.6 years.**
- The General Fund continues to rely heavily upon **borrowed cash.**
- The EFM has indicated that Income Tax Revenue is lower than anticipated.
- A **Deficit Elimination Plan (DEP)** in-place and expected to be amended.
- An anticipated **$507,000** refund (plus interest) resulting from a MI Tax Tribunal (MTT) stipulation is expected to be made for fiscal years 2010, 2011, and 2012.

Community Development:

The demographic and economic outlook for the City is poor, which implies the likely generation of a number of social ramifications. The Genesee County Land Bank Authority is very active in the City of Flint and has provided much of the following data.

- **32% of all property** in the City is abandoned. This includes 12,000 vacant lots and 6,000 abandoned homes.
- Some residential blocks have over **50%** abandonment.
- The County Land Bank owns over 3,600 properties in the City.
- Average Sale Price for residential properties in Flint is approximately **20%** of the balance of Genesee County.
- These issues will require developing an innovative and coherent strategy for the challenges related to large tracts of abandon property.

OPEB Liabilities:

The City is facing a number of significant challenges regarding its OPEB liabilities. Based upon EFM reports, the following has been noted.

- Total OPEB liabilities are nearly **$400-million.**
- The Annual Required Contribution (ARC) payment by the City is **$22-million.**
- The City is facing **Pending Litigation** regarding retiree health care changes.

Water and Sewer System:

In addition to the formidable decision facing the community regarding its decision to join the KWA Water Authority or remain a customer of the Detroit DWSD system, the City is facing a number of other financial and structural issues with its water and sewer system, including:

- The adopted 2011-2012 Water Fund Budget was **$48.3-million**. The adopted 2011-2012 Sewer Budget was **$28.2-million**.
- An **$8.8-million** accumulated Water Fund deficit.
- A budgeted annual Water Fund deficit of **$4.1-million**.
- Water Loss in the Distribution System is estimated to be between **20-30%**.
- A budgeted annual Sewer Fund deficit of **5-million**.
- The City is facing **Pending Litigation** regarding water rate changes.

Public Safety:

The City continues to struggle with a number of systemic public safety issues. Fire services are a General Fund operation while law enforcement is separated as a Special Fund. Based upon EFM reporting, the City's Community Dashboard and review of local news stories, the following concerns are noted:

- The Fire Department budget for FY 2011-2012 was **$11.6-million** while law enforcement was **$3.2-million** respectively.
- **Public Safety** operations exceeded budget by **$6-million**.
- Fire Department **Overtime** is in excess of budgeted amounts.
- Property crimes and "Other" crimes are rising within the community.
- Violent crime appears to be on the rise.
- The **Per Resident Cost** for Fire services and the District Court are rising.

Conclusions:

The City faces significant financial and operational challenges in the near and the long term. Given the concerns noted above, it is believed that these challenges will require the authority of an EFM to resolve. Therefore, it is recommended that the City is not yet demonstrated its readiness for a transition back to local control and that EFM status should be retained.

If further analysis on this issue is needed, please let me know.

Subject: Highlights from Weekly Call w/ Ed Kurtz

- Transition of Solid Waste collection to private section has been better than expected, minimal complaints.

  I assured Ed that Andy is aware of the March deadline for KWA

- Back story on council tabling the KWA participation last week was about political posturing, Ed believes final vote will be 8/1 or 7/2

- FY 12-13 budget on track at the ¾ point

- Hired 7 officers with the additional public safety millage, but need 5 more. Will not be able to hire them until they run a new police academy about 16 weeks out.

- Retiree health care changes on hold until federal judge rules, current problem is the employee's costs exceed city's cap by $150 and they are sending bills. They cannot differentiate between a 45 yr. old retiree receiving $17,000 of healthcare benefits versus a 65 yr. old retiree who is on Medicaid. Not sure of the outcome this will have on the judge's ruling.

- Mike Brown talking to Jeff Barnes to make sure second year of state funding for the lockup is still available.

- I mentioned the sanitary sewer issue they are dealing with, 300-400 manholes need to be replaced @ $800 per manhole.

Good evening Amy,

I just received additional information from DWSD regarding an alternative option we had proposed. If at all possible it would be easier to go over this information in person rather than over the phone. As I indicated we can meet anywhere if that helps. Please let me know. Otherwise, I will wait for his call.

Thank you,
Dave

STATE OF MICHIGAN
DEPARTMENT OF TREASURY

RICK SNYDER
GOVERNOR

ANDY DILLON
STATE TREASURER

DATE: March 15, 2013

TO: Governor Rick Snyder

FROM: Andy Dillon, State Treasurer

SUBJECT: Status of Financially Distressed Local Governments

	FEBRUARY			JANUARY		
	Cities			Cities		
EM/EFM	5			5		
Consent Agreement	3			3		
Watch List	5			5		

Per your request, this memorandum summarizes the status of selected financially distressed units of local government. The following units of local government now are subject to Public Act 72 of 1990, the Local Government Fiscal Responsibility Act.

GENERAL ISSUES

Cities Close to an Exit by EFM:

- Ecorse – While most of the financial issues are resolved, the City Council without the State's involvement, has the authority, through practice and a loosely worded city charter, to meddle in the day-to-day operations of the City, including selecting and supervising staff and setting their pay. Efforts to obtain a voluntary Inter Local Agreement have been frustrated by the unwillingness of a majority of Council to see the need for the oversight contemplated by the ILA. While we continue to work on a compromise, worst case is that we will impose a transition advisory board (TAB) under PA 436 in late March.

- Pontiac – As explained below, Mr. Schimmel has a short list of projects to complete before he leaves this summer. Imposition of a TAB will be recommended.

Retiree Health Care – In most of the EFM cities, and certainly in those cities that are struggling but not yet in receivership, the cost of promised retiree health care is a major concern. In Pontiac and Flint where changes in retiree health care were imposed under PA 4, lawsuits are pending leaving the effects of those changes uncertain. In Pontiac, the annual liability is about $6.0 million, which is also the amount of the City's current annual operating deficit. Allen Park's annual liability is approxi-

mately $2.5 million and Flint's is nearly $20 million, half of which is in the general fund. While Flint and Pontiac have each taken steps to reduce the annual expense of the health coverage the retirees enjoy, those changes are being challenged. In most of our EFM cities, this issue is a difficult obstruction to fiscal balance. Pontiac, our most extreme case, has 52 current employees in the health care system compared to approximately 1200 retirees receiving health care. Treasury is working to develop a standard process to use when addressing retiree health care spending.

EFM Exit Strategy – Treasury will be meeting individually with each EFM during the next two months to develop a timeline for them to exit the local unit. This timeline will include the specific financial and operational issues that must be resolved in order to exit; target dates for issue resolution; and a benchmarking component. Additionally, Treasury is crafting a list of criteria for each EFM city which establishes success and serves as benchmarks for returning each unit to local control.

EMERGENCY MANAGER – Cities

City of Allen Park

- Update: Joyce Parker was appointed Emergency Financial Manager by the Emergency Loan Board on October 25, 2012, with duties beginning October 29. She also serves, part-time, as the Emergency Financial Manager for the City of Ecorse.

- For fiscal year ending June 30, 2012, the City had an operating surplus of $2,973,862, or 18% of general fund revenues of $16,202,731. However, when transfers out of the general fund are taken into account, the financial picture is much worse. The City transferred $4.7 million (net of transfers in) from the general fund, including a $2.4 million transfer associated with studio debt and a $2.5 million transfer to cover retirement health care. Based on these numbers, the City's unrestricted accumulated general fund deficit is $1,090,225 or 6.7% of revenues.

- Treasury is exploring the potential to restructure the studio debt. The EFM has listed the movie studio property for sale and is preparing a detailed Deficit Elimination Plan. The City's financial distress is exacerbated by the minimum staffing requirements contained in the public safety collective bargaining agreements and the cost of retiree health care.

- The Road Out: With our recent entrance into Allen Park, several general strategies are in play. As noted above, the budget is in deficit primarily because of the movie studio debt and the retiree health care obligations. However, labor contracts have minimum manning provisions that need to be resolved, and there are several areas of ongoing expense that can be reduced. Among other things, the EFM's draft deficit elimination plan also includes personnel reductions (including police and fire), wage reductions, pension plan changes, active and retiree health care changes, reduction in sick days and holiday payouts, and revenue enhancements for rubbish and lights. Ms. Parker believes that it may be possible to balance these financial issues short of bankruptcy. However, that option is also being explored. Allen Park's exit from Emergency Manager status will likely de-

pend on Treasury's ability to restructure the City's movie studio debt and make significant adjustments to the City's retiree healthcare liabilities.

City of Benton Harbor

- Joe Harris was appointed Emergency Financial Manager on August 8, 2012. The Emergency Loan Board terminated Mr. Harris' contract effective January 31, 2013 and appointed Mr. Tony R. Saunders II as the new EFM effective February 1, 2013.

- For the fiscal year ending June 30, 2012, Benton Harbor had an operating shortfall of $1,125,798, exceeding general fund revenues of $6,555,653 by 17%. The unrestricted accumulated general fund deficit is $2,285,483 or 34% of general fund revenues. The unrestricted deficit increased slightly over 2011 by approximately $56,000.

- Update: The new EFM has established a working with relationship with the City Commission which has resulted in the Commission approving a resolution of support placing a millage proposal on the May ballot. The millage proposal, if approved, replaces the 10 mill special assessment levied during December 2012, with a 10 mill operating levy. The proposal will also include asking voters for a 3 mill increase . The EFM has requested and received an advancement of the April and June revenue sharing payments to address the cash shortage. A $2.5 million emergency loan application is anticipated during July.

- The Road Out: Mr. Saunders is reviewing all City operational expenses in an effort to rationalize annual expenses and eliminate deficit spending. The large amount of accounts payable is a near-term focus. The water plant is a major liability, particularly since users in Benton and St. Joseph Townships have withdrawn from the system due to ongoing political and financial management concerns. The City charter needs to be updated, the performance of City Council needs to be improved, and ongoing liabilities for retiree health care are also an issue. OFR staff are working with the new EM on the water/sewer system debt, transfer of the pension system to MERS and reductions in staff. Treasury had anticipated that withdrawal from the City would be a near-term possibility if charter issues could be overcome. However, these recent revenue issues and the demise of the water system customer base, make a near-term exit more challenging. The new EM understands our desire to make an exit as soon as possible.

City of Ecorse

- Joyce Parker was appointed Emergency Financial Manager on August 8, 2012 by the Emergency Loan Board. She was first appointed Emergency Financial Manager on October 30, 2009. She continues to serve Ecorse on a part-time basis while she also serves as Emergency Financial Manager for the City of Allen Park.

- City Council is cool toward an interlocal agreement proposed by Treasury that would create an advisory board under the Urban Cooperation Act, PA 7 of 1967 (Ex. Session) and create a seamless transition process away from an EFM, allowing Ms. Parker to end

her service there. A majority of Council believe such an advisory board is unnecessary. Treasury staff is redrafting the ILA to address some of the suggestions made by the AG. The revised agreement will be reviewed with the Council.

- For the fiscal year ending June 30, 2012 the City had a general fund balance of $2,419,220 or 18.8% of general fund revenues of $12,904,604 and experienced an operating surplus for the first time in several years.

- The Road Out: The work of the EFM is essentially done. The remaining concern is with the City Council and the City charter language which allows substantial day-to-day involvement of the City Council. Discussions continue on an interlocal agreement to establish a Transition Advisory Board, as explained above. If this voluntary approach is not successful, a TAB can be imposed with the advent of PA 436 in late March.

City of Flint

- Edward Kurtz was appointed Emergency Financial Manager on August 8, 2012 by the Emergency Loan Board. He succeeded Mike Brown who was appointed Emergency Manager on November 29, 2011. The Emergency Financial Manager is anticipated to be in Flint for more than one year. Mr. Kurtz is taking a minimal salary as EFM, while Mike Brown now works as City Administrator, appointed by Mr. Kurtz. It is assumed that Mike Brown will be reappointed as EM in late March, and that Mr. Kurtz will be retained until June to consult with the City on the FY 2014 budget.

- For fiscal year ending June 30, 2012, the City incurred a general fund operating shortfall of $10,169,828 exceeding general fund revenues of $51,497,686 by 20%. This resulted in an unrestricted accumulated general fund deficit of $19,184,850, which is 37% of general fund revenues.

- Update: The City of Flint has been participating with Genesee County on the feasibility of the City's use of a planned water pipe line from Lake Huron that would serve a large portion of Genesee County as an alternative to water supplied by DWSD. An engineering firm selected by Treasury to conduct an independent evaluation of Flint's choices for water supply presented their findings on December 18th. This is a critical long-term decision for Flint and the region. The economics show that but for the excess cost of DWSD water during the three year construction period of the Karegnondi Water Authority (KWA) pipeline, the City will benefit from lower water costs in the long term by using the KWA water and treating the water in Flint at their own, existing, water treatment plant. A recent proposal shows that with cooperative efforts with the County, those excess costs can be further minimized.

- The Budget for the current fiscal year encompasses both revenue increases and expenditure reductions in an effort to achieve a balanced budget. For example, the budget includes assessments for waste collection, for the operation, maintenance, and improvement of street lights, and a 25 percent increase in water and sewer rates. Voters overwhelmingly approved a 6 mill public safety millage in November that will substantially improve the FY 14 budget.

On the expenditure reduction side, the budget reduces the City's workforce by 150 positions (20 percent), and includes employee concessions and a restructuring of employee health care benefits. Retiree health care has been eliminated for future employees. Litigation is pending in federal court to preclude changes to retiree health care. The Emergency Financial Manager estimates that retiree health care costs will increase by $3.5 million during the current fiscal year if he is prevented from implementing the planned changes.

- The City has recently submitted a five year deficit elimination plan that anticipates submittal of an emergency loan application of $12 million to address the accumulated deficit. The remainder of the unrestricted accumulated general fund deficit will be eliminated through $7.1 million in reductions. The City has not yet identified specific cuts but will do so as it works through the development of its fiscal year 2014 budget. The Department is assisting the City with the identification of possible reductions.

- The City's first contract with a private a solid waste removal firm was recently implemented. Republic Services hired 20 of the 24 former city employees who provided this service. Republic also purchased a number of former city waste vehicles and will implement recycling services during the summer of 2013. The transition has progressed smoothly.

- The Road Out: This is the first year of the EFM's balanced budget and they are currently on track with the budget. Major remaining issues are resolving public safety staffing and effectiveness; establishing new and cooperative approaches to water and sewer services; funding and maintaining infrastructure; defining and sustaining blight eradication strategies; and funding OPEB liabilities. Treasury will be meeting with Flint's EFM during the next month to develop a timeline for him to exit the local unit.

City of Pontiac

- Lou Schimmel was appointed Emergency Financial Manager by the Emergency Loan Board on August 8, 2012. He was first appointed Emergency Manager on October 6, 2011. The Emergency Financial Manager is anticipated to complete his work by mid-2013, but a viable oversight mechanism, such as a Transition Advisory Board (TAB) under PA 436 of 2012, will be necessary for this to happen.

- For fiscal year ending June 30, 2012, the City had an operating shortfall of $1,249,049 exceeding general fund revenues of $38,709,018 by 3%. This resulted in an unrestricted accumulated general fund deficit of $4,748,117 or 12% of general fund revenues. For fiscal year 2013, the City's financial position will benefit from the transfer of the Pontiac Wastewater Treatment Plant. From the assets received, $8.4 million was used to pay off a loan to the general fund from the water/sewer fund; $6 million was used for retiree healthcare bringing the 2013 budget into balance; $3.4 million will be applied to the accumulated deficit from fiscal year 2012.

- The EFM reports that FY2014 would be balanced except for the $6.0 million required for health care costs associated with retired non-public safety employees, and those who are still

active employees. Retired public safety employees (there are no active Pontiac public safety employees) are covered by an existing VEBA.

- The Emergency Financial Manager continues to minimize the number of unused vacant properties in the City that are city-owned. The demolition of the Phoenix Center and sale of land project remains on hold after Oakland County Circuit Court Judge Michael Warren issued an injunction barring the City from demolishing the Phoenix Center. Settlement negotiations are proceeding.

- The partnership with Oakland County for a restructuring of the ownership of the Pontiac Wastewater Treatment Plant is essentially complete. The capitalization of assets created by the transfer generated approximately $55 million, which was used to reduce bond debt related to Fiscal Stabilization bonds, Water Supply system, Sewage Disposal system, and Building Authority. The transaction has dramatically improved the City's cash position while also eliminating most of the City's outstanding debt, and preserving a reasonable fund for infrastructure maintenance within the City. It is also projected that Pontiac users of the system will enjoy significant reductions in their costs for sewer services in future years.

- Update: The EFM continues to reduce general fund expenses. He has successfully negotiated cost reductions with the City's waste pickup contractor; secured agreement from the Chief Judge to control the City's subsidy to the 50th District Court by having the Court process its own employee payroll and pay court employees out of its own account instead of the City's general fund account; and he contracted out all remaining DPW services including the snow plowing of major streets with the Oakland County Road Commission.
- The Road Out: Mr. Schimmel expects to leave this summer and strongly supports the use of a transition advisory board. His list of tasks remaining are: Phoenix Center Demolition; sale of DPW building to Consumers Energy; auction of surplus stuff; provide for the redevelopment of the Hayes Jones Community Center; sale of various properties, including golf course; and substantially reduce the $6.0 million annual deficit related to retiree health care. Mr. Schimmel recently presented to Treasury a concept plan for utilizing apparent overfunding in two retirement plans to eliminate or dramatically reduce City costs for retiree health care. Treasury encouraged further refinement of the plan subject to certain conditions being addressed.

CONSENT AGREEMENT - CITIES

City of Detroit

- For fiscal year ending June 30, 2012, the City had an operating surplus of $105,842,769. However, when transfers out of the general fund are taken into account, the City's financial position is much worse. The City transferred $236,542,790 with the largest transfer going to the transportation fund for $87.2 million, $61.2 million to the debt service fund, and $80.9 million for interest payments on the pension obligation certificates. This resulted in an unre-

stricted accumulated deficit of $327,956,700 or 30% of general fund revenues of $1,100,342,313.

- The City continues to implement the "countermeasures" developed in order to net approximately $117 million in cash improvements by June 30 and allow the City to maintain a positive (though minimal) cash position through the end of the fiscal year. Much of the cash savings are realized by deferring required payments into the next fiscal year.

- On February 1, a first draft of the 5 year plan for the City was presented to the Review Team. The plan would eliminate the deficit within 5 years by significantly lowering employee costs. Changes include a reduction of an additional 500 FTEs, freezing all pension vesting for one year, moving all employees to a defined contribution plan after that, and capping health care expenditures at $125 million a year (compared to a current spend of roughly $190 million). Other potential savings being considered include additional headcount reductions/furloughs, asset sales, debt restructuring, and revenues. Update: As of early March, this has been expanded into a draft 10 year plan.

- Update: Information provided by the City (but as yet unverified) indicates that the General Retirement System Pension Board has set aside $3 million of pension funds to fund a lawsuit against an Emergency Financial Manager, if one is named.

- Update: The Detroit Public Lighting Authority board held its first meeting on March 1. While the authority cannot draw utility tax revenues until bonds are issued, the immediate focus is on getting a loan from the general fund to replace 10-15,000 lights that are out due to operational issues (as opposed to underlying infrastructure issues).

- Update: Judge Cox, who currently oversees the Detroit Water and Sewerage Department (DWSD), has expressed an interest in ending federal oversight. Although non-binding, this will require initial agreement among stakeholders about the path going forward. Treasury generally supports a proposal to move DWSD to a semiautonomous authority. This course may significantly benefit the City however; it is also Treasury's position that the City's investment banker (Miller Buckfire) conduct a thorough analysis of the various options available, so that no action would be taken that would foreclose on any possibility. The "Root Cause Committee" (consisting of members from the City's Administration, City Council and the Water Board), has drafted a non-binding report to be presented to Judge Cox in support of the authority option. The Judge had set a March 15 deadline for completion of the report.

City of Inkster

- The City of Inkster operates under a Consent Agreement which was implemented effective February 28, 2012.

- For fiscal year ending June 30, 2012, the City had a general fund operating shortfall of $3,171,524 or 19% of general fund revenues of $15,859,971. The FY12 shortfall increased

the City's general fund unrestricted accumulated deficit to $3,604,783 or 22% of general fund revenues.

- For FY13, the City reduced staffing by 20% and made other expenditure reductions. Current budget forecasts suggest a year end deficit of $1.7 million, consistent with the DEP. The most current budget to actual report shows the City's general fund breaking even instead of generating a $600,000 surplus as budgeted. The City is preparing FY 2012-13 budget amendments which include proposed reductions of $500,000. The projected loss in property value in the city for FY 2013-14 is 9.2%.The City's deficit elimination plan anticipates the FY14 budget will be balanced. Treasury is concerned about ongoing cooperation between the City Council and the city administration . City council's consideration of FY 2012-13 budget amendments at their 3/18/2013 meeting will be enlightening. Staff from OFR regularly visits Inkster.

City of River Rouge

- The City of River Rouge operates under a consent agreement which was implemented effective December 15, 2009.

- For fiscal year ending June 30, 2012, the City had a general fund operating surplus of $1,302,690 or 11% of general fund revenues of $11,989,601. The surplus has reduced the unrestricted accumulated general fund deficit to $1,039,067 or 8.6% of general fund revenues of $11,989,601. The 2012 accumulated deficit is approximately half of the previous year's deficit so progress is evident. However, the 2012 operating surplus is a result of the receipt of approximately $1.9 million in legal settlements. Had the legal settlements not occurred, the 2012 accumulated deficit would be an estimated $2,900,000. OFR staff visits with River Rouge and feels comfortable that their ongoing efforts to reduce costs, such as the recent implementation of a public safety officer model for combined police and fire services will help the City achieve its FY14 budget objective of balanced revenues and expenditures. Implementation of the Personal Property Tax reductions is anticipated to negatively impact the city. Efforts are underway to prepare more specific estimates of the impacts on both River Rouge and Ecorse, which have relied heavily on the PPT revenues from the Great Lakes steel mill.

LOCAL UNITS OF INTEREST

City of Hamtramck

- For fiscal year ending June 30, 2012, the City had a general fund operating shortfall of $3,303,385 which is 22% of general fund revenues of $14,827,148. This deficit eliminated the general fund balance and resulted in an unrestricted accumulated deficit of $753,733 or 5% of general fund revenues. The cause of the imbalance was the result of the loss of revenue due to the expiration of the Poletown tax increment financing agreement and the failure of the City to reduce its expenditures accordingly.

- The City has submitted an application for an emergency loan for $3 million. The Department is reviewing the application to determine if the City qualifies. In addition to the emergency loan, the City is pursuing the issuance of a tax anticipation note to address its cash shortage expected to occur during March 2013.

- Late last year, the City Council voted to request a financial review by the State. Prior to initiating the requested review, Treasury asked for and the City has submitted a deficit elimination plan (DEP). The plan relies heavily on the receipt of an emergency loan, an increase in rental inspection fees, and an increase in traffic violation revenues. Given the inadequacy of the DEP, Treasury initiated a preliminary review on Monday; February 11and staff has completed the report.

City of Highland Park[1]

- For fiscal year ending June 30, 2012, the City had a general fund operating surplus of $1,293,462 or 12% of general fund revenues of $10,718,332. This increased the City's unrestricted general fund balance to $2,199,762 or 20% of general fund revenues. The positive fund balance is a result of the restatement of accrued state revenue from the fiscal year 2011 financial statements and, in large part, the forgiveness of a $4 million payable due to DTE in 2011. Also a concern is the deficit in the water/sewer fund of approximately $6.7 million and the unfunded pension liability of $13.1 million. The unfunded liability for other post-employment benefits is $26 million.

- The City's updated general fund projections indicate the City will reach a deficit situation during FY 2018. However, these forecasts do not address the possible consequences of various debt coming due within the next two years. Office of Fiscal Responsibility staff is working with local officials to develop and implement cost savings.

- Update: The City has discontinued using their water treatment plant after attempting to implement MDEQ mandated improvements to the plant. Initial improvements were estimated at $340,000, but escalated to an estimated $5.9 million after valves and other essential parts of the system were found to be inoperable. The estimated cost to demolish the facility is $3.6 million. Currently, the City is purchasing water from DWSD. Negotiations continue between the City and DWSD with the intent of DWSD operating the City's water and sewer utility systems. One challenge to finalizing this arrangement is the $8 million the City owes DWSD for sewage treatment. Treasury and City officials expect a proposal during April from DWSD which contains the prerequisites for a cooperative venture to proceed and also addresses the amortization of the City's sewer debt to the DWSD.

---

[1] Several EFMs have been appointed in Highland Park. While the financial emergency in the City remains in effect, no replacement EFM has been appointed. Treasury is working with the Mayor and Council, without an EFM appointment, to get the City out of the business of providing public services.

- The Road Out: Highland Park's broken water system needs multiple strategies for resolution. DWSD is the major focus here for delivery of treated water and administration of water and sewer bills. The City's existing water treatment facilities are in need of demolition, which will be expensive. In addition to typical OPEB liabilities, H.P. also has a major, bank-funded debt because of a court order related to delinquent payments to police pension funds. That debt will need restructuring in the next 24 months. The continuing effort to minimize the services the City provides makes the City a prime candidate for participation in regional public safety.

The following units of local government are not currently subject to Public Act 72 of 1990, the Local Government Fiscal Responsibility Act:

Royal Oak Township

- The township had an operating deficit of $132,358 and an unrestricted general fund balance of a negative $34,821 at year end 2011. The unrestricted deficit was 3.6% of general fund revenues. However, the operating deficit is 14% of general fund revenues. The unrestricted deficit decreased significantly from 2010 to 2011; a negative $284,416 in 2010 to a negative $34,821. This appears to be related, in part to a 2011 interfund transfer between the Parks and Recreation Fund (dedicated millage) and the Senior /Transportation fund. There is no money budgeted to repay the loan. There is also a loan with a local bank that was not obtained in accordance with regulations, as well as accusations of credit card misuse. Office of Fiscal Responsibility staff recently met with the newly elected Supervisor, Attorney and Financial consultant to discuss the Township's anticipated cash flow shortage during May. Subsequent discussion with staff from the Local Audit and Finance Division regarding potential borrowings by the Township also took place. Staff continues its discussions with the Supervisor, Treasurer and Clerk to improve the Township's financial practices.

City of Taylor

- For fiscal year ending June 30, 2012, the City had a general fund operating shortfall of $3,905,004 exceeding general fund revenues of $40,444,430 by 9.6%. This excessive spending increased the general fund unrestricted accumulated deficit to $5,359,732 from approximately $1.7 million in 2011. The general fund borrowed $2 million from the water and sewer funds with no apparent commitment for repayment within a prescribed time period.

- The City fell short of its deficit elimination projections by a minimum of $1.0 million. The majority of this can be attributed to Public Safety, which exceeded its budget expenditures by $881,610. Consequently, the City has submitted an updated deficit elimination plan. Staff is reviewing the updated plan to determine if it is reasonable and achievable and will require the City to submit monthly reports to monitor its adherence to the new plan

- The relationship between the Mayor and City Council remains contentious. Rather than work together to solve the City's fiscal dilemmas, the City Council tends to make decisions that seem intended to confront the Mayor. Sometimes, those decisions result in further aggravation of the City's financial condition.

County of Wayne

- For fiscal year ending September 30, 2012, the County had a general fund operating surplus of $73,158,000, or 14% of general fund revenues totaling $532,919,000. However, the general fund transferred $113,158,000 to other funds thereby increasing the 2011 unrestricted accumulated general fund deficit to $148,925,000, which is 28% of general fund revenues.

- A revised deficit elimination plan has been submitted. Staff is working with the County to resolve several issues within the plan such as the transfer of assets from other funds and unsupported reductions to eliminate the general fund deficit.

- Update: Phase II of the State's consulting engagement contract with Pierce, Monroe & Associates to examine the funds of elected officials and other select departments was completed by the February deadline including examination of the substantial balance amount in the Treasurer's Delinquent Tax Revolving Fund.. Anticipated future County borrowing, if any, will be conditioned to require changes in the financial behavior within County government. Treasury remains very concerned about the probability of jail construction cost overruns.

- The County has submitted an application to issue $90 million in tax anticipation notes, has committed to updating its deficit elimination plan to include the most recent deficit and to address concerns in a timely manner. They intend to submit monthly financial reports so that the Department may monitor the County's adherence to the plan. The Department will issue a conditional approval of the deficit elimination plan and approve the borrowing. However, the proceeds of the borrowing will be placed in an escrow account and draws will be approved by the Department subject to the County meeting certain budgeting goals.

LITIGATION SUMMARY

1. *AFSCME 25, et al* v *Governor, et al.* This action was filed in United States District Court (Eastern District). The claim is that modifications by the Emergency Manager for Detroit Public Schools to collective bargaining agreements violated various constitutional provisions (e.g., the Contracts Clause and Takings Clause).

   Status: Cross motions for summary disposition were pending. A motion hearing was held on November 1, 2012, and the Court took the matter under advisement.

2. *Bland* v *Brown, Kurtz, et al.* This action was filed in Genesee County Circuit Court. This is an action for declaratory and injunctive relief and mandamus. The claim is that the Emergency Manager transferred the assets of the Flint Retirement System to the Municipal Employees Retirement System of Michigan (MERS) in violation of Act 4. Section 19(1)(m)(iii) of the Act authorizes such a transfer provided the recipient pension fund is actuarially funded at a level of 80 percent or more. The claim is that MERS as of December 31, 2010 was funded at only 76 percent.

   Status: A pre-trial conference was held the last week of October 2012.

3. *Brown* v *Snyder*. This action was filed in Ingham County Circuit Court. The claim is that Act 4 is unconstitutional, facially and as applied. The State sought a protective order in regards to discovery which the trial court denied. On appeal, the Court of Appeals vacated the denial of the requested protective order and remanded. The trial court hearing on remand is September 26, 2012.

   Status: The case was dismissed. The parties on November 19, 2012, signed stipulations and a voluntary dismissal.

4. *Citizens United Against Corrupt Government, et al* v *City of Detroit, et al.* This action was filed in Ingham County Circuit Court. The claim is that a contract by Mayor with an outside law firm violates City charter.

   Status: Awaiting a hearing date.

5. *Citizens United Against Corrupt Government,* et al v *Detroit Financial Advisory Board.* This action was filed in the Court of Appeals. This is an action for *quo warranto.* The claim is that, among other things, no portion of the Financial Stability Agreement, including the Financial Advisory Board, survived the disapproval of Act 4 by the voters.

   Status: The case is pending having been filed on December 10, 2012.

6. *Citizens United Against Corrupt Government,* et al v *Detroit Financial Review Team*. This action was filed in Ingham County Circuit Court. The claim is that negotiation of the Fi-

nancial Stability Agreement, as well as two provisions of the Financial Stability Agreement, violated Act 4. The case was dismissed by the Ingham County Circuit Court.

Status: Plaintiff filed a claim of appeal with the Court of Appeals and plaintiff's brief is due on December 26, 2012.

7. *Coletta et al* v *David Clark et al*. This action was filed in Wayne County Circuit Court and has been certified as a class action involving approximately 9,000 plaintiffs. This is an action for declaratory and injunctive relief and damages. The claim is that trustees of the City of Detroit's General Employees Retirement system and the Police and Fire Retirement system violated various laws and breached certain fiduciary duties in regards to the investment of pension assets.

8. *Davis* v *Detroit Financial Advisory Board*. This action was filed in Ingham County Circuit Court. The claim was that the Board violated the Open Meetings Act.

   Status: The case was dismissed.

9. *Davis* v *Detroit Financial Review Team, et al*. This action was filed in Ingham County Circuit Court. The claims were that review teams were subject to the Open Meetings Act and that the Detroit Financial Review Team had acted in violation of a trial court order. The Court of Appeals held on May 21, 2012, that review teams are not subject to the Open Meetings Act, but remanded to the trial court for an evidentiary hearing on the issue whether defendants should be held in contempt. Subsequently, the trial court declined to hold an evidentiary hearing and plaintiff appealed that decision to the Court of Appeals.

   Status: Payment of plaintiff's costs and attorney fees rendered moot the need for an evidentiary hearing.

10. *Davis* v *Highland Park Financial Review Team* (referred to as *Highland Park II* to distinguish it from the first Highland Park case which claimed that review teams were subject to the Open Meetings Act). This action was filed in Ingham County Circuit Court. The claims are that the terms of review team members expire 60 day (90 day with an extension) after appointment and that Act 4 violated Section 29 of the Headlee Amendment. The trial court dismissed the former claim, but held that Act 4 did violate the Headlee Amendment.

    Status: Plaintiff failed to file a brief.

11. *Davis* v *Parker*. This is an action for *quo warranto*. This action was filed in the Court of Appeals after the foregoing case was filed in Ingham County Circuit Court. The claims are that the Emergency Financial Manager has no entitlement to her office because the statutory process of Act 72 was not followed and that Act 72 is not revived because it was repealed by Act 4.

Status: The Court of Appeals denied application for leave to proceed by *quo warranto*.

12. *Davis* v *Rick Snyder, Michael Flanagan, and Joyce Parker*. This action was filed in Ingham County Circuit Court. This is an action for declaratory judgment. The claims are that the statutory process of Act 72 was not followed, that Act 72 does not authorize the grandfathering of actions taken under Act 4, and that the criteria for appointment of emergency managers under Act 4 and emergency financial managers under Act 72 differ.

    Status: A motion hearing is scheduled on January 30, 2013.

13. Davis v Roberts. This action was filed with the Michigan Supreme Court. The action is for quo warranto. The claims are that the Emergency Financial Manager has no entitlement to his office because the statutory process of Act 72 was not followed and that Act 72 is not revived because it was repealed by Act 4. The Court of Appeals previously denied relief and held that Act was revived.

14. *Davis* v *State of Michigan, City of Detroit, et al.* This action was filed in Ingham County Circuit Court. The claim is that the financial stability agreement violates the Headlee Amendment. The trial court denied plaintiff's motion for an evidentiary hearing, but allowed depositions. The Court of Appeals granted the State's application for leave to appeal. Defendants filed a reply brief on September 27, 2012.

    Status: The Court of Appeals held oral arguments on December 5, 2012. The matter is awaiting decision.

15. *DPOA* v City of Detroit. This action was filed in Wayne County Circuit Court. This was an action for injunctive relief. The claim was that duty to engage in Act 312 arbitration survived the duty to bargain under the Public Employment Relations Act. On August 30, 2012, the Court granted the State's motion to intervene, dissolved a previously entered temporary restraining order, refused to enter a preliminary injunction, and determined that the City's employment terms are controlling until a new agreement is reached. The Court dismissed the case.

    Status: DPOA filed with the Court of Appeals a claim of appeal and motion to stay, the latter of which the Court denied.

16. *DPOA* v *City of Detroit*. This action was filed in the Court of Claims (Ingham County Circuit Court). The claim is that the duty to engage in Act 312 arbitration survived the duty to bargain under the Public Employment Relations Act.

    Status: Supplemental briefs have been filed by all parties who are awaiting a decision.

17. *FPOA* v *City of Flint*. This action was filed in Genesee County Circuit Court. This is an action for injunctive relief. The claim is that an Emergency Manager order which im-

posed a labor contract should be invalidated because the statute under which it was issued, Act 4 of 2011, no longer is in effect.

18. *Kincaid* v *Kurtz*. This action was filed in Genesee County Circuit Court. This is an action for *quo warranto* against the Flint Emergency Financial Manager. The claim is that the appointment of the Emergency Financial Manager is unconstitutional because Act 72 was repealed by Act 4 and, per the anti-revival statute (MCL 8.4), Act 72 was not revived upon the suspension of Act 4. Plaintiff's amended complaint and brief as requested by the Court were due on November 19, 2012. A hearing was scheduled on November 26, 2012. The Court granted a motion to adjourn the November 26, 2012, hearing which was rescheduled for December 20, 2012.

    Status: The case was dismissed on December 20, 2012.

19. *NCO Acquisitions, LLC, et al* v *Governor, et al*. This action was filed in United States District Court (Eastern District). The claim is that termination lease by Emergency Manager for Detroit Public Schools violated the Contracts Clause and Takings Clause of the federal Constitution.

    Status: The parties have filed cross motions for summary disposition and a hearing has been scheduled for January 9, 2013.

20. *Roberts* v *Murray, et al, and Detroit Board of Education*. This action was filed in Wayne County Circuit Court. This was an action for injunctive relief filed by the Emergency Financial Manager with a cross claim for injunctive relief by the School Board. The Court adopted the position set out in Attorney General Opinion No. 7267 that Act 72 is revived during the suspension of Act 4. The Court also held that actions taken under Act 4 prior to the time of its suspension remained valid.

    Status: Not available.

21. *Sutton v Brown*. This action was filed in Ingham County Circuit Court. The claim was that the appointment of Mike Brown as Emergency Manager for the City of Flint violated the Headlee Amendment. On August 8, 2012, the trial court dismissed the complaint due to lack of service by plaintiff.

    Status: The case was dismissed.

22. *Valenti* v *Snyder, et al*. This action was filed in United States District Court (Eastern District). The claim is that the Detroit financial stability agreement violated the contracts clause, procedural due process, and amounted to a tortious interference with contractual relations. The Court concluded that the suspension of Act 4 rendered the case moot, but that the case could be revisited depending upon the outcome of the Act 4 referendum.

Status: The case was dismissed, but on January 24, 2013, plaintiffs filed a motion with the court to reopen the case.

23. *Watkins, et al* v *the Governor, State Treasurer, and Attorney General.* This action was filed in Ingham County Circuit Court on behalf of two members of the Pontiac City Council, four members of the Benton Harbor City Commission, and all nine members of the Flint City Council. This is an action for mandamus or, in the alternative, declaratory, and injunctive relief. The plaintiffs seek to have the reappointments of the seven existing emergency financial managers declared invalid on grounds that the suspension of Act 4 did not revive Act 72.

    Status: The case was dismissed. At a motion hearing on December 5, 2012, the Ingham County Circuit Court denied plaintiffs' requested relief and granted summary disposition in favor of the State.

24. *Welch et al* v *Brown, Kurtz, et al.* This action was filed in United States District Court (Eastern District). This is a class action for injunctive relief and damages. The claim is that changes implemented by the Emergency Manager under Act 4 and to be implemented under Act 72 to retiree healthcare violate certain constitutional and contractual rights of retirees. At a hearing on September 6, 2012, the Court declined to grant an injunction. Instead, the Court directed the parties to meet. The Court was of the opinion that plaintiffs appeared to misunderstand the nature of changes to their coverage and should first meet with city representatives to discuss those changes.

    Status: The meeting between plaintiff's counsel and City's counsel was held and plaintiffs are expected to continue litigation.

Subject: Meeting to review DWSD proposals

Hello Mr. Kurtz,

Last week I spoke with Mayor Walling to share DWSD's continued interest in discussing a long term Water Service contract to serve Flint. Mayor Walling indicated he would pass along our interest in meeting in the next week or two to discuss new proposals that are responsive to the changes that the City of Flint has identified in terms of it's requirements and priorities including; a reduction in requirements from 18 to 15 MGD and the newly expressed desire not to blend Flint treated water with DWSD treated water. The latter change certainly came as a surprise given the

economic advantage of this for Flint and Flint's intiated request for this specific option. I am curious to know what new information resulted in this option becoming less desirable and if there are opportunities to address those concerns.

It has been a rather odd experience to be outside of the process these last few months. I've taken note that the KWA proposal provides a single line of supply and would still leave Flint in the position of retaining the Flint plant in a full time operating mode as well as maintaining the capacity of treating two very different sources of supply in the event of an interruption. Although the line would be newer than the existing transmisson system serving Flint, it does not accomplish the redundancy in supply that Flint has long expressed an interest in.

With the changes identified in Flint's requirements and preferences, we have looked at opportunities to address these as well as Flint's historical concerns about the single transmission main and have developed proposals that twin the transmission main with smaller diameter pipe, provide transmission redundancy along the entire length from Imlay to the Flint Plant, as well as provide Flint the opportunity to consider selling Flint's portion of the 72 inch line and avoid the signficant risks and costs Flint has expresed concern about in maintaining that line. In addition, the twinning of supply with full redundancy, without additional treatment requirements, would allow Flint to avoid capital and well as operating expenses in both the plant and transmission system. All of this can be accomplished with still a significant reduction in Flints rates.

We are a new service organization. The rate adjustments for FY 14 are announced with significantly constrained adjustments from what had been forecast previously. Our financial plans reflect the ongoing benefit of our organizational optimization efforts. Recent discussions have brought attention to a near term opportunity to move toward greater independance with an opportunity to expand represenation in our governance. This is not the DWSD of your recollection.

I welcome the opportunity for discussion at your earliest convenience.

Best regards,

Sue

Governor and Dennis,

Attached is the recommendation from the engineers we hired to advise us on the KWA project for Genesee/Flint. As you will see, they are recommending that Flint stay with DWSD. This has ramifications that merit further discussion. Dennis and Brom, can you schedule a mtg for follow up?

Thanks,

Andy

STATE OF MICHIGAN CONTRACT NO. 271N3200089

CITY OF FLINT WATER SUPPLY ASSESSMENT

At the request of the Treasurer, Tucker, Young, Jackson, Tull, Inc. (TYJT) makes the following recommendation to the Department of Treasury concerning Flint's water supply alternatives. Based on the financial analysis performed of the various options presented by DWSD to continue treated water service to Flint compared to Flint being supplied by the new KWA untreated water system, TYJT believes that several of the options presented by DWSD are lower in cost currently and over the long run than the one offered by KWA. TYJT also believes that DWSD's most recent offer (subsequent to the submittal of our report) to build a smaller parallel water main from Imlay to Flint, funded by the entire DWSD base of customers, is the best solution offering the least cost alternative and the required redundancy by MDEQ.

Furthermore, since a majority of the KWA system has not been designed and none of the system has been constructed, there is an additional risk that the cost of the KWA system may actually be higher than estimated due to potential construction delays and unforeseen conditions. This risk to Flint could be substantial since the city is responsible for 30 percent of the KWA design and construction costs while still having to purchase water from DWSD during the construction period.

Finally, there are other issues that were identified in our report that may result in risks to Flint if it were to join KWA that should be considered by the Treasury in determining how Flint's potable water should be supplied. These issues are related to redundancy and reliability, other items affecting cost, and Flint's desire to control its own destiny related to its water supply. These are described further below.

- DWSD's supply to Flint is via a 72-inch water main from Imlay City. This main also supplies Imlay City, Mayfield and the Greater Lapeer County Utilities Authority (GLCUA). The volume of water contained within the 72-inch main is approximately 30 million gallons. If Genesee and Flint move to KWA then the three remaining communities' consumption would most likely not be large enough to maintain fresh water in DWSD's pipeline (due to loss of chlorine residual). DWSD may consider shutting down the 72-inch line completely due to the water quality concerns, which would then create an additional burden for Imlay, Mayfield and GLCUA to finance treated water supplies.
- The KWA supply option is counter to the Treasury's Competitive Grant Assistance Program (Formerly EVIP Grant). This program has been put in place to allow for communities to consolidate their services and save money. Two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (GLCUA, Mayfield, Imlay City) separating from another water system is in contradiction to the program.
- There is a concern over the ability of smaller systems (KWA) over larger systems (DWSD) to pay for future unfunded mandates and regulations. Obviously, identifying regulation requirements over 30 years is hard to determine. However, it is widely accepted that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.
- Although Flint will be responsible for 30 percent of the construction cost, they will only have a minority vote on the KWA board. Furthermore, there are other communities (Lapeer County, the City of Lapeer, and Sanilac County) that sit on the board and vote. However, they are not purchasing water nor contributing to the construction costs. Their position on the KWA Board will not provide them an ability to "control their own destiny," as they have stated to the Treasury.

This came up in our meeting. Let's forward this to TY and ask them for a brief explanation why City's decision to pull these options were not prudent plus I think DWSD modified their proposal from that point.

> on March 25, 2013 at 10:45 PM, updated March 26, 2013 at 1:28 AM
> FLINT, MI – Flint is one step closer to getting its water from Lake Huron as part of the Karegnondi Water Authority.
> The vote, approved 7-1 at the Flint City Council meeting Monday, March 25, may have set in motion the end to Flint paying to get its water from Detroit.
> Under the proposal, Flint would get 16 million gallons per day of raw water from Lake Huron, pipe it to Flint for treatment and then sell it to customers throughout the city. Another 2 million gallons per day would come from the Flint River and will be treated in Flint.
> Mayor Dayne Walling said the Department of Environmental Quality must approve Flint's getting 2 million gallons per day from the Flint River.
> Tuesday's meeting followed weeks of discussions and special meetings surrounding the resolution.
> "We got there," Councilman Joshua Freeman said. "That's the important thing."
> There were more than 50 people at Monday's meeting.
> "Going with Karegnondi is the best decision. We have no opinion on the economics of the decision," said Rebecca Fedewa, Flint River Watershed Coalition executive director. "If we start drawing water out of the Flint River, we are at risk of having to start releasing water from our reservoirs."
> Genesee County Drain Commissioner Jeff Wright said the decision must still be approved by a county water and waste advisory board. The KWA board will then be reconvened for final approval.
> Wright said construction could start in May.
> State treasury officials still must approve the city council's move because Flint has an emergency

financial manager. All expenditures over $50,000 must be approved.
Genesee County Drain Commissioner Jeff Wright has said that Flint would pay roughly $6.4 million annually for water service if it joined the pipeline – a nearly $4 million savings on what it pays Detroit for water.
Walling previously said the city would save $19 million over eight years by getting water from the KWA.
"It's a historic night in the City of Flint," Walling said. "The savings will be less with the capacity level approved by city council because there will be increased treatment cost for the river water."
He said the DEQ told the city it needed to get 18 million gallons per day or there would have to be additional work done at Flint's water plant.
Flint's water plant and the Flint River is currently the backup for Flint and Genesee County, however, the plant only operates four times per year.
Councilman Bryant Nolden was the lone dissenting vote.
"It was a protest vote," Nolden said. "I knew they had enough votes. I just feel like the Flint River is our best option."
Karengnondi is the regional water authority that includes Genesee, Lapeer and Sanilac counties and the cities of Flint and Lapeer.
Flint is the second municipality, behind Genesee County, to officially decide to purchase raw water through the KWA. Lapeer city officials said they intend to purchase water, but an agreement has been finalized.

Subject: RE: Treasury: Flint Assessment
Attachments: TYJT Recommendaton DWSD vs Flint.pdf

Good morning Brom,

We were contacted by the Treasurer last Thursday and met with him on Friday. He also asked that we draft a summary recommendation for his use. It is was sent to him yesterday and is attached to this email along with his response below. Our recommendations are for Flint to continue with DWSD's services in lieu of being supplied by KWA.

Although your memorandum took into account alternative proposals by KWA, it did not consider DWSD's new proposals made through the Treasury last month to build a second parallel line to the existing Flint WTP. These proposals are less costly than the most optimistic KWA proposal and the cost information was provided to the Treasurer on Friday as well. Note that the a second parallel line removes the need for Flint to operate its treatment plant and significantly reduces their operating costs. The additional reasons for our recommendations are also summarized in the attached recommendations.

It is also worth noting that it is good engineering practice to be conservative in estimates when a majority of the design has not been completed. We believe this to be prudent; especially when considering the financial capabilities and responsibilities of the end user (Flint). When a design is nearly complete, then it is acceptable to use the engineering estimate as there are specific quantities and materials of construction to cost out.

This point is brought to your attention to outline our approach. For the intake estimate, which was 90% complete at the time of our analysis, was used "as provided" in our cost comparison. We would hope that this cost is close to the contractors bid in February. However, this should not be consider a telltale for the rest of the project as the remaining costly components are only designed at a very preliminary level.

Please contact me should you need further clarification or have any questions.

Thank you,
Dave

Andy asked that I forward this memo for your comment. Can you address the conclusions, especially the fact that the City removed from consideration the various "blend" options.

For the time being you can send any comments just to me and Andy.

Thanks.

Brom

STATE OF MICHIGAN CONTRACT NO. 271N3200089

CITY OF FLINT WATER SUPPLY ASSESSMENT

At the request of the Treasurer, Tucker, Young, Jackson, Tull, Inc. (TYJT) makes the following recommendation to the Department of Treasury concerning Flint's water supply alternatives. Based on the financial analysis performed of the various options presented by DWSD to continue treated water service to Flint compared to Flint being supplied by the new KWA untreated water system, TYJT believes that several of the options presented by DWSD are lower in cost currently and over the long run than the one offered by KWA. TYJT also believes that DWSD's most recent offer (subsequent to the submittal of our report) to build a smaller parallel water main from Imlay to Flint, funded by the entire DWSD base of customers, is the best solution offering the least cost alternative and the required redundancy by MDEQ.

Furthermore, since a majority of the KWA system has not been designed and none of the system has been constructed, there is an additional risk that the cost of the KWA system may actually be higher than estimated due to potential construction delays and unforeseen conditions. This risk to Flint could be substantial since the city is responsible for 30 percent of the KWA design and construction costs while still having to purchase water from DWSD during the construction period.

Finally, there are other issues that were identified in our report that may result in risks to Flint if it were to join KWA that should be considered by the Treasury in determining how Flint's potable water should be supplied. These issues are related to redundancy and reliability, other items affecting cost, and Flint's desire to control its own destiny related to its water supply. These are described further below.

- DWSD's supply to Flint is via a 72-inch water main from Imlay City. This main also supplies Imlay City, Mayfield and the Greater Lapeer County Utilities Authority (GLCUA). The volume of water contained within the 72-inch main is approximately 30 million gallons. If Genesee and Flint move to KWA then the three remaining communities' consumption would most likely not be large enough to maintain fresh water in DWSD's pipeline (due to loss of chlorine residual). DWSD may consider shutting down the 72-inch line completely due to the water quality concerns, which would then create an additional burden for Imlay, Mayfield and GLCUA to finance treated water supplies.
- The KWA supply option is counter to the Treasury's Competitive Grant Assistance Program (Formerly EVIP Grant). This program has been put in place to allow for communities to consolidate their services and save money. Two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (GLCUA, Mayfield, Imlay City) separating from another water system is in contradiction to the program.
- There is a concern over the ability of smaller systems (KWA) over larger systems (DWSD) to pay for future unfunded mandates and regulations. Obviously, identifying regulation requirements over 30 years is hard to determine. However, it is widely accepted that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.
- Although Flint will be responsible for 30 percent of the construction cost, they will only have a minority vote on the KWA board. Furthermore, there are other communities (Lapeer County, the City of Lapeer, and Sanilac County) that sit on the board and vote. However, they are not purchasing water nor contributing to the construction costs. Their position on the KWA Board will not provide them an ability to "control their own destiny," as they have stated to the Treasury.

Eric

Here is the information we provided to the Treasurer on Friday regarding the recent DWSD offers. The first attachment was provided by DWSD to outline the cost of the twinning options. The second attachment is using DWSD's rates to project the 30 year cumulative cost for comparison. As you can see these options are less than the most optimistic KWA cost estimate.

Dave

Subject:	Tom Saxton, Treasury with DEQ RE: DWSD
Location:	1st Floor Treasury Austin Bldg - Treasurer's Conf. Room
Start:	Tue 3/19/2013 4:00 PM
End:	Tue 3/19/2013 4:30 PM
Show Time As:	Tentative
Recurrence:	(none)
Meeting Status:	Not yet responded
Organizer:	Thelen, Mary Beth (DEQ)
Required Attendees:	Wyant, Dan (DEQ); Saxton, Thomas (Treasury); Stibitz, Brom (Treasury); Sygo, Jim (DEQ); Creal, William (DEQ); Argiroff, Phil (DEQ); Wurfel, Brad (DEQ)
Optional Attendees:	Thelen, Mary Beth (DEQ); Smith, Laura (DEQ); Pleyte, Beth (Treasury); Hichez, Amy (Treasury)
Importance:	High

Tom Saxton has ½ hour at 4:00 on March 19 to talk with Director Dan Wyant and staff RE: DWSD. This has been confirmed.
DEQ Participants: Director Wyant, Jim Sygo, Bill Creal, and Phil Argiroff. Brad: FYI as needed.
Thanks.
Mary Beth
241-7390

Note from Treasury:
Tom and Brom Stibitz would have time @ 4:00 for a ½ hour. Tom will be out of state on Wed. I'm sorry that's the only option I have.
We are on the 1st Floor Austin Bldg. The meeting will be in the Treasurer's conference room.

Hi, Amy:

I need 15 minutes with Andy next week.

So you know, I will be attending the Governor's Economic event at Cobo Monday and Tuesday.

Thanks!

Roger

For whatever credibility I have; I was a witness. Andy asked them given their past work with dwsd could they be a honest broker in this assessment and their response was an unequivocal "yes". To a point Brom raised previously are you ok with the rate assumptions over time ?

It is was sent to him yesterday and is attached to this email along with his response below. Our recommendations are for Flint to continue with DWSD's services in lieu of being supplied by KWA.
> >
> > Although your memorandum took into account alternative proposals by KWA, it did not consider DWSD's new proposals made through the Treasury last month to build a second parallel line to the existing Flint WTP. These proposals are less costly than the most optimistic KWA proposal and the cost information was provided to the Treasurer on Friday as well. Note that the a second parallel line removes the need for Flint to operate its treatment plant and significantly reduces their operating costs. The additional reasons for our recommendations are also summarized in the attached recommendations.

It is also worth noting that it is good engineering practice to be conservative in estimates when a majority of the design has not been completed. We believe this to be prudent; especially when considering the financial capabilities and responsibilities of the end user (Flint). When a design is nearly complete, then it is acceptable to use the engineering estimate as there are specific quantities and materials of construction to cost out.

This point is brought to your attention to outline our approach. For the intake estimate, which was 90% complete at the time of our analysis, was used "as provided" in our cost comparison. We would hope that this cost is close to the contractors bid in February. However, this should not be consider a telltale for the rest of the project as the remaining costly components are only designed at a very preliminary level.

Please contact me should you need further clarification or have any questions.

Thank you,
Dave

1. INTRODUCTION

Tucker, Young, Jackson, Tull, Inc. (TYJT), at the request of the State Treasurer performed an analysis of the water supply options being considered by the City of Flint. The City of Flint is presently supplied potable water from the Detroit Water and Sewerage Department (DWSD). This supply is from a single 72-inch water main that terminates at a master meter located at Potter and Baxter. Additionally, downstream of the DWSD master meter, Flint supplies its customer Genesee County. The City of Flint also operates a water treatment plant that uses the Flint River as its source of supply to provide back up and redundancy to the DWSD supply as required by MDEQ

The Karegnondi Water Authority (KWA) is planning on constructing a raw water supply system that could provide Lake Huron water to the Flint Water Treatment Plant. Flint's existing plant would be upgraded to treat the new raw water source.

The State Treasurer has appointed an emergency financial manager for the City of Flint. As such the Treasurer has requested TYJT to provide an analysis of the water supply options to assist the Treasurer in determining any potential risk and the best course going forward for supplying potable water to the City of Flint.

Report Organization

The following sections of this report are described below:

Section 2 – The basis of the analysis is described in this section. The options include the KWA option and several options offered by DWSD.

Section 3 – A significant amount of information and data was collected including memorandums, reports, drawings, financial reports, and other documents. This section summarizes the information used in the analysis.

Section 4 – This section describes the evaluation of the cost of supply for the Flint options. The costs are comprised of the initial cost of operations plus the annual rate of escalation/inflation.

Section 5 – The evaluation process used to analyze the construction costs associated with the KWA supply system is described in this section. Additionally, the cost of financing the capital requirements is described.

Section 6 – This section presents the financial review of the options considered to supply potable water to Flint. A summary of these options is also provided.

Section 7 – In addition to the financial analysis other considerations were identified that should be considered in understanding the risks and determining the best option to supply Flint. They include items related to cost, redundancy and reliability, and Flint's ability to control their future cost of water supply.

2. FLINT WATER SUPPLY OPTIONS

Two water purveyor options were evaluated; the KWA water supply system and continued supply from DWSD. Both suppliers would provide water from Lake Huron as the source. The KWA system is a raw water supply, which means that the water would have to be treated by Flint before distributing the potable water to its customers. The DWSD supply is potable or "finished" water and would not need additional treatment.

Additionally, an option for the Flint WTP to supply the City of Flint without being supplied from either DWSD or KWA was initially considered. The preliminary investigation evaluated the cost associated with the required improvements to the plant and to the Flint River dam system. Although it appeared that this was a viable option, Flint in a meeting on December 20, 2012 with the Treasury, stated that the City did not want to pursue the option and it is no longer being considered.

Karegnondi Water Authority (KWA) Lake Huron Water Supply

The KWA water supply system schematic is shown in Figure 2-1. The system is comprised of an intake in Lake Huron that supplies water to the Lake Huron Pump Station (LHPS). The LHPS lifts the water and pumps it through an approximately 22 mile long 60-inch pipeline. The pipeline terminates at a 5 MG reservoir and is then pumped from the Intermediate Pump Station (IPS) through approximately 26 miles of 60-inch and 18 miles of 30-inch pipeline to the existing Flint WTP. Downstream of the IPS, approximately half way to the Flint WTP, the 60-inch line would also supply a new Genesee County WTP.

The raw water transmission system has a 60 MGD capacity and is sized to deliver a maximum of 18 MGD to the Flint WTP with an average day supply of 12 MGD. Improvements at the Flint WTP would also be required to treat the lake water as the plant is currently designed to treat the Flint River water.

The term of the KWA contract for Flint is 40 years.

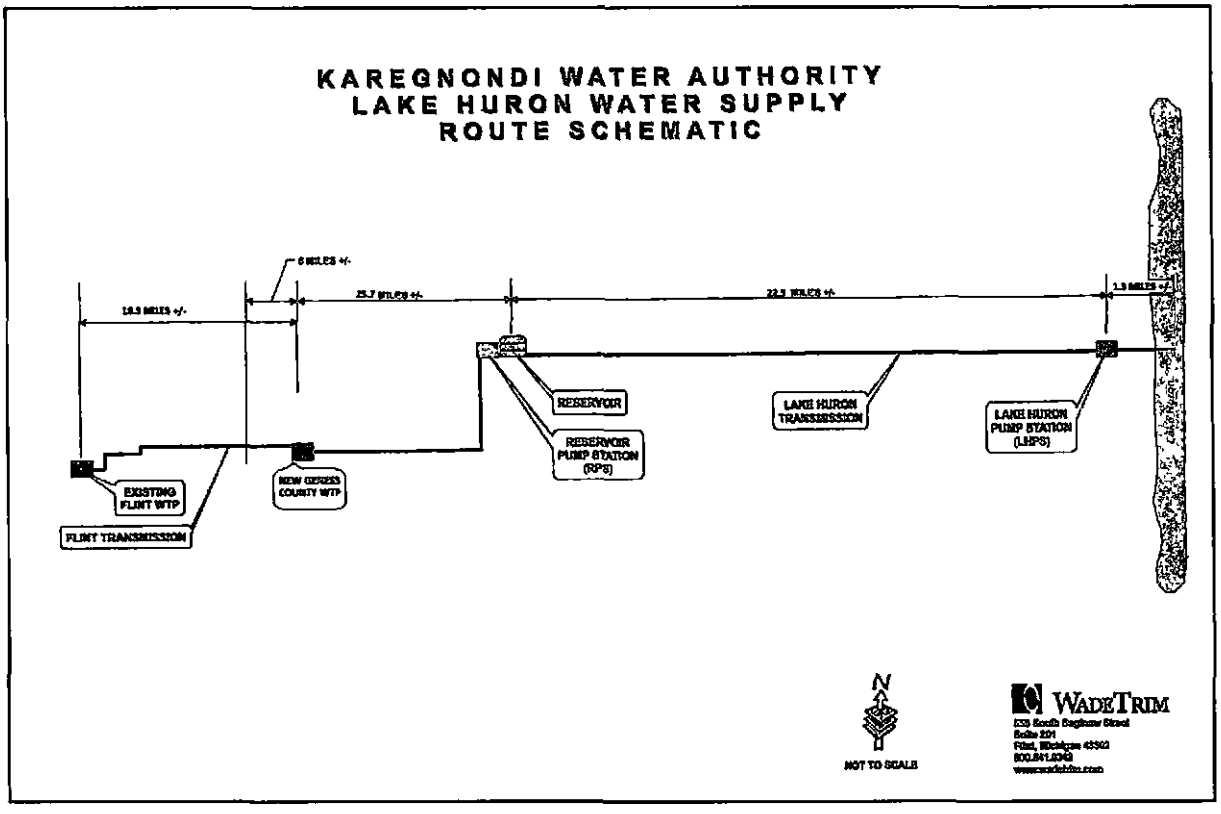

Figure 2-1: KWA Raw Water System

DWSD Water System

The DWSD system schematic is shown in Figure 2-2. Flint is currently supplied by DWSD at Master Meter FL-1, located at Potter and Baxter. Flint typically gets its water from the Lake Huron WTP, located in Fort Gratiot, Michigan; near the Lake Huron shoreline. Water is treated and pumped at the Lake Huron WTP and supplied through a 120-inch pipeline to an intermediate pump station called the Imlay Pump Station. The Imlay Pump Station has 20 MG of reservoir capacity. Depending on the time of year and the DWSD system demand, water is either bypassed directly to Flint or it is re-pumped at Imlay. It should be noted that the DWSD supply to Flint is part of a very large water system and during emergencies or outages water can be supplied from the south up to Flint in lieu of the Lake Huron facility.

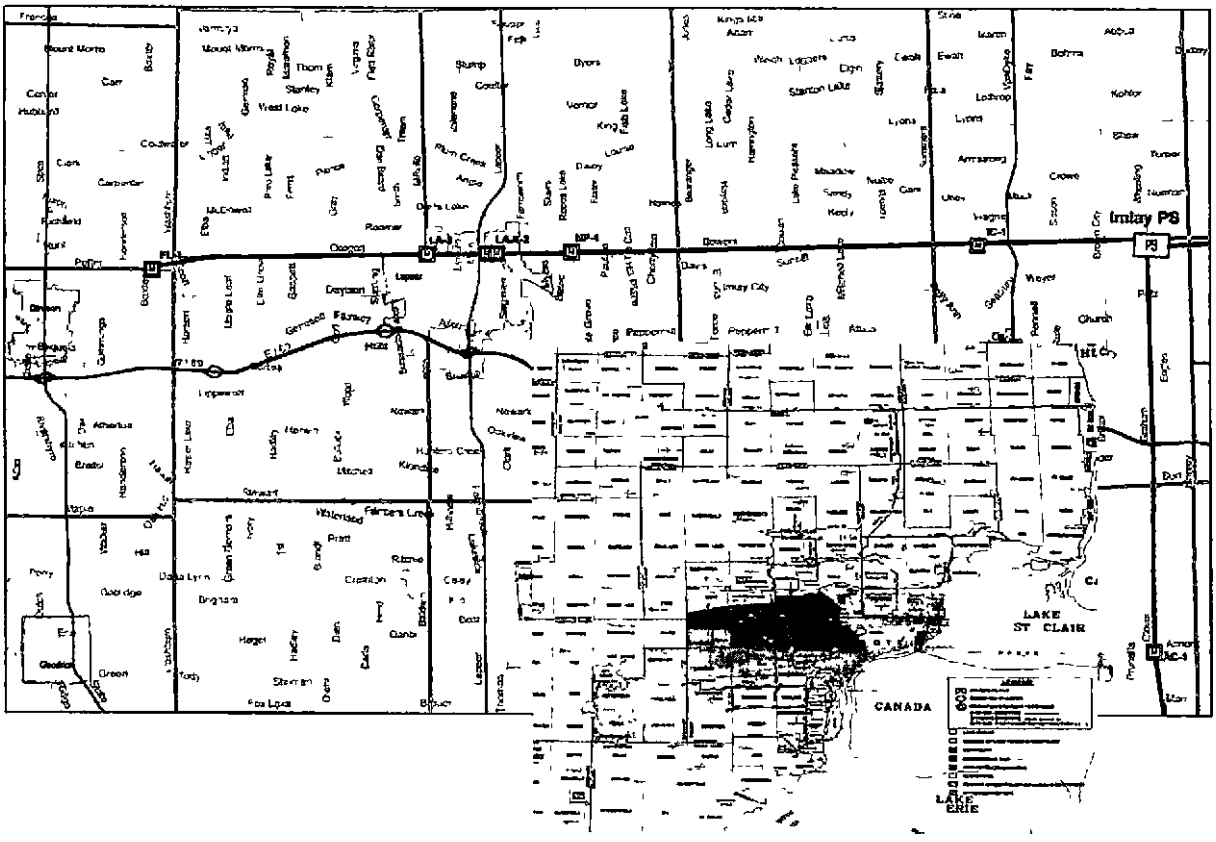

Figure 2-2: DWSD Water System

The pipeline from Imlay to FL-1 is a 72-inch pipeline. It has been estimated that the 72-inch line serving Flint has a capacity in excess of 90 MGD.

DWSD has presented several contractual options to Flint and all of them are based on Flint signing a new 30 year contract. The options shown in Table 2-1 are based on two different supply points; one at the current master meter location FL-1 at Potter and Baxter (P&B) and the other at the location of the Imlay Pump Station. The reason for the varying options is to provide a lower water rate at the Imlay Station, since the DWSD rate formula is based on distance and elevation factors related to the supply location.

The rates are also dependent on the maximum amount of water DWSD supplies. As example, if DWSD supplies a maximum day demand of 18 MGD that would equal the entire amount of water required by Flint.

For the options less than the maximum of 18 MGD means that the Flint WTP would supplement the difference by supplying water treated from the Flint River. These options are known as "blending" and would allow for Flint to blend two sources of water to supply its customers; the Flint River using the Flint WTP and Lake Huron from DWSD system.

Description	Average Day Demand
18 MGD Maximum Day Customer – FL-1	12 MGD
12 MGD Maximum Day Customer – FL-1	8 MGD
8 MGD Maximum Day Customer – FL-1	8 MGD
12 MGD Maximum Day Customer - Imlay	12 MGD
8 MGD Maximum Day Customer - Imlay	12 MGD

Table 2-1: DWSD Supply Options

3. DATA COLLECTION

During the course of the investigation several documents were used to perform the analysis. The names of the documents are listed below for reference.

KWA and Flint

- Preliminary Engineering Report, Lake Huron Water Supply Karegnondi Water Authority, September 2009;
- Analysis of the Flint River as a Permanent Water Supply for the City of Flint, July 2011;
- Cost Comparison, KWA vs. DWSD, Letter to Mr. Kurtz, October 31, 2012;
- Lake Huron Supply Study, KWA, Appendix 20, October 2012 Preliminary Report Update, Final Report (DRAFT), October 4, 2012;
- Articles of Incorporation of Karegnondi Water Authority, endorsed in 2010;
- Karegnondi Water Authority Bylaws, October 26, 2010;
- KWA Raw Water Supply Contract;
- Flint WTP Statement of Revenues and Expenditures 09' – 12';
- GCDC Division of Water and Waste Services Financial Statements 03' – 11'; and
- Assorted emails with further clarification of questions and documentation.

DWSD

- Historical Rates and Charges to Flint 04' – 13';
- Historical Rates and Charges to Flint with Hypothetical Model Contract 10' – 13';
- 2013 Rates and Charges for the following options:
  - 18 MGD Maximum Day Customer at FL-1;
  - 12 MGD Maximum Day Customer at FL-1 (Flint blending*);
  - 8 MGD Maximum Day Customer at FL-1 (Flint blending*);
  - 12 MGD Maximum Day Customer at Imlay (Flint blending*);
  - 8 MGD Maximum Day Customer at Imlay (Flint blending*); and
- Assorted emails with further clarification of questions and documentation.

* Flint blending based on DWSD supplying two-thirds and Flint one-third of 12 MGD average day demand.

Two meetings were also held; one with DWSD and one with Flint and Genesee County representing KWA. The meetings were held on November 19, 2012 and November 20, 2012, respectively. Minutes from these meetings are included in Appendix A.

4. COST OF SERVICE

Information provided by DWSD, Flint, and representatives of the KWA were used in the cost of service evaluation. To evaluate the annual escalation/inflation rate over the planning period, the rate adjustment for DWSD was estimated based on the recent rate adjustment history. For the KWA system both the estimated cost of operations when the system begins supplying water and the annual rate adjustment or inflation was evaluated. The existing cost of operations and escalation for the Flint WTP was based on actual costs provided and then adjusted depending on the scenario considered. This section describes the evaluation process and the rates used in the analysis.

DWSD Water Supply

The City of Flint has been a customer of DWSD since 1967. The Flint WTP has been maintained as a backup to the DWSD system. As indicated previously, several options were provided by DWSD depending on the type of service Flint was to select. The unit cost of water for each of these options is shown in Table 4-1. These rates are based on DWSD's FY13, which are current until July 2013.

Description	Average Day Demand (MGD)	Unit Rate ($/MCF)
18 MGD Maximum Day Customer – FL-1	12	16.37
12 MGD Maximum Day Customer – FL-1	8	16.31
8 MGD Maximum Day Customer – FL-1	8	12.68
12 MGD Maximum Day Customer - Imlay	12	14.38
8 MGD Maximum Day Customer - Imlay	12	11.11

Table 4-1: Cost of DWSD Supply Options

To determine annual escalation rate, DWSD's last 10 years of history was used along with other large urban water systems in Michigan. The water systems used for benchmarking comparison were: Lansing, Grand Rapids, and Saginaw.

Table 4-2 identifies the annual and average rate of increase to Flint based on supplying water either to the current FL-1 at Potter and Baxter or Imlay. Note the last three years of the rates (FY 2011 through FY 2013) assumes that Flint's cost would be based on the new 30 year contract; FY 2011 being the first year that the new contract was available.

Fiscal Year	Average Unit Cost ($/MCF)	Annual Change (%)
2004	11.06	
2005	10.24	-7.4
2006	10.56	3.1
2007	11.09	5.0
2008	11.35	2.3
2009	13.07	15.2
2010	11.73	-10.3
2011	13.89	18.4
2012	15.08	8.6
2013	16.24	7.7
Average		4.4%

From FL-1

Fiscal Year	Average Unit Cost ($/MCF)	Annual Change (%)
2004	11.06	
2005	10.24	-7.4
2006	10.56	3.1
2007	11.09	5.0
2008	11.35	2.3
2009	13.07	15.2
2010	11.16	-14.6
2011	12.23	9.6
2012	13.28	8.6
2013	14.32	7.8
Average		2.9%

From Imlay

Table 4-2: Recent DWSD Water Rates

Audited financial reports were used to determine the rate of inflation associated with other three large municipal systems. The results are shown in Table 4-3.

Water Systems	Years Evaluated	Average Rate (%)
Lansing	05'-12'	4.6
Grand Rapids	04'-11'	1.6
Saginaw	04'-11'	7.0

Table 4-3: O&M Inflation Rates of Other Large Water Systems

Based on the information analyzed from DWSD and the other communities, it was determined that a fair annual rate of inflation for operations and maintenance cost for the analysis should be 4.4%. The 4.4% has historical significance from Flint's current water supplier and falls within the range of the other communities.

KWA Water Supply

The initial projected O&M cost for the KWA supply would be comprised of KWA's O&M costs as well as Flint's O&M costs. Because there was limited information provided, the initial estimated rate of $1.50/MCF was used. This rate is based on information from the cost comparison analysis attached to the letter to Mr. Kurtz, dated October 31, 2012.

The KWA cost evaluation used an annual O&M inflation rate of 5%. To validate this rate a similar analysis to DWSD's operations and maintenance annual rate of inflation was used. First, in discussions with Flint and the Genesee County Drain Commission (GCDC), they believed that the annual rate of inflation for the new KWA system would be similar to the GCDC Water & Waste Services (WWS). Additionally, two large transmission systems were used to benchmark the inflation rates: the Southeastern Oakland County Water Authority (SOCWA) and the Ypsilanti Utility Community Authority (YUCA). Although both of these systems transmit finished water opposed to raw water, they were considered similar enough for comparison as they are comprised of only large water mains, pumping facilities and storage.

Once again audited financial statements were used to calculate the inflation rates. A summary of the findings are shown in Table 4-4. Based on the fact that the information analyzed showed a large difference between the two systems, it was determined that the KWA assumption of 5% was a good rate of inflation to use in the financial analysis. This rate is almost equally between the GCDC rate and the other two transmission systems.

Systems	Years Evaluated	Average Rate (%)
GCDC WWS	03' – 11'	10.5
SOCWA	04'-12'	–
YUCA	04'-12'	0.7

Table 4-4: O&M Inflation Rates of Other Comparable Systems to KWA

Flint WTP

The Flint WTP currently serves as a backup supply to the DWSD service to Flint. To maintain backup operations, the City of Flint operates the plant approximately 20 days each year. Flint indicated that the average production rate when they operate is 11 MGD.

For the blending options and the KWA supply considered, Flint would be required to operate its plant all year around. Therefore, their operating and maintenance costs were evaluated and adjusted to determine an annual cost associated with year-round operations.

The Flint WTP provided three years of operating costs for the assessment. Additionally, reports listed in Section 3 were also used as reference to determine both operating costs for the plant processing Flint River water (blending options) and Lake Huron raw water (KWA option).

Major cost centers were analyzed to estimate annual operation and maintenance. They included: labor, utilities, chemicals and residual management. In general, as recommended by the Flint plant staff, labor and overhead were increased from the current costs by two-thirds. Additionally, variable costs for power, chemicals and residual cost were increased to estimate full time treatment at the Flint WTP. Data from the KWA Preliminary Report and annual operating data for the Flint WTP (provided separately) were analyzed to make these forecasts.

The annual operating and maintenance costs developed for Flint WTP used are shown in Table 4-5.

Source of Supply	Average Daily Production (MGD)	Estimated Annual O&M Cost
Flint River (Blending with DWSD)	4	$5,895,097
Lake Huron (Supplied by KWA)	12	$7,913,118

Table 4-5: FY 13 O&M Costs for Year-round Operations

It was determined that a fair annual rate of inflation for operations and maintenance cost for the Flint WTP plant should be 4.51%. The 4.51% is an average of Lansing, Grand Rapids and Saginaw facilities.

5. CAPITAL REQUIREMENTS

Large capital investments would be required by Flint and GCDC to construct the KWA supply system. Furthermore, some of the options presented by DWSD (supply point from Imlay) would require the purchase by Flint of DWSD's 72-inch water main. Performing the financial analysis; therefore, required an analysis of the KWA construction cost estimate for the transmission system and Flint WTP improvements.

Revenue bonds were also identified as the source of financing the new supply system and associated improvements. This section describes the assumptions made and the interest used for financing the improvements.

KWA Supply System

The most current cost estimate of the KWA system was presented in the document titled; Lake Huron Supply Study, KWA, Appendix 20, October 2012 Preliminary Report Update, Final Report (DRAFT), October 4, 2012. The cost of construction is estimated at $272,421,558. Flint's portion would be 30% or $81,726,467.

Due to the significance of this expenditure, a detailed review of the cost was performed and is presented in this section. The analysis was performed based on the main elements of the supply system: the lake intake, the two pumping stations, and the transmission pipeline. Additionally, an analysis was performed related to construction contingencies and other costs such as engineering, legal, and administration.

Lake Intake

KWA representatives indicated in a meeting in November that the design documents for the intake were at 90% and that it was planned for advertisement in January 2013. A summary of the estimate is shown in Table 5-1.

Description	Estimate
Intake and Crib	$22,076,850
ELAC at 25%	5,519,213
Property	2,300,000
Total	**$29,896,063**

Table 5-1: KWA Intake Cost Estimate

Based on the evaluation, it appeared that the cost estimate was reasonable. Given that the design was nearly complete, the engineering, legal, administration, and construction contingencies (ELAC) at 25% were also found to be appropriate.

Pumping Stations

KWA representatives indicated that the pump stations were estimated at a level of design less than 15%. Therefore, in addition to an evaluation of their cost estimate, other water pumping station costs were used for comparison. Additionally, contractors were also contacted for costs. Table 5-2 summarizes the KWA cost estimate compared to our cost estimate performed for the Treasury.

Description	KWA	Estimate	TYJT	Estimate
Pumping Stations		$24,618,080		$54,573,314
Land for Intermediate Pump Station and Reservoir		--		75,000
Subtotal		$24,618,080		$54,648,314
ELAC for Construction	25%	6,154,520	30%	16,394,494
Total		**$30,772,600**		**$71,042,808**

Table 5-2: Pumping Stations Cost Estimate

Two things to note regarding the difference in the cost estimates; firstly, there is a large difference in the cost estimates of the pumping stations. The estimate developed for the Treasury used several other pumping stations construction costs from Southeastern Michigan and discussions with contractors. These costs were then computed on a $/MG's for comparison.

Secondly, our estimate for the Treasury is based on an ELAC of 30% instead of KWA's 25%. Although 25% was acceptable for the intake, it is believed to be too low for the pumping station estimate given that the engineering effort is less than 15%.

Transmission Main

Although the specific route for the transmission main was not provided, an estimate was calculated based on the general information provided. Once again, the KWA estimate was based on a level of design less than 15%. The estimate performed for the Treasury used the line items provided by KWA for the pipeline and also consulted with contractors to evaluate the cost of construction. The comparison is shown in Table 5-3.

Although the cost of construction of the pipeline is similar, a value of 30% was used for ELAC due to the level of design. Additionally, KWA did not believe there would be any additional costs for easements; however, this did not seem practical. Therefore an estimate for acquiring the easements was added to the Treasury estimate and is based on the 277 easements identified by KWA. The cost shown includes surveying, legal, engineering, administration, etc.

Description	KWA	Estimate	TYJT	Estimate
Transmission Mains		$166,202,316		$167,419,530
ELAC for Construction	25%	41,550,579	30%	50,225,859
Subtotal		$207,752,895		$217,645,389
Easements		--		1,166,170
Total		**$207,752,895**		**$218,811,559**

Table 5-3: Transmission Pipeline Cost Estimate

Other KWA Costs

In prior estimates of the construction cost, KWA used an ELAC of 37%. In this case it could be considered that the engineering effort associated with the design would have been included. However, it is believed that KWA's reduced ELAC of 25%, does not include the design effort. Additionally, it would be prudent to assume that the owner would want a construction manager during construction of this large project. A summary of these costs are shown in Table 5-4.

Description	Estimate
Design Engineering for Pumping Stations and the Transmission Pipeline	$16,939,581
Construction Management at 5%of Project Cost Estimate of $217,645,389	14,434,609
Administration	349,440
Legal, Easements, Contract Documents	831,000
Total	**$32,554,630**

Table 5-4: Other Costs

Summary Comparison

A summary of the two cost estimates are shown in Table 5-5. Based on the comparison, the estimate performed by TYJT shows a higher cost to Flint by approximately $25,000,000.

Note that there are two other costs shown in the summary that were not previously addressed; power and backup power. Regarding the cost of providing power to the pumping facilities, the cost of $4,000,000 appears reasonable.

The KWA has repeatedly indicated that backup power is not needed. Backup power is a standard practice in the water industry. Furthermore, a loss of power at either pumping facility will prevent the supply of water to both Flint and Genesee County. For these reasons, the cost of providing backup power was included in our estimate for the Treasury.

Description	KWA Estimate	DWT Estimate
Intake/Crib	$ 27,596,063	$ 27,596,063
Pump Stations	30,772,600	71,042,808
Transmission Mains	207,752,895	217,645,389
Power	4,000,000	4,000,000
Redundant Power for PS		1,273,200
Land for Lake Huron Pumping Station	2,300,000	2,300,000
Design Engineering/PS and Transmission		16,939,581
Construction Management		14,434,410
Administration		349,440
Legal/Easement/Contract Documents		831,000
Easements		1,166,170
Total	**$ 272,421,558**	**$ 357,578,060**
Flint Share at 30%	**$81,726,467**	**$107,273,418**

Table 5-5: Total Cost Comparison

Flint WTP Improvements

The KWA analysis identified capital costs required to convert the existing WTP from river water treatment to treating lake water. The cost estimate was identified as $7,100,000 in the 2009 report. This number was used in the our analysis, since additional information was not provided. For the purpose of the financial analysis; however, the $7,100,000 was increased by 3% each year for three years to account for inflation.

DWSD Imlay Station Supply Options

The options identified by DWSD to supply service to Flint at the Imlay Pump Station would require Flint to purchase the 72-inch water main from Imlay to Master Meter, FL-1. The pipeline is approximately 25 miles long. The estimated cost provided by DWSD for estimating purposes is $4,700,000.

Financing

The cost of financing the revenue bonds for the capital work was investigated. Based on conversations with local financial advisors knowledgeable in bond financing, an interest rate of 5% for the 25 year

period was considered acceptable. This is based on a Standard and Poor's bond rating of A without insurance.

Additional costs associated with the bond include the reserve and bond issuance fee. The bond holders will require a reserve of approximately 10% of the loan to be held for the 25 year payment period. The cost associated with the bond issuance has been estimated at 2.25% of the principal borrowed for the KWA project and 3% for the smaller loan associated with the Flint WTP improvements or the purchase of the 72-inch main.

Furthermore, since no revenue will be generated to pay on the bonds for the first three years that the system is being constructed, the cost associated with capitalizing the interest was also included.

Finally, interest on the reserve will be provided back to KWA and Flint. Although the interest is currently less than 1%, it was determined that a 3% rate would be more prudent long-term.

6. FINDINGS

Using the information described in the previous sections, a cost evaluation was conducted for the KWA supply and the DWSD options. Individual worksheets for each option are provided in Appendix B. For the purpose of comparison a 30 year period was used. This period includes the 3 year construction period, the 25 loan period and an additional two years to get a sense of the cost of operation after the loans have been paid.

There were three separate cost sheets prepared for the KWA option. The first cost sheet (KWA) is based on the cost estimate provided by KWA. The costs provided assumed no overruns or delay in construction. With KWA's own assumptions of an overrun in construction of 15% and a one year delay in operations, the KWA estimated cost becomes $686,375,920 through Year 2042.

Since this cost estimate did not appear to include the financing of revenue bonds, another cost sheet (KWA-1) was developed that included KWA's cost estimate without overruns with the additional finance costs associated with the revenue bonds. A final cost sheet (KWA-2) includes the cost associated with the revenue bonds based on the estimate provided by TYJT for the Treasury.

A summary of the cost sheets provided in Appendix B are shown in Table 6-1. Figure 6-1 shows the cumulative annual costs associated with each option.

Option	Costs through 2042 ($)	Ranking by Cost
DWSD 8 MGD Maximum Day at Imlay Station	634,795,488	1
KWA *(10/31/12 No Overruns, As Provided)**	649,775,166	2
DWSD 8 MGD Maximum Day at FL-1	672,671,705	3
KWA-1 *(10/31/12 No Overruns with Cost of Financing)*	707,279,715	4
DWSD 12 MGD Maximum Day at Imlay Station	725,576,803	5
DWSD 12 MGD Maximum Day at FL-1	762,110,308	6
KWA-2 *(Treasury Estimate)*	766,784,313	7
DWSD 18 MGD Maximum Day at FL-1	821,226,268	8

* $686,375,920 with 15% overrun in construction and a one year delay in operations

Table 6-1: Total Cost of Options through 2042

Based on the analysis, it is prudent to assume the KWA water supply option costs would be somewhere between the KWA-1 and KWA-2 options. Therefore, the analysis indicates that the two DWSD options of supplying 8 MGD on a maximum day and up to 8 MGD on average are the least cost options for Flint. These options allow Flint to maximize the use of existing assets; the City of Flint's (the Flint WTP) and DWSD's (the existing 72-inch main).

Additionally, in recent conversations with the Treasury another option was discussed that could potentially be the most cost-effective solution. Currently the Flint WTP serves as a backup if service is

lost through either the DWSD or KWA pipeline. If the a twin pipe paralleling the DWSD 72-inch water main were constructed with interconnects with the 72-inch line, then the new water main could serve as the backup to Flint and the Flint WTP could be abandoned or potentially sold to Genesee County for their use.

The construction of the parallel pipeline would be considered in the DWSD capital expenditure as a Common to All (CTA) cost. This means that the capital cost of the pipeline would be shared by all DWSD customers and not just by Flint. Preliminary analysis of this option appears to be the most cost-effective of all the options discussed. However, a more thorough cost analysis is warranted and this approach would require an agreement between Flint and DWSD.

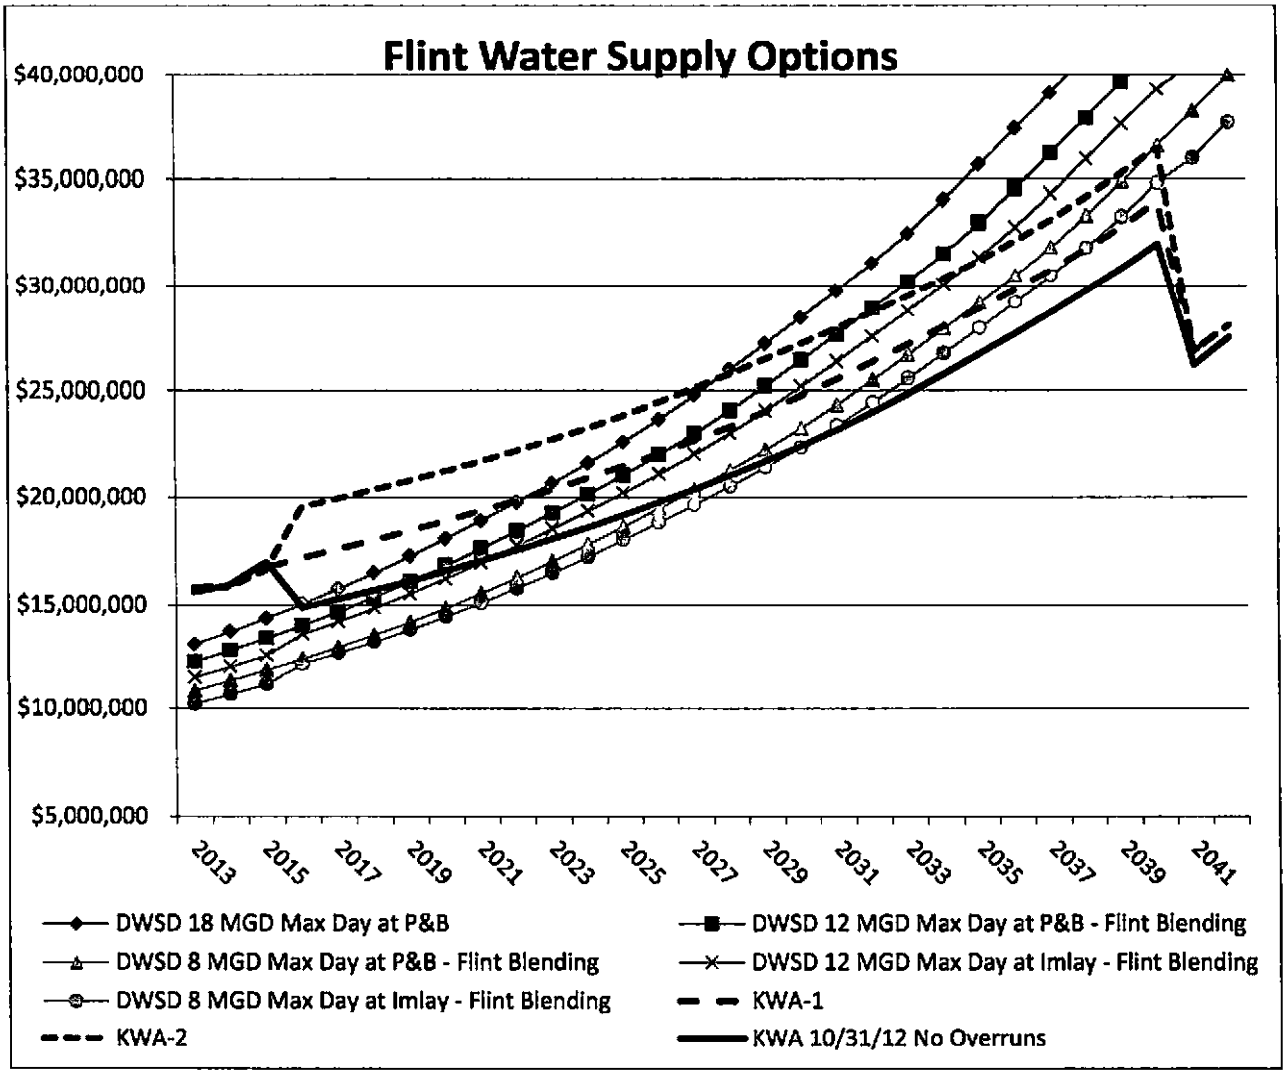

Figure 6-1: Flint Water Supply Options through 2042

7. OTHER CONSIDERATIONS

As part of the investigation other issues were identified that may result in risks to Flint that should be considered by the Treasury in determining how Flint's potable water should be supplied. These issues are related to redundancy and reliability, other items affecting cost, and Flint's desire to control its own destiny related to its water supply. These are described further below.

Redundancy/Reliability

In one of the first meetings related to this task assessment, which was held on November 1, 2012, the Genesee County Drain Commissioner, Mr. Jeff Wright, stated that one of the main reasons for pursuing the KWA supply option related to the lack of reliability of the DWSD system. He pointed to the Northeast blackout of 2003; a widespread power outage that occurred throughout parts of the Northeastern and Midwestern United States and Ontario, Canada, on Thursday, August 14, 2003. He stated that Flint and Genesee County were out of water for several days.

It is worth noting that this was a power outage of historic proportions that affected millions of Americans. However, DWSD did begin supplying water again relatively quickly in comparison to other major cities impacted by the same power outage.

Furthermore, the KWA supply system offers less redundancy to Flint than the current DWSD system. Under both options, Flint is supplied by a single pipeline; however, DWSD has backup power at all of its major facilities supplying Flint. The KWA system will not have a redundant power at its pumping facilities. This would be a major risk.

Currently, backup to the DWSD system for Flint is Flint's WTP using the Flint River as the source of supply. KWA has stated that the Flint River source would also be used as backup to Flint if the KWA supply through its pipeline was lost. However, since the Flint WTP would be upgraded to treat Lake Huron water under the KWA option, using the Flint River as a backup source would require the Flint WTP to maintain two process treatment streams.

In addition to Flint and Genesee County, the DWSD's 72-inch main supplies Imlay City, Mayfield and the Greater Lapeer County Utilities Authority (GLCUA). The volume of water contained within the 72-inch main is approximately 30 MG. Only supplying these three remaining communities would cause the water age to increase dramatically; somewhere in excess of three weeks old, before reaching the customers' master meters. Since the half-life of chlorine in the DWSD system is approximately 5 days, the chlorine would most probably be near zero requiring re-chlorination of the finished water upstream of the master meters.

Re-chlorinating is a costly and risky process due to the instability of chlorine gas. It is unknown whether DWSD would pursue this improvement or possibly abandoned the 72-inch pipeline.

If Flint is supplied by the KWA system, then DWSD supplying their other customers along the 72-inch water main may be reconsidered. Since the KWA system is a raw water supply, the communities would

either have to build a treatment facility to treat the water from KWA or find another water source for their communities.

Additional Cost and Risk Considerations

The design of the KWA supply and the construction of the system have not been completed; therefore, final costs and time to complete are unknown. Cost overruns and delays in completion will both negatively impact Flint's final cost. As example, if the project is not completed within the three year period, payment on the bonds will be due, but the revenue source needed from the sale of water could not be provided.

Furthermore, there is always a risk with large water system construction; especially those including an intake in the Great Lakes, pumping stations and rehabilitation of older water treatment plants. These risks include the potential of explosive gases in tunneling below Lake Huron, changing site conditions associated with the large number of miles of pipe installation and rehabilitating an older WTP, and the startup and debugging of the entire pumping system.

Flint has indicated that they have a high water loss. Not addressing this issue prior to sizing the Flint supply pipeline from KWA could cause the water main to be oversized along with its incremental cost in construction.

Also, the KWA supply option appears to run counter to the Treasury's Competitive Grant Assistance Program (Formerly EVIP Grant). This program has been put in place to allow for communities to consolidate their services and save money. Two existing customers of DWSD (Flint and Genesee County) along with the potential of others customers (GLCUA, Mayfield, Imlay City) separating to from another water system is in contradiction to the program.

Finally, there is a concern over the ability of smaller systems (KWA) over larger systems (DWSD) to pay for future unfunded mandates and regulations. Obviously, identifying regulation requirements over 30 years is hard to determine. However, it is widely accepted that a large system has greater ability to respond to unfunded mandates because the cost can be distributed over a large customer base.

Flint's Autonomy

Flint has indicated that a major point of consideration is that they have no control over the rate increases issued to Flint by DWSD. All other counties supplied by DWSD have representatives on the Board of Water Commissioners (BOWC). The BOWC is one of the governing bodies that approve the water rates. Since Flint and Genesee County do not have a representative on the BOWC, Flint believes they are held "hostage" to DWSD's rates and cost of service.

This issue was stated in Flint's handout at the November 1, 2012 meeting. The handout is titled, "Flint Water Supply Future." However, it is worth noting in the same handout, Flint also identifies similar concerns with the governing board of the KWA system. Notably, that although Flint and Genesee County will be the only customers and Flint will be responsible for 30 percent of the construction cost,

they will have a minority vote on the KWA board. Furthermore, there are other communities (Lapeer County, the City of Lapeer, and Sanilac County) that sit on the board and vote. However, they are not purchasing water nor contributing to the construction costs.

STATE OF MICHIGAN CONTRACT NO. 271N3200089

CITY OF FLINT WATER SUPPLY ASSESSMENT

State of Michigan, Department of Treasury

Appendix A: Meeting Minutes

TUCKER, YOUNG,
JACKSON, TULL INC.
CONSULTING ENGINEERS-PLANNERS
565 E. Larned Suite 300
Detroit, Michigan 48226
(313)963-0612 FAX (313)963-2156

MEETING MINUTES

IN ATTENDANCE:	Sue McCormick, DWSD Director Darryl Latimer, DWSD Deputy Director George Karmo, TYJT Awni Qaqish, TYJT Dave Guastella, TYJT
DATE:	November 24, 2012
PURPOSE OF MEETING:	Meeting with DWSD for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment
PREPARED BY:	Dave Guastella

A meeting was held at the DWSD Main Office Building on November 19, 2012 to discuss the water supply options being presented by DWSD to the City of Flint. The main items discussed generally followed the attached DWSD Discussion/Questions that were provided to the Department prior to the meeting. A summary of the key points discussed are provided below.

DISCUSSION ITEMS

1. Question/Discussion Item: Verify that the four options presented at the November 1, 2012 meeting are still available for consideration:

    a. Supplied from Potter & Baxter using the new model contract (assume a Maximum Day Customer),

    b. Supplied from Imlay Station,

    c. Finished un-pumped supply from Lake Huron WTP, and

    d. Raw un-pumped supply from Lake Huron WTP.

    DWSD prefers to focus on the first two supply point listed; from the current location at Potter & Baxter and at the Imlay Pump Station as these apply specifically to Flint.

    DWSD provided the attached summary regarding the current costs to Flint based on the various options that DWSD is offering. The savings associated with each option is provided as well. As example, if Flint were to purchase water from the supply point located at Imlay Station, the current cost to Flint would be $5,661,000 and it would be a savings of nearly 50%

Comments Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

compared to Flint's current rate.

2. Question/Discussion Item: What additional capital improvements will be required for each option?

   If Imlay Pump Station is selected as the supply point then Flint would need to purchase the 72-inch water main and an agreement to supply Lapeer would need to be worked out. DWSD believes that this could be worked out through a "wheeling" charge over the 72-inch main or possibly moving the supply point downstream of the Lapeer connection.. DWSD estimates the value of the water main at $4.7M. Flint could bond for this amount or DWSD could include the cost into Flint's rate.

3. Question/Discussion Item: Are there other options being presented that should be considered (e.g., blending)?

   Only the two options indicated above are currently being considered and both would include blending; DWSD providing 2/3 of the supply and the Flint WTP providing the other 1/3.

4. Question/Discussion Item: To evaluate each option over the 25 year planning period, provide:

   a. Annual water rate for Flint for 2002 through 2012, and the

   b. Projected annual rate adjustment for each option. What are the proposed measures to keep the rate adjustments down in the future?

   DWSD provided the attached historical rates from 2002 through 2012 for the existing water contract with Flint. The attachment also includes what the rates would have been if Flint had signed the new model contract or had taken service from Imlay. These rates were provided back to 2010.

   DWSD believes that 5% would be a good estimation to assume for their annual escalation in rates over the 25 year planning period.

5. Question/Discussion Item: Flint stated a 10% increase in the capacity charge. What number did DWSD provide Flint?

   It was unclear to DWSD where the 10% increase in capacity charge stated by Flint came from. DWSD's information provided shows an average of 6.3%. DWSD offered a meeting with TYJT to discuss how the fixed and commodity charges are allocated.

6. Question/Discussion Item: Flint financial comparison is based on the initial Cost of $14,413,858, which includes $2,725,538 for Flint WTP operating cost; i.e, DWSD charge is $11,688,320. How good is this number?

   DWSD indicated that the charge of $11,638,320 is good through 6/30/13.based on their existing contract with DWSD.

7. Question/Discussion Item: KWA's initial charge to Flint is based on 12 MGD. Is DWSD charge

based on 12 MGD?

Yes, 12 MGD from DWSD would be a maximum with Flint supplying 6 MGD for a total of 18 MGD (2/3 vs. 1/3).

Comments: Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days

CITY OF FLINT WATER SUPPLY ASSESSMENT

DWSD Discussion/Questions for the November 19, 2012 Meeting

1. Verify that the four options presented at the November 1, 2012 meeting are still available for consideration:
    c. Supplied from Potter & Baxter using the new model contract (assume a Maximum Day Customer),
    d. Supplied from Imlay Station,
    e. Finished un-pumped supply from Lake Huron WTP, and
    f. Raw un-pumped supply from Lake Huron WTP.
2. What additional capital improvements will be required for each option?
3. Are there other options being presented that should be considered (e.g., blending)?
4. To evaluate each option over the 25 year planning period, provide:
    g. *Annual water rate for Flint for 2002 through 2012, and the*
    h. Projected annual rate adjustment for each option. What are the proposed measures to keep the rate adjustments down in the future?
5. Flint stated a 10% increase in the capacity charge. What number did DWSD provide Flint?
6. Flint financial comparison is based on the initial Cost of $14,413,858, which includes $2,725,538 for Flint WTP operating cost, i.e DWSD charge is $11,688,320. How good is this number?
7. KWA's initial charge to Flint is based on 12 MGD. Is DWSD charge based on 12 MGD?

Comments Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days

Summary of DWSD Cost Allocations to Flint Under Various Scenarios

Flint Only

	Revenue Requirement	Rates and Charges		
		Fixed	Commodity	Avg Unit Cost
1 **Status Quo**	11,461,700	357,271	12.46	19.91

MEETING MINUTES

IN ATTENDANCE:	Ed Kurtz; Flint Emergency Financial Manager, City of Flint Dayne Walling; Mayor, City of Flint Mike Brown, City of Flint John O'Brien, Genesee County Howard Croft, City of Flint Dwayne "Duffy" Johnson, City of Flint Brent Wright, City of Flint Awni Qaqish, TYJT Dave Guastella, TYJT
DATE:	November 24, 2012
PURPOSE OF MEETING:	Meeting with the City of Flint for the Indefinite-scope, Indefinite-delivery Contract Number 00383, 2012 Professional General Architectural/Engineering Services – City of Flint Water Supply Assessment
PREPARED BY:	Dave Guastella

A meeting was held at the City of Flint Municipal Center on November 20, 2012 to discuss the water supply option being presented by the Karegnondi Water Authority (KWA) to the City of Flint. The main items discussed generally followed the attached KWA Discussion/Questions that were provided to City prior to the meeting. A summary of the key points discussed are provided below.

The questions submitted are repeated in the Discussion Items for easy reference. A summary of the action items generated from the meeting follow the Discussion Items.

DISCUSSION ITEMS

1. Question/Discussion Item: Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?

   KWA would supply up to 18 MGD. 18 MGD has been assumed as the maximum day demand and 12 MGD is assumed as the average day demand throughout the 25 year planning period.

2. Question/Discussion Item: Copy of the intake contract documents and engineer's estimate.

   The intake contract documents are approximately 90% complete and are not available for distribution. However, the updated Appendix 20, dated October 4, 2012 includes the most recent cost estimate of the intake based on the current design in process.

Comments. Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days

3. Question/Discussion Item: Documentation of the Flint WTP improvements required and cost estimate.

   The costs are approximately $7M as presented in the September 2009 Preliminary Engineering Report. However, this estimate has been updated. Some processes have been eliminated. John O'Brien will provide the updated costs and the description of the planned improvements to the plant.

4. Question/Discussion Item: Confirm Flint's allocated percentage of the KWA capital improvements (30%?).

   Yes, the allocation is based on 18 MGD/60 MGD total capacity.

5. Question/Discussion Item: Copy of the proposed KWA operating agreement for Flint.

   John O'Brien will provide the operating agreement as well as the Capacity Contract and Articles of Incorporation.

6. Question/Discussion Item: What is the annual operating agreement adjustment projected for the 25 year planning period?

   This information is provided in Appendix 14, Table 14.2 of the September 2009 Preliminary Engineering Report. Operating cost based on Table 1. Used 12 MGD as average day demand (ADD). Assumed 5% as the annual increase in operating costs. John O'Brien indicated that these operating costs were based on Genesee County's operating costs. John O'Brien will provide the last 10 years of audited financial statements for the water fund.

   To assess operating and maintenance costs for the Flint WTP, Duffy will provide multiple years of financial statements for the water fund. Duffy did not believe they had 10 years, but they will provide what they have.

   Regarding operation and maintenance costs, Flint believes that these costs will increase by 2/3 of what they are now.

7. Question/Discussion Item: Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).

   KWA will not release the route due to concerns regarding speculation of land and easements. John O'Brien did indicate that the Lake Huron pump station would be at Fisher and M-25. The intermediate pump station site is near a location of the Lapeer/Sanilac/St. Clair border; where all three meet.

8. Question/Discussion Item: KWA's initial charge to Flint is based on a 12 MGD average day demand. What is the basis of this number? Are there population projections and water use figures available that were used to determine the Flint demand for the 25 year planning period?

Comments Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

This was answered in Question No. 1 above.

9. Question/Discussion Item: Is there a transition plan and cost during construction of the KWA system identified?

   Flint is looking for an agreement with DWSD for back-up supply from the 72-inch main at the Genesee border.

10. Question/Discussion Item: The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?

    Flint indicated that they have adequate storage to supply the system for 6 to 7 days. Flint has 55 MG of storage and Genesee County has 65 MG for 2.5 days.

11. Question/Discussion Item: The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?

    In cases of emergency, Flint indicated that the back-up for the KWA system will be the same as it is now with DWSD; they will use the Flint River as the source water. Flint currently operates their plant four times a year.

    When questioned as to whether the WTP will be able to treat both lake water from the KWA system and river water Flint indicated that once the improvements identified in the September 2009 Preliminary Engineering Report are completed they will be able to accomplish both treatment processes. Flint will provide a schematic of the treatment trains at the WTP and a copy of the Flint transmission system.

    Genesee County indicated that additional redundancy would also be provided from the new Genesee County WTP.

    Regarding hydraulic transients; Genesee County indicated that a model analysis has not been included, but capital costs for mitigating transients have been included.

12. Question/Discussion Item: Related to the construction cost:

    a. Does it include an additional traffic lane since the construction will occupy half the right of way? *Not required, all roads are county roads; however, there are a few State road crossings.*

    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million. *Not required; all of the counties have waived any fees.*

    c. Does the cost of the steel pipe segments include corrosion protection measures such as

anode stations and related O&M? *Yes; however, the KWA has not settled on using steel pipe. PCCP pipe may be used. Steel shown in estimate because it is highest in cost and therefore the pricing is conservative.*

d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators. *Yes, Genesee County did emphasize that the SCADA system will be simple and straightforward because a lot of controls are not required.*

e. Other items discussed at the meeting included:

- The 2009 plant improvement cost is still good; however, there will be some reduction, such as a sulfuric chloride feed system that was eliminated. Plant capacity now is 36MGD, but will be 18 MGD.
- The KWA Lake Huron Pumping Station (LHPS) is now only high lift pump station.
- Genesee County will provide the distance of the intake pipe from the crib to the LHPS.
- The intake project is almost ready to bid; waiting for the COE permit.
- Genesee County is estimating the construction for the pipe lines and pump stations will begin July 2013.
- The route has been flown for survey.
- Genesee County is estimating construction will be complete and the project will be placed in service by Jan 2016.
- Genesee County to provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?

    The Flint River would serve as a back up supply.

14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

    The 40 years was stated in error. The reference was to DWSD's requirement to sign a 30 year contract.

    After 40 years Flint will own 30% of the project and can sell their share of ownership if they want. Conversely, with DWSD, they continue to pay for the capital projects but have no ownership. Flint believes they will know what they will be charged for the next 25 years versus DWSD that can't commit to a fixed escalation.

Comments: Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days

Action Items for Follow-up		
Items:	***Assigned To:***	***Date to Complete***
1. Updated Costs for the Flint WTP Improvements and a description of the improvements.	John O'Brien	11/21/12
2. KWA Operating Agreement, Capacity Contract and Articles of Incorporation.	John O'Brien	11/20/12
3. Provide the last 10 years of audited financial statements for the Genesee water fund.	John O'Brien	11/20/12
4. Provide multiple years of financial statements for the City of Flint water fund.	Duffy Johnson	11/26/12
5. Provide schematic of the Flint WTP and a map of the Flint transmission system.	Brent Wright	11/26/12
6. Provide the length of the intake pipe from the crib to the pump station.	John O'Brien	11/20/12
7. Provide a list of assumptions that the $272 million cost estimate is based on since the route is now known.	John O'Brien	11/26/12

Comments: Meeting minutes were recorded based on the understanding of the author Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days.

CITY OF FLINT WATER SUPPLY ASSESSMENT

KWA Discussion/Questions for the November 20, 2012 Meeting

1. Is the maximum day demand of 18 MGD for Flint the maximum day demand (MDD) throughout the 25 year planning period? If not, what is the 25 year projected MDD?
2. Copy of the intake contract documents and engineer's estimate.
3. Documentation of the Flint WTP improvements required and cost estimate.
4. Confirm Flint's allocated percentage of the KWA capital improvements (30%?).
5. *Copy of the proposed KWA operating agreement for Flint.*
6. What is the annual operating agreement adjustment projected for the 25 year planning period?
7. Need the route of the pipelines and the locations of the facilities proposed. Purpose is to identify constraints that impact costs (i.e., utilities, environmental (e.g. wetlands), easements, etc.).
8. KWA's initial charge to Flint is based on a 12 MGD maximum day demand. What is the basis of this number? Are there population projections and water use figures *available that were used to determine the Flint demand for the 25 year planning* period?
9. Is there a transition plan and cost during construction of the KWA system identified?
10. The October 4, 2012 Preliminary Engineering Report Update states: "no backup power is planned for the pumps" (LHPS) and "No backup power is planned for pumping" (IPS). In case of power loss, how would Flint supply its customers?
11. The latest plan shows only a 5 million gallon ground reservoir is planned for balancing between LHPS and IPS. How is redundancy maintained?
12. Related to the construction cost:
    a. Does it include an additional traffic lane since the construction will occupy half the right of way?
    b. Does it include costs/fees for permit requirements such as inspection cost by the jurisdictional authorities? As a point of reference, the permit fee costs for the Flint Transmission System came out to be $5.8 million.

Comments Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting. These minutes will be considered approved unless comments are provided within three days

c. Does the cost of the steel pipe segments include corrosion protection measures such as anode stations and related O&M?
d. SCADA monitoring stations require power. Is the cost of bring power to the SCADA stations included? Again, as a point of reference the for the Flint Transmission System we estimated $800,000 for power to SCADA and valve operators.

13. The Flint River is identified as a backup: At what capacity? MDD or emergency supply?
14. Where did the 40 years come from (Flint hostage to Detroit)? DWSD's new contracts are 30 years with openers to revise terms of supply (volume and pressure) after the first two years, then three years, and then in five year increments thereafter.

Comments Meeting minutes were recorded based on the understanding of the author. Please contact the author within three days if you have any different understanding of the meeting These minutes will be considered approved unless comments are provided within three days

STATE OF MICHIGAN CONTRACT NO. 271N3200089

CITY OF FLINT WATER SUPPLY ASSESSMENT

State of Michigan, Department of Treasury

Thanks Eric.

Do you have any thoughts on Flint removing the blend options from consideration? That is what this comes down to ultimately, right?

Subject: RE: KWA Analysis
Importance: High

No basic assumptions were used. I reviewed the data to attempt to determine the best option.

Certain constraints focused the analysis in certain ways. The Flint EFM eliminated the use of the Flint River and all of the blending options. This decision eliminated all DWSD options with the exception of purchasing 100% of water from DWSD. The Treasurer asked some very specific questions that were addressed in my report. All of this is outlined in my report.

No other assumptions were utilized.

In the interest of time, this is a quick answer. If more discussion is needed, please let me know.

RE: Karegnondi Water Authority (KWA)

Dear Ms. Schafer:

This letter is to confirm the discussion you recently had with Joe Heffernan, Partner at Plante & Moran, PLLC on our behalf.

KWA was formed in 2010 after the counties of Genesee, Lapeer and Sanilac together with the cities of Flint and Lapeer adopted the KWA's Articles of Incorporation and the Articles of Incorporation were filed with Michigan's Office of the Great Seal.

Since 2010, KWA has had no financial transactions whatsoever, and has merely continued with planning and development of a possible project, all of which was done with the benefit of uncompensated time by our members. We have no assets or liabilities, and accordingly have had no financial activity to audit.

We do anticipate the KWA will become active financially, in the near future.

Based on your discussion with Mr. Heffernan, he confirmed to us that since KWA had no financial transactions at any time from 2010 until now, that we are not required to have an audit performed under PA 2 of 1968. Furthermore, the fact that we have not had an audit for any time from 2010 until now will not be considered a violation of PA 2 of 1968 nor will it inhibit our ability to be qualified for future debt issuance.

Once we become active, we will of course submit audited financial reports as required.

Thank you for your guidance i

Sincerely,
Karegnondi Water Authorit

John O'Brien, PE, Deputy CE

CC: Les Pulver, Plante & Moran, I

Need to put in system. Need fiscal year ends - Putting it in premature. Suzanne gave them this

3/29/13

4/19/13
Diane.
Please create a muni code & enter this into the systems with a September fiscal year end.
Thanks

What: Jeff Wright Statement on Flint City Council Approving Resolution to Join KWA.

When: March 26, 2013

Additional Info: Jeff Wright, CEO of the KWA, today praised the Flint City Council for voting to approve a resolution to officially have the City of Flint join the KWA and its' water line.

"I have said from the beginning that this decision must be made by Flint's City Council and Mayor," said Wright. "I appreciate the council voting the way they did, but even more than that, I am glad the residents of Flint were able to have their voices heard via their elected officials." The next step in the process will come with the KWA Board executing the contract for the City.

"The most important aspect from the vote is the fact that we as an Authority can move forward knowing Flint's intentions," said Wright.

Despite Emergency Manager Ed Kurtz publicly supporting the project, Wright had made a vote by council a condition of Flint joining the KWA so the residents would have their say.

"There is a basic tenet that government is best when it has local control. We saw that with the council vote. Nobody, whether they live in Flint, Grand Blanc, Davison, Fenton, or anywhere in Genesee County, should have these types of decisions made by people who live outside of their community," said Wright.

At the next Water and Waste Advisory Board meeting a vote will be taken to award a contract for construction of the intake portion of the water line. All bids were submitted to the board at their last meeting for review.

Subject: Local Government action items 3-26
Attachments: Local Government agenda 3-26.pdf

Below are the action items from today's meeting:

Andy raised the idea of restructuring some of Detroit's debts by creating a lock-box type of structure. Anyone with suggestions should raise them.

Wayne county jail conditions- Suzanne is checking. Roger is going to do a soft inquiry.

Allen Park TAN amount and DEP details- Suzanne.

Ecorse- Roger is going to talk to the mayor about the possibility of a TAB.

How is the TAB established under the new law? Fred, Roger and Ed are going to determine the appropriate steps.

Highland Park EM appointment- Fred is asking the AG's office for an opinion of how to proceed.

EM resources- Ed is going to begin a statement of work for services to assist newly appointed EMs to transition into their new position.

Lincoln Park- Ed and Roger are going to look for a qualified city manager who can steer them in the proper direction.

Wayne County- Suzanne is looking at who is on the authority board.

Also, I am going to send out a tutorial with how to use the new program we will be using for our agendas. Attached is a draft of an example we created in the new system. Any feedback is appreciated.

Department of Treasury

Weekly Local Government meeting

City	Owner	Status	Comments
1. General discussio n points	Tom Barrett	R	Governor's Monthly Memo update Real estate transfer tax Act 72· Have all cities submitted their requirement since the switch to PA 72? Wayne County DTRF Cities that require Pension and OPEB analysis - We have received 11 actuarial reports from Benton Harbor, Ecorse, Flint, Highland Park, Harper Woods, Inkster, Muskegon Heights, Pontiac, River Rouge, Taylor and Wayne County. Detroit and Hamtramck have not submitted information and a follow up letter will be sent. (ek 1/7/13) Dashboard Software-Purchase order has been issued 2/12
City of Benton Harbor	Ed Koryzno	R	Tony is making reductions to the FY 2013 budget by laying off 12 people, changing attorney firms and removing Plante Moran. He is preparing the FY 2014 budget with a goal of reducing it by another $500K. He will send a draft budget for our review by the end of this week. (ek 3/26) Tony Saunders is prepared to hold a special millage election in May. City council passed a resolution of approval at their meeting of 2/19/13. (ek 2/26) Tony has received a a revenue sharing advance last week for the months of April and June. The most recent emergency loan has been withdrawn. Tony wants to evaluate the near-term needs before a loan app is finalized and anticipates submitting a new request during July. (ek 3/12)
City of Detroit	Andy Dillon	R	Ed Plawecki is under contract with P.I.E.to provide his services in Detroit. Roger and Ed met with Chris Gannon and Danielle Benedettini of Conway MacKenzie to discuss strategy regarding the PDD. Chris will meet with Kate Beebe who evaluated the PDD operation and prepared alternative reorganization strategies. (ek 2/26)
City of Flint	Roger Fraser	R	Ed Kurtz believes participation in the KWA is in the best interests of Flint. Short-term transition costs have been an issue up to this point and a strategy has been developed to address the $7 million cost which include selling a 72" water main to Genesee County and buying a 72" water main from DWSD. Staff report and recommendations were submitted last week. (rf 2.26) The City Commission voted 7-1 at their 3/25 meeting to approve a resolution to participate in the KWA project. (ek 3/26) Ed Kurtz has been told that the Genesee County Drain Commission will send out bids to engineering firms on March 22 to size the KWA pipeline and that is the absolute deadline for Flint to participate. (ek 3/12) The Genesee County Drain Commissioner opened bids on 2/25/13 for the KWA intake construction in Lake Huron. The low bid was $24,622,000, about $3,000,000 less than the Tucker Young estimate in the study performed for Treasury. The County authorized the borrowing of $35,000,000 for the project. It is now estimated that the total cost with engineering, legal and contingencies will be less than $31,000,000.(ek2/27) City has submitted a DEP. The DEP projects $1.5M in savings over next five years due to budget cuts but have not identified the source of cuts. Will provide more detail as they go through the 2014 budget process. The rest of the DEP relies on an emergency loan for $12M. No application has been filed yet. (ss 2/12)
City of Inkster	Ed Koryzno	R	City Council, at their 3/18 meeting appointed Mark Stuhldreher as the Interim City Manager on a 4/3 vote while they search for a permanent manager. Council also amended their budget to account for $600,000+ less in General Fund revenues.(ek 3/26) City Council terminated Ron Wolkowicz last week as city manager, but has retained him as Public Works and Recreation Director. Mark Stuhldreher has expressed concern that council may be reluctant to implement his recommended $700,000 of budget reductions. A cash flow projection reveals that the general fund cash levels will be low at the end of June unless reductions are made. Ed will be meeting with city council and Mark Stuhldreher to reiterate the need for budget reductions and to hire a professional city manager. OFR also working with Mark to develop a list of projects to provide operational support to him. O700 (ek 3/12)

City of Lincoln Park	Roger Fraser	R	Roger, Ed and Randy attended the 3/20 City Council worksession where Roger emphasized to the Mayor and council immediate action is required to reduce their expenses. He reviewed 28 short, mid and long term recommendations for revenue enhancements or budget reductions.
Royal Oak Township	Ed Koryzno	R	Ed and Randy are meeting with Supervisor Squalls, the Township Clerk and Treasurer on 3/27 to offer OFR assistance. Long term financial viability of the township is doubtful. (ek 3/26) Ed and Randy will meet in the next two weeks with the Supervisor, Treasurer and Clerk to offer OFR's assistance. Since there is a poitical division on the board we are unsure if a majority of the Board will accept our help. . Further nalysis of the township's public safety millage levy reveals it may be legal.. (ek 3/12
Wayne County	Suzanne Schafer	R	LAFD is poised to approve the TAN but are waiting for the County to return the escrow agreement so the ball is in the County's court right now. Carla said she would send it this week although I expected it yesterday. As for the Mental Health Authority, the Mental Health Board is working with the County to minimize the impact on cash flow. A proposal will be made to the board to transfer 20% of the $80M each year for 4 years. It is anticipated the board will accept this. The County may have to increase its TAN amount in 2014 by about $20M but Carla is hoping that with the cuts the county will make, that won't be necessary. Carla is sending me the agreement when accepted and an updated cash flow showing the impact of the agreement. (ss 3/26) I talked to Carla Sledge on Fnday regarding the TAN application and the DEP. I told her that we would move forward with the TAN approval with certain conditions. First, the TAN proceeds will be escrowed and she will need to provide us a proceeds use list. Secondly, as part of the TAN application, the County has to provide what we call a deficiency letter. The letter tells how the County is addressing its non- compliance issues with PA 34. Of course the biggest deficiency is the lack of an approved DEP. I told Carla that the deficiency letter should not be general in nature, i.e., "We are working with Treasury to achieve an acceptable DEP" like the County did last time This deficiency letter needs to include specific actions taken by the County. We talked about what those actions should be and agreed upon the following 1) The DEP will be updated to include the FY2012 deficit by a specific date. I strongly suggested March 31 and she indicated that they were already working on the update. 2) The county will submit a monthly cash flow, budget to actual, and accounts payable aging so that the Department can monitor the County's progress on its DEP. 3) The county will respond to any requests regarding the DEP in a timely manner i.e. information regarding the road fund. I also indicated to Carla that the Order of Approval for the TAN and the Escrow agreement may contain stronger requirements such as adherence to a monthly budget by all Departments and elected officials. She was very agreeable to that. Mental Health Authority - The creation of the Mental Health Authority will significantly impact the County's cash flow. The Mental Health Fund accounts for 40% of the general pooled cash amount. That will be $80 million that the County will have to transfer to the Authority when established, which will likely be in FY 2014. The County uses the general pooled cash to pay its current operating expense and the funds are reconciled at the end of the year. There may be other lesser negative impact regarding the time of cash available in pooled cash. The Mental Health Fund generates approximately $50 million in revenue and has expenditures in a similar amount. Because the two are virtually equal, there should be no net effect on cash flow. However, there may be due to timing or due to the accounting practices of the County. Jail-In 2010, the Wayne County Building Authority issued 30 year general obligation limited tax bonds in the amount of $200M for the County's jail facilities The debt service payments are to be made from rental payments from the County to the Authority. Those rental payments have been pledged by the Authority for the payment of the bonds and the rental payments are a full faith and credit obligation of the County. We estimate that the average annual debt service to be around $20M. The County was approved to issue $300M in bonds so the remaining $100M is expected to be issued this year. The County levies a jail millage of 0.9381 mills. Based on 2012 TV, this equates to about $38M in annual revenue. The Phase II consulting engagement is complete. A final report and summary was sent to Andy, Roger and Brom. (ek 3/12) County has submitted a TAN application for $90M on 2/11. The DEP is still under review as it is not clear the County has authority to use road funds to eliminate deficit. No details regarding where the expenditure reductions are coming from as requested in our 1/30 meeting. (ss 2/12)

City of Allen Park	Ed Koryzno	Y	Joyce is making a few updates to the DEP at our suggestion. I hope to have something this week. She will also be filing a prior approval application for the TAN borrowing. We haven't received that yet. (ss 3/26) Submitted DEP relies on a voter approved millage ($2M) in 2014, the reduction of debt service payments for the movie studio ($600,000-$1.2M), and the renewal of the existing police/fire millage ($2M) in 2015. DEP also eliminates the incorrect deficit amount of $800,000 instead of $1M (ss 2/12)
City of Ecorse	Roger Fraser	Y	A revised version of the ILA has been prepared. After AG input, their suggestions were incorporated into the document and returned to the AG for final review on 2/25. Additional comments were received March 1 and are being incorporated into the document. (rf 3.5)
City of Hamtramck	Suzanne Schafer	Y	A preliminary review is underway. (ss 2/12)
City of Highland Park	Ed Koryzno	Y	During their weekly visit OFR staff discovered the City has exceeded its adopted budget by $2.5M. The primary sources of overspending are Police($493K), Fire ($353K), NSP grant costs ($121K) and an unfavorable lawsuit verdict ($1.3M). The absence of daily administrative support at the city is a concern. OFR will have a staff member at City Hall once a week. to provide operational assistance however the City requires more support than OFR can provide for the long term. (ek 3/12) Staff recommendations were submitted last week. Appointment of an EM, contracting for nearly all city services and bankruptcy are recommended.
City of Pontiac	Roger Fraser	Y	none.
City of River Rouge	Ed Koryzno	Y	ORTA will be working with Plante Moran to prepare a detailed analysis of the PPT's negative impact upon the River rouge and Ecorse. (ek32/12)
City of Taylor	Ed Koryzno	Y	Ed spoke to Mayor Lamarand and Rick Eva the new Finance Director last week. Mayor still upset about inability to bond for pension costs. City overestimated SAFER grant revenues by $3 million. He anticipates placing a question on the August ballot for a one-time millage levy to cover the shortfall.
Webber Township	Ed Koryzno	Y	OFR will send a letter of engagement to the Township this week. The engagement will be to perfrom a five year financial forecast. (ek 2/26)

Subject: Meeting to review DWSD proposals

Hello Mr. Kurtz,

Last week I spoke with Mayor Walling to share DWSD's continued interest in discussing a long term Water Service contract to serve Flint. Mayor Walling indicated he would pass along our interest in meeting in the next week or two to discuss new proposals that are responsive to the changes that the City of Flint has identified in terms of it's requirements and priorities including; a reduction in requirements from 18 to 15 MGD and the newly expressed desire not to blend Flint treated water with DWSD treated water. The latter change certainly came as a surprise given the

economic advantage of this for Flint and Flint's intiated request for this specific option. I am curious to know what new information resulted in this option becoming less desirable and if there are opportunities to address those concerns.

It has been a rather odd experience to be outside of the process these last few months. I've taken note that the KWA proposal provides a single line of supply and would still leave Flint in the position of retaining the Flint plant in a full time operating mode as well as maintaining the capacity of treating two very different sources of supply in the event of an interruption. Although the line would be newer than the existing transmisson system serving Flint, it does not accomplish the redundancy in supply that Flint has long expressed an interest in.

With the changes identified in Flint's requirements and preferences, we have looked at opportunities to address these as well as Flint's historical concerns about the single transmission main and have developed proposals that twin the transmission main with smaller diameter pipe, provide transmission redundancy along the entire length from Imlay to the Flint Plant, as well as provide Flint the opportunity to consider selling Flint's portion of the 72 inch line and avoid the signficant risks and costs Flint has expresed concern about in maintaining that line. In addition, the twinning of supply with full redundancy, without additional treatment requirements, would allow Flint to avoid capital and well as operating expenses in both the plant and transmission system. All of this can be accomplished with still a significant reduction in Flints rates.

We are a new service organization. The rate adjustments for FY 14 are announced with significantly constrained adjustments from what had been forecast previously. Our financial plans reflect the ongoing benefit of our organizational optimization efforts. Recent discussions have brought attention to a near term opportunity to move toward greater independance with an opportunity to expand represenation in our governance. This is not the DWSD of your recollection.

I welcome the opportunity for discussion at your earliest convenience.

Best regards,

Sue

Andy,

Attached is staff feedback. I will be getting additional feedback in the morning. All indications are that we are supportive of KWA and its cost benefits compared to DWSD options. If that is not the answer you want tomorrow – then we should discuss.

Subject: ODWMA Response - Flint KWA-DWSD Report
Importance: High

Director Wyant, and Deputy Director Sygo,

Addendums to ODWMA comments provided yesterday regarding the City of Flint water system and comments on the reports from Tucker, Young, Jackson, Tull, Inc. (TYJT) can be found below in red. Additional comments are as follows:

With regards to regulatory authority for DEQ to allow or prevent the breakup of water utilities, and State vs. local decisions about cost effectiveness, it is important to note that when the DEQ permitted the water withdrawal for KWA (permit 2009-001) part of the decision making process (copy attached) included reasonable use and the balance of Economic Development, Social Development, and Environmental Protection. As part of the public participation process general comments were received (pages 6 & 7) regarding impacts on DWSD and rates to remaining customers. The Department's response to those comments stated:

"The DEQ is specifically precluded from using part 327 to "...diminish or create any existing authority of municipalities to require persons to connect to municipal water supply systems as authorized by law" (MCL 324.32726)."

And

"It is appropriately an issue for water service contract negotiations between the regional water system and its customers. To do otherwise invites unwanted intervention of the state into local decision making."

ODWMA cannot on its own assess an actual dollar value to any regional benefit for the City of Flint to remain a full customer of DWSD, but the following should be included in any additional analysis:

- The cost estimates provided in the TYJT report show a cost difference between full KWA and full DWSD participation of $172 million over 30 years.
- The formation of KWA would itself be considered one of the largest regional drinking water authorities in the State in terms of capacity, and as such any regional benefits provided by DWSD may only be marginal in comparison.

Finally, we have additional questions for TYJT regarding the various DWSD supply options and the considerations they made in the operations of the Flint WTP. These considerations will have an impact on the cost estimates for DWSD options.

We look forward to further discussion of these comments during our meetings tomorrow, and please let us know if you have any additional questions for us between now and then.

Subject: Flint Draft Response

Director Wyant,

In preparation for our call today with Treasurer Dillon's office, ODWMA has developed the following for consideration. We can provide any additional info you require during the meeting.

ODWMA has reviewed the materials developed by the consultant Tucker, Young, Jackson, Tull, Inc. (TYJT) for Treasury regarding the City of Flint and potential alternatives for public water supply. Based on our reviews, we have developed the following comments to this point in our analysis:

1. The TYJT report does not contain the full scope of the Karegnondi Water Authority (KWA) raw water supply system. TYJT concerns over raw water supply redundancy and reliability are addressed to the satisfaction of

ODWMA under the full KWA proposal. Please note some portions of the overall project are being financed independently by the Genesee County Drain Commission.

2. There are significant differences in contract language between KWA and Detroit Water and Sewerage Department (DWSD) with respect to the contracted maximum day demand capacity.
    a. Under a KWA contract, a "maximum day" capacity of 18 million gallons per day (MGD) would fully satisfy current demands of the City of Flint, without the need to supplement raw water capacity using the Flint River. (18 MGD, average over a 30 day period).
    b. Under a DWSD model contract, a "maximum day" capacity, even at 18 MGD, would not satisfy the current demands for the City of Flint. (18 MGD, over any 24 hour period).

3. Restrictions in contracted capacity that would prevent the City of Flint from meeting peak demand requirements present potential limits to economic development within the City of Flint, including possible connection bans and water system extension bans. This information was previously conveyed to the City of Flint by ODWMA staff.

4. All contract options with DWSD that are considered semi-competitive with the KWA contract do not fully supply the City of Flint, and would require the City of Flint to meet a significant, if not majority, of its water demands by treating water from the Flint River. Continuous use of the Flint River at such demand rates would:
    a. Pose an increased microbial risk to public health (Flint River vs. Lake Huron source water)
    b. Pose an increased risk of disinfection by-product (carcinogen) exposure to public health (Flint River vs. Lake Huron source water)
    c. Trigger additional regulatory requirements under the Michigan Safe Drinking Water Act (LT2ESWTR)
    d. Require significant enhancements to treatment at the Flint WTP, beyond those identified in the TYJT report (see item 5 below).
    e. Water Resource Division is evaluating potential impacts to NPDES wastewater discharge permits in downstream segments of the Flint River, as a result of decreased river baseflow caused by Flint WTP use.

5. The TYJT report does not adequately address increased requirements and costs associated with using the Flint River as a significant source for the Flint WTP, which are not necessary under a Lake Huron source water scenario. This includes:
    a. The need to provide softening treatment
    b. Limitations on disposal options for lime softening sludge
    c. Increased ozone capacity, UV disinfection
    d. Additional backup power, more power required for Flint River operation

6. The Flint WTP must operate at some minimum level and within a range of flow rates to maintain treatment effectiveness. Currently that minimum level is 9 MGD. This level may be reduced with additional capital costs to modify the WTP, not addressed in the TYJT report.

7. Allowing Flint WTP to blend water with DWSD sets a new precedent that could pose future consequences with other DWSD customers.

8. Costs impacts to remaining DWSD customers would be similar under the proposed scenarios, only retaining 8 MGD of 30+ MGD total Flint/Genesee Co. demands, based on the following:
    a. Genesee County distribution system demands are pulling out of DWSD regardless of the decisions by Flint WTP
    b. Flint's need to utilize the Flint River as a source

9. ODWMA anticipates cost savings under the KWA proposal will be leveraged to provide additional improvements to the City of Flint water distribution system, improving efficiency and providing additional cost benefits. The

KWA water withdrawal permit (2009-001) includes the required implementation of conservation measures that would also drive these distribution system improvements.

10. Major cost discrepancies in TYJT analysis
    a. Engineering, Legal, Administration, Contingency – TYJT appears to have effectively double charged for these costs in their KWA estimates without adequate justification
    b. Pumping facilities – TYJT cost estimate methodology does not appear to address localized market costs and does not distinguish fixed and variable costs in its comparison analysis.

11. Remaining DWSD customers in Lapeer County could potentially see water quality impacts as a result of Flint joining KWA, if they remain with DWSD. However, indications to ODWMA are that these communities are currently in final negotiations with KWA for service, which would make this a non-issue.
    a. City Lapeer
    b. City of Imlay City

Additional response to the TYJT report has also been provided by Rowe Engineering to Flint EFM, Mr. Ed Kurtz. (Copy Attached)

ODWMA has continued to meet on a regular basis with KWA, Genesee County, and the City of Flint regarding these water supply proposals.

ODWMA will continue to provide any additional detailed analysis requested by Treasury or the DEQ Executive Office.

GENESEE COUNTY DRAIN COMMISSION
APPLICATION FOR A WATER WITHDRAWAL FROM LAKE HURON

PERMIT DECISION
And
RESPONSE TO PUBLIC COMMENTS

August 28, 2009

Michigan Department of Environmental Quality
Constitution Hall, 525 West Allegan
P.O. Box 30273
Lansing, Michigan 48909-7773

EXECUTIVE SUMMARY

GENESEE COUNTY DRAIN COMMISSION
APPLICATION FOR A WATER WITHDRAWAL FROM LAKE HURON

On February 12, 2009, the Department of Environmental Quality (DEQ) received from the Genesee County Drain Commission (GCDC) a permit application submitted under Section 32723 of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA). The permit application included a request that the DEQ begin the required evaluation and public notice under Part 327, Great Lakes Preservation, of NREPA for a proposed water withdrawal from Lake Huron.

Section 32723(4) of Part 327 requires that the DEQ provide for a public comment period of not less than 45 days before a permit application is acted upon. The DEQ invited public comment on the permit application via press release, public notice and website posting. The DEQ issued the press release on the permit application on May 27, 2009, and posted the public notice on the DEQ internet website the following day. A copy of the public notice was transmitted to the GCDC on May 28, 2009 for posting at the entrance to their premises and at the shoreline parcel where a "shore well and pumping station" are to be constructed. The press release and public notice announced the public comment period and requested that comment be submitted to the DEQ by July 15, 2009.

After considering the information submitted relevant to the factors used in determining the acceptability of a permit application and the comments received, the DEQ determined that the proposed GCDC withdrawal is in compliance with the applicable standards and should be issued.

On August 28, 2009, the DEQ rendered a decision in favor of issuing the permit concluding the GCDC proposed withdrawal would not likely cause an adverse resource impact and that all other factors in rendering a permit decision had been met.

This document includes the basis of decision for issuance of a permit to the GCDC for the future withdrawal of 85 MGD from Lake Huron. Responses are provided to comments received on the permit application during the public comment period that including concerns relating to the permit process, the environmental impact of the proposed water withdrawal, the legality of the proposed water use, and the applicability of laws and regulations to the proposed withdrawal.

Many of the early comments were critical of the public notice and comment period duration regarding the permit application. The DEQ is limited in its ability to provide public comment by a Part 327 statutorily required time frame for responding to the permit application. The DEQ recognizes that this is the first application for a permit to withdraw water from a Great Lake that is subject to the standards of Part 327, the Great Lakes Charter process, the standards-of-decision in the Great Lakes-St. Lawrence River Basin Water Resources Compact, and the Great Lakes-St. Lawrence River Basin Sustainable Water Resources Agreement. Therefore, the DEQ reviewed additional comments received after the public comment period for consideration in application and functionality of the administrative process on this and future permit applications.

V. SUMMARY OF DEQ POSITION 12

I. BACKGROUND

Proposed Withdrawal

The proposed 85 million gallons per day (MGD) water withdrawal is from a Lake Huron water intake. The permit applicant, Genesee County Drain Commission (GCDC), proposes to use the withdrawal water for a community public water supply system, to be owned and operated by a collection of municipalities organized as the Karegnondi Water Authority (KWA). The proposed withdrawal will be via a Lake Huron water intake located approximately 3.5 miles offshore and a shore well and pumping facilities located in the south of section 31 and 32, Worth Township, T.9N, R.17E, Sanilac County, Michigan. The maximum proposed withdrawal of 85 MGD, corresponds to a maximum pumping rate of ~59,000 gallons per minute (gpm).

Public water supply is a use that the DEQ estimates to be 10 percent consumptive. While 90 percent of the water will remain in the Lake Huron watershed, the consumptive use estimate places the loss from the Great Lakes hydrologic system at 8.5 MGD.

II. STATUTORY STANDARD

A person who proposes to develop a new withdrawal of 2 MGD or more from the waters of the state to supply a common distribution system, is required to obtain a water withdrawal permit prior to making the withdrawal (MCL 324.32723[1]).

Application Submittal

A person proposing a withdrawal from the surface waters of the state is required to apply for a permit by submitting an application for the withdrawal to the DEQ containing the following information (MCL 324.32723[2]):

- Capacity of equipment used to make the withdrawal,
- Location of the withdrawal,
- Withdrawal source,
- Amount and rate of withdrawal,
- Intended maximum monthly and annual volumes and rates, if different from the capacity of equipment used to make the withdrawal,
- Relevant information related to seasonal use,
- Description of how the water will be used and location, amount and rate of return flow,
- Any other information the person would like the DEQ to consider.

The application is required to include an evaluation of existing hydrological and hydrogeological conditions and a detailed description of proposed preventative measures where relevant. In addition, the applicant is required to submit an application fee in the amount of $2000.00

Administrative Requirements

MCL 324.32723 requires the department to determine whether a permit application is administratively complete. The DEQ has 30 days to make this determination, unless the applicant is notified of deficiencies in the application requiring additional information. Once an application is determined to be administratively complete, the DEQ is required to provide a public comment period of not less than 45 days and render a decision on the permit application within 120 days from the completeness determination.

The DEQ received the original permit application from the GCDC on February 12, 2009. The information was submitted in accordance with Part 327, and "proposals subject to prior notice and consultation" of The Great Lakes Charter, Principles for the Management of Great Lakes Water Resources (The Charter). On March 4, 2009 the DEQ requested additional information to better fulfill the information requirements of The Charter essential to the administrative

process. Upon receipt of the additional information the DEQ sent a letter to the GCDC dated April 24, 2009 notifying them of the completeness of the application package.

The DEQ invited public comment on the permit application via press release, public notice and website posting. The press release was issued on May 27, 2009, and the posting of the public notice on the DEQ internet website on May 28, 2009. The GCDC was provided a copy of the public notice on May 28, 2009 for posting at the entrance to their premises and at the shoreline parcel where the proposed shore well and pumping station are to be constructed. The press release and public notice announced the 45-day public comment period and requested that comments be submitted to the DEQ by July 15, 2009.

The consumptive use estimate of 8.5 MGD exceeds the 5 MGD threshold established in the Charter for proposed withdrawals requiring Prior Notice and Consultation with the other Great Lakes states and provinces. In the spirit of the companion legislation adopted by the state of Michigan in conjunction with the Great Lakes-St. Lawrence River Basin Water Resources Compact (Compact), and pursuant to the Great Lakes-St. Lawrence River Basin Sustainable Water Resources Agreement (Agreement), the DEQ's Office of the Great Lakes provided notice of the proposed withdrawal on May 26, 2009. The complete application packet was transmitted to the other Great Lakes states, the Canadian provinces of Ontario and Quebec, and the Great Lakes first nation and federally recognized tribes, with a request that comments be provided by July 20, 2009 in order for the DEQ to meet the statutory obligations of Part 327.

Conditions Required for Issuance of a Permit

The DEQ is required to issue a permit for a water withdrawal if all of the following conditions are met (MCL 324.32723[6]):

- All water withdrawn, less any consumptive use, is returned to the source watershed;
- The withdrawal is implemented to insure there is no individual or cumulative adverse resource impact (ARI). Cumulative impacts are to be evaluated based upon available information gathered by the DEQ;
- The withdrawal will be implemented in compliance with all applicable local, state, and federal laws, as well as all legally binding regional interstate and international agreements;
- The proposed use is reasonable;
- The permit applicant certifies compliance with the environmentally sound and economically feasible water conservation measures for the applicable water use sector; and
- The proposed withdrawal does not violate public or private rights and limitations imposed by Michigan water law or other common law duties.

Parallel requirements for approval are spelled out in Section 4.11, Decision Making Standard, of the Compact. Section 4.11(5) of the Compact provides greater specificity on reasonable use conditions and requires the parties to consider efficient use of the water; efficient use of existing water supplies; the balance between economic and social development and environmental protection as they relate to other planned withdrawals and uses sharing the same source; supply potential; the degree and duration of likely adverse impacts and the restoration of hydrologic conditions.

III. DECISION MAKING PROCESS

Consumptive Use Considerations

The consumptive use calculation was based upon a consumptive use coefficient of 10 percent. The DEQ relied primarily upon the United State Geological Survey publication "Consumptive Water-Use Coefficients for the Great Lakes Basin and Climatically Similar Areas," Scientific Investigation Report 2007-5197. There is a relatively narrow range of coefficients for public water supplies in comparison with many of the other types of uses. Further, it is generally conceded the range is 10 to 15 percent as identified in Table 3-1, Consumptive-use coefficient used by Great Lakes jurisdictions, by water use category of the report. Upon review of the aforementioned report, the DEQ ultimately decided that 10 percent was the best estimate of consumptive use. This is the published value for the public water supply sector in Table 3-2, Total water use by category for the Great Lakes Basin, by year, from the Great Lakes Commission annual reports, 1998-2002. Based upon the 10 percent coefficient for consumptive use, the proposed withdrawal is projected to have a maximum consumptive use of 8.5 MGD.

Adverse Resource Impacts

Section 32721(1) of Part 327 prohibits a person from making a "...new or increased large quantity withdrawal from the waters of the state that causes an adverse resource impact." Section 32701(1)(a)(vii) defines an adverse resource impact (ARI) for a surface water body as "decreasing the level of a lake or pond with a surface area of 5 acres or more through a direct withdrawal from the lake or pond in a manner that would impair or destroy the lake or pond or the uses made of the lake or pond, including the ability of the lake or pond to support characteristic fish populations, or such that the ability of the lake or pond to support characteristic fish populations is functionally impaired." For flowing streams and rivers an ARI is defined as decreasing the flow by part of the index flow such that the ability of the stream to support the characteristic fish population is functionally impaired.

Part 327 establishes specific flow reduction as constituting an ARI for some stream types. No specific flow reductions are established for the Great Lakes or their connecting channels. In that case, a comparison of the proposed withdrawal to the water availability from the GL or connecting channel from which the withdrawal originates is one means of assessing the likelihood of an ARI. The proposed withdrawal of 85 MGD corresponds to a daily withdrawal of 1.136×10^7 cubic feet per day (ft^3/day) or 4.148×10^9 cubic feet per year (ft^3/year). The area of Lake Huron and Lake Michigan, which hydraulically act as a single source at the same elevation, possess a combined surface area of 45,300 square miles, or 1.263×10^{12} ft^2. Based upon a consumptive use of 10 percent a withdrawal of 4.148×10^9 cubic feet per year (ft^3/year) would result in a projected loss of water from the Great Lakes Basin of 4.148×10^8 ft^3/year. Assuming no recharge to lakes Michigan and Huron the consumptive use loss is projected to cause a reduction in lake levels of 0.0003284 feet (0.004 inches or 0.01 centimeter). Accordingly, the DEQ concludes the impact of the proposed 85 MGD withdrawal on lake levels and the corresponding impact to the characteristic fish population would not result in an ARI as defined in Part 327.

A comparison of the proposed withdrawal to flows immediately down stream of the proposed intake in the St. Clair River provides another reasonable measure of water availability and the potential for impact. The United States Geological Survey has published average flows for the St. Clair River in excess of 183,000 cubic feet per second, corresponding to a daily flow of ~118,268 MGD. When consideration is given to return flows and consumptive use, the water theoretically lost from Lake Huron of 8.5 MGD corresponds to 0.0072 percent of the total flow.

The DEQ concludes from this comparison that the proposed withdrawal would be insufficient to cause an ARI as defined in Part 327.

Applicable Local, State and Federal Laws

To be approved, the proposed withdrawal must be in compliance with all applicable local, state, and federal laws as well as legally binding interstate and international agreements, including the boundary waters treaty of 1909. Section 32726 governing local ordinances, specifically prohibits a local unit of government from enacting, or enforcing an ordinance that regulates a large quantity withdrawal. The information contained within the permit application indicates the withdrawal would be implemented in compliance with applicable state and federal laws (Part 327) and applicable international agreements. The Boundary Waters Treaty of 1909 was agreed to by the U.S. and Canada to provide a mechanism for the resolution of disputes over waters bordering the two countries and to insure the waters of the Great Lakes remain navigable. Nothing related to the GCDC proposed withdrawal volumes would be in violation of the treaty.

Reasonable Use

Part 327 requires that a proposed use be reasonable. As noted above the specific criteria for consideration the efficient use of the water and the efficient use of existing water supplies; a consideration of the balance between economic development, social development and environmental protect, supply potential; the degree and duration of likely adverse impacts and the restoration of hydrologic conditions. These considerations are consistent with Michigan's test for determining a reasonable use as set forth in Michigan Citizen for Water Conservation V. Nestle Waters of North America, Inc. [Michigan Citizens for Water Conservation v Nestlé Waters N America Inc, 269 Mich App 25; 709 NW2d 174 (2005)]. The considerations are addressed as follows:

Efficient Use of the Water: This requirement is directly tied to the user's commitment to Environmentally Sound and Economically Feasible Water Conservation Measures. (Conservation Measures) In the application the GCDC identified the Conservation Measures applicable to the public water supply sector that they are currently employing. A more comprehensive discussion is provided in the section entitled Conservation Measures on page 6.

Efficient Use of Existing Water Supplies: The language of the Compact specifies efficient use as a consideration when an increased withdrawal is proposed. The Compact language is intended to assure that water from various sources is being efficiently used by a large quantity user before they are granted approval for an increased withdrawal. Since the GCDC proposal is for a new withdrawal, this criterion does not apply.

Balance between Economic Development, Social Development and Environmental Protection: Reasonableness of a water use as it relates to the balance between economic development, social development and environmental protection is an important consideration in the acceptability of a proposed withdrawal.

Creation of a water authority and construction of the pipeline and treatment plants would enhance economic development in a variety of ways. During the 5-year construction period there project would provide an estimated $100 million in skilled trades work, $200 million in manufacturing of pipe and other equipment and 30 million in engineering and design services. Once on line the new pipeline and associated facilities is estimated to create over 50 new jobs necessary to the operation and maintenance treatment facilities, the Great Lakes intake, pipeline, and pump stations. Improving system reliability, as discussed below will also encourage economic development in the affected communities.

From a social standpoint, the proposed withdrawal and related facilities would benefit the area by enhancing the health, safety and security of area residents. The DEQ, Water Bureau (WB)

has identified deficiencies in the GCDC system primarily related to reliability. Significant effort will be placed on improving current system reliability in the design of system components associated with the proposed withdrawal. These efforts will meet with the requirements of the Safe Drinking Water Act. With the construction of new facilities the GCDC would also be improving system reliability for surrounding public water supply systems by offering emergency inter-connects and entering into mutual aid agreements.

Lastly, given the net effect of the withdrawal on the water resources as described above, these economic and social benefits to the area would be obtained without a perceptible impact on the environment.

Supply Potential: Supply potential consideration requires the DEQ look at the impact of the withdrawal on the quantity, quality, reliability, and safe yield of hydrologically interconnected water sources. The proposed withdrawal does not present any known or anticipated threat to the quantity or quality of Lake Huron as a water source. Also, the proposed withdrawal would have no impact on the reliability or the safe yield of the source as it relates to others using Lake Huron or hydrologically connected sources, such as the St. Clair/Detroit river systems.

Degree and Duration of Likely Adverse Impacts: The DEQ concluded the proposed withdrawal would not cause an ARI.

Restoration of Hydrologic Conditions: The water withdrawn by the GCDC, less consumptive use, would all be returned to the source watershed via treated wastewater discharges to the Flint River. The consumptive use losses for inside Great Lakes Basin uses are considered reasonable. Under Part 327 the restoration of hydrologic conditions does not apply to the proposed withdrawal.

Conservation Measures

For permit applications received on or after January 1, 2009, the applicant must self-certify that they are in compliance with Conservation Measures. More specifically they must certify that they are in compliance with the Conservation Measures developed by the applicable water user's sector or developed for the water use associated with that specific withdrawal (MCL 324.32723[6(e)]).

The GCDC has certified that they are in compliance with the accepted practices as developed and submitted to the DEQ for the public water supply sector by the Michigan Section of the American Water Works Association and set a goal of a less than 5 percent system wide water loss. GCDC further certifies to the promotion of educational programs related to lawn sprinkling and other outside uses, and the implementation of programs to promote water re-use and other water conservation measures by commercial and industrial facilities. The GCDC also practices "flat rate water billing," meaning large users do not pay proportionally less as their water use goes up. All water uses served by the GCDC are metered and billing is commensurate with the metered water usage. Lastly, the GCDC employs a local ordinance restricting outdoor water use during periods of peak use.

Public or Private Rights, Limitations and Common Law

The issuance of a permit on the proposed withdrawal must not violate public or private rights or interfere with limitations imposed on the use of the resource by Michigan water law or other common law decisions. Specifically, the DEQ must ascertain if the issuance of the permit would interfere with the principle that certain natural resources, which in this case is Lake Huron, are preserved for public use, and that the state is required to maintain the resource for the public's reasonable use. The issuance of a permit for the proposed withdrawal would not interfere with the public's access to Lake Huron, the public interest in Lake Huron as a natural resource, or maintenance of Lake Huron for drinking and recreational purposes.

VI. PUBLIC PARTICIPATION PROCESS

The DEQ invited public comment on the permit application via press release, public notice and website posting. The press release was issued on May 27, 2009, and the posting of the public notice on the DEQ internet website on May 28, 2009. The web posting included the permit application packet for the proposed withdrawal and the public notice announcement. The press release and public notice announced the public comment period and requested comments be submitted to the DEQ by July 15, 2009.

The Office of the Great Lakes provided notice of the proposed withdrawal on May 26, 2009, to the other Great Lakes states, provinces and federally recognized tribes and first nations. The notice included a request that comments be provided by July 20, 2009.

The remainder of this document summarizes the comments received based on the proposed 85 MGD withdrawal by the GCDC and the DEQ response to the comments on the basis of applicable rule, policy, and procedure in administration of the permit application and review process under Part 327, Great Lakes Preservation, of NREPA.

General Comments

Many of the comments were specific to ongoing negotiations between the GCDC and the City of Detroit relative to the continued provisions for water supply service from the Detroit Water and Sewer Department (DWSD).

It was expressed by some commenters that the GCDC proposal underestimates the reliability of the DWSD public water supply system noting that DWSD possesses sufficient capacity and has an approved proposal to provide the GCDC the desired redundancy. Conversely, it was claimed the request for redundancy was made in 1965 with reciprocal commitment to construct the necessary infrastructure over the past 30 years.

A comment was made that constructing a new intake does not appropriately address deficiencies in either the GCDC or DWSD systems. As an example, there was a reference to ongoing system losses for the GCDC and DWSD of 5 percent versus 20 percent of water pumped.

Multiple comments were received with regards to the impact on water rates for DWSD customers if the KWA member municipalities were to withdraw from the DWSD system. Rate increases for the remaining DWSD customers was estimated at approximately 6 percent. A counter argument was made that the loss of a customer should not affect remaining customer rates as costs are presumably based on "cost of service."

There was a claim that the cost of the intake structure, transmission line, and separate treatment facilities for the KWA would be much greater than provided in the preliminary estimates. Conversely, The GCDC claims that all potential KWA members are aware of the cost estimates. The intake and pipeline costs are estimated at 75 percent of costs, including plans for redundancy while the treatment costs will be 25 percent of costs. GCDC also noted that separate studies on the cost of various water supply alternatives should have no bearing on the permit decision.

Response to Comments: The DEQ does not consider any comments on the relative position of the DWSD and GCDC water supply system to be legally relevant to a decision as to whether or not a permit should be issued to the GCDC for the proposed 85 MGD withdrawal from Lake Huron. Part 327 specifically requires the DEQ to issue a permit if on the basis of the submitted material the proposed water withdrawal meets the decision making criteria. The DEQ is specifically precluded from using part 327 to "...diminish or create any existing authority of municipalities to require persons to connect to municipal water supply systems as authorized by law" (MCL 324.32726).

Any addition or loss of a major customer of a regional public water system has the likelihood of affecting water rates – clearly a major addition or loss affects both the revenues and costs of operation. Water rates and the basis for establishing water rates are not an issue under Part 327. It is appropriately an issue for water service contract negotiations between the regional water system and its customers. To do otherwise invites unwanted intervention of the state into local decision making. There is nothing in Part 327 or any provisions of the Agreement and Compact that would either mandate connection to a regional water system or bind a customer permanently to a regional water system.

Applicability of Law and Regulations

Comments criticized the GCDC's application under Part 327. As a community public water supply the commenter believes the application would have been more appropriately made under the Michigan Safe Drinking Water Act, Act 399, as amended and rules. A submittal of plans and specifications under Act 399 would have provided greater clarity as to the reasonableness of the water use and the applicant's intent relative to applicable Conservation Measures.

Other comments cited the application of requirements in the Compact and expressed the opinion that the GCDC proposal did not meet the applicable standards. Most frequently referenced were the standards identified in *Section 4.11, Decision Making Standard* and *Section 4.12, Applicability* of the Compact. Relative to the former, comments suggested the proposed use is not reasonable based on efficient use of existing water supplies, balance between economic and social development, environmental protection, use of same source by multiple users, and the probable degree of adverse impacts. Relative to the latter requirements, it was implied that the Compact provides the Originating Party (i.e. Michigan) with the power to apply a much more stringent standard.

Response to Comments: Part 327 and the companion amendments to Act 399 do not provide any restrictions as to who may apply for a permit to make a large quantity water withdrawal nor specify how one must go about obtaining a permit. GCDC stated that they submitted their request for approval through Part 327 in large part to obtain the appropriate authorization of the withdrawal before investing a significant amount of money in developing plans and specification for the water works systems. Conformity with the Decision Making Standard of the Compact is, in part, the basis for the DEQ's decision on the permit application.

New Withdrawal and Consumptive Use

A number of comments focused on the fact that approval of the GCDC proposal would not result in a decrease in Detroit's ability to pump water and solicit new customers to maintain their current rate of use. As a result commenters concluded that the GCDC proposal should be treated as a new withdrawal. A corollary to this criticism was the observation that the total water withdrawal from the Great Lakes Basin would increase and that approval of the proposal would encourage other users to pursue similar use of Great Lakes waters. Some comments questioned the water use projections by the GCDC for the years 2014 to 2039. GCDC projected water use to increase by 42 percent. There was also concern that projected demand was 78.7 MGD, yet the request is for 85 MGD. There were requests that the proposed new withdrawal should be considered unacceptable unless the Detroit withdrawal was reduced by a corresponding amount.

Concern was also expressed over an increase in consumptive use. The fact that there would be an increase in use would result in additional consumptive use loss from the Great Lakes Basin. Numerous comments, particularly from other states questioned the use of 10 percent as the consumptive use coefficient indicating it should be higher. USGS publications cite consumptive use on public water supply systems in the range of 10 to 15 percent.

Response to Comments: Comments on the increased use must be addressed within the context of public water supply system operation, in particular when the increase in use is based upon population projections over a period of years. GCDC conducted a study to obtain the projected use of 78.7 MGD by 2039 based upon population and water use trends for the area currently served by the GCDC system. The GCDC explains that the request for 85 MGD provides a slight buffer over that which would be needed to account for water use in KWA member water treatment plants for such things as filter backwash. Additional buffer is provided to account for system losses. The GCDC as previously noted has set a goal of 5 percent for system losses. The DEQ determined the 85 MGD request is appropriate relative to the projected use, system operation and system water losses.

The DEQ has projected an increase in consumptive use of 8.5 MGD because the GCDC proposal is a new withdrawal. The GCDC proposed withdrawal does not affect the baseline capacity of the DWSD system or DWSD's future use of their existing baseline capacity. In the short term, the combined use of water for both the DWSD and GCDC systems will not significantly increase, because GCDC presently receives their water from DWSD. The proposed withdrawal was evaluated by the DEQ on the basis of DWSD maintaining their existing baseline capacity and evaluating the impact of a new 85 MGD withdrawal by GCDC from Lake Huron.

The consumptive use coefficient of 10 percent was obtained from *Table 3-2. Total water use by category for the Great Lakes Basin, by year, from the Great Lakes Commission annual reports, 1998-2002* in the USGS publication Consumptive Water-Use Coefficients for the Great Lakes Basin and Climatically Similar Areas, Scientific Investigations Report 2007-5197. Consumptive use coefficients for public supply over the years cited (1998-2002) were 10 and 11 percent, with 10 percent cited as the consumptive use over the entire period in question. The DEQ deemed this reference to be the most reasonable estimate of consumptive use.

Conservation Measures

There were multiple criticisms of the GCDC's commitment to water conservation. Specifically, that the GCDC identified no measures aimed at water use reduction noting that water conservation on new systems should be aggressive. Comments cited the published water conservation measures applicable to the public water supply sector noting that the GCDC has not made a commitment to each and every conservation measure. Specifically, their description of conservation measures did not include measures that promote water use conservation and the reduction of system leaks. Lastly, none of GCDC proposed wholesale or municipal customers provided information on compliance with Conservation Measures.

Commenters also expressed concern that the conservation measures identified by the GCDC were not consistent with the requirements of the Agreement and/or Compact. Plans for water use reduction or conservation were characterized as inadequate as nothing was mentioned relative to targeting system leaks and the promotion of efficient water use, in particular those leaks mentioned for the Detroit system. It was expressed that no new withdrawals should be approved until Detroit's leak problems are addressed. Some indicate there should be no approval of the withdrawal without a "water master plan" including impacts of current conservation and efficient use measures that have reduced total use and consumption. Commenters questioned whether there would be a continuation of conservation efforts made to date or whether there efforts would be improved upon. It was noted that a projected increase in population does not necessarily correspond to a projected increase in use, if one assumes more efficient use and conservation. Some commented that additional documentation is needed on water conservation measures including clear goals, targets and means of assessment.

Response to Comments: After January 1, 2009 permit applicant's are required to "self-certify" that they are in compliance with conservation measures developed by the applicable water

user's sector or developed for the water use associated with that specific withdrawal. The GCDC certified to the promotion of educational programs related to lawn sprinkling and other outside water uses, implementation of programs to promote water re-use and promotion of other water conservation measures by commercial and industrial facilities, and has set a goal of a less than 5 percent for system wide water losses. The GCDC practices "flat rate water billing," meters all water uses and bills commensurate with the metered water usage. The GCDC employs a local ordinance restriction on outdoor water use during periods of peak use.

The DEQ acknowledges the GCDC has not certified as to employing each and every water conservation measure identified for the public water supply sector, and notes there is not a requirement in Part 327 that they do so. The DEQ does commit to working with public water supplies to further water conservation efforts and will do so with the GCDC. Relative to the GCDC customers, the GCDC is making application on behalf of member communities of the KWA. All KWA members would participate in the implementation of the identified conservation measures. References to fixing deficiencies in the DWSD system are not germane to the GCDC permit application.

Reasonableness of Proposed Withdrawal

A number of comments were received relative to the reasonableness of the proposed withdrawal noting that any proposal must be considered on the basis of its purpose, suitability of use to location, the extent and amount of harm, benefits, necessity and manner of use, and other factors. The Agreement and Compact also require consideration of the economic and social value relative to potential environmental impacts and other factors. Generally, comments on the reasonableness of the proposed withdrawal focused on:

- The environmental harm that might be caused by the return of treated wastewater, and
- The necessity and amount of the withdrawal given the availability of Detroit system.

Specifically, on the issue of return flow there is a concern that points of discharge and downstream segments would be incapable of absorbing the projected 42 percent increase in discharge (based on future growth projection) without adverse impact. Commenter's claim numerous combined sewer overflows have occurred and requested verification that discharges are operating in compliance with existing laws.

Regarding the availability of the Detroit system, many comments made reference to the fact that the efficient use of existing systems is a required demonstration of reasonableness. There were claims the GCDC application should be rejected since the GCDC failed to rule out the option of using the existing DWSD system. Comments indicated that DWSW currently has the capacity to meet the needs of the GCDC and its customer municipalities, is already providing service to the proposed service area, and alleges to having made a commitment to providing reliability.

A few comments related to the economic and social value criteria of the Agreement and Compact, which requires consideration of the balance between economic development and social development and environmental protection on planned withdrawals from the same source

Response to Comments: There are four wastewater discharges by the City of Flushing, City of Flint, Genesee County's "Ragnone Plant" and the City of Lapeer. The four wastewater treatment plants are in the process of reducing infiltration and inflow from their collection systems. The National Pollutant Discharge Elimination System (NPDES) permits for the Flint and Genesee Ragnone plants discharges require treatment facility and collection system capacity analyses. The City of Lapeer proposes to rehabilitate their plant to increase the treatment capacity and accommodate an increase in population and service area. All are operating and are in compliance with the parameters stipulated by their respective NPDES permits. If the GCDC service area demands increase in the future, or if the service area expands, the DEQ will use the standard NPDES permit review/reissuance cycle (5-years) to

evaluate any impacts from increases in wastewater flow. That process will include public participation.

The efficient use of existing systems is an applicable consideration when a proposal for an increased withdrawal and consumptive use is before the DEQ for approval. That is to say, an existing system must demonstrate that it is not wasteful of its water before is request for an increase in use can be approved. Because this is a new withdrawal the requirement for efficient use of existing systems, specifically the efficient use of a system owned and operated by another party (DWSD), is not germane to the permit decision.

As a consideration on the reasonableness of a water use, social and economic development considerations must be balanced against environmental impact of the proposed withdrawal. The GCDC outlined the potential benefits including enhanced public safety, security and health that would be provided to area communities served by the proposed withdrawal. Many of the social benefits would arise as a direct outcome of the new intake, pipeline, shore well and treatment facilities correcting existing system deficiencies identified by the DEQ. The GCDC projects the proposed construction of facilities would provide a direct infusion of money, jobs and manufacturing opportunities to the area. The DEQ determined there would likely be no ARI to the commonly shared water source as the withdrawal is not of sufficient magnitude to perceptibly lower the levels of Lake Michigan and Lake Huron. Accordingly, the DEQ concludes the GCDC proposal meets the reasonableness criteria relative to social development, economic development, and environmental impact.

Adverse Impact and Requirements for Ecological Improvement

Comments pointed out that the Great Lakes states and provinces have agreed to protect, conserve, restore and improve the Great Lakes resources. Some additional analysis recommended that the DEQ ascertain if there might be a cumulative ARI and questioned why the DEQ has not required the submittal of proposed restorative measures as part of the application packet. Comment pointed out that the application packet included no information as to whether Detroit will reduce its water use, whether GCDC will remain a DWSD customer for backup, and whether DWSD will seek additional customers. Commenters indicated that if there is no net reduction in use cumulative impacts need to be addressed. Some believe what was referred to as a diversion could have a significant impact on the levels of the Great Lakes and set precedent for other large scale diversions. Eleven comments focused solely on the impact the withdrawal would have on lake levels.

Response to Comments: The DEQ has determined there would be no ARI caused by the impact of the proposed withdrawal, and no perceptible impact on the levels of the Great Lakes or connecting channels. Given the likely near term affect of the proposed withdrawal on the volume of the DWSD withdrawal, there is no identifiable issue of cumulative impacts. Part 327, ~~which is~~ the guiding legislation in the issuance of the permit, requires "preventative measures" be submitted as part of a permit application only when necessary to preclude an otherwise prohibited environmental impact. As a proposed new withdrawal, the DEQ evaluated the GCDC withdrawal without assuming there would necessarily be any change to DWSD capacity to withdraw~~al~~ water from the Great Lakes.

Diversion or Intra-Basin Transfer

A number of comments assumed that the proposed withdrawal constitutes a diversion, or intra-basin transfer, precluding DEQ approval under Part 327, the Agreement and Compact. Comments indicated the need for the GCDC to better identify the current and proposed service area. This was especially true in dealing with service to Shiawassee County as portions of the county are in both the Lake Michigan and Lake Huron watersheds. There was also concern that some of the service area and return flow might be to the St. Clair/Detroit River watershed, or discharged to the Lake Erie watershed resulting in an intra-basin transfer. There was concern

that approval of the withdrawal would set a dangerous precedent for the review of diversion and intra-basin transfers in the future.

Response to Comments: In accordance with Part 327, the Agreement and Compact, the DEQ has determined the proposed withdrawal would not constitute a diversion or intra-basin transfer. Portions of Shiawassee County lie in both the Lake Michigan and Lake Huron watersheds. However, Section 4.12.9 of the Compact states that Lake Michigan and Lake Huron are to be considered a single hydrologic unit and watershed. And therefore the transfer of water between Lake Michigan and Lake Huron watersheds is not considered a diversion under the Compact. None of the proposed service area lies within the watershed of the connecting channel or Lake Erie. Connecting channels are those waters and associated watershed that lie between any two of the Great Lakes. Section 4.12.7 of the Compact treats connecting channels as though they are part of both the Great Lake watersheds above and below the connecting channel.

In summary, within the applicable definitions of Part 327, the Agreement, and Compact the proposed withdrawal would not constitute a diversion or intra-basin transfer. It is a proposal potentially subject to Prior Notice and Consultation under the Charter because it is proposed as an in basin use with the only loss of Great Lakes waters due to the associated consumptive use.

Inadequate Information

A number of comments criticized the adequacy of the submitted information. Some suggested more information was needed on the movement of ground water and surface water to determine if the proposal will result in an intra-basin transfer or cause an adverse impact to the quantity and quality of Great Lakes basin waters. There were claims the proposal did not meet the requirements, spirit or intent of Agreement or Compact. The presumed inadequacy of information led to concern over consumptive use, service area information and water loss. There was also concern over inconsistencies in the information such as references to the new capacity of 85 MGD, a maximum capacity of 110 MGD and a firm capacity of 88 MGD. There were questions as to the relationship between the various cited capacities.

Others acknowledged the effort made to demonstrate consistency with the Agreement and/or Compact while noting information deficiencies. In a few instances commenter's requested information concurrent with a request for extension of the public comment period.

Response to Comments: A permit applicant under Part 327 is required to submit information including pumping capacity; location of withdrawal; withdrawal source; amount and rate of withdrawal; the maximum monthly and annual volumes and rates; relevant information related to seasonal use; a description of how the water will be used; the location, amount and rate of return flow; and an evaluation of existing hydrological and hydrogeological conditions. Other information may be provided at the discretion of the applicant with a description of preventative measures required where relevant.

Due to the magnitude of the withdrawal and its qualifying as a proposal potentially subject to Prior Notice and Consultation under the Charter, the DEQ requested the submittal of additional information. Extensive information was provided to meet information requirements in accordance with the Charter, the Agreement and Compact. The DEQ deemed the information sufficient and notified the GCDC of such on April 24, 2009.

Regarding the request for an extension of the public comment period, Part 327 contains a statutory limit on the time the DEQ may give to the consideration of a permit application. Once the applicant is notified of the completeness of application the DEQ has 120 days in which to render a decision. Given the time constraints and the adequacy of the application packet, the DEQ denied requests to grant an extension to the public comment period.

V. Summary of DEQ Position

The DEQ has determined the application for the GCDC proposed withdrawal of water from Lake Huron was submitted in accordance with the permit requirements of Part 327. Further, the proposed withdrawal is deemed not likely to cause an ARI and, as proposed, meets the intent of the Great Lakes Charter and the decision making standards of the Agreement and Compact. The DEQ based this determination on a review of the information and data pertinent to the factors used in making a decision on a permit application which included a thoughtful consideration of the comments received from the public, the other Great Lakes states, the Canadian provinces of Ontario and Quebec, and federally recognized tribes and first nations on the permit application, as made available for public review.

The authorized withdrawal capacity is 85 million gallons per day (maximum withdrawal in any single day). The DEQ will assure that capacity is not exceeded in the issuance of the required Michigan Safe Drinking Water Act construction permits (1976 P.A. 399, as amended). In addition, the DEQ will require as a condition of this Part 327 authorization that the participating members of the Karegnondi Water Authority be committed to a water conservation/water use efficiency program consistent with the water sector guidelines accepted by the state under Part 327, and posted on the DEQ website.

ROWE PROFESSIONAL SERVICES COMPANY

Large Firm Resources. Personal Attention.

Mr. Edward Kurtz, Emergency Financial Manager
City of Flint
1101 S. Saginaw Street
Flint, MI 48502

Subject. Review of December 21, 2012 Presentation – City of Flint Water Supply Assessment

Dear Mr. Kurtz:

As requested, we have reviewed the analysis of water supply alternatives for the City of Flint which was presented to the State Department of Treasury by Tucker, Young, Jackson, and Tull, Inc. (TYJT) on December 21, 2012. Our review is attached and summarizes the primary differences between the TYJT assessment and our previous studies and provides explanations of why we believe there are differences.

We have also reviewed the options for continued DWSD supply included in the TYJT presentation. It is not clear whether these are presented as specific offers on behalf of DWSD or included as examples for analysis, but we have noted some items which we believe should be addressed and considered as these options are compared.

If there are questions, please contact me.

Sincerely,
ROWE Professional Services Company

James E. Redding, P.E.
Vice President / Director of Engineering

Review of TYJT December 21, 2012 Presentation
City of Flint Water Supply Assessment
Prepared by Rowe Professional Services Company

DWSD Supply (Slides 7 through 9)

1. The 8 mgd maximum day supply by DWSD options can result in periods during the summer when most of the water to meet demands will be supplied by the City from the river. To aid in maintaining a consistent water quality, softening of the water from the river should be provided with this option, greatly increasing the City's costs.

2. Upgrades to Flint's WTP and dams will be needed for options requiring blending, since the WTP will be required to provide continuous, reliable service and compliance with recent surface water treatment regulations.

3. The rates for the options analyzed are shown on Slide 9 as "TYJT Estimates". Options and rates shown are different than presented by DWSD previously.

	DWSD 11/29/2012	TYJT Estimates
18 mgd Maximum Day - P&B	$16.24	$16.37
12 mgd Maximum Day - P&B	$16.30	$16.31
8 mgd Maximum Day -P&B		$12.68
12 mgd Maximum Day - Imlay	$14.38	$14.38
8 mgd Maximum Day - Imlay		$11.11

4. Since the rates used in the analyses are shown as estimates, are they actual offers or just presented as "what if" scenarios?

5. We assume that the Imlay options are based on transfer of the 72" main through Lapeer County to Flint. The analyses show a capital cost of $4.7 million; we assume that this is the proposed purchase / lease cost to Flint. This should be clarified along with pertinent details.

6. If the transmission main is transferred to Flint, what are Flint's responsibilities regarding service to the Lapeer County customers? If they remain DWSD customers, then Flint should receive some revenue for the use the main. It does not appear this is included in the TYJT analyses.

7. If the transmission main is transferred to Flint, we assume that the city will be responsible for the maintenance of the 50 year old main. The TYJT analysis did not include this.

8. Do the rates shown include the credit for "reliability" which had been discussed with DWSD?

9. If the point of commerce is changed from Baxter and Potter to Imlay, a new meter pit will be required. The cost of this does not appear to be included in the TYJT cost analyses.

Flint River Supply (Slide 10)

1. If any of the "blending" options are chosen, it will be necessary to upgrade the Flint WTP and dams to provide reliable, continuous service and compliance with recent surface water treatment regulations.

Data Collected (Slide 14)

1. The slide notes that Flint blending is based on DWSD supplying 2/3 and Flint supplying 1/3 of 12 MGD ADD. For the maximum day demand (18 mgd), if DWSD supplies a maximum of 8 mgd, Flint will supply 10 mgd or 56% of the total. However, such a large portion will make it more difficult to blend and achieve consistent water quality. Flint will need to soften water for these options.

Benchmarking Comparisons (Slide 16)

1. The slide subtitles are "KWA O&M Inflation Factor" and "DWSD and Flint Rate Inflation Factor". It seems appropriate to benchmark O&M costs for the KWA, because future costs of service will be dependent on how operating costs are impacted by inflation. For Flint, it does not seem appropriate that "rate inflation" from other utilities be used to determine the impact of inflation on future cost of service. Rates are impacted by inflation, but also by other factors such as debt and customer base. O&M expenses and rates are different and care should be exercised not to mix the two during analyses. The TYJT analyses apply an inflation factor (based on rates from other utilities) to the Flint WTP operating expenses, which does not seem to be consistent.

2. The KWA will supply raw water; SOCWA and YUCA both supply finished water. Regulations impact the O&M for finished water suppliers but should not impact the KWA O&M. The use of data from SOCWA and YUCA does not seem like a comparable comparison with the KWA. Finished water suppliers will have increased costs due to regulatory compliance, which really are not due to "inflation" of the costs of wages, power, chemicals, etc.

3. DWSD has a history of rates to Flint and other suburban wholesale customers. Rates tend to be quite specific to each utility, based on much more than just the costs of operating and maintenance. It appears that DWSD historical rates have not been considered in projecting future DWSD rate increases.

Capital Financing (Slide 17)

1. KWA bonds are planned to be general obligation bonds, backed by member counties.

O&M Inflation Factor (Slide 20)

1. SOCWA and YUCA are finished water suppliers; ever-changing regulatory requirements will impact their operating costs more than a raw water supplier, such as KWA.
2. KWA will be a supplier of raw water. O&M costs should primarily be limited to power and labor, with a little chemical use for zebra mussel control. KWA will not provide treatment of the water.

3. The KWA study assumed power, labor, and chemical costs increase at an annual average of 3%. TYJT indicated this is too low and suggested 5%.

4. Following are examples of historical inflation, which support the 3% as a reasonable assumption for O&M expenses (not rates)
    a. Labor- GCDC-WWS labor costs have increased at an annual average rate of 2.5% since 2003
    b. Electricity Rates in Michigan (per U.S. Energy Information Administration) have increased an average of 3.2% since 1999.
    c. The U.S. Bureau of Labor Statistics indicates that the inflation rate over the last 30 years has been an average of 2.8%.

Finished Water Rate Inflation (Slide 21)

1. TYJT bases their assumptions for rate inflation on a survey of rates from three other water suppliers, but ignored the actual rate history of DWSD. TYJT assumed DWSD rate increases of 4.4% annually (if water is purchased from P&B) and 2.9% annually (if water is purchased from Imlay). Based on the actual charges by DWSD to Flint, DWSD historical rates are as follows:
    a. 10 year increase in DWSD rates to Flint:: 10.5% annually
    b. Average annual increase through 45 year history: 6.7%

2. Note that for the KWA analyses, an inflation factor has just been applied to power, labor, and chemicals. Although higher prices for labor, power, and chemicals impacts utility rates; rates are impacted by many other factors, many of which are not related to inflation. Rate inflation will likely be different than O&M inflation. Other factors impacting rates:
    a. Debt – the amount of debt varies widely between utilities
    b. Number of customers / quantity of water sold – there are many fixed expenses with a utility, that if are distributed amongst more users/more gallons sold will result in lower rates. Conversely, if there are fewer users or less water sold, the rates are higher. Assumptions regarding future water consumption will have a great impact on "rate inflation".

3. Unlike KWA and Flint operating expenses which will increase over time based on inflation, the cost of continued DWSD service should be based on the inflation of DWSD rates, to include the increasing cost of other DWSD expenses such as debt and the impact of reduced customers / demands in addition to increasing O&M expenses.

4. Even though there could be a one-time reduction in DWSD rates through adopting the model contract, limiting peak demands, and or changing the point of commerce; it doesn't seem reasonable to assume that subsequent annual increases will only average 4.4% through the 30 year period of analysis. This is significantly less than historical performance (yet TYJT suggests that inflation for KWA O&M expenses will increase at almost double the rate of historical indicators).

Capital Financing with Revenue Bonds (Slide 24)

1. Note that the KWA bonds will be general obligation bonds backed by the member counties.

2. The 2009 KWA Study assumed 6%, 25 year financing. The interest rate for planning was reduced in the 2012 Study update to 5%, which is still higher than if bonds were sold today.

3. Financial consultants determined the charges for purchasing capacity in the KWA supply based on the estimated project cost plus appropriate financing costs. Based on 60 units of capacity, $538,764,000 will be generated for repayment of debt and project costs using the capacity charges in the KWA capacity agreement.

25 years * 60 units * $355,300 / unit =	$532,950,000
3 years * 60 units * $32,300 / unit =	$ 5,814,000
	$538,764,000

4. For a KWA project cost of $272,421,558, total P&I is $483 million. The difference of $55,500,000 is available for financing expenses (capitalized interest, bond issuance costs, etc.) and additional contingencies.

5. Bond holder reserve is not a requirement for general obligation bonds.

6. TYJT assumed that 3% interest would be earned on the bond holder reserve during the 25 year bond period. Current interest rates are less than 1% and it seems inappropriate to assume such a high rate will be earned on retained funds.

7. Bondholder reserve, if provided, should be applied against the last couple of P&I payments. The TYJT did not apply it. This will reduce their project costs.

KWA Construction (Slides 26 through 29)

TYJT has indicated that the KWA construction cost estimate is too low. The primary differences in cost estimates for the project appear to be the following components:

1. Pump Stations (Slide 27) – The TYJT estimate for the pump stations is more than double that used by the KWA ($54,573,314 vs. $24,618,080). KWA estimates were based on actual construction costs from recent projectd completed by Genesee County within the last eight years.
   a. 32mgd water pump station including two-10 MG ground storage tanks - $13.4 million
   b. 80 mgd wastewater pump station, 50 feet deep wetwell – $8.3 million
   c. 30 mgd wastewater pump station, 50 feet deep wetwell – $9.4 million

   The KWA budgeted amount seems reasonable for two pumping stations as currently planned and to be constructed in rural areas (not southeast Michigan).

2. Redundant Power – There is no need for redundant power; other provisions will provide reliability of supply.

3. Land – Preliminary engineering has continued so earlier budgets established for planning for land acquisition can be greatly reduced. Options have been obtained on all properties which must be

purchased, so purchase prices are known. It will be necessary to obtain easements for only two miles of pipeline construction. All land costs are now estimated at $1.25 million.

4. Engineering, Legal, Administration & Contingencies
   a. The October 2012 KWA estimate provided an allowance of 25% of construction cost to cover engineering, legal, administration, and contingencies (ELAC). This was reduced from the 38% allowance used in the 2009 Study because ongoing planning and design have firmed up many of the details of the project, including:
      i. The intake design has been completed and all regulatory permits obtained.
      ii. The transmission main route has been determined. Meetings with road agencies have firmed up the requirements for construction and restoration within rights-of-way. Environmental review and permitting are in process.

   b. TYJT costs for Intake Crib, Pump Stations, and Transmission Mains (Slide 30) include a 30% allowance for ELAC. These allowances (from Slides 26 through 28) total $72,139,566. In addition, Slide 30 provides the following additional ELAC costs in the project total:

Design Engineering / Pump Stations	$16,939,581
Construction Management	$14,434,410
Administration	$ 349,440
Legal	$ 831,000
Total	$32,554,431

   c. Combining this with the $72,139,566 totals $104,693,997 or 43% of the estimated construction cost. We believe that such a high allowance for ELAC is not appropriate for a project of this magnitude where preliminary engineering and some design have already been completed.

Cost Comparison (Slide 30)

1. The TYJT pump station price is too high based on costs of similar projects; costs used by KWA are based on costs of recent local projects. The KWA estimate is believed to be sufficient for the proposed pumping stations.

2. Redundant power is not required; this does not need to be included in the TYJT estimate.

3. Land for LHPS – actual price is $360,000

4. Design Engineering / PS and Transmission – KWA included engineering in the 25% ELAC allowance included in the $207,752,895 estimated cost of transmission mains; TYJT included engineering in their 30% ELAC allowance included in the $218,811,559 estimated cost. By adding $16,939,581 for design engineering, $14,434,609 for construction administration, $349,440 for administration, and $831,000; it seems that ELAC is being "double-counted". The TYJT 43% allowance for ELAC seems unwarranted for a project with a great deal of preliminary and design engineering completed. The 25% KWA allowance is believed to be sufficient.

5. Easements and land (other than LHPS) should total $1,140,000, based on current options and specific needs for easements.

Other Considerations – Redundancy / Reliability (Slide 33)

1. Unfunded Mandates/ Future Regulations
    a. The proposed KWA supply will deliver raw water; it is not anticipated to be affected by future changes to regulations. Regulations will impact the City of Flint with respect to treatment and/or distribution of finished water. The City will be subject to these requirements with any of the DWSD blending options, just as they will be responsible for them if supplied by KWA. Some compliance costs may actually be less with the higher quality Lake Huron water rather than Flint River water as the source.

2. State Goals
    a. The TYJT presentation indicates that creation of a new raw water supply is contrary to the governor's goals as suggested. However, the development of a new raw water supply provides new opportunities. Communities in Sanilac, St. Clair, and Lapeer counties will have the option to join a regional water supply and replace their small local supplies where limited supplies and high concentrations of arsenic have been a concern. The new water supply also provides great economic development opportunities. The raw water supplied by KWA will make a new commodity, raw water, available to the region. A large, low-cost supply of raw water can be a valuable resource for industries and agri-businesses. The development of a new water supply will also create construction jobs through the short term period of building the new water supply and subsequently over a longer period as new businesses and industries are developed in the area.
    b. The City of Flint and area communities will benefit as permanent jobs are created for operating and maintaining the local treatment facilities.

3. Redundancy
    a. We agree that the KWA and DWSD options are similar with respect to redundancy. Both provide the primary water supply; customers are responsible for their backup supply.

Other Considerations – Cost Slide 34

1. TYJT indicates that the DWSD 8 mgd supply option is the least cost alternative.
    a. The TYJT analysis does not include the cost of needed upgrades to the City's WTP or increased operating costs in their analysis. During summer months, water from the river will need to be softened before blending. More than half of the water supplied will be provided from the river. When the cost of upgrades to the WTP and the increased operating costs (for softening) are added to the TYJT analysis, the KWA option is less than the DWSD 8 mgd option.

2. For any of the DWSD "blending" options, upgrades will need to be made at the WTP to provide for continuous, reliable operation and compliance with new surface water treatment rules. Increased capital and operating costs for treating water from the river should be added to the TYJT costs for comparison with the other options.

3. Water from the river will require greater effort to treat than water from Lake Huron (more chemicals, power, and residuals). The TYJT analysis shows about the same O&M costs for the Flint WTP, regardless of water source. It seems that the WTP O&M costs for the KWA options should be reduced to reflect the savings from treating Lake Huron water.

4. The TYJT presentation noted that the KWA analysis did not include allowances for mechanical and process improvements within the planning period. The KWA will supply raw water. The facilities consist of pipe, pumps, and a tank. There are no treatment facilities which would be susceptible to future regulatory changes. The only improvements that seem likely would be the need to provide additional capacity. Capacity expansion is planned to be financed through capacity charges to new users.

5. The provision for redundant connections between the City's water system and the GCDC system was included in the most recent water supply agreement between the two, in 2011. Although not a KWA cost, the cost of the redundant connections should be considered with all options.

6. The $2.3 million budgeted for land by KWA was intended to cover all land requirements. Since the October update, options have been obtained on all land to be purchased and the locations of easements needed has been finalized. Total land costs are now estimated to be about $1.5 million.

7. The 2004 study included a 47% allowance for engineering, legal, administration, and contingencies (ELAC). The 2009 study reduced the allowance for ELAC to 37% because many of the details since the 2004 conceptual study had been better defined. For the October 2012 update, the allowance for ELAC was reduced to 25% because continued planning and preliminary engineering further addressed details from the earlier concepts.
    a. The detailed design (plans and specifications) and permitting have been completed.
    b. The transmission main route has been finalized. Meetings with road agencies have established requirements for construction and restoration within road rights-of-way. Environmental permitting is in process. The primary remaining unknown is pipe sizing, which is largely dependent on Flint's participation.

    It is our experience that the 25% ELAC allowance is appropriate for a project of this magnitude at this stage in the planning / design stage. The 43% ELAC allowance recommended by TYJT is excessive for a project in the design phase.

8. Flint's WTP as a backup to the KWA will be less difficult to provide for than the current arrangement as a backup to DWSD. We believe there is potential for challenges with chemistry and treatment for the proposed DWSD blending options, too.

9. It doesn't seem that oversizing the KWA capacity is a good solution for the city's water loss problems, if that is what is being suggested.

10. Yes, it would be nice if the KWA system could be constructed to firmly determine its cost and time to complete before making a decision about water supply alternatives. However, a decision is needed regarding Flint's participation so that the sizing and design can be completed, before it can be built.

Project Costs - TYJT Slides 26 through 30

	KWA	TYJT
Intake and Crib		
Construction	$22,076,850	$22,076,850
ELAC	$5,519,213	$5,519,213

Notes:

Engineering Fees include all planning, soils investigation, design, construction inspection & testing, and construction management costs

Engineering Fees % is based on final construction cost

Engineering and Contengency % is based on engineering fees + amount final construction cost exceeds estimate

Final Construction Cost % is based on difference between final construction cost and engineer's estimate

NEES Project Contractor went out of business during project - increasing cost to finish project

Projects constructed within last ten years

EM SUBMISSION NO.: 2013EM041

PRESENTED: 3-28-13

ADOPTED: 3-29-13

BY THE EMERGENCY MANAGER:

RESOLUTION TO PURCHASE CAPACITY FROM KAREGNONDI WATER AUTHORITY

The Karegnondi Water Authority (KWA) is a governmental consortium of cities and counties in southeastern Michigan that was created to build a water pipeline that will provide water from Lake Huron to interested communities in Sanilac, Lapeer, and Genesee counties. The incorporating bodies that created the KWA are Sanilac County, Lapeer County, Genesee County, the City of Flint, and the City of Lapeer.

The City of Flint is currently in a year to year contract with the City of Detroit for the purchase of water. A study was conducted that projected that staying with Detroit will cost the region $2.1 billion over the next 25 years. In contrast, if the region builds its own pipeline, the projected costs are $1.9 billion over the same period. After the initial 25 year period, the projected costs would be less then 25% of the projected water costs from Detroit.

In order to build the pipeline, the KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. The KWA is allowed to withdraw 85 million gallons of water per day. Capacity is available to members in increments of 1 million gallons per day known as units. For each unit of capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300.00 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $355.300.00 per unit per year until such time that the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract.

The purchase of capacity along with the payment of other costs necessary to operate the pipeline gives the member a right to water for sale to its customers. The buyer has a right to resell capacity and water rights. Each party entering into a capacity contract shall also be entitled to appoint additional board members equal to the party's percentage share of the total capacity under contract.

It is in the long term best interests of the City of Flint to enter into a contract with the KWA to purchase up to eighteen (18) units of capacity.

IT IS RESOLVED that City officials are authorized to enter into a contract with KWA to purchase up to eighteen (18) units of capacity.

IT IS FURTHER RESOLVED that the City Administrator is authorized to provide KWA information needed to administer the contract and, with approval of the Chief Legal Officer, to make minor (non-material) modifications to the contract.

> Andy - here is the information you requested. Let me know if you need more information. As we move into DWSD 2.0 without federal court supervision, I can hear the chanting "free at last…free at last" .Seriously this should make it easier to work things out with Flint and DWSD 2.0 if they want to work it out or get told to do it. March 28, 2013

Andy Dillon, State Treasurer
Michigan Department of Treasury
Lansing, Michigan 48922

Dear Treasurer Dillon,

We understand that you are tasked with evaluating the merit for the City of Flint to cede from participation in the DWSD water system. For the following reasons, we represent to you that Flint's continuance in the present system is not only what is best for the City of Flint and Genesee County, but for the entire DWSD customer base.

Background

Water is provided by DWSD to the City of Flint via a 72" water main that runs west from a booster pumping station at Imlay City. Water purchased by Flint is then sold to its customers in the City of Flint and to Genesee County. The City of Flint and Genesee County are evaluating the construction of a new raw water supply system as members of the Karegondi Water Authority (KWA). The decision point is whether the City of Flint is best served by KWA or DWSD. Genesee County is not bound by Flint's decision. For this discussion, however, the emphasis is on Flint which encompasses its customer Genesee County.

The items presented below are based on a brief staff analysis of water quality, system capacity, capital, and financial considerations of the loss of Flint as a DWSD customer.

Water Quality

If the 72" water main is idled, there will be water quality issues for remaining customers on that line.

- ✓ The 72" main to feed Lapeer, Mayfield and Imlay City will need to be modified based on their comparatively low consumption at 12% of the flow. That pipeline will be too large to support the reduced demand which presents water quality issues.
- ✓ System users along the water transmission line in Lapeer, Mayfield, and Imlay City may experience water quality problems due to reduced disinfection levels associated with stagnant water. Solutions include abandoning the 72" main and replacing it with a smaller diameter pipe or adding facilities to re-chlorinate and disinfect the water a second time. The latter option is problematic because re-chlorination results in higher levels of disinfection byproducts.
- ✓ The Lake Huron Plant ("Plant") will require modifications to address water quality issues for Lapeer, Mayfield, and Imlay City. That cost is unknown.
- ✓ The Imlay Booster Station ("Station") will also need modification to feed Lapeer, Mayfield, and Imlay City. An estimated cost is $1 million.

- ✓ The true water quality impact would need to be confirmed through a study or the master planning effort. These concerns and alternatives are based on a brief analysis.

Excess Capacity of a Public Utility

- ✓ If DWSD is not supplying Flint with water, then there will be three high capacity pumps at the Station which will be significantly underutilized.
- ✓ DWSD currently has treatment capacity of 1.7 BGD, which is easily expandable to close to 2.0 BGD with infrastructure already in place at the Plant. Meanwhile current max day use of the DWSD System is only about 1 BGD.
- ✓ Although more than one DWSD facility is able to provide water to Flint, the reduction in use as represented at the nearest water treatment plant would result in excess capacity of up to 70% at the Plant.
- ✓ The water line servicing Flint is approximately 25 miles long (extending from Imlay City to Flint). That line would have no use if Flint joins KWA.

Impairment of Ratepayer Funded Assets

- ✓ Twenty-five miles of water line would likely be abandoned.
- ✓ Three pumps at the Station would also be idled.
- ✓ The net book value of the water line is at least $5M.
- ✓ In addition, improvements were completed at the Station in 2012 which serves Flint and other customers. The construction cost was $44 million.
- ✓ DWSD has in good faith preserved the terms and conditions of the 1965 service agreement with Flint which expired in 2000. Beginning in the 2000s DWSD and its wholesale water customers collaborated on a new model contract. Since that time, DWSD and 73 of its wholesale water customers have entered into new model contracts. The model contract provides for DWSD to recoup the costs of customer specific constructed facilities in the event that the contract is terminated.

Financial Implications to Other DWSD Ratepayers

The estimated immediate impact of the loss of Flint is an increase in rates to address a net revenue shortfall of approximately $22 million, or 6 percent of total DWSD water revenue. The long-term impact would require further analysis to evaluate the capital investment and increases in cost to address the operational concerns noted earlier. The immediate impact estimate is based on the FY 2013-14 DWSD financial plan as explained below.

- ✓ Flint volume (including Genesee County) represents approximately 7.4% of the suburban wholesale water sales, and 5.9% of the total water sales (including Detroit retail accounts) based on approximately 1.2 million Mcf of water sales.
- ✓ The allocated revenue requirement totals $24.23 million, which is approximately 8.3% of the suburban wholesale revenue requirement, and 6.6% of the total revenue requirement (including Detroit retail).

- ✓ At most, variable cost savings of not providing service to Flint is 7 to 10 percent, or roughly $2 million.
- ✓ The City of Flint's and Genesee County's revenue split is approximately equal. Loss of Genesee customers to KWA while maintaining the City of Flint as a customer would reduce the rate and dollar amounts above by half.
- ✓ DWSD ratepayers will incur the cost of operational changes at the Plant and the Station to address the water quality issues noted above, although charges to Flint during the KWA construction period would be evaluated.
- ✓ These amounts exclude the new capital investment for transmission piping for customers in the areas served by the Station and potentially at the Plant. Additional costs would be incurred to resize the water main to assure compliance with water quality standards.

Financial Risk

The ability to manage the financial risk for the City of Flint is especially precarious given its financial condition. As recently as yesterday, the frailty of the City's fiscal capacity is described by the present emergency financial manager in the Bloomberg News. The bottom line is that KWA's optimistic project with a cost of $272M ($82M attributable to Flint KWA's proposal) poses an undue financial risk to the public given that a system with reliable, excess capacity is readily available through DWSD. That risk is even greater based on the Tucker, Young, Jackson, Tull report that the KWA costs are underestimated by $100 million.

DWSD is undergoing monumental efforts to confront long-term operational and capital costs. The recent water rate adjustment was the lowest in decades, staff at all levels is actively involved in an organizational optimization process facilitated by EMA, there is an increased emphasis in long-term financial planning, and the transparency of these efforts is evident through more than a dozen customer-centric committees. Proactively addressing our borrowing costs and financial outlook is paramount to our mission. We understand the challenges that confront a public utility.

The bottom line is that Flint's financial flexibility will be impaired for generations by abandoning the DWSD system to participate in KWA. Duplicating the available capacity will expose them to a very large fixed cost obligation. As water utilities continue to experience reduced demand, the fixed costs component for capital, operating, and debt decrease the cost sharing base. For this reason, DWSD provides its customers the ability to adjust demand to control their costs.

Going Forward

DWSD is committed to the viability of Flint's water needs. Going forward there may be ways that DWSD can provide technical assistance and collaboration to the City of Flint. This includes methodologies to address its high water loss ratio, shut-off program, and capital planning needs. DWSD has fostered a strong customer community through its outreach program. We encourage Flint to become engaged with these resources. Finally, DWSD has demonstrated an earnest interest by offering service options specifically tailored for Flint's needs through a flexible contract approach. We look forward to reaching a long-term, viable solution to provide Flint a safe, reliable, cost-effective water system.

Sincerely,

Nicolette N. Bateson

Subject: Flint Water System Update

After speaking with Andy, Dan, Dennis and John, we have a plan for the next steps in Flint's request to participate in the KWA with Genesee County. Here is what we can confirm publicly, although unless it's a permitting question, we should have Treasury (Terry or I) answer any inquiries.

Ed Kurtz will submit a resolution to join the Karegnondi Water Authority (KWA) to the Treasurer, likely today. Once I receive word that we have officially received, we can confirm that we have it and the Treasurer will thoroughly review the resolution and perform due diligence before making a decision. Under PA 436, the State Treasurer must approve contracts over $50,000 that were not competitively bid.

No date has been set for the Treasurer to complete his review, but, he is fully aware of the tight timelines necessary to get approvals for the upcoming construction season, and will conduct his review accordingly.

That is all we can confirm publicly through next week. Just so you are aware, **and not for public consumption**, a call was placed to DWSD to let them know that Ed Kurtz was submitting his request and that if they have a final best offer that they should submit it very soon. This may prompt them to go to the media, or not, but be prepared if you get a call from that angle.

We need to develop some talking points for the following week, when Andy makes his determination. I will try to put together a draft by the end of the day and send it around for review. If anyone has anything they would like me to add, feel free to send it my way.

Let me know if you have any questions.

-Caleb

March 29, 2013

RECEIVED
MAR 29 2013
OFFICE OF THE STATE TREASURER

Andy Dillon, Treasurer
Michigan Department of Treasury
Lansing, MI 48922

Dear Treasurer Dillon:

As per Section 12 (3) "Except as otherwise provided in this subsection, any contract involving a cumulative value of $50,000.00 or more is subject to competitive bidding by an emergency manager. However, if a potential contract involves a cumulative value of $50,000.00 or more, the emergency manager may submit the potential contract to the state treasurer for review and the state treasurer may authorize that the potential contract is not subject to competitive bidding".

KWA needs commitment from its members regarding the capacity that each member will purchase in the pipeline. Capacity is available to members in increments of 1 million gallons per day know as units. For each unit of a capacity that a member purchases, the buyer shall pay to the KWA a one time fee of $32,300.00. Additionally, the buyer shall pay to the KWA not less then $32,300 per unit per year until such time as water is made available to the buyer. After water is made available, the buyer shall pay to the KWA an estimated amount not to exceed $335,300.00 per unit per year until such time as the bonds are paid in full. If it is determined that the costs per unit will exceed $355,300.00 the buyer has a right to cancel the contract".

Therefore, the Emergency Manager (EM) is asking Treasury to authorize the EM to adopt a resolution to and enter into a contract with KWA for up to 18 MDGS based on the above terms.

If you need additional information, please contact me.

Sincerely,

Edward J. Kurtz
Emergency Manager

Subject: Flint Water TPs

Here is the start of some topline messages for Flint ... I don't think that we need to get too deep into the specifics on the deal, we can leave that to Ed and others to discuss. Please let me know of any suggestions and additions that you have. I plan to also put together some background information that we can have on hand when discussing the topic. As I mentioned before, it likely won't be until the week of Apr 8th that we discuss this publicly.

- This is a decision made by the City of Flint and is a local decision that affects their local water supply.
- Flint Emergency Manager Ed Kurtz has heavily involved the city's elected officials throughout the decision-making process and all agree that this is best for the citizens and businesses in Flint.
- This will save Flint at least $100 million over the next 25 years, and possibly as much as $300 million.
- The Departments of Treasury and Environmental Quality have approved the financial and environmental soundness of KWA's plan.
- Flint accounts for only 2% of DWSD's capacity.

Thanks,
Caleb

We grilled them on that quite a bit. There is a maximum guaranteed price on key construction items and the path allegedly presents limited risk- rural, thru areas w no gas or water lines, existing easements etc. I was the skeptic but view of my staff and deq was universal in favor of kwa. I was won over as well. I can't make a legitimate case that financially this is worse for Flint unless today's threat from Shank (DWSD will bill Flint for past capex) is real. We are sorting thru that.

I see lots of political downside as well. Community is invested in this.

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
MICHAEL K. BROWN

July 12, 2013

Andy Dillon, State Treasurer and Chair
Michigan Department of Treasury
Bureau of Local Government Services
41h Floor Treasury Building
430 West Allegan Street
Lansing, MI 48922

Dear Mr. Dillon:

I am attaching for your consideration the quarterly report of the Emergency Manager of the City of Flint as required by Public Act 436 of 2013. It specifies in Section 9 (5) that "the emergency manager shall submit quarterly reports to the state treasurer with respect to the financial condition of the local government in receivership, with a copy to ... each state senator and state representative who represents that local government."

This quarterly report covers the period from April 1, 2013 through June 30, 2013 and addresses the financial condition of the City of Flint.

Respectfully submitted,

Michael K. Brown

Michael K. Brown
Emergency Manager

Ed Koryzno, Administrator, Office of Fiscal Responsibility

QUARTERLY REPORT TO THE STATE TREASURER REGARDING THE FINANCIAL CONDITION OF THE CITY OF FLINT

July 15, 2013

This quarterly report covers the period from April 1, 2013 through June 30, 2013 and addresses the financial condition of the City of Flint.

Public Act 436 of 2013 specifies in Section 9 (5) that "the emergency manager shall submit quarterly reports to the state treasurer with respect to the financial condition of the local government in receivership, with a copy to ... each state senator and state representative who represents that local government."

Status of the Financial Condition of Flint April 1, 2013 through June 30, 2013

The financial condition of the City of Flint has begun to improve, with revenues and expenses generally tracking with budget projections. While the FY12 results showed an increase in the accumulated deficit, that increase was anticipated, due to a decision early on to focus efforts on developing and implementing a budget for FY13 that would maintain essential services while moving the City toward long term financial solvency.

These efforts are proving successful. To-date, the FY13 budget was balanced without increasing the deficit; and revenues and expenses have been generally in line with expectations. The budget for FY14 has been adopted, with anticipated revenues and expenses balanced. In both FY13 and FY14, difficult decisions have been made with regards to staffing, fringe benefits, organizational structure, levels of service, and increases in fees and taxes.

Development of the FY14 budget was done in the context of developing budgetary projections through FY18, and recognizing the need to eliminate the City's accumulated deficit. With a desire to develop and maintain a multi-year perspective on city resources and operations, the development of the FY15 budget is now beginning. While FY15 will be extremely challenging due to continued property value declines and the anticipated loss of some major grants, the budget for FY15 will be realistically balanced.

Finally, as a result of analyzing projected revenues and expenses for the next five years, it has become clear that the City will continue to face a structural deficit in the area of $3 million to $5 million annually. More than anything, the City's stagnant revenue streams (no growth projected over the next 5 years) and its high amount of legacy costs ($37 million for FY14) have created this situation.

This structural deficit essentially precludes the City from stabilizing service levels even at minimal levels, and prevents it from addressing significant unmet capital needs (currently estimated at more than $300 million). Without structural change, this situation is not sustainable and the City will not achieve even a minimal level of financial solvency in the long term.

While bankruptcy has been mentioned as a possible solution to this, investigation of the alternative shows it to be expensive, slow, and with outcomes that are far from certain. However, investigation of an alternative which focuses on improving the City's revenue stream while continuing to reduce legacy costs shows promise. For example, an increase in the local income tax rate to the levels afforded other urban centers, coupled with significant additional changes in health care and pensions for active employees and retirees appears to have the potential to overcome the $3-$5 million structural deficit while providing a similar amount for stabilizing services and beginning to address capital needs.

FY12 Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the state in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits exist in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

In the FY 13 budget document, prepared in April 2012, the accumulated deficit for the FY12 General Fund was projected to be $18.1 million. However, this projection did not include the $1.54 million write down for the value of Genesee Towers. Adding the write down to the projected deficit of $18.1 million would have resulted in a total of $19.7 million.

In the FY12 CAFR, the amended budget projected a deficit of $16.3 million. However, this projection did not include the $1.54 million write down for Genesee Towers. It also included $739,406 in federal grant revenues and $602,192 in local revenues which did not materialize. Taking these items into consideration, the deficit projection would have been $19.2 million.

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $11.1 million. This was anticipated by the Emergency Manager shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services – especially public safety - for the balance of the year. Instead, focus was concentrated on developing a budget for FY13 which would move towards restoring Flint to long term financial solvency. It was projected that as a result of this decision, the deficit for FY12

could have been as much as $12 million, resulting in an accumulated deficit of $20 million.

The deficits identified in the City's Comprehensive Annual Financial Report for FY12, the year ended June 30, 2012, are follows:

General Fund -	$ 19,184,850
Water Supply Division -	$ 8,758,091
Economic Development Corporation	$ 119,439

Status of FY13 Budget – Preliminary Year End Projection

As of June 1, 2013, revenues and expenses are generally on target. The budget was amended in December to reflect some adjustments to revenues and expenses, including the proceeds of the voter approved millage for police and fire protection, projected revenues and expenses for the operation of the City lock-up; and the extension of a public safety grant from the Mott Foundation which provided continued funding for 11 law enforcement officers. Additional Budget amendments were adopted based on an unplanned special election, the proceeds from two auctions, utility refunds and other minor issues. Income tax revenues appear to be slightly less than projections, and over expenditures in Fire Department overtime have been addressed.

Absent any catastrophic event, such as an adverse decision on modifications of retiree health care, FY13 is projected to end with revenues slightly exceeding expenses.

Cash Flow as of June 30, 2013

Cash flow has improved with the receipt of revenues from the public safety millage, street light assessment, and waste collection fees. Pooled cash on hand is now in excess of $25 million, compared to $13 million as of December, 2011. However, the General Fund still relies heavily on borrowed cash as a result of its $19 million accumulated deficit. This cannot be resolved without borrowing, as stated in the Draft Deficit Elimination Plan submitted to Treasury in January 2013. As of this date, Treasury has not approved the Deficit Elimination Plan.

2011 Deficit Elimination Plan

In April 2012 the Emergency Manager filed a 2011 Deficit Elimination Plan focused on the accumulated deficit as of June 30, 2011. That plan indicated the City's intent to request authorization to borrow approximately $9 million in Fiscal Stabilization Bonds in order to address the accumulated General Fund deficit once a credible FY13 budget was in place. The 2011 Deficit Elimination Plan was approved by the State. On May 24, 2012 the City filed an application for borrowing with the State Administrative Board, and the Department of Treasury has issued a memorandum stating that the request satisfies the necessary statutory requirements. However, Treasury did not authorize the borrowing as proposed and approved in the 2011 Deficit Elimination Plan.

While this borrowing request addressed the accumulated FY11 deficit, there was an additional deficit at the end of FY12 of approximately $10 million. It is estimated at this time that an additional $10 million will need to be financed in order to address the FY12 deficit. However, the FY13 budget as adopted should create no additional General Fund deficit. There will be ongoing deficits in the water and sewer funds, but only as related to unfunded OPEB liabilities.

2012 Deficit Elimination Plan

FY12 ended with an accumulated $19.1 million deficit in the General Fund. The City has shared with Treasury a draft plan to eliminate the deficit over the next five years. The draft plan proposes a mixture of borrowing ($12 million) and dedicating future revenues ($7 million) over the next five years (FY14 to FY18).

The deficit of $8.8 million in the Water Fund is less than the unfunded OPEB liability. Since the City is not in the position to address OPEB liabilities throughout the City, there is little reason to increase water rates to eliminate this deficit. Additionally, the City's approach to containing its OPEB liabilities has been to restructure its active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million. To the extent these efforts are successful; the deficit in the Water Fund will be lessened

Terry:

Could I please get a copy of the report Ed Kurtz filed with your office, I believe dated June 28, that was his exit report before retiring and leaving as emergency manager in Flint?

I'd prefer to get this emailed back to me and as soon as possible.

Thanks,

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
EDWARD J. KURTZ

June 28, 2013

Mr. Andy Dillon, State Treasurer
Michigan Department of Treasury
4th Floor Treasury Building
430 West Allegan Street
Lansing, MI 48922

Dear Mr. Dillon:
Attached please find Update 3 for the City of Flint Financial and Operating Plan. This update will also serve as my closing memorandum as specified in the Emergency Manager's contract with the State of Michigan.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City and the on-going actions being taken to resolve the financial emergency. This update will be posted on the City's website: www.cityofflint.com .

Respectfully submitted,

Edward Kurtz
Emergency Manager

City of Flint Financial and Operating Plan – FY 2013 – Third Update
June 30, 2013

Introduction

This update to the Financial and Operating Plan for the City of Flint is submitted by the Emergency Manager for the City of Flint to Governor Rick Snyder, through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 11.

The City of Flint had previously submitted a Financial and Operating Plan under PA 72 and was not required under PA 436 to submit a new plan. However, as this is the end of the 2013 fiscal year and end of the service of Emergency Manager Kurtz, the City felt it was appropriate to prepare an update to the current plan. This is also the end of the first full fiscal year under the administration of the Emergency Manager. The FY 2014 Budget and Five Year Strategic Plan has been adopted and in October, 2013 a City Wide Master Plan will also be adopted.

This update will also serve as Emergency Manager Kurtz' closing memorandum as specified in the Emergency Manager's contract with the State of Michigan. On June 26, 2013 former EM Michael K. Brown has been reappointed by Governor Snyder as Emergency Manager for the City of Flint.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City and the on-going actions being taken to resolve the financial emergency. This update will be posted on the City's website: www.cityofflint.com .

Summary of the EM/EFM Appointment Sequence and Development of the Operating and Financial Plan

The Flint Financial Review Team determined in November 2011 that the City of Flint was in a financial emergency. See Attachment #1.

On December 1, 2011 Governor Rick Snyder appointed Michael K. Brown as Emergency Manager. EM Brown developed the Financial and Operating Plan utilizing the resources of a five person Advisory Committee as well as five additional advisory committees. EM Brown sought broad expertise to ensure public engagement and to maintain a sense of continuity with the Mayor and City Council. In fact, all nine City Council members and over fifty other citizens participated in the advisory committees.

EM Brown's original Financial and Operating Plan (45 Day Plan) was submitted to the State Treasurer on January 15, 2012; the first update to the Plan was submitted on June 1, 2012. On August 8, 2012, PA 4 was suspended and Edward J. Kurtz was appointed Emergency Financial Manager under PA 72. (Mr. Brown stepped aside as he was prohibited from serving as EFM due to his recent service as Interim Mayor for the City of Flint.)

EFM Kurtz established a new Advisory Committee in accordance with the requirements of PA 72.

Utilizing the Advisory Committee and the City of Flint management team, EFM Kurtz presented a second update to the Financial and Operating Plan and submitted this to the State Treasurer on February 8, 2013.

Operations of the City of Flint

Shortly after his appointment as EM, Michael Brown took steps to reorganize the city government operations including: elimination of departments, consolidation of departments, elimination of management level positions, adjustment of the compensation of elected and appointed officials, elimination of the Civil Service operation and the Office of Ombudsman.

Management appointments were made to ensure that the essential services necessary for the public's health, safety and welfare are provided and to continue conducting all aspects of the City of Flint's operation within the resources available. Necessary employment contracts were extended with the approval of the Treasury Department.

Department management reconfigurations were completed in anticipation of reductions in staffing levels as provided in the FY 13 Budget (See Attachment # 2 Organizational Chart FY 13). Subsequently, as part of the FY 14 Budget process a Strategic Plan was adopted and more changes in the organizational structure occurred. The primary change was the inclusion of a new Planning and Development Department (See Attachment #3 Organizational Chart FY 14).

When PA 436 became effective in March 2013 the City Council members' and Mayor's compensation was eliminated. EM Kurtz partially restored compensation for Mayor and Council through Orders 1 and 2. These orders also defined specific responsibilities and requirements. For example, the City Council members must complete Level One of the Michigan Municipal League (MML) core course for municipal government and must receive the MML education award with in one year.

All Orders and Directives issued by the Emergency Financial Manager (under PA 72) and Orders issued by the Emergency Manager (under PA 436) are listed in Attachment #4: Orders and Directives of the EFM and EM.

Financial Status

The financial condition of the City of Flint has begun to improve, with revenues and expenses generally tracking with budget projections. While the FY12 results showed an increase in the accumulated deficit, that increase was anticipated, due to a decision early on to focus efforts on developing and implementing a budget for FY13 that would maintain essential services while moving the City toward long term

financial solvency.

These efforts are proving successful. To-date, the FY13 budget was balanced without increasing the deficit; and revenues and expenses have been generally in line with expectations. The budget for FY14 has been adopted, with anticipated revenues and expenses balanced. In both FY13 and FY14, difficult decisions have been made with regards to staffing, fringe benefits, organizational structure, levels of service, and increases in fees and taxes.

Development of the FY14 budget was done in the context of developing budgetary projections through FY18, and recognizing the need to eliminate the City's accumulated deficit. With a desire to develop and maintain a multi-year perspective on city resources and operations, the development of the FY15 budget is now beginning. While FY15 will be extremely challenging due to continued property value declines and the anticipated loss of some major grants, the budget for FY15 will be realistically balanced.

Finally, as a result of analyzing projected revenues and expenses for the next five years, it has become clear that the City will continue to face a structural deficit in the area of $3 million to $5 million annually. More than anything, the City's stagnant revenue streams (no growth projected over the next 5 years) and its high amount of legacy costs ($37 million for FY14) have created this situation.

This structural deficit essentially precludes the City from stabilizing service levels even at minimal levels, and prevents it from addressing significant unmet capital needs (currently estimated at more than $300 million). Without structural change, this situation is not sustainable and the City will not achieve even a minimal level of financial solvency in the long term.

While bankruptcy has been mentioned as a possible solution to this, investigation of the alternative shows it to be expensive, slow, and with outcomes that are far from certain. However, investigation of an alternative which focuses on improving the City's revenue stream while continuing to reduce legacy costs shows promise. For example, an increase in the local income tax rate to the levels afforded other urban centers, coupled with significant additional changes in health care and pensions for active employees and retirees appears to have the potential to overcome the $3-$5 million structural deficit while providing a similar amount for stabilizing services and beginning to address capital needs.

Cash Flow as of June 30, 2013

Cash flow has improved with the receipt of revenues from the public safety millage, street light assessment, and waste collection fees. Pooled cash on hand is now in excess of $25 million, compared to $13 million as of December, 2011. However, the General Fund still relies heavily on borrowed cash as a result of its $19 million accumulated deficit. This cannot be resolved without borrowing, as stated in the Draft Deficit Elimination Plan submitted to Treasury in January 2013. As of this date, Treasury has not approved the Deficit Elimination Plan.

FY13 Budget – Preliminary Year End Projection

As of June 1, 2013, revenues and expenses are generally on target. The budget was amended in December to reflect some adjustments to revenues and expenses, including the proceeds of the voter approved millage for police and fire protection, projected revenues and expenses for the operation of the City lock-up; and the extension of a public safety grant from the Mott Foundation which provided continued funding for 11 law enforcement officers. Additional Budget amendments were adopted based on an unplanned special election, the proceeds from two auctions, utility refunds and other minor issues. Income tax revenues appear to be slightly less than projections, and over expenditures in Fire Department overtime have been addressed.

Absent any catastrophic event, such as an adverse decision on modifications of retiree health care, FY13 is projected to end with revenues slightly exceeding expenses.

FY13 Budget Decisions

The FY 13 budget was balanced realistically, and encompassed significant revenue increases and expenditure reductions. The FY13 budget process started with a projected gap of $25 million between projected revenues and projected expenses. The result was a total budget of $192 million, of which $82 million is sewer and water; $58 million is General Fund and $30 million is Federal CDBG.

The budget encompassed expenditure reductions which included the elimination of nearly 150 positions (20% of the workforce); employee concessions including a restructuring of health and pension benefits and employee costs; and various organizational changes.

The budget also recognized the implementation of new health care plans and pensions benefits for active employees, as well changes in healthcare plans for retirees. These changes reduced the City's OPEB liability from nearly $900 million to less than $400 million.

The change in retiree health care is the subject of litigation in Federal District Court, where a temporary restraining order has been issued and is being appealed. Should the City be precluded from implementing these changes in health care for retirees, there will be a projected (unbudgeted) increase in expenses of $1.7 million in FY13 and more than that in FY14 and beyond, this will be devastating to efforts to return Flint to financial solvency. On June 25, 2013, the court denied the City's request to stay the order and in fact, applied the injunctive order to all retirees as a class (without actually certifying a class). The City's legal counsel has recommended the City immediately comply with the court's order. The City has authorized legal counsel to immediately apply for relief in the 6th Circuit Court.

For future employees, city retiree health care will no longer be an option, and the traditional defined benefit pension plan for non-police and fire employees will be replaced with a hybrid pension plan. There are also numerous changes which increase management flexibility and reduce other employee costs. Note: The City of Flint basically is operating a Medicare system for retirees from the time they retire (as early as

their mid-forties to early fifties) at the same cost as regular employees ($5,000 to $17,000) which is unsustainable.

The FY13 budget also implemented new revenues in order to provide the level of revenues still required – in spite of expense reductions – to continue the marginal level of city funded public safety personnel and basic city services. These revenues include numerous fee increases; a $143 annual fee for waste collection (replacing a dedicated 3 mill tax levy); a $62 special assessment fee for operation, maintenance, and improvement of street lights (in the past this was a $2.85 million general fund expense); and an overall 25% increase in water and sewer rates (12.5% water; 45% sewer). Unfortunately, the reliance on fees and assessments will create hardship for many of the City's residents. However, the choices for increasing revenues at this time were limited. For those homeowners who qualify for the property tax exemption, the City recently will waive the street light assessment ($62) and the ready to serve charge on the water bill ($52 approximately).

In November 2012, a 6 mill Police and Fire Protection Millage was approved by Flint voters. The first year of this millage is expected to generate $5.3 million. The Emergency Manager also issued a resolution (2012EFM101) on October 17, 2012 as a charter revision requiring that the new millage revenue would be in addition to the 55.5% of unrestricted General Fund dedicated to Police and Fire departments. The percent dedicated to police and fire will increase to 60% in Fiscal 14.

Though the FY13 budget was been implemented as planned, the City still faces several legal challenges. While the challenges may not be sustained in the long term, any impediments to implementing the budget will have severe financial impacts.

For example, legal challenges which prohibit the City from implementing revenue increases or expenditure decreases will require immediate actions to further reduce spending – including public safety – and may impact the City's ability to function at an adequate level, particularly in light of the marginal cash flow.

Potential challenges the City may face from budgetary perspective include ones associated with the numerous rate increases incorporated into the budget, changes in retiree health care, and the unilateral implementation of changes to three collective bargaining agreements. It should be noted that through the Emergency Manager the City of Flint was able to reach tentative agreements with three of the six bargaining units.

To this point, the City was sued over the implementation of increased water and sewer rates, by the President of the City Council et al. This is a prime example of litigation that could impede the COF's ability to maintain fiscal solvency. With regard to this lawsuit, the City filed a motion to dismiss and in late June 2013 the court dismissed this suit.

Two additional law suits were filed: in late May 2013 AFSCME Local 1600 is seeking to repeal the contract imposed by the EM in April of 2012, and URGE (a retiree organization) is seeking to negate the transfer of the pension plan from FERS to MERS.

FY 12 Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the state in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits exist in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

In the FY 13 budget document, prepared in April 2012, the accumulated deficit for the FY12 General Fund was projected to be $18.1 million. However, this projection did not include the $1.54 million write down for the value of Genesee Towers. Adding the write down to the projected deficit of $18.1 million would have resulted in a total of $19.7 million.

In the FY12 CAFR, the amended budget projected a deficit of $16.3 million. However, this projection did not include the $1.54 million write down for Genesee Towers. It also included $739,406 in federal grant revenues and $602,192 in local revenues which did not materialize. Taking these items into consideration, the deficit projection would have been $19.2 million.

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $11.1 million. This was anticipated by the Emergency Manager shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services – especially public safety - for the balance of the year. Instead, focus was concentrated on developing a budget for FY13 which would move towards restoring Flint to long term financial solvency. It was projected that as a result of this decision, the deficit for FY12 could have been as much as $12 million, resulting in an accumulated deficit of $20 million.

The deficits identified in the City's Comprehensive Annual Financial Report for FY12, the year ended June 30, 2012, are follows:

General Fund -	$ 19,184,850
Water Supply Division -	$ 8,758,091
Economic Development Corporation	$ 119,439

FY 11 Deficit Financing

In April 2012 the Emergency Manager filed a 2011 Deficit Elimination Plan focused on the accumulated deficit as of June 30, 2011. That plan indicated the City's intent to request authorization to borrow approximately $9 million in Fiscal Stabilization Bonds in order to address the accumulated General Fund deficit once a credible FY13 budget was in place. The 2011 Deficit Elimination Plan was approved by the State. On May 24, 2012 the City filed an application for borrowing with the State Administrative Board, and the Department of Treasury has issued a memorandum stating that the request satisfies the

necessary statutory requirements. However, Treasury did not authorize the borrowing as proposed and approved in the 2011 Deficit Elimination Plan.

While this borrowing request addressed the accumulated FY11 deficit, there was an additional deficit at the end of FY12 of approximately $10 million. It is estimated at this time that an additional $10 million will need to be financed in order to address the FY12 deficit. However, the FY13 budget as adopted should create no additional General Fund deficit. There will be ongoing deficits in the water and sewer funds, but only as related to unfunded OPEB liabilities.

Deficit Financing 2012

FY12 ended with an accumulated $19.1 million deficit in the General Fund. The City has shared with Treasury a draft plan to eliminate the deficit over the next five years. The draft plan proposes a mixture of borrowing ($12 million) and dedicating future revenues ($7 million) over the next five years (FY14 to FY18).

The deficit of $8.8 million in the Water Fund is less than the unfunded OPEB liability. Since the City is not in the position to address OPEB liabilities throughout the City, there is little reason to increase water rates to eliminate this deficit. Additionally, the City's approach to containing its OPEB liabilities has been to restructure its active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million. To the extent these efforts are successful; the deficit in the Water Fund will be lessened.

Treasury has not responded to this draft plan.

Revenue Enhancement Activity

As noted in "FY13 Budget Decisions" section, several new revenue actions were implemented for the FY13 Budget: waste collection 3 mils eliminated and fee established, Street Lighting Assessment established, new 6 mil Police and Fire Protection approved by voters, also fees for licenses and permits were adjusted.

The EFM via Order No. 8 established the Poverty Exemption to the Street Lighting Assessment. Individuals who qualify for relief from property taxes may apply for an exemption from the street lighting assessment as well.

Also, through EFM Order No. 11, water service procedures were modified. The City's procedures and rate structure for the provision of water service has a substantial financial impact on the City. The Emergency Financial Manager has determined that it is necessary to make a number of changes to these procedures.

The following new procedures were adopted regarding water service:

1. Property owners who apply for and are granted the annual poverty tax exemption will also be exempted from the monthly ready to serve charge for

water service. Exemptions will be for the period of July 1 to June 30. Exemptions from the March Board of Review will begin July 1. Exemptions from the July and December Board of Review will be retroactive to July 1.

2. For individuals who have a "Decision Notice" from the Michigan Department of Human Services (DHS), wherein DHS has agreed that it will pay the water deposit, the City will accept the DHS maximum deposit payment (currently $200). However, the individual will remain responsible for the affidavit fee and the water turn-on fee.

3. For customers where the water has been shut off and a fee is required to turn the water back on, the fee will be reduced to $100 if the customer agrees to a payment plan for all unpaid water and sewer charges.

4. Same day turn on service will be available ONLY if the customer pays the $175 fee AND pays all unpaid water and sewer charges billed in full.

5. The Infrastructure Division will develop an implementation and business plan for aggressively pursuing alleged instances of water theft. The plan will also address increasing the capacity for quickly shutting off water and reducing the time between the delinquency and the actual shut off.

The Treasury Department has also created the Competitive Grant Assistance Program (C-GAP) as a means of encouraging shared services implementation. The City of Flint participated in five C-GAP applications which included Human Resource Hiring and Management system sharing with the Genesee Intermediate School District and Genesee County; a fiber optic cable expansion also with Genesee Intermediate School District and Genesee County; Criminal Justice system and Courts Electronic Workflow Initiative with Genesee County, City of Flushing and plans for expansion throughout Genesee County; a Genesee County Regional Purchasing Collaborative with Genesee Intermediate School District and Genesee County; and a proposal to expand and strengthen the 9-1-1 communication tower system with the City and the Genesee County 9-1-1 Consortium. The City has been awarded a $1.8 million grant for the 9-1-1 communications tower system, an important step necessary to potentially merge with the County 9-1-1 Consortium system.

FY14 Budget and Strategic Plan

On June 7, 2013 EM Kurtz signed Order No.4 adopting the fiscal Year 2014 budget. This is now a second year for which a balanced budget was adopted. Conservative, realistic revenues and expenses were included. This budget does include the reduction of 27 employees; however no public safety employees were reduced. See Attachment #5 FY 14 Budget Narrative pgs. 32 - 44 of Attachment #6 Setting a Sustainable Course for the City of Flint.

Prior to the detailed development of the FY14 Budget, all departments and divisions participated in creating a Strategic Plan for 2014 – 2018. The Vision, Mission, Overall

Goals have been specified. Each department and division identified their specific functions/goals and key objectives.

The content of the strategic plan will be the basis for planning future budgets, evaluating department/division management, and deciding whether and when to pursue grants.

The Strategic Plan includes a section entitled "Five Year Financial Projections and Challenges City of Flint, FY14-FY18". In summary:

> Years 2—5 show the continuing challenge of the City's structural deficit, with property tax revenues continuing to fall through FY15, and then stabilizing but with no growth until FY18. At the same time however, legacy and compensation costs are projected to increase by 5% per year, and major grant sources will disappear. The City will be faced with a significant challenge of attempting to choose between reductions in public safety and other reductions; however, finding other reductions may not be possible, given the minimal level of service provided. Again, without additional new significant levels of revenue, there is little ability to improve services or address continually increasing capital improvement needs.

Within the next few months the City plans to prepare the financially challenging FY15 Budget.

Key Actions Taken To-Date

The city continues to review all departments and services for potential merger, consolidation, contracted service, shared services with other governmental entities, privatization or elimination. As a result of these reviews determine if these functions should be subsidized with general property tax dollars, what will be paid by the users and what services can be eliminated.

Finance/Administration/IT

Finance Department

The Finance Department is proceeding with the following projects:

- implementation of a Procurement Card system and associated changes to the City's Purchasing Policies,
- completion of the update of the pension and OPEB liabilities,
- continued aggressive monitoring of revenue and expense activities, with particular emphasis on revenue collections, position counts and overtime expenditures,
- planning and implementation of employee development programs focusing on financial management, supervision and labor relations, and leadership development.
- Reorganization of city accounting functions based on the analysis and recommendations of an organizational study recently completed by Plante Moran

Grant Management
Finance reviewed the process for all grants to the City of Flint for appropriate use of funds, potential for continued funding, and timely reapplication. A new grant pre-submission approval system has been operational since March 2013 following EM Order No. 10.

Economic Vitality Incentive Program (EVIP) Requirements
The City of Flint has met all reporting requirement dates for Economic Vitality Incentive Program (EVIP) in order to qualify for all disbursements of State Shared Revenue. Each report is available on the City's website www.cityofflint.com through Munetrix Citizens Guide to Finances and Dashboard.

Transition of Flint Employee Retirement system (FERS) to Michigan Employees Retirement system (MERS)
The FERS to MERS transition nears completion. Retirees have been receiving their monthly checks from MERS since October 18 2012. The transfer of the administrative components will be complete by July 1, 2013. A lawsuit was filed in late May 2013 by URGE against the City seeking to force the City to negate the move of the pension funds to MERS,

Treasury Division
Income tax processing is being handled through a joint project with the Cities of Grand Rapids and Lansing. Beginning in FY14, income tax collections will be handled by Innovative Software, the current vendor for the City's income tax software. Also of note, the city is operating with a shared Treasurer between the City of Burton and Flint.

The City contracted with Plante Moran to conduct a study to evaluate the potential of shared services between the City and Genesee County treasury functions. This study has been funded by the Mott Foundation.

Collection rates are an on-going concern. This year, the city will be made whole via full payment from the County. In subsequent years those shortfalls must be repaid to the County. The City estimates that only 33 % of property taxes and assessments have been paid, water and sewer delinquencies have grown to 40 %.

In an effort to improve income tax collection the city purchased the 2010 State Tax role and has begun sending notices to 8800 individuals, both residents and non-residents, who have not filed City tax returns. The total estimated tax value from uncollected income tax for the 2010 tax year is between $300,000 & $400,000. The City also plans to pursue uncollected income tax from previous years.

Assessment Division
The Assessment Division has been operating with a part-time Level IV Assessor. A member of the Division is currently completing Level IV assessment certification.

Currently, the Assessor is projecting City of Flint property values to stabilize in FY15.

Human Resources Department
Continued reduction in personnel has strained the capability of departments to complete compliance and reporting work. Both short and long term vacancies create knowledge deficits which are becoming most difficult to overcome. This will be exacerbated as further staff reductions are required.

HR has joined the Genesee Intermediate School district in using APPLITRAC system for job postings and the initial hiring process.

City-wide management and supervisory training was re-established after an almost fifteen year absence.

Labor Agreements and Implementation
During the tenure of EM Michael Brown, Labor Counsel held meet and confer sessions with the City's six bargaining units. A target of 20% equivalent wage reductions was achieved. Tentative Agreements were reached with four of these bargaining units. As contract settlement was necessary prior to adopting the FY13 budget, the EM invoked the 19K provision in Public Act 4 from the State Treasurer for the bargaining units which had not achieved Tentative Agreements (EM Orders 18 and 26) and with Local 1799 which had approved a TA but had not ratified (EM Order 27).

EFM Edward Kurtz has held additional sessions with AFSCME, Flint Police Officers Association (FPOA) and the Firefighters Union. In January 2013 AFSCME and the City reached agreement for the privatizing of waste collection and demolition. FPOA has notified the City that they have filed a lawsuit to return to arbitration. FPOA is asking for a return to the status quo (prior to EM imposed contract). The Firefighters Union and the City are working on overtime containment. In late May, a lawsuit was filed by AFSCME Council 25 seeking to overturn the contract imposed by the EM is April of 2012.

A Model Contract is in development, beginning with the FPOA. The City's goal is to streamline and standardize the contracts. It is hoped that these models could be used throughout the State.

The City has recently contracted with a part-time Labor Relations Specialist; through his efforts dozens of past grievances have been settled and only a handful of grievances remain outstanding.

Retiree Health Insurance Revisions
The City's approach to containing its OPEB liabilities has been to restructure its active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million. As noted earlier, on June 25, 2013, the court denied the City's request to stay the order and in fact, applied the injunctive order to all retirees as a class (without actually certifying a class). The City's legal counsel has recommended the City immediately comply with the court's order. The City has authorized legal counsel to immediately apply for relief in the 6th Circuit Court.

Risk Management Office is reviewing various Employee/Retiree health care options including plan design, delivery systems, Medicare Advantage, Medicare Wrap Around, benefit carve-outs, etc. in an effort to control health care costs.

Retiree Prescription Drug Program Revision
City of Flint has suspended the planned implementation of a modified prescription drug program which required the issuance of a generic drug unless a name brand drug is determined to be medically necessary. This action resulted due to a lawsuit, Yurk et al. v. City of Flint, pending in Genesee County Circuit Court before Hon. Archie Hayman. Judge Hayman granted a temporary restraining order and has completed a hearing on plaintiffs' motion for preliminary injunction. However, the court took the motion under advisement and has not issued a decision.

Dependent Eligibility Audit
The Risk Management Office has completed the process of conducting a dependent eligibility audit. Three hundred eighty-one dependents were identified for removal from the City's health plans. This reduction is estimated to save $1.3 million in the first year, FY13.

Information Technology
Prior to the start of FY13 the Information Services Department eliminated all but two of the existing positions. Through reorganization, 6 of 9 employees were rehired under new job descriptions. The new structure allowed more flexibility and greater utilization of personnel. Several large scale projects are nearing completion including: installation of a back-up server for Public Safety and 911, installation of new switches which will allow for a more complete use of Public Safety's data collection and record keeping systems.

Other projects are on track, primarily the system upgrade of the BS&A ERP. Several legacy projects are nearing final milestones: installation of a new

visualization server cluster, installation of 300 new desktop terminals and a cost savings pump station automation project.

Fleet Division
The City has consolidated the management of the City's fleet under the Fleet Division. This division will oversee the specification, purchase, repair and maintenance and replacement schedule for all city vehicles and wheeled equipment. The Division recently participated in a successful auction of surplus equipment.

City Clerk
As part of the reorganization, the City has transferred the responsibility for Business Licensing to the newly formed Department of Planning and Development. The City recognizes that it is losing significant revenue from unlicensed businesses and this change is designed to insure that all businesses in the City of Flint are licensed and inspected.

Office of the City Attorney
The City Attorney is continuing with efforts to improve litigation management through claim evaluation, claim reporting, attorney training and trial preparation. The City Attorney continues to emphasize the "litigation team" approach to case handling, with weekly review of pending matters and discussion of how best to protect the City of Flint's legal interests.

With the help of interns from Michigan State University, all ordinances are being reviewed. Charter revisions which would increase flexibility for department reorganization and budget flexibility **are also being considered.**

Criminal Justice System Advisory Council (CJSAC)
Based on input from the State Police, Governor's Office and a Michigan State University Criminal Justice Study, it is clear that the Genesee County Criminal Justice System and the Flint Police Department could benefit from improved coordination and policy development.

In September 2012 the first meeting of the Criminal Justice System Advisory Council (CJSAC) was held. Eight workgroups were established. Through these work groups a number of cooperative projects, streamlined operations and new collaborations have been identified; these were reported at the second CJSAC meeting in January 2013. A Treasury Department C-GAP application was originated and submitted through this process.

68th District Court
The City currently funds the operation of the 68th District Court; in FY13 this amounts to $5.4 Million - which comprises 9.2% of the General Fund Budget. The percentage of General Fund expense allocated to District Court has increased about 1.2% as compared to five years ago. It is anticipated that this percentage will again increase .5% for FY14.

(This is a very rough estimate). This significant portion of the City's General Fund needs to be studied closely and recommendations developed to meet this required activity while containing and reducing costs. The EFM strongly encourages the State to continue the process of working to consolidate the 67th and 68th District Courts.

Infrastructure/ Development

Utilities Division

Karegnondi Water Authority (KWA)

The City Council, as well as EM Kurtz, has adopted resolutions to enter into a contract with KWA water authority to partner with Genesee County, City of Lapeer, Lapeer County and Sanilac County in the construction of a pipeline to deliver raw water to the City of Flint. This decision followed many months of analysis by the City of Flint, the Genesee County Drain Commissioner's office, the State Treasurer and ultimately, Governor Snyder. This conclusion to join KWA is momentous for the City and the entire region. The City looks forward to a safe, reliable water supply through which water costs can be stabilized for the KWA participants.

Detroit Water and Sewer Department has notified the City that it will terminate the contract with the City for the deliver of water in 12 months. The City is currently exploring its options for water service between May 2014 and the full operation of the KWA pipeline. High consideration is being given to utilizing the Flint River, and/or blending River and DWSD water. The City of Flint is also considering contracting with DWSD to be the back-up water source for the City.

There are many other points of negotiation regarding sections of the current 72" pipeline which are yet to be conducted between the City, the Genesee County Drain Commission and the DSWD.

Water Department

An evaluation is underway to determine what efforts can be employed to create an effective Preventive Maintenance plan which focuses on controlling water loss (leakage). This is expected to involve a combination of outsourcing, in-house work, and shared services with the County.

There are currently no water main leaks and the crews are now working on the small leaks such as curb boxes, etc. A plan is being reviewed to replace all water meters in the City. Currently $700,000 has been allocated in Fiscal 14 for that purpose.

Discussions have begun with the Genesee County Drain Commissioner on a wide range of shared services and partnerships for both water and sewer operations.

Sewage Treatment Division

The automation of one of the City's pump stations (which is currently staffed 24 hrs a day) has an expected completion date of July 2013. This will result in the elimination of overtime and a savings of over $500,000 annually.

The planned shutdown of the City's incinerator has begun with engineering plans for a new load-out facility and is expected to reach completion in approximately 8 months. The estimated savings is $400,000 annually.

U. S. Department of Environmental Quality S2 Grant

An S2 DEQ grant to study infrastructure condition for water pollution control was accepted. The study was defined to encompass the City's entire sanitary sewer system including the overall collection system, the capacity and condition of the system, potential upgrade recommendations to the lift stations and the pumping stations, and to make recommendations for necessary investments to maintain the system.

Storm Water Management Plan

A new storm water ordinance that shifts the cost allocation to the larger users is in process of being developed.

Swedish Biogas International (SBI)

In conjunction with the City of Flint sewage treatment plant shut-down of the sludge incinerator, Swedish Biogas International (SBI) proposes to accept sludge output and produce electricity. The city will agree to purchase the electricity at a reduced rate compared to purchase from Consumer's Energy. The SBI contract has completed the City's review process and is now awaiting SBI's Board of Directors' authorization.

Transportation Division

Solid Waste Management Division

In early February 2013, the Infrastructure Department signed a contract with Republic Services, a private waste collection company. The City of Flint will no longer collect or dispose of household waste. Through this new contract, residents of Flint now have access to curb-side recycling. It is expected that the fee for waste collection service will continue to be billed and collected by the City.

Outsourcing of Sanitation is now complete and the process of establishing city composting is underway with a permit application to DEQ submitted and a site plan of action being prepared for the EPA.

Street Maintenance and Engineering
Discussions have started with the County Road Commissioner on possible shared services.

Both road paving and engineering are seasonal activities and these are at ever decreasing levels. These are under review as areas to downsize or eliminate. Consideration is being given to developing service sharing arrangements or creating the ability to source on an as needed basis. Only crack sealing and pothole repair will be conducted this season. There will be no repaving of any City streets.

Facilities Management
A private company held an on-line auction in January 2013 to dispose of surplus equipment from a variety of departments in the City. This one day auction netted $130,000. A second auction was held in May 2013 which netted an additional $250,000. An auction at the impound lot was held in June 2013, netting over $30,000 for the City.

The Facilities manager is reviewing all city owned assets (both real property and capital equipment) to determine if disposal should be pursued.

All city owned facilities are under review for energy savings, revenue generation from tenants, or possible liquidation.

Parks and Recreation
The City has contracted with two vendors who have shown the capacity to mow all of the city parks (64) multiple times at a rate that fits the current millage. The City is also actively seeking neighborhood groups and organizations who will adopt one or more of the City's parks, traffic triangles or medians.

Master Planning
The City of Flint continues to make significant progress on the preparation of the first comprehensive Master Plan since 1960. After culminating the data gathering phase of the master planning process, the planning team was able to release a summary of the findings in an Existing Conditions Report. This report has already proven extremely beneficial, assisting several community stakeholders in applying for grants and helping inform decisions around critical issues such as blight and demolition. In fact, the completed Housing Conditions Inventory included in the report was critical in helping the Genesee County Land Bank develop its successful application for $3.7 million in funding for demolition through the Michigan Blight Elimination Grant Program. This data is also being used to develop an application for Michigan's Hardest Hit Program.

After the Existing Conditions Report was finished, planning staff began work on the visioning phase of the master planning process. Prior to holding a large Vision and Goals Workshop, staff along with the Planning Commission, Steering

Committee, and six citizen advisory groups held a series of smaller community workshops involving nearly 700 participants (over 20% were under 18) to learn about the City's challenges and possible solutions. This input along with the data from the Existing Conditions Report was utilized to develop a discussion guide for the four-hour Vision and Goals Workshop held on March 9, 2013. At the workshop, nearly 500 stakeholders engaged in small group dialog, which was captured on laptop computers in real time. A team of community residents reviewed this input and lifted common themes from the small table discussions for participants to vote on using key-pad polling in order to build consensus. From the results of the March 9th Workshop, staff and the Planning Commission worked together to draft a vision statement and guiding principles, which were widely distributed for further comment before adoption at the end of April. Also during this time, staff worked with the Planning Commission and community to identify the eight subarea plans to be included in the Master Plan.

In May, the City began work on the actual drafting of the Master Plan. In collaboration with the Planning Commission, Steering Committee, and six citizen advisory groups (over 160 members), the goals and objectives of the Master Plan have begun to take shape. Through the development of the Master Plan, the planning team also has come to realize how important close coordination with the Flint Community Schools is. Thus, we have met with school leadership to finalize a Memorandum of Understanding in order to formalize joint planning efforts between City and School System, particularly around community facilities. In addition to our work on drafting the plan, we have started to focus on training the future leaders who will help implement the Master Plan. As a result, planning staff arranged a Zoning and Planning Essentials Workshop for forty-five community participants in early May and on May 23rdorganized a tour of the City of Detroit and met with the Detroit Works Project to learn from their process.

More recently, the planning team has embarked on the development of a land use plan. Consequently, planning staff has organized the first land use workshops and worked with our consultants to develop an innovative 'Place Making' Toolkit comprised around eleven land use designations that will allow for new places like green neighborhoods and green production zones. This 'Place Making' Toolkit will encourage residents to redefine their neighborhoods and create a unique sense of place with distinctive characteristics, whether these areas are now dense with multi-family housing or less populated with single-family houses on large plots of land. The first Land Use Workshop was held on Saturday, June 22nd and involved over 160 residents in candid discussions about vacancy and realistic development patterns. Surprisingly, many residents favored pioneering land uses including a more radical mix of uses. The second workshop will be held on July 2nd and is expected to surpass the turnout of the first workshop. Thus far, the City continues to pursue an aggressive schedule for the Master Plan with anticipated approval by late Fall 2013.

A website, www.imagineflint.com, and a Facebook page, City of Flint Master Plan has been established to inform citizens about the planning process and to gather input.

Community and Economic Development
With the end of the Federal NSP program in sight, the City has begun evaluating the management needs of the department and what can be outsourced or become a shared service.

The Emergency Manager has challenged each department to complete the use of HUD, CDBG and/or other grant funds within the grant guideline spending period.

Collaborative economic development efforts are underway with the Flint & Genesee Chamber of Commerce to attract and retain businesses; and to receive and apply new tools such as the Next Michigan Development Corporation and Smart Zone designation. The City will continue to work with RACER Trust for brownfield development, including Buick City.

The City of Flint is challenged in its current financial condition to provide significant investment into job creation and Economic Development. However, the City has developed a unique and effective partnership with the Genesee Regional Chamber of Commerce (GRCC) which is the recognized economic development entity for Genesee County. The City receives specific community and economic development services from GRCC each year.

Blight Management Plan
The EM has determined that blight has become one of the primary issues facing the City of Flint. Blight is a continuum of problems from tall grass and weed control through abandoned, demolition ready property. The newly formed Department of Planning and Development is formulating a complete blight strategy.

The City's financial condition has resulted in the drastic reduction in the Building and Safety Inspections Division. All demolition work will now be the responsibility of the Genesee County Land Bank Authority. The City will also be hiring part-time Neighborhood Safety Officers, through a grant from the Mott Foundation, who will be assigned to issue citations for blight violations, including processing the impounding of abandoned vehicles, verifying current business licenses and identifying rental properties.

The Landbank in partnership with the City has recently received over $3.5 million from MSHDA for demolition of properties in three specific areas of the City. First, around Northwestern High School, second around Northern High School, and the third around the area of Diplomat Pharmacy and the International Academy of Flint.

The Landbank, again in partnership with the City of Flint is expected to receive Hardest Hit Federal Funds of $20 25 million for residential demolitions in Genesee County, primarily in the COF. This will be a significant milestone in the history of the City, affording it the opportunity to significantly improve the quality of life in the City's "tipping neighborhoods".

In May 2013 the City received a report from the Center for Community Progress entitled "City of Flint Vacant Property Maintenance Site Visit Report" which provided recommendations for the City and its partners to consider implementing. This, along with other reports including the City's developing Master Plan is leading to a defined "Blight Elimination Plan".

DCED currently has $400,000 in CDBG funding for mowing and trash removal. This is being supplemented with approximately $800,000 from the Landbank. Currently, the plan calls for mowing the vacant properties only one time this summer.

A Cities of Service grant for $25,000 was awarded to Flint this Spring for use for neighborhood clean-ups and tire collection. Twenty projects were funded and the tire collection resulted in 10,000 tires being removed from back yards, lots and parks.

A very positive development in the City has been the unsolicited efforts of private businesses and educational organizations planning large scale redevelopment projects, with the City and the Landbank, to improve areas surrounding their operations.

Golf Courses
All four of the city's golf courses were leased to private organizations. Two courses were operational summer 2012 and both have reopened for the summer of 2013.

Senior Centers
The Pierce Senior Center closed on April 30, 2012 as funding was no longer available. The City of Flint continued to explore its options with the two open Senior Centers: Brennen and Hasselbring. In June 2013 contracts were successfully negotiated with United Senior Network for the operation and sale of the Hasselbring Community Center, and with the Brennan Elm Park Senior Community Corporation for the operation of the Brennan Community Center. Planning is also underway for a third center in downtown in partnership with another vendor.

Smith Village Housing Development
The Smith Village housing project is funded primarily with HUD and NSP2 grants. Phase I, which includes 30 housing units, has been completed as scheduled. HUD has determined February 10, 2012 was the goal to expend 50%

of the allocation. The Smith Village housing project has met that development goal

On May 18, 2012, the City announced that Phase II of the Smith Village development will be undertaken by Ginosko Development Company and Rohde Construction Company. Ginosko's site plan was approved by the Flint Planning Commission on May 22, 2012.

Smith Village Phase II completed 14 homes by February 28, 2013. Nine homes built by the new developer were completed by March 30, 2013. Occupancy Permits have been received for homes in Phase I. Four of the completed homes have purchase agreements and fifteen mortgage closings are schedule to take place by June 30, 2013.

The contractor will complete three more homes in June 2013 which will bring the total completed to 42. As sale proceeds become available, up to an additional 5 units can be built.

U. S. Department of Housing and Urban Development Monitoring
After the February 2012 HUD monitoring of the HOME Program, The City of Flint received notice from HUD that it has capacity to run the HOME program.

In the City of Flint 2012 Single Audit, DCED had one finding related to the resolution of the OIG audit for 2010. In the 2011 Single Audit, under the previous administration, there were 8 findings.

In September 2012, HUD headquarters in Washington D.C. monitored the DCED ARRA Homeless Prevention and Rapid Rehousing Program and stated that the City of Flint established a comprehensive and well coordinated program for providing homelessness prevention assistance for its residents and that the City's HPRP Policies and Procedures Manual was well thought out.

In December 2012, HUD notified the City of Flint, in its Comprehensive Annual Performance and Evaluation Report (CAPER) that it met its timeliness ratio and expenditure requirement reaffirming their confidence in DCED's capacity to administer federal programs.

Real Estate Transactions
In August 2012 the City of Flint sold the Genesee Towers to Uptown Redevelopment Corporation for $1 and committed $880,000 CDBG dollars toward the over $4 million cost of demolition. Genesee Towers has been a liability for the City since December 2010 when the city assessed a one time millage to cover the $9.0 million judgment. The transaction has been finalized but demolition timeline is not completed.

A quit claim deed for Chevy-in-the-Hole site has been transacted between the EDC and the City of Flint. EPA money for clean up has been agreed upon.

Public Safety

A Police and Fire Protection Millage request for 6 mils for 5 years was placed on the November 2012 ballot and was approved by the electorate. This will begin the process of stabilizing both the Police and Fire Departments. The City hired eight additional police officers as a result. Millage dollars will be used to replace the expiring Mott foundation Community Policing Grant and part of the Federal SAFER firefighter grant.

A Public Safety Plan was introduced to the public on May 4, 2012. This plan addresses Police and Fire department organizational plan, operation of the lock-up, transition to 800 MHz communications system and the formation of the Criminal Justice System Advisory Council.

Efforts continue to restructure the Fire Department, 911 and emergency response operations to adjust to eliminated Federal and County revenue sources. Review options for shared services, station configurations, staffing levels, contract services and technology applications.

Police Department

In June 2012 the Police Department changed to a 12 hour shift operation within a four District Patrol plan. These changes, in combination with the expansion of alternative call response procedures (including the introduction of the on-line CopLogic reporting system); have resulted in the continuing reduction in response times to 9-1-1 calls.

In June 2012, the City received a 6 month grant renewal from the C. S. Mott Foundation for the Community Policing grant which has funded 10 officers and 1 sergeant. This grant was submitted in conjunction with the Michigan State University School of Criminal Justice Training and Technical Assistance team. The MSU team assists the City in implementing several phases of the Public Safety plan. In December 2012, the Mott Foundation extended this grant to the City for an additional 6 months which will provide funding through the end of the FY13 budget.

The City of Flint is continuing its existing collaborative efforts with regional partners. Examples: Flint Area Narcotics Unit, Safe Streets Task Force, and U.S. Attorney's Office Zero Tolerance gun violence reduction initiative, LifeLines (formerly known as CeaseFire), and other programs to help eliminate gang activity and prevent other violent acts.

The city continues to receive patrol assistance and detective assistance from Michigan State Police. Patrol assistance is a crime deterrent and increases traffic

safety compliance. The detective assistance has increased the capacity for investigations within the Flint Police Department.

Apply new technologies and information systems to improve police efficiencies and improve targeting and effectiveness including New World, CopLogic, and DDACTS.

Lock-up
The Public Safety Department recommended selection of the Genesee County Sheriff as the operator of the Flint lock-up. The lock-up opened the week of October 1, 2012.

In early 2013, use of the lock-up was made available to all Genesee County police agencies. The availability of the lock-up is credited with the clearance of over 1000 warrants per month in Genesee County. The State Legislature has approved funding for one more year of operation.

Fire Department
A protocol was finalized for the transition to the Genesee County Sheriff's Department to handle the paramedic calls in the City of Flint. This millage is now being managed only by Genesee County. Completion date was July 1, 2012.

The FEMA funded SAFER Grant which supports the wages and benefits of 39 firefighters was renewed on June 10, 2012 for two years. The new grant totaled $6.9 million. It is very rare that a city would be awarded a full funding request in back-to-back granting periods.

A Fire Chief was hired April 15, 2013 and he is currently in the process of restructuring the department.

9-1-1 Operation
The City completed change over to the 800 MHz communication system for the Police and Fire Departments before the December 31, 2012 required implementation date. The installation of a point to point microwave link with the Genesee County 9-1-1 Consortium tower system is being finalized in July 2013.

The Mott Foundation funded a study through the MSU Training and Technical Assistance Team to determine the costs and issues involved in pursuing a reconsolidation of the Flint 9-1-1 Center with the Genesee County 9-1-1 Consortium. Both EM's have stated their intentions to move toward reconsolidation. This intent was the basis of the C-GAP application to construct a simul-cast communications tower which will be integrated into the Consortium's tower system.

Priority List for the Continued Resolution of the Financial Emergency

- Increase Revenue: Income tax increase process
- Blight Elimination Plan: Major problem impacting the City as a whole
- 9-1-1 Reconsolidation: Results of the reconsolidation study need to be reviewed and pathway for action needs to be developed.
- KWA Implementation: Many steps remain including disposition of current pipeline sections, City Water Treatment Plant updates, interim water supply plan development, long term water supply back up plan.
- Unfunded OPEB Liability: outstanding lawsuits leave the City in an unknowable status; this could impact Audit standing and required funding, which is potentially ruinous to the budget.
- Capital Investment Needs: The extensive infrastructure of the City must be maintained in order for the City to continue to be functional. Current estimates of unfunded needed capital investment is over $300 million

Emergency Manager's Conclusions

Significant work has been accomplished to stabilize the financial situation of the City of Flint. The whole of the organization is being restructured to reflect a smaller, leaner government operation. Services which were routinely provided are being inspected to determine if they should continue and if so, in what format. Technology solutions are often implemented to increase efficiencies but these also result in reduced opportunities to speak to a real person.

The Emergency Manager acknowledges an on-going financial crisis. However, stable revenue is necessary in order for this city, and most other cities in Michigan, to continue to avoid a bankruptcy situation. We have asked our residents to accept a significant 6 mil Police and Fire Protection Millage; and they have done so. We have imposed a street lighting assessment, a waste collection fee and tremendous water and sewer rate increases. Our residents have not enjoyed increasing services, increasing property valuations or increasing employment opportunities.

As noted previously, there are very few additional revenue options. We are approaching the limit of the City's borrowing capability. Capital improvement funds are drained and the property tax millage rate in within .1 mil of maximum. State Revenue Sharing is now tied to EVIP and C-GAP competitive granting. We have made a request through our State Legislative representatives and the State Treasurer to push legislation to allow City voters the opportunity to decide to increase the income tax. This action could generate $7 million annually and would eliminate the City's structural deficit. A bill has been

introduced but will not be acted on before Fall 2013. Based on that, the earliest that a ballot proposal could come before the City of Flint residents would be February 2014.

In the meantime, Flint is still struggling with effects from increased expenses and reduced revenue from decisions outside our control. These include: yet another General Motors/Delphi closure impacting over 300 jobs, the unknown impact from the changes in personal property taxes, the $120,000 cost to hold the State Senate primary election, and the $575,000 required match for MDOT projects in FY14.

The City is also approaching the point of diminishing returns. There are only so many personnel reductions which can be made before there is no one left to manage the operation.

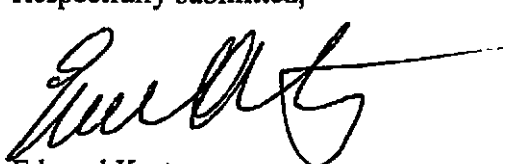
Yet, in light of all of these difficulties, we do not believe that bankruptcy is the best option for the City of Flint. Bankruptcy is expensive: on June 24, 2013 the *Detroit News online* reported that Kenneth Klee, a lawyer for Jefferson County Georgia, said that the County's bankruptcy costs would be about $1 million per month. Jefferson County, GA filed for bankruptcy in November 2011. Similar reports came from Vallejo, California. Bankruptcy could reduce or discharge the City's obligations for retiree healthcare. Whether or not pensions could be impacted is less clear. Both would probably not occur without significant litigation. The balance of the City's debt is actually debt to the State of Michigan, not to private creditors. We feel this is a very unacceptable choice in light of other alternatives that the City has identified, and we don't see that this benefits any entity. The City has to continue to operate even under receivership.

What we do need is a state-wide strategy to support Michigan's cities. Even in post bankruptcy, additional revenue sources will need to be developed for the City to survive.

Further, we do not recommend beginning the transition back to the Mayor/Council management of the City at this time. The City still has critical budgeting issues, there is tremendous work necessary on charter revisions and as yet the City Council has not taken any action to begin the governing education process required by the EM Order which partially restored their pay.

Another update of this report is expected to be presented in September 2013 as required by PA 436. Other updates may be provided as appropriate.

Respectfully submitted,



Edward Kurtz
Emergency Manager

Summary of Findings of the Flint Financial Review Team

Summary of Findings of the Flint Financial Review Team
November 2011

- The City has a general fund deficit of$14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.

- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of$7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.

- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

Setting a Sustainable Course for the City of Flint: Five Year Financial Plan 2014 -2018

Introduction

The City of Flint is currently in a financial emergency, placed in receivership by Governor Synder in December, 2011. The primary reasons for this action included a continuing structural deficit, continuing annual deficits, and unchecked legacy costs, all resulting in an accumulated deficit and marginal cash flow which placed the city in an inevitable position of financial insolvency. The details of the many reasons for this action are detailed by the report of the Financial Review Team which reviewed the City's finances and recommended the action ultimately undertaken by the Governor.

The environment in which Flint finds itself is not necessarily new or unique. For many years, Flint has faced the challenges of an older urban center – population loss; high rates of poverty and low rates of educational attainment; high crime, aged infrastructure; and high legacy costs. In addition, there are stagnant or declining revenue streams, including property and income tax revenue; state shared revenues; disappearing grant revenues; rapidly increasing health and pension costs; an increasing number of retirees; and a workforce already seriously reduced in response to previous financial challenges. This environment is not expected to significantly change in the foreseeable future.

Since the original appointment of an Emergency Manager, charged with addressing the situation, the statutes authorizing the Governor's action has changed three times. However, while the original Emergency Manager has changed as a result of the statute changes, the team in place at the beginning of 2012, including the original Emergency Manager, has remained largely intact. There has been much action focused on restoring the financial solvency of Flint and putting into place changes to assist the government to once again become a leader fostering the community of Flint to become an attractive place for residents, businesses, students, and visitors.

At the end of fiscal year 2012, (June 30, 2012), the City's General Fund faced an accumulated deficit of more than $19.1 million. The initial projections for the fiscal year 2013 budget (which began July 1, 2012), indicated a gap between revenues and expenses of more than $20 million, and as the budget preparation proceeded, it was clear that the actual gap was much larger. The consequences were hard decisions made to reduce the workforce by 20%, reduce employee compensation by 20% of wages, alter retiree health care, and both request and impose significant tax and fee increases on residents and businesses totaling nearly $20 million.

The result of these actions was a balanced budget in place on July 1, 2012. Eight months into the fiscal year, revenues and expenses remain balanced. With voter approval of a public safety millage, assistance from the state, and funds from several grant sources, public safety staffing has been stabilized for the time being, and the City is in the midst of creating a new Master Plan to guide the future development of the City.

The goal now has been to formally establish a new direction for the city government, looking forward for the next several years. To this end, a five year Strategic Plan for the City, accompanied by a financial plan, is being developed. The plan defines the key goals and objectives that the City intends to accomplish, framed in the context of conservatively projected revenues and expenses. Key goals include maintaining public safety; reducing the blight conditions prevalent throughout much of the city, providing other essential city services, and eliminating the accumulated deficit.

The development of the financial plan underpinning the Strategic Plan is the crucial component of the City's future financial viability. If one cannot see a clear path to financial solvency over the next five years, then the future is dim. And while there is little doubt that expenses cannot be reduced to meet revenues, the real question is whether or not the result equates even minimally to a viable city able to provide even the most basic of city services, let alone provide the support and leadership necessary for the Flint community to survive.

There are currently three sections to the plan and budget. The first is the most current draft of the Strategic Plan developed internally to guide the actions of city leaders for the next several years. The second section provides a five year overview of revenues and expenses and identifies the challenges the city currently identifies as impacting its future directions and capabilities. The third section details the preliminary FY 14 budget. While the FY14 budget as a financial document is nearly final, it is still necessary to finalize the specific objectives and measurements necessary to guide and measure implementation of the budget.

Once the review of the five year overlook is complete and the FY 14 budget is nearly complete, attention will then focus on development of the FY15 budget. Once that is complete –within the next several weeks, attention will be given to formulating financial plans for succeeding years while at the same time moving forward with adopting and implementing the FY14 budget.

FLINT STRATEGIC PLAN

2014 -2018

Setting a Sustainable Course for the City of Flint

FLINT STRATEGIC PLAN

2014 -2018

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to fulfill its Mission, the City government will assure that residents, businesses, students and visitors will:

Have a safe, secure, and healthy environment in which to live, work, learn and play

Have access to dependable and affordable water, sewer, and waste collection

Have access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

Cooperate with business, non-profit, and foundation partners to create a climate that supports community and economic development

The City government will also:

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits

FLINT STRATEGIC PLAN
2014 -2018
Setting a Sustainable Course for the City of Flint

GOVERNANCE/ADMINISTRATION

FINAL 3/20/2013

DIVISIONS/AREAS		FUNCTIONS/GOALS	KEY OBJECTIVES
EMERGENCY FINANCIAL MANAGER		Directs and guides the City government in order to have a financially stable organization capable of assuring:	Assure Division Directors Achieve their goals
	CITY ADMINISTRATOR		Finalize Contract for water services
	MAYOR	* A safe, secure, healthy environment to live, work, play	Secure Continued Funding for the Lock-Up
	COUNCIL		Secure Replacement Funding for the SAFER Grant
	HUMAN RELATIONS	*A dependable and affordable water, sewer and waste collection	Pursue 911 Consolidation
	CIVIL SERVICE/OMBUDSMAN		Implement New Organizational Structure/Hire Fire Chief and Asst. Police Chief
		*An adequate and well maintained transportation network	Establish link with FARO for grant assistance
			Support Economic Development
		* Support of community and economic development activities	Support Community Development
			Expand Communication efforts
			Assess Hospital Asset
			Pursue State Approval for Income Tax Increase
			Search for and Evaluate Shared Services
			Support State Level Changes to Municipal Financing
			Support consolidation of District Courts

CITY ATTORNEY			
		Provides legal advice on matters relating to the conduct of city business; prosecutes violations of city ordinances; responds to FOIA requests; advises in labor relations	Comprehensive review of all ordinances, including Zoning and Business Licensing
			Handle 95% of litigation in-house
			Improve skill sets of all staff
			Improve processes of handling paper and digital files
			Improve standardization of procedures for common legal matters
			Improve appearance of City Attorney's Office

CITY CLERK			
	RECORDS	Manages custody and retention of city records, including minutes of official bodies. Conducts elections in accordance with state law.	Become current on cataloging and filing records
	ELECTIONS		Conduct regularly scheduled and special elections

FLINT STRATEGIC PLAN
2014 -2018
Setting a Sustainable Course for the City of Flint

PUBLIC SAFETY

DIVISIONS/AREAS	FUNCTIONS/GOALS	KEY OBJECTIVES
POLICE	Provides the best public safety response possible within total staffing of 150	Continue work with MSU Technical Assistance, including:
		Update Organizational Chart and administrative structure
		Hire Deputy Chief w Designated Responsibilities
		Establish Roster
		Fill Positions
		Eliminate Provisional Appointments
		Update Operational Policies
		Develop formal expectations for IT support
		Develop formal expectations for Fleet support
		Determine adequate size of Fleet
		Evaluate Lock Up operations
		Finalize 800 MHz installation
		Conduct technology training for all personnel
		Strengthen relationships with community groups
911	Provides the best possible emergency telephone answering and dispatch purpose possible within current staffing of 23	
		Reduce use of 911 for non-emergency calls
		Develop plan for Next Gen 911 technology
		Improve response to incoming 911 and 7 digit calls
		Improve data transfer for false alarm billing
		Complete 800 MHZ implementation
		Develop plan for new communications tower
		Prepare plan for management succession
		Meet mandated training standards
		Complete 911 consolidation study and prepare to implement
FIRE	Provides the best fire response possible within current staffing of 94, while preparing for reduced operations with loss of SAFER funds	
		Document turnaround time for fire inspections
		Develop contingency plan without SAFER funding
		Develop potential shared services w surrounding depts.
		Analyze patterns of sick leave usage
		Evaluate alternate organizational structures
		Determine impact of "Fire only" response capability
DISTRICT COURT	Provides the most efficient processing possible within the net current appropriation from the City	
		Improve court coverage when employees are absent
		Improve Court Collections
		Re-establish Probation department
		Improve Criminal Case Processing

FLINT STRATEGIC PLAN
2014 -2018
Setting a Sustainable Course for the City of Flint

INFRASTRUCTURE

DIVISIONS/AREAS	FUNCTIONS/GOALS	KEY OBJECTIVES
STREETS		
	Oversees the maintenance and repair of the City's street and sidewalk network within the constraints of state funding and in compliance with state law	Conduct preventative maintenance on 10% of streets
		Implement Sidewalk repair program targeting 1,000 repairs
		Initiate a 50/50 Sidewalk repair program
		Invest $100,000 in non-motorized facilities
		Initiate Pot Hole repair within 48 hours
		Initiate Right of Way Enforcement Program
TRAFFIC CONTROL		
	Oversees the maintenance and repair of traffic control signals and markings, including barricading and other temporary changes during repairs and events; provides safe access for the traveling public, both motorized and non-motorized	Initiate traffic signal preventive maintenance program
		Enforce state standards for traffic control devices
		Establish safe right of way environments for events
		Implement a long line pavement marking program
SANITATION		
	Assures the reliable and efficient collection and disposal of residential waste	Develop and execute compost plan
		Monitor contractor's waste collection activities
		Participate in development of recycling program
		Monitor finances of waste collection fee
UTILITIES		
	Assures the reliable and efficient provision of water and the disposal of sewage in compliance with local ordinances, state and federal laws	Comply with all MDEQ water quality standards
WATER SERVICE CENTER		Comply with all effluent quality standards
WATER TREATMENT PLANT		Respond quickly and efficiently to water main breaks
WATER POLLUTION CONTROL		Continue implementing meter replacement program
		Design and implement pilot sewer back-up prevention program
		Implement Capital equipment/process upgrades
		Implement Storm Water Ordinance and fee
		Reduce storm water and groundwater infiltration into sanitary sewer
		Shut down incinerator as next step to reducing unit cost of solids disposal
PARKS		
	Oversees the maintenance and use of park land; promotes the development of recreational programming	Implement "Mowing plan" developed by Ruth Mott Foundation
		Promote "Adopt a Park" program throughout the City
		Participate with Planning to develop a parks disposal plan
		Monitor mowing contractor performance

FLINT STRATEGIC PLAN
2014 -2018
Setting a Sustainable Course for the City of Flint

INFRASTRUCTURE (cont)

DIVISIONS/AREAS	FUNCTIONS/GOALS	KEY OBJECTIVES
FORESTRY		
	Oversees the care of trees within the jurisdiction of the City	Develop program giving property owners responsibility for trees in right of way
		Provide capacity for emergency removals
		Seek volunteer capacity for tree planting
STREETLIGHTS		
	Works with Consumers Energy and City Planning to plan and implement an appropriate and energy efficient system of streetlights	Initiate planning process with CE for upgrades
		Monitor CE progress in plan implementation
		Monitor finances of streetlight assessment
FLEET		
	Oversees the specification, purchase, repair, maintenance and replacement of all city vehicles and wheeled equipment. Provides professional and technical advice to departments regarding their vehicle and equipment needs.	Complete and maintain a current fleet and equipment inventory
		Develop a vehicle/equipment replacement schedule
		Complete 75% of work orders within 72 hours
		Maintain scheduled/actual preventative/maintenance ratio > 75%
		Sustain average vehicle availability rates above 70%
		Implement fuel program to minimize fuel storage & cost
FACILITIES		
	Oversees the operations of all city buildings and grounds other than park land. Responsible for repair and maintenance of building systems, cleaning, and security. Provides professional and technical advice on departments facility needs and on most efficient use of facilities.	Resolve emergencies immediately
		Develop and implement Property/Equipment Disposal Plan
		Assure proper ventilation, heating and cooling in occupied buildings
		Assure facilities are cleaned appropriately
		Assure buildings are safe and maintained for employees and visitors
		Define emergency saving opportunities

FLINT STRATEGIC PLAN
2014 -2018
Setting a Sustainable Course for the City of Flint

PLANNING AND DEVELOPMENT

DIVISIONS/AREAS	FUNCTIONS/GOALS	KEY OBJECTIVES
CODE ENFORCEMENT		
RENTAL REGISTRATIONS	Assures comprehensive and fair enforcement of compliance of the Michigan Construction Codes, City of Flint Ordinances, including rental registrations, and the International Property Maintenance Code	Register 100% of Rental Properties
BUILDING PERMITS		Review and update Building Fee Schedule
		Document timeliness of turnaround for Building Permits and Inspections
		Develop and implement a plan for code enforcement
BUSINESS LICENSES		
	Assures that all businesses within the City are registered in accordance with city ordinances and that appropriate inspections are completed in a professional and timely manner	Revise and simplify business licensing requirements
		License 100% of businesses, per ordinance
		Document timeliness of inspections done, per ordinance
PLANNING AND ZONING		
	Provides professional and technical advice and assists policy makers and administrators in guiding development of the City in accordance with its Master Plan; develops collaborative partnerships to coordinate planning efforts throughout the City	Adopt Master Plan by October 2013
		Amend Zoning Ordinance by June 2014
		Redesign park plan to recognize city resource limitations
		Update Capital Improvement Plan
		Develop plan to assure that disposition of city property is consistent w MPlan
		Make available basic demographic information and GIS Services
		Complete NEPA Clearances
		Complete Blight Elimination Plan
COMMUNITY DEVELOPMENT		
	Provides professional and technical advice and assists residents, policy makers, and others in developing strong neighborhoods. Supports the Green and Healthy Homes Initiative (GHHI), youth initiatives, urban housing initiatives, and quality of life initiatives by leveraging current federal funding sources.	Develop plan for strengthening neighborhoods
		Improve HUD grant allocation process
		Improve Contractor capacity to administer grants
		Reduce # of HUD grant findings
		Reduce Unsold Housing Inventory
		Close contracts more than 2 years old
ECONOMIC DEVELOPMENT		
	Provides professional and technical advice and assists businesses, policy makers and others in developing a positive climate to attract and retain business	Assess potential of making Oak Business Center profitable
		Assess effectiveness of EDC
		Formalize relationships with GRCC and others

FLINT STRATEGIC PLAN
2014 -2018
Setting a Sustainable Course for the City of Flint

BUSINESS SUPPORT

DIVISIONS/AREAS	FUNCTIONS/GOALS	KEY OBJECTIVES
FINANCE		
ACCOUNTING AUDITING BUDGETING RISK MANAGEMENT PURCHASING GRANT ADMIN	Provides for a financially secure organization with sound business practices providing for the purchase of goods and services and financial reporting. Provides professional and technical advice to departments regarding financial and purchasing needs and on grant administration processes.	Meet State reporting requirements Eliminate Deficit per plan Fully implement BS&A Continue reorganization of department per P&M study Incorporate purchasing and risk management into Finance Formalize a 5 year budget and planning process Complete and submit FY13 audit by November 30 Design and implement formal budget monitoring process Implement new grant reporting process Fully implement P Card process; evaluate expansion Conduct ongoing training for all city accounting staff Develop and implement a city wide fixed asset policy Conduct ongoing training for all city purchasing staff Document turnaround time for purchasing goods and services Implement a vendor registration program Improve vendor payment turn around Develop formal internal audit process/procedures Issue RFP for Fy14 audit Improve Cash position Review property and liability coverage's for adequacy Review health insurance coverages for cost savings
TREASURY		
CUSTOMER SERVICE DELINQUENT COLLECTIONS	Provides for a customer friendly accountable entity managing receipts and collections. Monitors collections of property taxes, income taxes, water and sewer, and other receivables to assess budgetary compliance.	Increase income tax revenue thru compliance programs Collect a larger percentage of the City's delinquent receivables Assist customers' needs timely Expand an electronic payment programs Implement e-file for income tax returns Set up training programs for Treasury staff
ASSESSING		
	Assures the assessment of properties within the City in a professional and equitable manner in conformance with state law and professional practices; addresses appeals of values to Board of Review; represents City at state level appeals	Migrate to BS&A.net; train staff Conduct tract revaluations Conduct personal property canvas of accounts less than $40k Conduct personal property audits of accounts greater than $40k Convert/transfer structure drawings from paper to APEX Establish and maintain parcel layer for City GIS
HUMAN RESOURCES		
	Oversees the recruitment and hiring of qualified employees in compliance with laws and ordinances, provides professional and technical advice in the development of personnel polices and contracts, and assists departments and employees in providing training and resolving disputes	Implement on-line application/screening (Applitrack) Update testing protocols for recruitment/selection Update/improve layoff process Identify contract terms for modification/elimination Codify and finalize labor contracts and personnel policies Revise process of benefit administration Foster and maintain good labor relations Resolve management concerns & employee grievances Design and implement ongoing training city wide Update personnel rules and procedures Update program and compliance for employee safety

Five Year Financial Projections

Proposed 5/20/13

Five Year
Financial Projections and Challenges
City of Flint, FY14-FY18

Year 1 of the five year financial projection starts with a balanced FY14 budget, made possible in large part by continuation of several major grants supporting police, fire, and the update of the City's Master Plan, as well as the cost reduction strategies related to employee compensation which were implemented in Fy13. These, plus continued effort to restructure work processes and to reduce the size of the workforce make it possible to provide services in FY14 at generally the same level as FY13. It also reflects the initial steps necessary to begin to eliminate the accumulated $19.1 million deficit. However, it affords little ability to improve services, reduce taxes or fees, or to address the monumental amount of unmet capital improvement needs.

Years 2–5 show the continuing challenge of the City's structural deficit, with property tax revenues continuing to fall through FY15, and then stabilizing but with no growth until FY18. At the same time however, legacy and compensation costs are projected to increase by 5% per year, and major grant sources will disappear. The City will be faced with a significant challenge of attempting to choose between reductions in public safety and other reductions; however, finding other reductions may not be possible, given the minimal level of resources available. Again, without additional new significant levels of revenue, there is little ability to improve services or address continually increasing capital improvement needs.

Core General Fund revenues and millage proceeds are projected to remain substantially unchanged at $58 million from FY14 to FY18. Taking into account current grant levels supporting general city services, however, revenues are projected to drop from $66.1 million in FY14 to $58 million in FY18. If the services and service delivery mechanisms supported by the FY14 revenues were left untouched through FY18, it is projected that the gap between revenues and expenses would be more than $19 million by FY18. That gap amount would be even greater if some reductions (such as fire operations with the end of the SAFER grant) were not already incorporated into projections. This gap coincidentally is virtually the same amount as the $19.1 accumulated General Fund deficit as of June 30, 2012.

Balancing city expenditures with projected revenues will be an ongoing challenge for the next several years. While FY14 is balanced, there is a projected $9.1 million gap between revenues and expenditures for the FY15 budget, which begins July 1, 2014. This large gap is due primarily to the anticipated loss of some major grant sources, including SAFER (which provides funding for 39 fire fighters); Master Planning (which provides resources for the revision of the City's Master Plan) state support for operation of the City's Lock-Up; and the Mott Foundation grant which has supported the cost of several police officers. While solutions to closing this gap have not yet been formulated, work to do so will begin once the FY14 budget is finalized.

Revenue and expense projections for FY16, FY17, and FY18 all show gaps which must be closed. Current projections for each of these years range between $2.4 and $3.6 million, and again will pose a significant challenge. The continuation of these gaps reinforces the fact that the City of Flint, like most municipalities in the state, faces a structural gap. With ongoing expense increases in the conduct of business, including legacy costs, on one side, and flat revenues with little opportunity for growth on the other, there will be a continuing challenge to manage the City's business in a financially solvent manner while still providing even the most basic of city services. It is becoming even more imperative that serious consideration be given to providing a more realistic funding mechanism for municipalities. In the City of Flint, state legislative approval to allow consideration of an increase in the income tax (as has been done for other municipalities) is an option that could address the city's plight in a substantial way.

These financial challenges show that it will be difficult for the City to maintain its police and fire departments at current levels. Were it not for the voter approved 6 mill increase in property taxes, as well as continuation of the Neighborhood Police millage, consideration of current levels would be impossible to consider. As it is, it is projected that with the end of the SAFER grant in FY15, staffing for the Fire Department will be reduced from 94 to 75, allowing for the operation of 3 stations. And while staffing for the Police Department may stay close to its current 150 level for a few years, it will likely reduce to 140 in FY18. And that scenario is only possible with continued COPS grant funding.

It will also be challenging to allocate City funds for Planning and Zoning as the grant funding for these activities ends in FY15. Without dedicated staff to pursue implementation of the soon to be adopted Master Plan and updated Zoning Ordinance, development goals of the City cannot be effectively pursued.

With current federal funding for community development and code enforcement significantly reducing over the next few years, city efforts to make even marginal progress in addressing blight and becoming more aggressive in enforcing building and safety codes is in jeopardy. If progress is to continue, it will be necessary that other sources of funding be found.

Finally, it will become increasingly difficult to address priority areas such as those mentioned above by further reducing or eliminating other areas of City services. Restructuring the city's workforce and compensation structures have been done and are ongoing, and city support of areas such as parks and recreation and human services have been reduced. These have resulted in efficiencies and a balanced budget for FY13 and FY14, and there are more decisions to be made. However, there may become a time when no further reductions of the magnitude necessary to balance budgets can be achieved.

Proposed FY14 Budget

Proposed 5/17/13

Setting a Sustainable Course for the City of Flint

FY14 Budget

The FY14 Budget was prepared in the context of furthering the financial stability of the City of Flint and moving forward on meeting the prime objectives of the recently developed strategic plan. Once this plan is in place, attention will be given to finalizing the five year plan, including a detailed assessment of the likely budget for FY15, and more defined projections for the following three years.

If one could simplify the prime objectives of the Strategic Plan, it would be to state that budgetary actions must be consistent with operating in a financially sustainable manner; pursuing changes which increase efficiency while reducing costs; maintaining current levels of public safety; and organizing in a way that the City can best address the blighted conditions thorough the City. All of this to be done with the aim of making the City of Flint an attractive and affordable place to attract and retain residents, businesses, students, and visitors.

In light of decreasing property values, stagnant income tax and state shared revenue projections, plus a commitment to eliminating the accumulated General fund deficit, revenues are severely limited. For example, while funds available for general city services (those funded by the General Fund, major grants, and special voted millages) total $73.5 million this year; only $66.4 million is projected to be available for the FY14 budget. Property tax revenues are projected to decline by $3.5 million or 22%, while major grant revenues are projected to decline by $2.5 million, or 25%. $1 million is also committed to reducing the City's accumulated $19.3 million deficit. In addition, there is an increasing amount of tax delinquencies, as well as fees and special assessments for water, sewer, garbage and street lights.

Fortunately, the impact of many of the structural changes made last year has been to constrain growth in ongoing expenses, in particular those related to employee compensation. Even with a significant increase in the annual pension payments, made necessary to halt further decline in the funded status of the pension assets, pension and health care costs are slightly reduced from the current year. Salary costs are also slightly less as a result of changes in employee compensation structure.

However, the City is currently faced with a legal challenge to its decision to change retiree healthcare, and should the City not prevail, it will likely be faced with increased costs of between $3.5 million and $5 million. These potential costs are not included in this budget, and having to subsequently include them will be potentially disastrous for the financial solvency of the City.

All in all, with significant effort from department heads and others involved in building this budget, the level of services to be provided by the City in FY14 should be close to the level currently provided. This is due in large part to concerted effort to improve business processes and organization arrangements. These improvements and changes do, however, include the elimination of several positions within the workforce. FTE staffing in the FY14 budget is projected at 567, in comparison to 595 in the current budget.

With deployment of the police and fire protection millage funds, and the potential of additional federal funding for law enforcement, the current level of staffing in the Police Department (150 in total) is expected to be maintained – even as other grant funds end. This level includes the additional 10 positions authorized in December, 2012 when the millage was passed. In this budget, the General Fund appropriation for the Police and Fire budgets total $33.5 million, or 63% of the General Fund.

Adding the costs of 911 and District Court to this bring the total General Fund appropriation for public safety to $42.4 million, or 80% of the General Fund.

However, there are not the resources to address even some of the most critical unmet needs in the delivery of city services. For example, there are no additional resources to expand staffing in the Police Department if the goal is to attempt to stabilize staffing there and to be prepared to address the personnel loss expected in the Fire Department when the federal SAFER grant expires at the end of FY14.

In addition, in light of the loss of federal dollars for demolition, the resources for addressing blight in any significant way are significantly less for FY14. Building Safety resources have been limited for many years, resulting in very limited ability to enforce compliance with city codes. This budget does include the creation of a separate Planning and Development Division of the City, whose efforts will include improving code compliance activities, including increasing compliance with rental registration requirements and business licensing requirements. The work of this division will be aided by the addition of Neighborhood Safety Officers, funded by the Mott Foundation and housed in the Police Department.

The Planning and Development Division also includes the current grant funded activities related to adoption and implementation of the City's Master Plan. While grant funds should be sufficient to finish the adoption of the Master Plan and the associated update to the Zoning Ordinance by the end of FY14, continuation into FY15 will require the identification of new sources of revenues.

Finally, there are nearly $300 million in unmet capital needs for utilities, streets, facilities, parks, and technology. This budget does not contain the level of resources to be able to address these needs in any substantive way, with barely enough resources budgeted to meet the most critical emergency needs.

The limited resources will result in some changes noticeable to city residents and visitors. For example, there will be no repaving of city streets, with funding focused on crack sealing streets to prolong their longevity. While as much as one-third of city streets need repaving, doing so would cost more than $20 million. Alternatively, nearly one-third of the city's streets can be crack sealed for approximately $200,000 in materials. In addition however, the City is required by the state to participate financially in improvement to state determined street projects.

There will be minimal maintenance of parks, with the City's primary activity being related to mowing. There will, however, be increased efforts to form partnerships with interested groups, neighborhood associations and businesses to improve individual parks.

From a taxpayer perspective, payments for governmental services will generally decrease in total, by an average of 7% for FY14. Taxes based on the value of the property will decrease due to the continuing decline in value, while the annual assessment for streetlights and the fee for waste collection will increase in total by $4. There will be no increase in water and sewer rates.

Subject: Flint Financial and Operating Plan V3

Good Day,

Following a study of Flint's June 28, 2013 Financial and Operating Plan (Plan), this summary can be provided. This Plan is intended to also function as EM Kurtz's closing memorandum. The Plan is extensive, and subdivided into several major sections which will be addressed in their native order.

Financial and Operating Plan

The document begins with a summary of Flint's Emergency Manager history; in 2011 Mike Brown was appointed, and then when PA 4 was repealed by referendum, Ed Kurtz was appointed on August 8, 2012. As of the release date, Mike Brown had not yet been appointed for a second time.

The dire nature of the City's fiscal woes is quickly addressed. The Plan states that while the City has largely kept to a balanced budget so far during FY 13, decreasing property values, grant expirations, and increasing legacy costs will contribute to structural deficits in the following years, ranging from $3-5 million annually. All of these projected losses will occur without the budgeting for any capital needs, which the city currently estimates to be approximately $300 million. The Plan admits that "[t]his structural deficit essentially precludes the City from stabilizing services levels even at minimal levels . . . without structural change, this situation is not sustainable and the City will not achieve even a minimal level of financial solvency in the long term".

Bankruptcy is acknowledged as a possible solution, however the Plan dismisses it as "expensive, slow, and with outcomes that are far from certain". Instead, the Plan is summarized as "an increase in the local income tax rate to the levels afforded other urban centers, coupled with significant additional changes in health care and pension for active employees and retirees appears to have the potential to overcome the . . . structural deficit while providing a similar amount for stabilizing services and beginning to address capital needs."

The City's cash position has improved due to a public safety millage, a street light assessment, and waste collection fees. However, it is stated that the general fund still needs to borrow to remain solvent. Deficit financing is a necessary component under the Plan. This request to borrow was incorporated into the City's most recent DEP application; this DEP has not yet been certified by LAFD.

The Plan describes the efforts to secure concessions from the City's six bargaining units. While wage reductions have been achieved with four of these units, this area is fraught with litigation and union threats of litigation. On a more positive note the City has recently contracted with a part-time labor relations specialist who, it is reported, has resolved dozens of union grievances.

The City has resolved to enter into a contract with KWA. This partnership with Genesee County, the City of Lapeer, Lapeer County and Sanilac County is designed to stabilize the cost of water for all the involved parties. There still is ongoing negotiation regarding a 72" pipeline which will be integral for the KWA plan. Additionally, one of the city's sewage pump stations is becoming fully automated; the station is fully staffed at all times now. This automation is projected to save at least $500,000 annually.

During FY13, the City has held three auctions where surplus equipment was sold, netting $410,000.

The fiscal hardships of the City have reduced its ability to fight blight. All demolitions are now the responsibility of the Genesee County Land Bank Authority, who has recently received a $3.5 million MSHDA grant for demolition purposes. The Land Bank is also soliciting a $20 million grant from the "Hardest Hit" federal grant fund.

Six priority actions are identified for the future:

1. Increase revenue through an income tax increase
2. Develop a blight elimination plan
3. 9-1-1 reconsolidation
4. KWA implementation
5. Win the lawsuits that threaten the OPEB reduction
6. Maintain capital infrastructure

Five Year Financial Plan Projections

These figures show a degree of budgetary stability through FY14, when stagnant revenues are projected to be overtaken by increasing retirement expenses and grant expirations. Difficult decisions must be made in FY15 and onward, as past staffing cut have left little other than public safety to reduce. Any reductions to public safety must be arrayed against the resulting physical insecurity to the citizens of Flint.

In conclusion, much of the Financial and Operational Plan's conclusions are identical to those reached by the OFR. While considerable cuts have been made, the minimal operational expense and the legacy costs for Flint's retirees are simply a larger sum than the tax revenues of the City. Additional revenues and additional cost savings must be realized soon if the City of Flint is to be a going concern that can provide essential services to its people.

Subject: Weekly Phone conference with Mike Brown

Below are the more significant items we discussed this morning:

Public Safety meeting, Monday in Flint, Harvey Hollings staff, Col. Etue, Captain Arnold, Lt. Bolger,

Andy called yesterday to have Mike Brown and Chief Locke at his office on 8/21/13 @ 11:30 am meeting Col. Etue

John Clark city close to finalizing CBA's ready to negotiate with 6 unions, Mike anticipates John will call Andy directly to update him

Pipe Sale, SRR wanted $18K, looking for another vendor, 8/21/13 deadline won't be met

Working on details of implementation of using the water plant, DWSD no longer providing to Flint after 4/14 and this means accelerating the plant's CIP of $15M,will provide details later in writing,

Mike wants to meet w/ Kevyn Orr to discuss purchase of their pipeline by KWA and the potential of DWSD being backup to KWA

Mike desires to know our position on the Income Tax proposal and to advocate with the Legislature

Genesee County land bank submitted a $25M application to demo homes (majority) in Flint

Subject: Water System Capital Improvements

Mike,

I discussed with Wayne your concept to fund $11 million of necessary improvements at the city's water plant by delaying existing water bond payments for 3 years. Wayne requested that you send a written proposal to both he and John Barton in Bond Finance so that they may evaluate it. Let me know if you have any additional questions.

> **Subject: Flint Update**
>
> Below are the highlights from my conversation today with Mike Brown.
>
> Hurley Hospital Board appointments – Mike will send future appoints to Treasury for approval
>
> MOU w/ MSP and Itemized law enforcement "to do" list provided to Treasury
>
> Final FY 13 budget expected to reduce the $19M structural deficit to $16M. Reasons for success are controlled expenses, better than expected experience in health care cost, overall cash position improved from $15M to $40M at end of FY13 due to delayed h2O/sewer capital projects, retiree health care savings, fringe benefits costs were below estimates by $5-$6M, public safety millage (2 levies) resulted in $5M and increased fund balance in road fund of $1M.
>
> Mike is considering a 4 point plan for inclusion in the model contract. City's healthcare consultant Cornerstone is evaluating it. 1) Currently city adopted the hard cap under PA 152, city costs are below hard cap and no premiums are paid by employees. Employees do pay significant co-pays. He is considering adopting 80/20 option; 2) Would inform non vested employees not guaranteed retiree healthcare; 3) Vested employees would get retiree healthcare, but those who retire after 1/14 will be told the premium share for pre 65 will be limited to the same premium share of post 65 employees. Setting date of 1/14 would allow implementing collective bargaining agreements during 10/13 and it is expected employees will retire and new employees hired will have no healthcare; 4) effective 1/14 new police & fire employees will be moved to the hybrid plan (1.75 defined benefit multiplier and city matches a defined contribution up to 5%, the total combined limit for both is 10% . Partial cost estimate is due week of 9/9/13.
>
> Mike is concerned about the ability of the city to deliver water by next April because DWSD will stop providing water and their plant needs upgrades. The City will have to make $11M in improvements to the water plant to provide city residents with water until the city connects to KWA. The city has $28M in outstanding water bonds and they inquired about the state's willingness to divert payment for 3 years, in order to spend bond debt payments on the $11M of capital improvement necessary for using the water plant and connect to KWA.

Let me know if you need any additional information on these items.

September 10, 2013

To: Governor Rick Snyder, Treasurer Andrew Dillon

From: Michael K. Brown, Emergency Manager, City of Flint

Subject: CLOSING MEMORANDUM

It has been a pleasure for me to serve the citizens of Flint for the past twenty-two months and I thank you for the opportunity to serve as Emergency Manager.

I have worked hard to begin a cultural change to both improve the approach to city government's interaction with citizens and to encourage a wider range of citizen participation. It is important to me that the next generation of leaders (I have called them emerging leaders) not be from the same mold as the old leaders and have the opportunity to assume positions of responsibility as we set a path to the future for Flint. A significant number of my leadership team is comprised of Flint residents who are committed to the future of their city. While this approach has meant that some things may have taken longer to achieve than it might otherwise take, it has been with the realization that *changing the culture of City Hall is imperative if history is not to repeat itself.*

I have also tried to champion citizen participation throughout my tenure as Emergency Manager. Collectively, hundreds of people have been involved: in the Advisory Teams for Public Safety, Infrastructure, Financial, and Legacy issues which I established in January 2012; in the nine ward public meetings held in February-March 2012; in the Police and Fire Protection millage campaign in Fall 2012; and in the Master Planning process which has involved citizen participation in numerous meetings held throughout the City over the past year. I have attached a list of some of these individuals who have worked on my advisory groups and the millage team.

As our regularly submitted reports to the Department of Treasury have documented, we have made substantial progress in putting the city on a path to solvency and resolving the financial emergency. Many achievements are detailed in the latest Financial and Operating Report which was submitted to the Department of Treasury on June 30, 2013. Significant achievements over the past twenty-two months include:

A. Financial
   1. Developing, adopting and operating with a balanced budget for FY13 - the first time in seven years that the City of Flint has lived within a balanced budget.

   2. Significantly improving the City's cash flow - More than $40 million in cash on hand as of September 2, 2013 is significantly better than the approximate $10 million on hand in December 2011. The $10 million in cash at that time was due primarily to an $8 million loan from the state in the form of Fiscal Stabilization Bonds.

   3. Significantly reducing Other Post Employment Benefits (OPEB) liabilities by more than $500 million – a 60% reduction. Not only have we significantly reduced legacy costs by more than 60%, we also have a plan for further reducing legacy costs, as detailed in recent presentations to the Department of Treasury

4. Significantly reducing pension administration costs and improving investment returns by moving administration of the City's pension fund to the Municipal Employees Retirement Fund, while also changing the structure of future pension benefits which will reduce future pension liabilities

5. Developing a plan for and implementing a reduction in the City's $19.1 million deficit ahead of schedule. At the end of FY12, we presented a plan to the State Treasurer for eliminating the $19.1 million deficit within 5 years. Based on preliminary year end results for FY13, we are ahead of the scheduled reduction since it appears that FY 13 will end with a surplus of revenues over expenses by approximately $3 million. This will likely reduce the $19.1 million deficit to the $16 million range. Had the Department of Treasury authorized the borrowing of $12 million as contained in the approved FY12 Deficit Elimination Plan, the remaining deficit would now be closer to $4 million.

6. Developing a five year financial projection which maps out the continuing financial challenges Flint will face, regardless of who is in charge. With FY 14 balanced and adopted, development of the FY15 budget – which will without doubt be the most challenging of the next few years – is underway. In the process of developing the multi-year projection, it has also become clear that the path for Flint's financial solvency will require additional sources of revenue in addition to further reductions in legacy costs. We have identified a path for further reductions in legacy costs, and we have also identified an increase in the local income tax as the most promising and realistic source of new revenue. Unfortunately the Treasurer has not supported that initiative.

7. Stabilizing Police and Fire Protection revenue. Since being appointed in 2011, it has been clear that the stabilization and enhancement of public safety is the top priority in the City of Flint. Many steps have been taken to achieve this, including securing voter approval of a 6 mill property tax increase by a margin of 57% to 43%. Additionally, by ordinance the City must now appropriate no less than 55.5% of General Fund revenues for Police and Fire budgets. The FY 14 budget dedicates more than 60% of General Fund revenues to these purposes, and exceeds 80% when 9-1-1 and District Court funding is included. As a result, staffing for police and fire personnel was maintained at current levels in spite of the significant staffing reductions necessary to balance both the FY13 and FY14 budgets. Unfortunately, without a new source of revenue in FY15, it is unlikely that can continue.

8. Resolving Federal Government liabilities - More than $7 million in questioned grant costs prior to the EM's appointment in December 2011 have been resolved – as documented by the OIG report and HUD findings.

9. Reorganizing City operations – The City workforce has been reduced by more than 25% as the City has faced its financial challenges. Doing so while still providing for the delivery of city services has required restructuring work processes and organizational alignments, as well as the increased use of technology. These changes have been made in the context of a newly developed strategic plan which identifies the key functions and objectives of the City.

B. Public Safety
   1. Opening of the Flint Lock-up. The lock-up opened the week of October 1, 2012. Public Safety Director Lock recommended selection of the Genesee County Sheriff as the operator of the Flint lock-up. Lock also recommended that the lock-up be made available to all policing agencies operating within

Genesee County for warrants and fresh charges, both felony and misdemeanor. Well over one thousand outstanding warrants are being cleared each month. This funding by the State has been very much appreciated and very beneficial to the City.

2. Creating the Criminal Justice System Advisory Council chaired by Chief Judge Richard Yuille. In September 2012 the first meeting of the Criminal Justice System Advisory Council (CJSAC) was held. Eight workgroups were established. Through these work groups a number of cooperative projects, streamlined operations and new collaborations have been identified and numerous projects continue to move forward.

3. Completing the transition to 800 MHz public safety communications system. All Public Safety departments were operational on the 800 MHz communications system in December of 2012. Flint Public Safety is now compatible with the communications system used throughout Genesee County and with the Michigan State Police.

4. Securing public safety grants totaling over $11 million (not including State funded Lock-up). A $6.9 million SAFER grant to employ thirty-nine firefighters for two years was received in May 2012. The Mott Foundation has granted the City over $1.8 million for several public safety initiatives. The Treasurer's Office through the C-GAP funding awarded the City $1.8 million to construct a 9-1-1 simulcast communications tower in April 2013. Homeland Security awarded Flint a total of $615,000 for 9-1-1 console upgrades and purchase of new radios for the 800 MHZ transition.

5. Up-grading Police Department technology to improve data-driven decision making and capability for overall communications with Law Enforcement agencies at all levels of government. The Mott Foundation funded MSU Training & Technical Assistance Team conducted a technology audit which provided a road map of upgrades necessary to ensure that officers and firefighters can take maximum advantage of the tools already provided to them. New World Systems, Flint's records management system, required server and switch upgrades before the New World update could be made. Each of these components has now been completed and the use of the full feature set of New World is being implemented throughout the FPD.

6. Implementing 12 hour shifts for Police Patrol Officers which put more officers on the street and vastly reduced overtime in the department.

7. Taking major steps toward the reconsolidation of the Flint City 9-1-1 with the Genesee County 9-1-1 consortium. The C-GAP grant to build the communications tower will enhance system coverage for the entire County.

8. Improving Public Safety Response Recently compiled statistics for FBI Part One violent crimes show significant improvements have resulted from the implementation of many public safety initiatives. Overall violent crime is down an average of 24% in the first six months of 2013 vs. the first six months of 2012.

C. Infrastructure (this area includes water and sewer, waste collection, roads and streets, bridges, parks, facilities as well as commercial and residential demolition targets and blight in general)

1. Stabilizing funding for water and sewer systems. This enterprise fund plunged from a $60 million dollar positive balance in 2007 to a $23M deficit in 2012. By raising water and sewer rates more than 25%, reorganizations and improving technologies we have been able to stop the bleeding and stabilize funding for the long term.

2. Significantly improving the process and cost of providing the Flint and Genesee County region with water by joining the KWA. Working with the County Drain Commissioner and others, we have begun this long awaited KWA project, which will result in several hundred million dollars in cost decreases to residents and businesses. I want to acknowledge former Emergency Financial Manager Edward Kurtz for his work and detailed analysis which brought this complicated process to a decision point.

3. Reducing costs for Waste Collection and implementing Recycling. By moving to a fee for service and contracting with the private sector waste collection vendor, we eliminated a General Fund subsidy of more than $1 million annually, and for the first time ever we are able to offer city-wide curbside recycling.

4. Finalizing the Smith Village construction project. This housing development project has languished for over ten years, important deadlines were ignored and Flint was in serious difficulty with HUD. Ed Kurtz cleaned up this tangled project, changed developers, and moved this project significantly toward its final steps. Thirty-six residences have been completed, seven have been sold and ten purchase agreements are in process.

5. Updating of City's 50 year old Master Plan Mayor Walling and Chief Planner Megan Hunter have coordinated a city-wide, tremendously inclusive planning effort. Hundreds of Flint citizens have worked on sub-committees, attended visioning sessions and worked hard to develop a plan for a revitalized Flint.

6. Reducing overtime costs in the Utilities division, by implementing new technology and reorganizations. Examples include planned elimination of the solid waste incinerator and electronic monitoring of the Third Ave. Pumping Station.

7. Disposing of unused inventory and facilities. Auctions have been used to eliminate surplus equipment and vehicles while city facilities which are no longer required and which we can not afford to operate are being sold or leased.

8. Contracting management of city golf courses and Senior Centers in order to reduce city costs and still provide access to residents.

Achieving this level of success in twenty-two months has been extremely challenging. Obstacles have arisen from many sources. The team in Flint has taken on each challenge and worked with a single-mindedness to keep Flint on the path to sustainability. We firmly believe that with continued effort, Flint City government can once again become a financially stable organization capable of delivering quality municipal services to it residents, businesses, and visitors. This route will involve continued cost reductions, investments in technology and personnel, and additional sources of revenues. The alternative of bankruptcy is not the right path – it is expensive, time consuming, and the outcome is uncertain.

There are several major issues which are currently on the horizon. The shortage of revenue to balance the FY15 Budget is the primary issue. Public Safety staffing is still at unacceptably low

levels and with current financial conditions it is likely that the number of police officers and firefighters will be reduced in order to achieve a balanced budget. This likelihood is enhanced by the pending expiration of the FEMA SAFER grant which supports the wages and benefits of 39 firefighters.

Blight is an on-going major issue in Flint. We have few resources and blight issues range from unmowed to demolition necessary properties. Flint recently received $20 million in Federal "Hardest Hit" funds to demolish approximately 1600 residences, yet we have 20,000 abandoned homes and hundreds of vacant commercial properties.

There has been disagreement within the community regarding the appointment of an Emergency Manager, about the difficult choices which were made to impose higher water and sewer rates, street lighting assessment and waste collection fees, and about other decisions. Yet, there has been no civil unrest, as threatened by a few voices. There was significant support to increase property taxes in an economically distressed city, because voters saw that this was the right choice for Flint.

With the changes of the magnitude needed to address Flint's conditions, there is no doubt controversy, disagreement, and anger can result. Often, the most vocal represent the fewest number. I have worked with many in the City of Flint who understand the severity of our condition and the scope of effort necessary to address it. If you have questions about the support given for the direction I have taken to restore Flint to financial solvency, I offer the names of the following citizens for you to contact:

1. Sheryl Thompson, former DHS Director
2. Lawrence Moon, CEO Moon Funeral Home
3. Clarence Pierce, CEO Hamilton Community Health Center
4. Tim Herman, CEO Flint Genesee Chamber of Commerce
5. Dick Shaink, President Mott Community College
6. Kenyetta Dotson, local neighborhood activist
7. Diana Kelly, Building Neighborhood Partnerships Coordinator
8. Ravi Yalamanchi, CEO Metro Community Development
9. Ruth Person, Chancellor University of Michigan-Flint
10. Phil Peters, CFO, Charles Stewart Mott Foundation
11. Jamie Gaskin, President, United Way of Genesee County
12. Pastor Rodney Stokes, chair of our public safety millage campaign
13. Pastor Phil Thompson, member of my Advisory Council
14. Pastor George Wilkerson, Chamber of Commerce Staff
15. Steve Landaal, CEO Landaal Packaging
16. John Henry, Executive Director, Flint Institute of Arts
17. Bob Emerson, volunteer adviser
18. Bill White, President Charles Stewart Mott Foundation
19. Judge Judith Fullerton
20. Superintendent Larry Watkins, Flint Community Schools
21. Melanie Gavulic, CEO Hurley Medical Center
22. Donald Kooy, CEO McLaren Health Systems – Flint
23. Edward Kurtz, CEO Baker College Corporation, former EFM (2x)
24. Armando Hernandez, Vice-president Security Credit Union
25. Elizabeth Aderholdt, CEO Genesys Regional Medical Center
26. Duane Miller, COO Flint & Genesee Regional Chamber of Commerce
27. Joe Serra, President Serra Automotive Group
28. Ghassan Saab, Sorensen Gross, Inc.
29. David Hollister, Prima Civitas Foundation, former Mayor of Lansing, MI
30. Philip Hagerman, President and CEO Diplomat Specialty Pharmacy

I have been a member of the Flint community for over thirty-five years. I grew up on the North End in one of the few integrated Flint neighborhoods; my wife and I raised five children, all of whom graduated from the Flint Community Schools. I have served Flint as a Runaway Counselor, Child Care Operator, Red Cross and United Way Director and as an elected official. I have interacted and earned the respect of a broad array of people in Flint. I hear from people all over the City on a regular basis and I have been pleased to receive their constant support and encouragement.

Please know that I will do everything possible to make this transition smooth and successful. We all have to keep our eye on the goal of putting Flint on a path to solvency, safety and regeneration.

TO: Derrick F. Jones, Purchasing Manager

THRU: Daugherty Johnson III, Utilities Administrator

FROM: Robert J. Case, WPC Supervisor

RE: **Emergency Bar Screen Replacement, Northwest PS**

Recently, there have been a number of breakdowns of the bar screen and raking mechanism at Northwest Pump Station. This device is critical for the proper function of the main sewage pumps at the station. Without it, debris in the raw sewage accumulates on the screen and blocks flow to the pumps. This in turn can result in blockage and the backup of sewage flowing to the treatment plant. Ultimately, it would result in backups of sewage into residents' basements, particularly in the northwest portion of the City.

It has now been determined that the gears, sprockets, chain, and other components of the rake mechanism are worn beyond repair. Even minor stress causes the shear pins to break, and often the chain comes off the gears. When this occurs, the channel containing it must be bypassed and drained and major maintenance must be performed to restore operation. The manual cleanout of the debris in the channel, frequent removal of rags in the pumps, and related work has caused an unacceptable increase in maintenance costs, along with downtime that could result in major sewage backups.

Your assistance is requested to secure a Purchase Order on an emergency basis to obtain new equipment to rehabilitate this station. The equipment needed is similar to that just purchased for Third Avenue Pump Station. The lowest-bid vendor for that purchase, JWC, has quoted a cost for an equivalent bar screen, rake, and washer/compactor sized for NWPS at $275,000.00.

Please use account 590-550.300-977.000 when issuing this Purchase Order.

RESOLUTION TO JWC ENVIRONMENTAL FOR BARSCREEN REPLACEMENT @ NORTHWEST PUMPING STATION

BY THE EMERGENCY MANAGER

RESOLUTION

The Utilities Department/Water Pollution Control Division is requesting an emergency purchase to replace a bar screen and raking mechanism at the Northwest Pumping Station in order to avert a backup of sewage flowing to the treatment plant, and

The Department of Purchases and Supplies has recently solicited bids for similar equipment and JWC Environmental, 4485 Commerce Dr., Buford, GA was the only company to submit a bid. The Purchasing Department has received a quote from said company and request to proceed in procuring said equipment as an emergency. The funding for this request will come from the following account number: 590-550.300-977.000; and

IT IS RESOLVED, that the Proper City Officials , upon the Emergency Manager's approval, are hereby authorized to enter into a contract with JWC Environmental for an emergency purchase to replace a bar screen and raking mechanism at the Northwest Pumping Station in an amount not to exceed $275,000.00. RESOLUTION STAFF REVIEW

June 19, 2013

Agenda Item Title: Northwest Pump Station Bar Screen

Prepared By: Robert J. Case

Background/Summary of Proposed Action:
Approval to proceed with the emergency purchase of a new bar screen equipment assembly, consisting of a bar screen, automatic rake, and washer/compactor/loader for Northwest Pump Station. The total purchase amount is $275,0000.

This device is critical for the proper function of the main sewage pumps at this station. Without it, debris in the raw sewage accumulates on the screen and blocks flow to the pumps. This in turn can result in blockage and the backup of sewage flowing to the treatment plant. The pumps could also be damaged by the low water levels behind the bar screen. Ultimately, it could result in backups of sewage into residents' basements, particularly in the northwest portion of the City.

Bar screen assemblies are custom designed and fabricated for each installation. A 12 to 16 week lead time is needed to obtain the equipment once an order is placed. It is critical to place the order as soon as possible, because the existing equipment is worn out, and subject to frequent breakdowns. It is feared that a catastrophic failure could occur soon.

Financial Implications:
Please approve an emergency purchase of new bar screen equipment for a total amount of $275,000.00 using account 590-550.300-977.000.

Budgeted Expenditure? Yes ☒ No ☐ **Please explain if no:**

Account No.: 590-550.300-977.000 ($275,000.00)

RESOLUTION STAFF REVIEW

June 19, 2013

Agenda Item Title Barscreen Units for East Pump Station

Prepared By: Robert J. Case

Background/Summary of Proposed Action:

The existing barscreen at the East Pump Station has a large hole in it, rendering it useless for screening out and protecting the main sewage pumps from rags and larger debris in the wastewater. Current raking equipment is also nonfunctional. New equipment will allow for the removal of the debris to landfill, and preventing excessive maintenance and damage to the pumps, as well as reducing man hours for removing debris from the plant head works and primary tanks.

Financial Implications:

Please issue a purchase order for the FY 2014 approved budget amount of $841,000.00. Use account 590-550.300-977.000 when issuing this purchase order.

Mr. Kevyn Orr, Emergency Manager
City of Detroit
2 Woodward Avenue, Suite 1126
Detroit, MI 48226

RE: Flint Water Contract

Dear Mr. Orr:

I am requesting permission to allow the City of Flint to blend Flint River water with water purchased from the City of Detroit. The City of Flint currently operates under a 1965 water service contract with the City of Detroit. Paragraph 14 of the contract prohibits the introduction of water from other sources, unless permission is given.

The City of Flint operates a water treatment facility that routinely treats Flint River water to ensure it meets State of Michigan drinking water standards. This is maintained as a secondary water source for our residents. However, the treated Flint River water is then dumped back into the Flint River, essentially being wasted.

The City of Flint has been in close consultation with the Michigan Department of Environmental Quality (DEQ). The DEQ has raised no objections to blending treated Flint River water with water purchased from Detroit for consumption by Flint residents. This presents no danger to the Detroit water system.

Like Detroit, Flint faces daunting financial challenges. The ability to blend Flint River water would have an immediate positive impact. And while this would reduce commodity revenue received by Detroit, Flint would continue to pay the full service charge of $738,000 per month.

Detroit has provided notice of termination of the Flint water contract effective April 17, 2014. Upon termination of service, Flint is planning to utilize Flint River water for

City Hall
1101 S. Saginaw Street - Flint, Michigan 48502
810-766-7346 FAX: 810-766-7218 www.cityofflint.com

consumption. It would be very helpful if we were allowed to gradually introduce Flint River water during the upcoming months so as to better ensure a seamless transition and safe, healthy water supply. This would also allow Detroit to make similar adjustments as needed as Flint is weaned off the Detroit system.

We believe there are other areas of potential cooperation between Flint and Detroit that would be mutually beneficial, such as purchase of pipeline. Your team has demonstrated excellent leadership for Detroit and I am hopeful that by working together we will be able to better address these infrastructure issues.

The City of Flint along with the Genesee County Drain Commissioner would like to meet with you at your earliest convenience to discuss the various issues. I can be contacted at 810.237.2035 (office) or 810.577.5263 (cell) or by email at ekurtz@cityofflint.com.

Thank you for consideration of this request. If you need further information, please let me know.

Sincerely,

Edward J. Kurtz
Emergency Manager

ELECTRONIC COMMUNICATION

June 19, 2013

Mr. Edward Koryzno
Office of Fiscal Responsibility
State of Michigan
Lansing, Michigan

Dear Mr. Koryzno:

Due to contractual relations with the DWSD, Flint is investigating the possibility of placing the Flint Water Plant (FWP) into operation using the Flint River as a primary drinking water source for approximately two years and then converting to KWA delivered lake water when available. During this two year interim period, Flint would consider supplying water to Genesee County provided the FWP proves capable of treating and supplying the required 40 MGD maximum day demand. This new operational scenario along with the reduction in maximum day capacity to 18-mgd, after KWA System completion, creates the need for a modified plan that balances the short and long term needs for Flint.

The FWP had extensive upgrades under the State's Drinking Water Revolving Fund program in order to serve as a back up supply in case of loss from DWSD. This upgrade was done as Phase I. The subsequent Phase II analysis was done to bring the plant to primary status but not implemented until this point.

The City of Flint is seeking to enter into a sole source contract with Lockwood, Andrews & Newnam, Inc. (LAN) whose professional staff engineered and implemented Phase I as well as developed the Phase II report.

The scope of services has two primary tasks that must be performed to develop a cost effective plan for Flint's immediate and long term needs. DWSD has implemented the termination clause of our supply contract effective April 2014. In order to meet the short schedules, some portions of these tasks will be performed concurrently, while some may be performed consecutively.

Task 1 is a plant test run scheduled for this summer to test the treatment systems and hydraulic capacity of the plant.

Task 2 would be the development of an engineering planning report to define the immediate and long term improvements necessary for using the Flint River as a primary source of water.

See Appendix A and B for detailed cost proposals and scope of services.

Thank you,

Edward J. Kurtz
Emergency Manager

Appendix A

DETAIL LEVEL OF EFFORT BY TASK
LOCKWOOD, ANDREWS AND NEWNAM, INC.

PHASE II - CITY OF FLINT WTP REHABILITATION
Date : June 10, 2013

TASK I - WATER TREATMENT PLANT TEST RUN SUPPORT				
CLASSIFICATION	HOURS	BILLING RATE	LABOR COST	TOTAL
Project Director	96	$ 240.00	$ 23,040.00	
Senior Project Manager	40	$ 220.00	$ 8,800.00	
Project Manager	120	$ 180.00	$ 21,600.00	
Project Engineer (PE)	80	$ 150.00	$ 12,000.00	
Design Engineer (EIT)	120	$ 120.00	$ 14,400.00	
Project Controls Manager	16	$ 105.00	$ 1,680.00	
Total Staff Hours	336			
Total Labor + Direct Overhead			$ 81,520.00	
Sub-Consultant(s)				
Expenses				$2,500.00
Total Task I				$84,020.00

TASK II - ENGINEERING PLANNING REPORT				
CLASSIFICATION	HOURS	BILLING RATE	LABOR COST	TOTAL
Project Director	24	$ 240.00	$ 5,760.00

Total Task II				$86,980.00

Appendix B

Task 1: Plant Test Run

1) Meet with FWP staff and other stakeholders as necessary to review current condition of the water plant facilities and equipment. Develop a preliminary list of issues or concerns that will impact the planned test run.

2) Obtain copies and review existing Phase I documents as provided by Flint. Recreate design calculations, such as plant hydraulic headlosses, as needed to develop plant test run parameters.

3) Perform plant site visit with FWP staff to ascertain the condition of the facilities and equipment.

4) Develop plant test run protocol for submission to MDEQ.

5) Meet with MDEQ representatives to review and discuss test run protocol. Incorporate MDEQ comments into final plant test run protocol.

6) Provide assistance and training/support to the FWP staff on implementing the Test run protocol.

7) Collect data and information generated during plant test run. Evaluate the plant and unit systems performance for water quality and hydraulic capacity.

8) Meet with Flint staff, MDEQ and other stakeholders as necessary to discuss plant run findings and present conclusions and recommendations. Prepare and submit interim technical memorandum to City of Flint outlining conclusions and recommendations from the plant test run.

9) Schedule, coordinate and meet with equipment and material vendors as required.

Appendix B (continued)

Task 2: Engineering Planning Report

1) Using the technical memorandum as referenced in the preceding section, develop conceptual plan for both immediate and long term improvements.

2) Review site plan information and utilities to define needs and constraints related to immediate and long term proposed improvements.

3) Attend frequent meetings with Flint utility staff to discuss and review potential and recommended improvements to meet the needs for immediate and long term water supply needs

4) Define the finished water quality parameters and goals.

5) Develop plans for temporary facilities as needed, such as lime sludge disposal, to minimize cost for the interim period.

6) Define the basis of design for the needed improvements along with an opinion of probable construction cost referenced to a specific ENR Index value.

7) Re-evaluate issues defined in the 2011 Analysis of the Flint River report for permanent withdrawal versus interim withdrawal from the river such as Holloway Reservoir water levels and Flint River minimum flow requirements.

8) Submit a draft of the planning report to Flint for review.

9) Attend up to four meetings with Flint staff and the MDEQ to finalize the planning report.

10) Incorporate review comments into planning report and deliver final to Flint.

RESOLUTION STAFF REVIEW

Date: June 17, 2013

Agenda Item Title: Resolution Authorizing Approval to Enter into a Professional Engineering Services Contract for the implementation of Placing the Flint Water Plant into Operation

Prepared by:
Yolanda Gray, Utilities Accounting Coordinator

Summary of Proposed Action:
Resolution authorizing the City of Flint to enter into a sole source contract with Lockwood, Andrews & Newnam for professional engineering services to place the Flint Water Plant into operation using the Flint River as a primary drinking water source.

Financial Implications:
$171,000.00

Pre-encumbered?: Yes____ No __x____ Requisition: Funding will be available in the FY14 Utilities Administration budget.

Account No. FY14 591-536.100-801.000

Other implications (i.e. collective bargaining):
No other implications are known at this time.

Staff Recommendation: Recommend Approval

CITY OF FLINT
OFFICE OF EMERGENCY MANAGER
EDWARD J. KURTZ

June 19, 2013

Mr. Andy Dillon, State Treasurer
Michigan Department of Treasury
Lansing, MI 48922

Re: JWC – Northwest Pump Station

Dear Treasurer Dillon:

This is to request your approval to enter into a no bid contract with JWC for emergency repairs to Flint's northwest pump station. As described in the attached memorandum from Robert J. Case, Water Pollution Control Supervisor, these repairs are critical for the proper function of the main sewage pumps at the northwest pump station.

The City recently made similar repairs at the Third Avenue pump station, and the low-bid vendor was JWC. The needed equipment is customized for each installation, and its design and fabrication will take approximately 12 - 16 weeks. On that basis, and due to the emergency nature of the necessary repairs, I recommend a no-bid contract with JWC to perform the repair work at the northwest pump station. The estimated cost is $275,000.

The Local Financial Stability and Choice Act (Public Act 436 of 2012) states that "[e]xcept as otherwise provided in this subsection, any contract involving a cumulative value of $50,000.00 or more is subject to competitive bidding by an emergency manager. However, if a potential contract involves a cumulative value of $ 50,000.00 or more, the emergency manager may submit the potential contract to the state treasurer for review and the state treasurer may authorize that the potential contract is not subject to competitive bidding." MCL 141.1552(3).

I am requesting your approval of a no bid contact with JWC to perform emergency repairs to the northwest pump station at an estimated cost of $275,000. If you need any further information concerning this request, please let me know. Otherwise, thank you for your consideration of this matter.

Very truly yours,

Edward J. Kurtz
Emergency Manager

City of Flint Financial and Operating Plan – FY 2013 – Third Update
June 30, 2013

Introduction
This update to the Financial and Operating Plan for the City of Flint is submitted by the Emergency Manager for the City of Flint to Governor Rick Snyder, through the Department of Treasury for the State of Michigan, in accordance with Public Act 436, Section 11.

The City of Flint had previously submitted a Financial and Operating Plan under PA 72 and was not required under PA 436 to submit a new plan. However, as this is the end of the 2013 fiscal year and end of the service of Emergency Manager Kurtz, the City felt it was appropriate to prepare an update to the current plan. This is also the end of the first full fiscal year under the administration of the Emergency Manager. The FY 2014 Budget and Five Year Strategic Plan has been adopted and in October, 2013 a City Wide Master Plan will also be adopted.

This update will also serve as Emergency Manager Kurtz' closing memorandum as specified in the Emergency Manager's contract with the State of Michigan. On June 26, 2013 former EM Michael K. Brown has been reappointed by Governor Snyder as Emergency Manager for the City of Flint.

This report includes a summary of the financial conditions and goals for the City of Flint, the plan to conduct the operations of the City and the on-going actions being taken to resolve the financial emergency. This update will be posted on the City's website: www.cityofflint.com .

Summary of the EM/EFM Appointment Sequence and Development of the Operating and Financial Plan
The Flint Financial Review Team determined in November 2011 that the City of Flint was in a financial emergency. See Attachment #1.

On December 1, 2011 Governor Rick Snyder appointed Michael K. Brown as Emergency Manager. EM Brown developed the Financial and Operating Plan utilizing the resources of a five person Advisory Committee as well as five additional advisory committees. EM Brown sought broad expertise to ensure public engagement and to maintain a sense of continuity with the Mayor and City Council. In fact, all nine City Council members and over fifty other citizens participated in the advisory committees.

EM Brown's original Financial and Operating Plan (45 Day Plan) was submitted to the State Treasurer on January 15, 2012; the first update to the Plan was submitted on June 1, 2012. On August 8, 2012, PA 4 was suspended and Edward J. Kurtz was appointed Emergency Financial Manager under PA 72. (Mr. Brown stepped aside as he was prohibited from serving as EFM due to his recent service as Interim Mayor for the City of Flint.)

EFM Kurtz established a new Advisory Committee in accordance with the requirements of PA 72.

Utilizing the Advisory Committee and the City of Flint management team, EFM Kurtz presented a second update to the Financial and Operating Plan and submitted this to the State Treasurer on February 8, 2013.

Operations of the City of Flint

Shortly after his appointment as EM, Michael Brown took steps to reorganize the city government operations including: elimination of departments, consolidation of departments, elimination of management level positions, adjustment of the compensation of elected and appointed officials, elimination of the Civil Service operation and the Office of Ombudsman.

Management appointments were made to ensure that the essential services necessary for the public's health, safety and welfare are provided and to continue conducting all aspects of the City of Flint's operation within the resources available. Necessary employment contracts were extended with the approval of the Treasury Department.

Department management reconfigurations were completed in anticipation of reductions in staffing levels as provided in the FY 13 Budget (See Attachment # 2 Organizational Chart FY 13). Subsequently, as part of the FY 14 Budget process a Strategic Plan was adopted and more changes in the organizational structure occurred. The primary change was the inclusion of a new Planning and Development Department (See Attachment #3 Organizational Chart FY 14).

When PA 436 became effective in March 2013 the City Council members' and Mayor's compensation was eliminated. EM Kurtz partially restored compensation for Mayor and Council through Orders 1 and 2. These orders also defined specific responsibilities and requirements. For example, the City Council members must complete Level One of the Michigan Municipal League (MML) core course for municipal government and must receive the MML education award with in one year.

All Orders and Directives issued by the Emergency Financial Manager (under PA 72) and Orders issued by the Emergency Manager (under PA 436) are listed in Attachment #4: Orders and Directives of the EFM and EM.

Financial Status

The financial condition of the City of Flint has begun to improve, with revenues and expenses generally tracking with budget projections. While the FY12 results showed an increase in the accumulated deficit, that increase was anticipated, due to a decision early on to focus efforts on developing and implementing a budget for FY13 that would maintain essential services while moving the City toward long term

financial solvency.

These efforts are proving successful. To-date, the FY13 budget was balanced without increasing the deficit; and revenues and expenses have been generally in line with expectations. The budget for FY14 has been adopted, with anticipated revenues and expenses balanced. In both FY13 and FY14, difficult decisions have been made with regards to staffing, fringe benefits, organizational structure, levels of service, and increases in fees and taxes.

Development of the FY14 budget was done in the context of developing budgetary projections through FY18, and recognizing the need to eliminate the City's accumulated deficit. With a desire to develop and maintain a multi-year perspective on city resources and operations, the development of the FY15 budget is now beginning. While FY15 will be extremely challenging due to continued property value declines and the anticipated loss of some major grants, the budget for FY15 will be realistically balanced.

Finally, as a result of analyzing projected revenues and expenses for the next five years, it has become clear that the City will continue to face a structural deficit in the area of $3 million to $5 million annually. More than anything, the City's stagnant revenue streams (no growth projected over the next 5 years) and its high amount of legacy costs ($37 million for FY14) have created this situation.

This structural deficit essentially precludes the City from stabilizing service levels even at minimal levels, and prevents it from addressing significant unmet capital needs (currently estimated at more than $300 million). Without structural change, this situation is not sustainable and the City will not achieve even a minimal level of financial solvency in the long term.

While bankruptcy has been mentioned as a possible solution to this, investigation of the alternative shows it to be expensive, slow, and with outcomes that are far from certain. However, investigation of an alternative which focuses on improving the City's revenue stream while continuing to reduce legacy costs shows promise. For example, an increase in the local income tax rate to the levels afforded other urban centers, coupled with significant additional changes in health care and pensions for active employees and retirees appears to have the potential to overcome the $3-$5 million structural deficit while providing a similar amount for stabilizing services and beginning to address capital needs.

Cash Flow as of June 30, 2013

Cash flow has improved with the receipt of revenues from the public safety millage, street light assessment, and waste collection fees. Pooled cash on hand is now in excess of $25 million, compared to $13 million as of December, 2011. However, the General Fund still relies heavily on borrowed cash as a result of its $19 million accumulated deficit. This cannot be resolved without borrowing, as stated in the Draft Deficit Elimination Plan submitted to Treasury in January 2013. As of this date, Treasury has not approved the Deficit Elimination Plan.

FY13 Budget – Preliminary Year End Projection
As of June 1, 2013, revenues and expenses are generally on target. The budget was amended in December to reflect some adjustments to revenues and expenses, including the proceeds of the voter approved millage for police and fire protection, projected revenues and expenses for the operation of the City lock-up; and the extension of a public safety grant from the Mott Foundation which provided continued funding for 11 law enforcement officers. Additional Budget amendments were adopted based on an unplanned special election, the proceeds from two auctions, utility refunds and other minor issues. Income tax revenues appear to be slightly less than projections, and over expenditures in Fire Department overtime have been addressed.

Absent any catastrophic event, such as an adverse decision on modifications of retiree health care, FY13 is projected to end with revenues slightly exceeding expenses.

FY13 Budget Decisions
The FY 13 budget was balanced realistically, and encompassed significant revenue increases and expenditure reductions. The FY13 budget process started with a projected gap of $25 million between projected revenues and projected expenses. The result was a total budget of $192 million, of which $82 million is sewer and water; $58 million is General Fund and $30 million is Federal CDBG.

The budget encompassed expenditure reductions which included the elimination of nearly 150 positions (20% of the workforce); employee concessions including a restructuring of health and pension benefits and employee costs; and various organizational changes.

The budget also recognized the implementation of new health care plans and pensions benefits for active employees, as well changes in healthcare plans for retirees. These changes reduced the City's OPEB liability from nearly $900 million to less than $400 million.

The change in retiree health care is the subject of litigation in Federal District Court, where a temporary restraining order has been issued and is being appealed. Should the City be precluded from implementing these changes in health care for retirees, there will be a projected (unbudgeted) increase in expenses of $1.7 million in FY13 and more than that in FY14 and beyond, this will be devastating to efforts to return Flint to financial solvency. On June 25, 2013, the court denied the City's request to stay the order and in fact, applied the injunctive order to all retirees as a class (without actually certifying a class). The City's legal counsel has recommended the City immediately comply with the court's order. The City has authorized legal counsel to immediately apply for relief in the 6th Circuit Court.

For future employees, city retiree health care will no longer be an option, and the traditional defined benefit pension plan for non-police and fire employees will be replaced with a hybrid pension plan. There are also numerous changes which increase management flexibility and reduce other employee costs. Note: The City of Flint basically is operating a Medicare system for retirees from the time they retire (as early as

their mid-forties to early fifties) at the same cost as regular employees ($5,000 to $17,000) which is unsustainable.

The FY13 budget also implemented new revenues in order to provide the level of revenues still required – in spite of expense reductions – to continue the marginal level of city funded public safety personnel and basic city services. These revenues include numerous fee increases; a $143 annual fee for waste collection (replacing a dedicated 3 mill tax levy); a $62 special assessment fee for operation, maintenance, and improvement of street lights (in the past this was a $2.85 million general fund expense); and an overall 25% increase in water and sewer rates (12.5% water; 45% sewer). Unfortunately, the reliance on fees and assessments will create hardship for many of the City's residents. However, the choices for increasing revenues at this time were limited. For those homeowners who qualify for the property tax exemption, the City recently will waive the street light assessment ($62) and the ready to serve charge on the water bill ($52 approximately).

In November 2012, a 6 mill Police and Fire Protection Millage was approved by Flint voters. The first year of this millage is expected to generate $5.3 million. The Emergency Manager also issued a resolution (2012EFM101) on October 17, 2012 as a charter revision requiring that the new millage revenue would be in addition to the 55.5% of unrestricted General Fund dedicated to Police and Fire departments. The percent dedicated to police and fire will increase to 60% in Fiscal 14.

Though the FY13 budget was been implemented as planned, the City still faces several legal challenges. While the challenges may not be sustained in the long term, any impediments to implementing the budget will have severe financial impacts.

For example, legal challenges which prohibit the City from implementing revenue increases or expenditure decreases will require immediate actions to further reduce spending – including public safety – and may impact the City's ability to function at an adequate level, particularly in light of the marginal cash flow.

Potential challenges the City may face from budgetary perspective include ones associated with the numerous rate increases incorporated into the budget, changes in retiree health care, and the unilateral implementation of changes to three collective bargaining agreements. It should be noted that through the Emergency Manager the City of Flint was able to reach tentative agreements with three of the six bargaining units.

To this point, the City was sued over the implementation of increased water and sewer rates, by the President of the City Council et al. This is a prime example of litigation that could impede the COF's ability to maintain fiscal solvency. With regard to this lawsuit, the City filed a motion to dismiss and in late June 2013 the court dismissed this suit.

Two additional law suits were filed: in late May 2013 AFSCME Local 1600 is seeking to repeal the contract imposed by the EM in April of 2012, and URGE (a retiree organization) is seeking to negate the transfer of the pension plan from FERS to MERS.

FY 12 Audit

The Comprehensive Annual Financial Report (CAFR) for FY12 was completed and was filed with the state in a timely manner. The results were as expected, with fewer auditor comments than in past years. Deficits exist in the General Fund ($19.1 million) and in the Water Fund ($8.8 million).

In the FY 13 budget document, prepared in April 2012, the accumulated deficit for the FY12 General Fund was projected to be $18.1 million. However, this projection did not include the $1.54 million write down for the value of Genesee Towers. Adding the write down to the projected deficit of $18.1 million would have resulted in a total of $19.7 million.

In the FY12 CAFR, the amended budget projected a deficit of $16.3 million. However, this projection did not include the $1.54 million write down for Genesee Towers. It also included $739,406 in federal grant revenues and $602,192 in local revenues which did not materialize. Taking these items into consideration, the deficit projection would have been $19.2 million.

The $19.1 million accumulated deficit reflected an excess of expenditures in the General Fund for FY12 of $11.1 million. This was anticipated by the Emergency Manager shortly after being appointed, which was almost six months into the FY12 year. Given that FY12 was nearly half over, and that significant unplanned reductions in services, primarily public safety, would need to occur if the projected deficit were to be immediately eliminated, the decision of the Emergency Manager, in consultation with Treasury, was to contain costs as much as possible but without significantly reducing services – especially public safety - for the balance of the year. Instead, focus was concentrated on developing a budget for FY13 which would move towards restoring Flint to long term financial solvency. It was projected that as a result of this decision, the deficit for FY12 could have been as much as $12 million, resulting in an accumulated deficit of $20 million.

The deficits identified in the City's Comprehensive Annual Financial Report for FY12, the year ended June 30, 2012, are follows:

General Fund -	$ 19,184,850
Water Supply Division -	$ 8,758,091
Economic Development Corporation	$ 119,439

FY 11 Deficit Financing

In April 2012 the Emergency Manager filed a 2011 Deficit Elimination Plan focused on the accumulated deficit as of June 30, 2011. That plan indicated the City's intent to request authorization to borrow approximately $9 million in Fiscal Stabilization Bonds in order to address the accumulated General Fund deficit once a credible FY13 budget was in place. The 2011 Deficit Elimination Plan was approved by the State. On May 24, 2012 the City filed an application for borrowing with the State Administrative Board, and the Department of Treasury has issued a memorandum stating that the request satisfies the

necessary statutory requirements. However, Treasury did not authorize the borrowing as proposed and approved in the 2011 Deficit Elimination Plan.

While this borrowing request addressed the accumulated FY11 deficit, there was an additional deficit at the end of FY12 of approximately $10 million. It is estimated at this time that an additional $10 million will need to be financed in order to address the FY12 deficit. However, the FY13 budget as adopted should create no additional General Fund deficit. There will be ongoing deficits in the water and sewer funds, but only as related to unfunded OPEB liabilities.

Deficit Financing 2012

FY12 ended with an accumulated $19.1 million deficit in the General Fund. The City has shared with Treasury a draft plan to eliminate the deficit over the next five years. The draft plan proposes a mixture of borrowing ($12 million) and dedicating future revenues ($7 million) over the next five years (FY14 to FY18).

The deficit of $8.8 million in the Water Fund is less than the unfunded OPEB liability. Since the City is not in the position to address OPEB liabilities throughout the City, there is little reason to increase water rates to eliminate this deficit. Additionally, the City's approach to containing its OPEB liabilities has been to restructure its active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million. To the extent these efforts are successful; the deficit in the Water Fund will be lessened.

Treasury has not responded to this draft plan.

Revenue Enhancement Activity

As noted in "FY13 Budget Decisions" section, several new revenue actions were implemented for the FY13 Budget: waste collection 3 mils eliminated and fee established, Street Lighting Assessment established, new 6 mil Police and Fire Protection approved by voters, also fees for licenses and permits were adjusted.

The EFM via Order No. 8 established the Poverty Exemption to the Street Lighting Assessment. Individuals who qualify for relief from property taxes may apply for an exemption from the street lighting assessment as well.

Also, through EFM Order No. 11, water service procedures were modified. The City's procedures and rate structure for the provision of water service has a substantial financial impact on the City. The Emergency Financial Manager has determined that it is necessary to make a number of changes to these procedures.

The following new procedures were adopted regarding water service:

1. Property owners who apply for and are granted the annual poverty tax exemption will also be exempted from the monthly ready to serve charge for

water service. Exemptions will be for the period of July 1 to June 30. Exemptions from the March Board of Review will begin July 1. Exemptions from the July and December Board of Review will be retroactive to July 1.

2. For individuals who have a "Decision Notice" from the Michigan Department of Human Services (DHS), wherein DHS has agreed that it will pay the water deposit, the City will accept the DHS maximum deposit payment (currently $200). However, the individual will remain responsible for the affidavit fee and the water turn-on fee.

3. For customers where the water has been shut off and a fee is required to turn the water back on, the fee will be reduced to $100 if the customer agrees to a payment plan for all unpaid water and sewer charges.

4. Same day turn on service will be available ONLY if the customer pays the $175 fee AND pays all unpaid water and sewer charges billed in full.

5. The Infrastructure Division will develop an implementation and business plan for aggressively pursuing alleged instances of water theft. The plan will also address increasing the capacity for quickly shutting off water and reducing the time between the delinquency and the actual shut off.

The Treasury Department has also created the Competitive Grant Assistance Program (C-GAP) as a means of encouraging shared services implementation. The City of Flint participated in five C-GAP applications which included Human Resource Hiring and Management system sharing with the Genesee Intermediate School District and Genesee County; a fiber optic cable expansion also with Genesee Intermediate School District and Genesee County; Criminal Justice system and Courts Electronic Workflow Initiative with Genesee County, City of Flushing and plans for expansion throughout Genesee County; a Genesee County Regional Purchasing Collaborative with Genesee Intermediate School District and Genesee County; and a proposal to expand and strengthen the 9-1-1 communication tower system with the City and the Genesee County 9-1-1 Consortium. The City has been awarded a $1.8 million grant for the 9-1-1 communications tower system, an important step necessary to potentially merge with the County 9-1-1 Consortium system.

FY14 Budget and Strategic Plan

On June 7, 2013 EM Kurtz signed Order No.4 adopting the fiscal Year 2014 budget. This is now a second year for which a balanced budget was adopted. Conservative, realistic revenues and expenses were included. This budget does include the reduction of 27 employees; however no public safety employees were reduced. See Attachment #5 FY 14 Budget Narrative pgs. 32 - 44 of Attachment #6 Setting a Sustainable Course for the City of Flint.

Prior to the detailed development of the FY14 Budget, all departments and divisions participated in creating a Strategic Plan for 2014 – 2018. The Vision, Mission, Overall

Goals have been specified. Each department and division identified their specific functions/goals and key objectives.

The content of the strategic plan will be the basis for planning future budgets, evaluating department/division management, and deciding whether and when to pursue grants.

The Strategic Plan includes a section entitled "Five Year Financial Projections and Challenges City of Flint, FY14-FY18". *In summary:*

> Years 2—5 show the continuing challenge of the City's structural deficit, with property tax revenues continuing to fall through FY15, and then stabilizing but with no growth until FY18. At the same time however, legacy and compensation costs are projected to increase by 5% per year, and major grant sources will disappear. The City will be faced with a significant challenge of attempting to choose between reductions in public safety and other reductions; however, finding other reductions may not be possible, given the minimal level of service provided. Again, without additional new significant levels of revenue, there is little ability to improve services or address continually increasing capital improvement needs.

Within the next few months the City plans to prepare the financially challenging FY15 Budget.

Key Actions Taken To-Date

The city continues to review all departments and services for potential merger, consolidation, contracted service, shared services with other governmental entities, privatization or elimination. As a result of these reviews determine if these functions should be subsidized with general property tax dollars, what will be paid by the users and what services can be eliminated.

Finance/Administration/IT

Finance Department

The Finance Department is proceeding with the following projects:

- implementation of a Procurement Card system and associated changes to the City's Purchasing Policies,
- completion of the update of the pension and OPEB liabilities,
- continued aggressive monitoring of revenue and expense activities, with particular emphasis on revenue collections, position counts and overtime expenditures,
- planning and implementation of employee development programs focusing on financial management, supervision and labor relations, and leadership development.
- Reorganization of city accounting functions based on the analysis and recommendations of an organizational study recently completed by Plante Moran

Grant Management
Finance reviewed the process for all grants to the City of Flint for appropriate use of funds, potential for continued funding, and timely reapplication. A new grant pre-submission approval system has been operational since March 2013 following EM Order No. 10.

Economic Vitality Incentive Program (EVIP) Requirements
The City of Flint has met all reporting requirement dates for Economic Vitality Incentive Program (EVIP) in order to qualify for all disbursements of State Shared Revenue. Each report is available on the City's website www.cityofflint.com through Munetrix Citizens Guide to Finances and Dashboard.

Transition of Flint Employee Retirement system (FERS) to Michigan Employees Retirement system (MERS)
The FERS to MERS transition nears completion. Retirees have been receiving their monthly checks from MERS since October 18 2012. The transfer of the administrative components will be complete by July 1, 2013. A lawsuit was filed in late May 2013 by URGE against the City seeking to force the City to negate the move of the pension funds to MERS,

Treasury Division
Income tax processing is being handled through a joint project with the Cities of Grand Rapids and Lansing. Beginning in FY14, income tax collections will be handled by Innovative Software, the current vendor for the City's income tax software. Also of note, the city is operating with a shared Treasurer between the City of Burton and Flint.

The City contracted with Plante Moran to conduct a study to evaluate the potential of shared services between the City and Genesee County treasury functions. This study has been funded by the Mott Foundation.

Collection rates are an on-going concern. This year, the city will be made whole via full payment from the County. In subsequent years those shortfalls must be repaid to the County. The City estimates that only 33 % of property taxes and assessments have been paid, water and sewer delinquencies have grown to 40 %.

In an effort to improve income tax collection the city purchased the 2010 State Tax role and has begun sending notices to 8800 individuals, both residents and non-residents, who have not filed City tax returns. The total estimated tax value from uncollected income tax for the 2010 tax year is between $300,000 & $400,000. The City also plans to pursue uncollected income tax from previous years.

Assessment Division
The Assessment Division has been operating with a part-time Level IV Assessor. A member of the Division is currently completing Level IV assessment certification.

Currently, the Assessor is projecting City of Flint property values to stabilize in FY15.

Human Resources Department
Continued reduction in personnel has strained the capability of departments to complete compliance and reporting work. Both short and long term vacancies create knowledge deficits which are becoming most difficult to overcome. This will be exacerbated as further staff reductions are required.

HR has joined the Genesee Intermediate School district in using APPLITRAC system for job postings and the initial hiring process.

City-wide management and supervisory training was re-established after an almost fifteen year absence.

Labor Agreements and Implementation
During the tenure of EM Michael Brown, Labor Counsel held meet and confer sessions with the City's six bargaining units. A target of 20% equivalent wage reductions was achieved. Tentative Agreements were reached with four of these bargaining units. As contract settlement was necessary prior to adopting the FY13 budget, the EM invoked the 19K provision in Public Act 4 from the State Treasurer for the bargaining units which had not achieved Tentative Agreements (EM Orders 18 and 26) and with Local 1799 which had approved a TA but had not ratified (EM Order 27).

EFM Edward Kurtz has held additional sessions with AFSCME, Flint Police Officers Association (FPOA) and the Firefighters Union. In January 2013 AFSCME and the City reached agreement for the privatizing of waste collection and demolition. FPOA has notified the City that they have filed a lawsuit to return to arbitration. FPOA is asking for a return to the status quo (prior to EM imposed contract). The Firefighters Union and the City are working on overtime containment. In late May, a lawsuit was filed by AFSCME Council 25 seeking to overturn the contract imposed by the EM is April of 2012.

A Model Contract is in development, beginning with the FPOA. The City's goal is to streamline and standardize the contracts. It is hoped that these models could be used throughout the State.

The City has recently contracted with a part-time Labor Relations Specialist; through his efforts dozens of past grievances have been settled and only a handful of grievances remain outstanding.

Retiree Health Insurance Revisions
The City's approach to containing its OPEB liabilities has been to restructure its active and retiree health care benefits, and to eliminate the promise of retiree health care for new employees. The changes have had a significant impact on the City's OPEB liabilities, reducing the total unfunded liability from nearly $900 million to less than $400 million, and reducing the Annual Required Contribution (ARC) from $60 million to $22 million. As noted earlier, on June 25, 2013, the court denied the City's request to stay the order and in fact, applied the injunctive order to all retirees as a class (without actually certifying a class). The City's legal counsel has recommended the City immediately comply with the court's order. The City has authorized legal counsel to immediately apply for relief in the 6th Circuit Court.

Risk Management Office is reviewing various Employee/Retiree health care options including plan design, delivery systems, Medicare Advantage, Medicare Wrap Around, benefit carve-outs, etc. in an effort to control health care costs.

Retiree Prescription Drug Program Revision
City of Flint has suspended the planned implementation of a modified prescription drug program which required the issuance of a generic drug unless a name brand drug is determined to be medically necessary. This action resulted due to a lawsuit, Yurk et al. v. City of Flint, pending in Genesee County Circuit Court before Hon. Archie Hayman. Judge Hayman granted a temporary restraining order and has completed a hearing on plaintiffs' motion for preliminary injunction. However, the court took the motion under advisement and has not issued a decision.

Dependent Eligibility Audit
The Risk Management Office has completed the process of conducting a dependent eligibility audit. Three hundred eighty-one dependents were identified for removal from the City's health plans. This reduction is estimated to save $1.3 million in the first year, FY13.

Information Technology
Prior to the start of FY13 the Information Services Department eliminated all but two of the existing positions. Through reorganization, 6 of 9 employees were rehired under new job descriptions. The new structure allowed more flexibility and greater utilization of personnel. Several large scale projects are nearing completion including: installation of a back-up server for Public Safety and 911, installation of new switches which will allow for a more complete use of Public Safety's data collection and record keeping systems.

Other projects are on track, primarily the system upgrade of the BS&A ERP. Several legacy projects are nearing final milestones: installation of a new

visualization server cluster, installation of 300 new desktop terminals and a cost savings pump station automation project.

Fleet Division
The City has consolidated the management of the City's fleet under the Fleet Division. This division will oversee the specification, purchase, repair and maintenance and replacement schedule for all city vehicles and wheeled equipment. The Division recently participated in a successful auction of surplus equipment.

City Clerk
As part of the reorganization, the City has transferred the responsibility for Business Licensing to the newly formed Department of Planning and Development. The City recognizes that it is losing significant revenue from unlicensed businesses and this change is designed to insure that all businesses in the City of Flint are licensed and inspected.

Office of the City Attorney
The City Attorney is continuing with efforts to improve litigation management through claim evaluation, claim reporting, attorney training and trial preparation. The City Attorney continues to emphasize the "litigation team" approach to case handling, with weekly review of pending matters and discussion of how best to protect the City of Flint's legal interests.

With the help of interns from Michigan State University, all ordinances are being reviewed. Charter revisions which would increase flexibility for department reorganization and budget flexibility **are also being considered.**

Criminal Justice System Advisory Council (CJSAC)
Based on input from the State Police, Governor's Office and a Michigan State University Criminal Justice Study, it is clear that the Genesee County Criminal Justice System and the Flint Police Department could benefit from improved coordination and policy development.

In September 2012 the first meeting of the Criminal Justice System Advisory Council (CJSAC) was held. Eight workgroups were established. Through these work groups a number of cooperative projects, streamlined operations and new collaborations have been identified; these were reported at the second CJSAC meeting in January 2013. A Treasury Department C-GAP application was originated and submitted through this process.

68th District Court
The City currently funds the operation of the 68th District Court; in FY13 this amounts to $5.4 Million - which comprises 9.2% of the General Fund Budget. The percentage of General Fund expense allocated to District Court has increased about 1.2% as compared to five years ago. It is anticipated that this percentage will again increase .5% for FY14.

(This is a very rough estimate). This significant portion of the City's General Fund needs to be studied closely and recommendations developed to meet this required activity while containing and reducing costs. The EFM strongly encourages the State to continue the process of working to consolidate the 67th and 68th District Courts.

Infrastructure/ Development

Utilities Division

Karegnondi Water Authority (KWA)

The City Council, as well as EM Kurtz, has adopted resolutions to enter into a contract with KWA water authority to partner with Genesee County, City of Lapeer, Lapeer County and Sanilac County in the construction of a pipeline to deliver raw water to the City of Flint. This decision followed many months of analysis by the City of Flint, the Genesee County Drain Commissioner's office, the State Treasurer and ultimately, Governor Snyder. This conclusion to join KWA is momentous for the City and the entire region. The City looks forward to a safe, reliable water supply through which water costs can be stabilized for the KWA participants.

Detroit Water and Sewer Department has notified the City that it will terminate the contract with the City for the deliver of water in 12 months. The City is currently exploring its options for water service between May 2014 and the full operation of the KWA pipeline. High consideration is being given to utilizing the Flint River, and/or blending River and DWSD water. The City of Flint is also considering contracting with DWSD to be the back-up water source for the City.

There are many other points of negotiation regarding sections of the current 72" pipeline which are yet to be conducted between the City, the Genesee County Drain Commission and the DSWD.

Water Department

An evaluation is underway to determine what efforts can be employed to create an effective Preventive Maintenance plan which focuses on controlling water loss (leakage). This is expected to involve a combination of outsourcing, in-house work, and shared services with the County.

There are currently no water main leaks and the crews are now working on the small leaks such as curb boxes, etc. A plan is being reviewed to replace all water meters in the City. Currently $700,000 has been allocated in Fiscal 14 for that purpose.

Discussions have begun with the Genesee County Drain Commissioner on a wide range of shared services and partnerships for both water and sewer operations.

Sewage Treatment Division

The automation of one of the City's pump stations (which is currently staffed 24 hrs a day) has an expected completion date of July 2013. This will result in the elimination of overtime and a savings of over $500,000 annually.

The planned shutdown of the City's incinerator has begun with engineering plans for a new load-out facility and is expected to reach completion in approximately 8 months. The estimated savings is $400,000 annually.

U. S. Department of Environmental Quality S2 Grant

An S2 DEQ grant to study infrastructure condition for water pollution control was accepted. The study was defined to encompass the City's entire sanitary sewer system including the overall collection system, the capacity and condition of the system, potential upgrade recommendations to the lift stations and the pumping stations, and to make recommendations for necessary investments to maintain the system.

Storm Water Management Plan

A new storm water ordinance that shifts the cost allocation to the larger users is in process of being developed.

Swedish Biogas International (SBI)

In conjunction with the City of Flint sewage treatment plant shut-down of the sludge incinerator, Swedish Biogas International (SBI) proposes to accept sludge output and produce electricity. The city will agree to purchase the electricity at a reduced rate compared to purchase from Consumer's Energy. The SBI contract has completed the City's review process and is now awaiting SBI's Board of Directors' authorization.

Transportation Division

Solid Waste Management Division

In early February 2013, the Infrastructure Department signed a contract with Republic Services, a private waste collection company. The City of Flint will no longer collect or dispose of household waste. Through this new contract, residents of Flint now have access to curb-side recycling. It is expected that the fee for waste collection service will continue to be billed and collected by the City.

Outsourcing of Sanitation is now complete and the process of establishing city composting is underway with a permit application to DEQ submitted and a site plan of action being prepared for the EPA.

Street Maintenance and Engineering
Discussions have started with the County Road Commissioner on possible shared services.

Both road paving and engineering are seasonal activities and these are at ever decreasing levels. These are under review as areas to downsize or eliminate. Consideration is being given to developing service sharing arrangements or creating the ability to source on an as needed basis. Only crack sealing and pothole repair will be conducted this season. There will be no repaving of any City streets.

Facilities Management
A private company held an on-line auction in January 2013 to dispose of surplus equipment from a variety of departments in the City. This one day auction netted $130,000. A second auction was held in May 2013 which netted an additional $250,000. An auction at the impound lot was held in June 2013, netting over $30,000 for the City.

The Facilities manager is reviewing all city owned assets (both real property and capital equipment) to determine if disposal should be pursued.

All city owned facilities are under review for energy savings, revenue generation from tenants, or possible liquidation.

Parks and Recreation
The City has contracted with two vendors who have shown the capacity to mow all of the city parks (64) multiple times at a rate that fits the current millage. The City is also actively seeking neighborhood groups and organizations who will adopt one or more of the City's parks, traffic triangles or medians.

Master Planning
The City of Flint continues to make significant progress on the preparation of the first comprehensive Master Plan since 1960. After culminating the data gathering phase of the master planning process, the planning team was able to release a summary of the findings in an Existing Conditions Report. This report has already proven extremely beneficial, assisting several community stakeholders in applying for grants and helping inform decisions around critical issues such as blight and demolition. In fact, the completed Housing Conditions Inventory included in the report was critical in helping the Genesee County Land Bank develop its successful application for $3.7 million in funding for demolition through the Michigan Blight Elimination Grant Program. This data is also being used to develop an application for Michigan's Hardest Hit Program.

After the Existing Conditions Report was finished, planning staff began work on the visioning phase of the master planning process. Prior to holding a large Vision and Goals Workshop, staff along with the Planning Commission, Steering

Committee, and six citizen advisory groups held a series of smaller community workshops involving nearly 700 participants (over 20% were under 18) to learn about the City's challenges and possible solutions. This input along with the data from the Existing Conditions Report was utilized to develop a discussion guide for the four-hour Vision and Goals Workshop held on March 9, 2013. At the workshop, nearly 500 stakeholders engaged in small group dialog, which was captured on laptop computers in real time. A team of community residents reviewed this input and lifted common themes from the small table discussions for participants to vote on using key-pad polling in order to build consensus. From the results of the March 9th Workshop, staff and the Planning Commission worked together to draft a vision statement and guiding principles, which were widely distributed for further comment before adoption at the end of April. Also during this time, staff worked with the Planning Commission and community to identify the eight subarea plans to be included in the Master Plan.

In May, the City began work on the actual drafting of the Master Plan. In collaboration with the Planning Commission, Steering Committee, and six citizen advisory groups (over 160 members), the goals and objectives of the Master Plan have begun to take shape. Through the development of the Master Plan, the planning team also has come to realize how important close coordination with the Flint Community Schools is. Thus, we have met with school leadership to finalize a Memorandum of Understanding in order to formalize joint planning efforts between City and School System, particularly around community facilities. In addition to our work on drafting the plan, we have started to focus on training the future leaders who will help implement the Master Plan. As a result, planning staff arranged a Zoning and Planning Essentials Workshop for forty-five community participants in early May and on May 23rd organized a tour of the City of Detroit and met with the Detroit Works Project to learn from their process.

More recently, the planning team has embarked on the development of a land use plan. Consequently, planning staff has organized the first land use workshops and worked with our consultants to develop an innovative 'Place Making' Toolkit comprised around eleven land use designations that will allow for new places like green neighborhoods and green production zones. This 'Place Making' Toolkit will encourage residents to redefine their neighborhoods and create a unique sense of place with distinctive characteristics, whether these areas are now dense with multi-family housing or less populated with single-family houses on large plots of land. The first Land Use Workshop was held on Saturday, June 22nd and involved over 160 residents in candid discussions about vacancy and realistic development patterns. Surprisingly, many residents favored pioneering land uses including a more radical mix of uses. The second workshop will be held on July 2nd and is expected to surpass the turnout of the first workshop. Thus far, the City continues to pursue an aggressive schedule for the Master Plan with anticipated approval by late Fall 2013.

A website, www.imagineflint.com, and a Facebook page, City of Flint Master Plan has been established to inform citizens about the planning process and to gather input.

Community and Economic Development
With the end of the Federal NSP program in sight, the City has begun evaluating the management needs of the department and what can be outsourced or become a shared service.

The Emergency Manager has challenged each department to complete the use of HUD, CDBG and/or other grant funds within the grant guideline spending period.

Collaborative economic development efforts are underway with the Flint & Genesee Chamber of Commerce to attract and retain businesses; and to receive and apply new tools such as the Next Michigan Development Corporation and Smart Zone designation. The City will continue to work with RACER Trust for brownfield development, including Buick City.

The City of Flint is challenged in its current financial condition to provide significant investment into job creation and Economic Development. However, the City has developed a unique and effective partnership with the Genesee Regional Chamber of Commerce (GRCC) which is the recognized economic development entity for Genesee County. The City receives specific community and economic development services from GRCC each year.

Blight Management Plan
The EM has determined that blight has become one of the primary issues facing the City of Flint. Blight is a continuum of problems from tall grass and weed control through abandoned, demolition ready property. The newly formed Department of Planning and Development is formulating a complete blight strategy.

The City's financial condition has resulted in the drastic reduction in the Building and Safety Inspections Division. All demolition work will now be the responsibility of the Genesee County Land Bank Authority. The City will also be hiring part-time Neighborhood Safety Officers, through a grant from the Mott Foundation, who will be assigned to issue citations for blight violations, including processing the impounding of abandoned vehicles, verifying current business licenses and identifying rental properties.

The Landbank in partnership with the City has recently received over $3.5 million from MSHDA for demolition of properties in three specific areas of the City. First, around Northwestern High School, second around Northern High School, and the third around the area of Diplomat Pharmacy and the International Academy of Flint.

The Landbank, again in partnership with the City of Flint is expected to receive Hardest Hit Federal Funds of $20 25 million for residential demolitions in Genesee County, primarily in the COF. This will be a significant milestone in the history of the City, affording it the opportunity to significantly improve the quality of life in the City's "tipping neighborhoods".

In May 2013 the City received a report from the Center for Community Progress entitled "City of Flint Vacant Property Maintenance Site Visit Report" which provided recommendations for the City and its partners to consider implementing. This, along with other reports including the City's developing Master Plan is leading to a defined "Blight Elimination Plan".

DCED currently has $400,000 in CDBG funding for mowing and trash removal. This is being supplemented with approximately $800,000 from the Landbank. Currently, the plan calls for mowing the vacant properties only one time this summer.

A Cities of Service grant for $25,000 was awarded to Flint this Spring for use for neighborhood clean-ups and tire collection. Twenty projects were funded and the tire collection resulted in 10,000 tires being removed from back yards, lots and parks.

A very positive development in the City has been the unsolicited efforts of private businesses and educational organizations planning large scale redevelopment projects, with the City and the Landbank, to improve areas surrounding their operations.

Golf Courses
All four of the city's golf courses were leased to private organizations. Two courses were operational summer 2012 and both have reopened for the summer of 2013.

Senior Centers
The Pierce Senior Center closed on April 30, 2012 as funding was no longer available. The City of Flint continued to explore its options with the two open Senior Centers: Brennen and Hasselbring. In June 2013 contracts were successfully negotiated with United Senior Network for the operation and sale of the Hasselbring Community Center, and with the Brennan Elm Park Senior Community Corporation for the operation of the Brennan Community Center. Planning is also underway for a third center in downtown in partnership with another vendor.

Smith Village Housing Development
The Smith Village housing project is funded primarily with HUD and NSP2 grants. Phase I, which includes 30 housing units, has been completed as scheduled. HUD has determined February 10, 2012 was the goal to expend 50%

of the allocation. The Smith Village housing project has met that development goal

On May 18, 2012, the City announced that Phase II of the Smith Village development will be undertaken by Ginosko Development Company and Rohde Construction Company. Ginosko's site plan was approved by the Flint Planning Commission on May 22, 2012.

Smith Village Phase II completed 14 homes by February 28, 2013. Nine homes built by the new developer were completed by March 30, 2013. Occupancy Permits have been received for homes in Phase I. Four of the completed homes have purchase agreements and fifteen mortgage closings are schedule to take place by June 30, 2013.

The contractor will complete three more homes in June 2013 which will bring the total completed to 42. As sale proceeds become available, up to an additional 5 units can be built.

U. S. Department of Housing and Urban Development Monitoring
After the February 2012 HUD monitoring of the HOME Program, The City of Flint received notice from HUD that it has capacity to run the HOME program.

In the City of Flint 2012 Single Audit, DCED had one finding related to the resolution of the OIG audit for 2010. In the 2011 Single Audit, under the previous administration, there were 8 findings.

In September 2012, HUD headquarters in Washington D.C. monitored the DCED ARRA Homeless Prevention and Rapid Rehousing Program and stated that the City of Flint established a comprehensive and well coordinated program for providing homelessness prevention assistance for its residents and that the City's HPRP Policies and Procedures Manual was well thought out.

In December 2012, HUD notified the City of Flint, in its Comprehensive Annual Performance and Evaluation Report (CAPER) that it met its timeliness ratio and expenditure requirement reaffirming their confidence in DCED's capacity to administer federal programs.

Real Estate Transactions
In August 2012 the City of Flint sold the Genesee Towers to Uptown Redevelopment Corporation for $1 and committed $880,000 CDBG dollars toward the over $4 million cost of demolition. Genesee Towers has been a liability for the City since December 2010 when the city assessed a one time millage to cover the $9.0 million judgment. The transaction has been finalized but demolition timeline is not completed.

A quit claim deed for Chevy-in-the-Hole site has been transacted between the EDC and the City of Flint. EPA money for clean up has been agreed upon.

Public Safety

A Police and Fire Protection Millage request for 6 mils for 5 years was placed on the November 2012 ballot and was approved by the electorate. This will begin the process of stabilizing both the Police and Fire Departments. The City hired eight additional police officers as a result. Millage dollars will be used to replace the expiring Mott foundation Community Policing Grant and part of the Federal SAFER firefighter grant.

A Public Safety Plan was introduced to the public on May 4, 2012. This plan addresses Police and Fire department organizational plan, operation of the lock-up, transition to 800 MHz communications system and the formation of the Criminal Justice System Advisory Council.

Efforts continue to restructure the Fire Department, 911 and emergency response operations to adjust to eliminated Federal and County revenue sources. Review options for shared services, station configurations, staffing levels, contract services and technology applications.

Police Department

In June 2012 the Police Department changed to a 12 hour shift operation within a four District Patrol plan. These changes, in combination with the expansion of alternative call response procedures (including the introduction of the on-line CopLogic reporting system); have resulted in the continuing reduction in response times to 9-1-1 calls.

In June 2012, the City received a 6 month grant renewal from the C. S. Mott Foundation for the Community Policing grant which has funded 10 officers and 1 sergeant. This grant was submitted in conjunction with the Michigan State University School of Criminal Justice Training and Technical Assistance team. The MSU team assists the City in implementing several phases of the Public Safety plan. In December 2012, the Mott Foundation extended this grant to the City for an additional 6 months which will provide funding through the end of the FY13 budget.

The City of Flint is continuing its existing collaborative efforts with regional partners. Examples: Flint Area Narcotics Unit, Safe Streets Task Force, and U.S. Attorney's Office Zero Tolerance gun violence reduction initiative, LifeLines (formerly known as CeaseFire), and other programs to help eliminate gang activity and prevent other violent acts.

The city continues to receive patrol assistance and detective assistance from Michigan State Police. Patrol assistance is a crime deterrent and increases traffic

safety compliance. The detective assistance has increased the capacity for investigations within the Flint Police Department.

Apply new technologies and information systems to improve police efficiencies and improve targeting and effectiveness including New World, CopLogic, and DDACTS.

Lock-up
The Public Safety Department recommended selection of the Genesee County Sheriff as the operator of the Flint lock-up. The lock-up opened the week of October 1, 2012.

In early 2013, use of the lock-up was made available to all Genesee County police agencies. The availability of the lock-up is credited with the clearance of over 1000 warrants per month in Genesee County. The State Legislature has approved funding for one more year of operation.

Fire Department
A protocol was finalized for the transition to the Genesee County Sheriff's Department to handle the paramedic calls in the City of Flint. This millage is now being managed only by Genesee County. Completion date was July 1, 2012.

The FEMA funded SAFER Grant which supports the wages and benefits of 39 firefighters was renewed on June 10, 2012 for two years. The new grant totaled $6.9 million. It is very rare that a city would be awarded a full funding request in back-to-back granting periods.

A Fire Chief was hired April 15, 2013 and he is currently in the process of restructuring the department.

9-1-1 Operation
The City completed change over to the 800 MHz communication system for the Police and Fire Departments before the December 31, 2012 required implementation date. The installation of a point to point microwave link with the Genesee County 9-1-1 Consortium tower system is being finalized in July 2013.

The Mott Foundation funded a study through the MSU Training and Technical Assistance Team to determine the costs and issues involved in pursuing a reconsolidation of the Flint 9-1-1 Center with the Genesee County 9-1-1 Consortium. Both EM's have stated their intentions to move toward reconsolidation. This intent was the basis of the C-GAP application to construct a simul-cast communications tower which will be integrated into the Consortium's tower system.

Priority List for the Continued Resolution of the Financial Emergency

- Increase Revenue: Income tax increase process
- Blight Elimination Plan: Major problem impacting the City as a whole
- 9-1-1 Reconsolidation: Results of the reconsolidation study need to be reviewed and pathway for action needs to be developed.
- KWA Implementation: Many steps remain including disposition of current pipeline sections, City Water Treatment Plant updates, interim water supply plan development, long term water supply back up plan.
- Unfunded OPEB Liability: outstanding lawsuits leave the City in an unknowable status; this could impact Audit standing and required funding, which is potentially ruinous to the budget.
- Capital Investment Needs: The extensive infrastructure of the City must be maintained in order for the City to continue to be functional. Current estimates of unfunded needed capital investment is over $300 million

Emergency Manager's Conclusions

Significant work has been accomplished to stabilize the financial situation of the City of Flint. The whole of the organization is being restructured to reflect a smaller, leaner government operation. Services which were routinely provided are being inspected to determine if they should continue and if so, in what format. Technology solutions are often implemented to increase efficiencies but these also result in reduced opportunities to speak to a real person.

The Emergency Manager acknowledges an on-going financial crisis. However, stable revenue is necessary in order for this city, and most other cities in Michigan, to continue to avoid a bankruptcy situation. We have asked our residents to accept a significant 6 mil Police and Fire Protection Millage; and they have done so. We have imposed a street lighting assessment, a waste collection fee and tremendous water and sewer rate increases. Our residents have not enjoyed increasing services, increasing property valuations or increasing employment opportunities.

As noted previously, there are very few additional revenue options. We are approaching the limit of the City's borrowing capability. Capital improvement funds are drained and the property tax millage rate in within .1 mil of maximum. State Revenue Sharing is now tied to EVIP and C-GAP competitive granting. We have made a request through our State Legislative representatives and the State Treasurer to push legislation to allow City voters the opportunity to decide to increase the income tax. This action could generate $7 million annually and would eliminate the City's structural deficit. A bill has been

introduced but will not be acted on before Fall 2013. Based on that, the earliest that a ballot proposal could come before the City of Flint residents would be February 2014.

In the meantime, Flint is still struggling with effects from increased expenses and reduced revenue from decisions outside our control. These include: yet another General Motors/Delphi closure impacting over 300 jobs, the unknown impact from the changes in personal property taxes, the $120,000 cost to hold the State Senate primary election, and the $575,000 required match for MDOT projects in FY14.

The City is also approaching the point of diminishing returns. There are only so many personnel reductions which can be made before there is no one left to manage the operation.

Yet, in light of all of these difficulties, we do not believe that bankruptcy is the best option for the City of Flint. Bankruptcy is expensive: on June 24, 2013 the *Detroit News online* reported that Kenneth Klee, a lawyer for Jefferson County Georgia, said that the County's bankruptcy costs would be about $1 million per month. Jefferson County, GA filed for bankruptcy in November 2011. Similar reports came from Vallejo, California. Bankruptcy could reduce or discharge the City's obligations for retiree healthcare. Whether or not pensions could be impacted is less clear. Both would probably not occur without significant litigation. The balance of the City's debt is actually debt to the State of Michigan, not to private creditors. We feel this is a very unacceptable choice in light of other alternatives that the City has identified, and we don't see that this benefits any entity. The City has to continue to operate even under receivership.

What we do need is a state-wide strategy to support Michigan's cities. Even in post bankruptcy, additional revenue sources will need to be developed for the City to survive.

Further, we do not recommend beginning the transition back to the Mayor/Council management of the City at this time. The City still has critical budgeting issues, there is tremendous work necessary on charter revisions and as yet the City Council has not taken any action to begin the governing education process required by the EM Order which partially restored their pay.

Another update of this report is expected to be presented in September 2013 as required by PA 436. Other updates may be provided as appropriate.

Respectfully submitted,

Edward Kurtz
Emergency Manager

Summary of Findings of the Flint Financial Review Team

Summary of Findings of the Flint Financial Review Team
November 2011

- The City has a general fund deficit of$14,621,546 as of June 30, 2010 which was not eliminated within the two year preceding period.

- The City previously submitted a five year deficit elimination plan for a cumulative general fund deficit of$7,046,820 as of June 30, 2008. However, by June 30, 2010 the cumulative general fund deficit had grown to $14,621,546. An updated plan submitted for 2010 does not purport to eliminate the cumulative deficit until 2030 and that relies upon the issuance of an additional $12 million of debt in 2013.

- A structural operating deficit existed in the general fund as of June 30, 2007, 2008, 2009, 2010 and the general fund is projected to have a $6,768,864 deficit as of June 30, 2011.

Setting a Sustainable Course for the City of Flint: Five Year Financial Plan 2014 -2018

Introduction

The City of Flint is currently in a financial emergency, placed in receivership by Governor Synder in December, 2011. The primary reasons for this action included a continuing structural deficit, continuing annual deficits, and unchecked legacy costs, all resulting in an accumulated deficit and marginal cash flow which placed the city in an inevitable position of financial insolvency. The details of the many reasons for this action are detailed by the report of the Financial Review Team which reviewed the City's finances and recommended the action ultimately undertaken by the Governor.

The environment in which Flint finds itself is not necessarily new or unique. For many years, Flint has faced the challenges of an older urban center – population loss; high rates of poverty and low rates of educational attainment; high crime, aged infrastructure; and high legacy costs. In addition, there are stagnant or declining revenue streams, including property and income tax revenue; state shared revenues; disappearing grant revenues; rapidly increasing health and pension costs; an increasing number of retirees; and a workforce already seriously reduced in response to previous financial challenges. This environment is not expected to significantly change in the foreseeable future.

Since the original appointment of an Emergency Manager, charged with addressing the situation, the statutes authorizing the Governor's action has changed three times. However, while the original Emergency Manager has changed as a result of the statute changes, the team in place at the beginning of 2012, including the original Emergency Manager, has remained largely intact. There has been much action focused on restoring the financial solvency of Flint and putting into place changes to assist the government to once again become a leader fostering the community of Flint to become an attractive place for residents, businesses, students, and visitors.

At the end of fiscal year 2012, (June 30, 2012), the City's General Fund faced an accumulated deficit of more than $19.1 million. The initial projections for the fiscal year 2013 budget (which began July 1, 2012), indicated a gap between revenues and expenses of more than $20 million, and as the budget preparation proceeded, it was clear that the actual gap was much larger. The consequences were hard decisions made to reduce the workforce by 20%, reduce employee compensation by 20% of wages, alter retiree health care, and both request and impose significant tax and fee increases on residents and businesses totaling nearly $20 million.

The result of these actions was a balanced budget in place on July 1, 2012. Eight months into the fiscal year, revenues and expenses remain balanced. With voter approval of a public safety millage, assistance from the state, and funds from several grant sources, public safety staffing has been stabilized for the time being, and the City is in the midst of creating a new Master Plan to guide the future development of the City.

The goal now has been to formally establish a new direction for the city government, looking forward for the next several years. To this end, a five year Strategic Plan for the City, accompanied by a financial plan, is being developed. The plan defines the key goals and objectives that the City intends to accomplish, framed in the context of conservatively projected revenues and expenses. Key goals include maintaining public safety; reducing the blight conditions prevalent throughout much of the city, providing other essential city services, and eliminating the accumulated deficit.

The development of the financial plan underpinning the Strategic Plan is the crucial component of the City's future financial viability. If one cannot see a clear path to financial solvency over the next five years, then the future is dim. And while there is little doubt that expenses cannot be reduced to meet revenues, the real question is whether or not the result equates even minimally to a viable city able to provide even the most basic of city services, let alone provide the support and leadership necessary for the Flint community to survive.

There are currently three sections to the plan and budget. The first is the most current draft of the Strategic Plan developed internally to guide the actions of city leaders for the next several years. The second section provides a five year overview of revenues and expenses and identifies the challenges the city currently identifies as impacting its future directions and capabilities. The third section details the preliminary FY 14 budget. While the FY14 budget as a financial document is nearly final, it is still necessary to finalize the specific objectives and measurements necessary to guide and measure implementation of the budget.

Once the review of the five year overlook is complete and the FY 14 budget is nearly complete, attention will then focus on development of the FY15 budget. Once that is complete --within the next several weeks, attention will be given to formulating financial plans for succeeding years while at the same time moving forward with adopting and implementing the FY14 budget.

FLINT STRATEGIC PLAN

2014 -2018

Setting a Sustainable Course for the City of Flint

FLINT STRATEGIC PLAN

2014 -2018

Setting a Sustainable Course for the City of Flint

The Vision for the City Government of Flint:

A well managed, financially stable, and accountable government focused on creating and maintaining a vibrant and growing community which will attract and retain residents, businesses, students, and visitors

The Mission of the City Government:

To assure that residents, businesses, students and visitors in the City of Flint receive municipal services in a customer friendly and financially responsible manner

The Goals:

In order to fulfill its Mission, the City government will assure that residents, businesses, students and visitors will:

Have a safe, secure, and healthy environment in which to live, work, learn and play

Have access to dependable and affordable water, sewer, and waste collection

Have access to an adequate and well maintained transportation network serving motorized, non-motorized, and pedestrian needs

Cooperate with business, non-profit, and foundation partners to create a climate that supports community and economic development

The City government will also:

Provide municipal services consistent with the City's Master Plan and also work with residents, businesses, and others to foster development of the City and its infrastructure in a manner consistent with its Master Plan

Encourage partnerships for recreation and access to open space across the City

Enforce building and occupancy codes and to aggressively work with others to address blighted conditions

Assure that City ordinances and regulatory activities are consistent with the Master plan and supportive of economic development

Operate in an open and financially sustainable manner, including improving citizen access, focusing on measurable results, improving the City's financial position, and eliminating accumulated deficits
